## PREFACE.

The Canada Year Book had its beginning in the first year of the Dominion, when the "Year Book and Almanac of British North America"—being (to quote its sub-title) "an Annual Register of political, vital and trade statistics, customs tariffs, excise and stamp duties, and all public events of interest in Upper and Lower Canada, New Brunswick, Nova Scotia, Prince Edward Island, Newfoundland, and West Indies"—was founded. Subsequently the title was changed to "The Year Book and Almanac of Canada,—an annual statistical abstract of the Dominion and a register of legislation and of public men in British North America". It was published annually from 1867 to 1879.

In 1886, after the passing of a general Statistics Act, the "Statistical Abstract and Record of Canada" was instituted as an official book of reference respecting the institutions, population, finance, trade and general conditions of the Dominion, "with comparative data for the United Kingdom, British Possessions and foreign countries". The work was prepared in the General Statistical Office of the Department of Agriculture, and was continued annually until 1904, under the direction of Dr. George Johnson, F.S.S. In 1905 the General Statistical Office was amalgamated with the Census Office (which was at the same time made a permanent organization), and the Year Book was remodelled by Dr. Archibald Blue, Chief Officer, and continued under the title "The Canada Year Book, Second Series".

In the reorganization and centralization of statistics which followed the report of the Royal Commission on Statistics of 1912, and the establishment of the Dominion Bureau of Statistics in 1918, the improvement of the Year Book, both in content and method of presentation, was made a primary object, and this progress has been continued down to the present time.

A prominent feature in past editions of the Year Book has been the inclusion from time to time of special articles dealing with some important phase of Canadian social, economic, intellectual or artistic life in considerable detail, but the pressure on the space of the present volume owing to the necessity of covering two years has prevented the inclusion of any special articles in this edition, although a list of special articles appearing in past editions is given on page vi of this Introduction immediately preceding the map.

Attention may be called to certain novel features of the present volume. There is included in Chapter I a brief description of Standard Time and Time Zones in Canada, which is of special interest to those who travel either in the flesh or by radio. There will also be found in Chapter III a discussion of the Representation Act of 1933 and a special table at page 82 showing the population of each of the new electoral districts which will return representatives to Parliament at the approaching general election. Probably the most extended presentation of the results of the Census of 1931 that will appear in the Year Book is to be found in Chapter IV, where Religions (Section 6) are cross-analysed by racial origin for the first time, and several new classifications are added to Section 7 dealing with Birth-places; the chapter closes with statistics of the areas and populations of countries of the British Empire for the years 1911, 1921 and 1931 and of the countries of the world for 1931. The Mines and Minerals Chapter, together with the discussion of the new discoveries in economic geology in Chapter I, will be of interest to those who are concerned with this rapidly-growing branch of our economic life. Again, attention may be directed to the improvement of the introduction to the External

Trade Chapter as well as to the final statistics of the Census of Distribution and Services of 1930, to which has been added a more summary treatment of retail trade based upon a 65 to 70 p.c. sample of all retail trade and covering the years 1931 to 1933. In the Labour and Wages Chapter may be noted the inclusion of tables showing both the occupational and the industrial distribution of the gainfully occupied population of the Dominion as in 1931. In the Public Finance Chapter appears, for the first time, a comparative analysis of provincial revenues, expenditures, assets and liabilities on the basis agreed upon at the Dominion-Provincial Conference of 1933; additional material regarding national income is also included in this chapter. The Currency and Banking Chapter includes a description of the new Bank of Canada and a classification of bank loans by industries and of deposits by amounts. Lastly, in the Miscellaneous Administration Chapter there appears a study of liquor control, liquor sales and revenues arising therefrom.

Throughout the volume tables and text alike have been revised so as to include the latest possible information appearing to the date of going to press. The Appendices include information on Immigration and Trade in the fiscal year 1934-35. All parts of the volume have been subjected to careful revision by the most competent authorities in each branch of our national activities.

The present volume has been edited by S. A. Cudmore, B.A. (Tor.), M.A. (Oxon.), F.S.S., F.R. Econ. Soc., assisted by A. E. Millward, B.A., B. Com., W. H. Lanceley, and R. F. Clarke, M.C., D.L.S., of the editorial staff of the General Statistics Branch of the Bureau. Grateful acknowledgments are hereby tendered to the numerous officials of the Dominion and Provincial Governments who have assisted in the collection of information. An effort has been made to apportion due credit to the various individuals and services concerned by means of footnotes to those chapters and sections which have been contributed, or in the compilation of which co-operation has been received.

While the greatest care has been taken in the preparation of the volume, there are doubtless imperfections and, with a view to the improvement of future editions, the Editor will be glad to hear of any errors which may have escaped his notice, and to receive any suggestions with regard to omissions or to method of treatment.

DOMINION BUREAU OF STATISTICS,  
OTTAWA, June 4, 1935.

R. H. COATS,  
Dominion Statistician.

## TABLE OF CONTENTS.

## Part V.—Canada and The League of Nations.....

95-97

# CHAPTER IV.—POPULATION.

|                                                                                                                                                                               |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>Census Statistics of General Population</i> .....                                                                                                               | 98-111  |
| 1. Population of Canada, by Provinces and Territories, in the Census Years 1871 to 1931.....                                                                                  | 99      |
| 2. Percentage Distribution of Canadian Population, by Provinces and Territories, 1871 to 1931.....                                                                            | 99      |
| 3. Population of Canada, by Provinces and Territories, in 1871 and 1931, Numerical Increase in each Decade from 1871 to 1931 and Total Increase.....                          | 99      |
| 4. Population of Canada, by Provinces and Territories, in 1871, and Increase Per Cent, by Decades, from 1871 to 1931.....                                                     | 100     |
| 5. Population of Canada, by Provinces and Counties, or Census Divisions, 1871-1931.....                                                                                       | 103-106 |
| 6. Area and Density of Population of Canada, by Provinces, 1901-31.....                                                                                                       | 108     |
| 7. Area and Density of Population, by Counties or Census Divisions, 1931.....                                                                                                 | 109-110 |
| 8. Movement of Population, Including Estimated Natural Increase, Recorded Immigration and Estimated Emigration for the Inter-Censal Periods 1901-11, 1911-21 and 1921-31..... | 111     |
| Section 2. <i>Sex Distribution</i> .....                                                                                                                                      | 111-113 |
| 9. Sex Distribution of the People of Canada, by Provinces, 1871-1931.....                                                                                                     | 112     |
| 10. Proportion of Sexes per 1,000 of Population in Canada, by Provinces, 1871-1931.....                                                                                       | 113     |
| 11. Masculinity of the Populations of Various Countries in Recent Years.....                                                                                                  | 113     |
| Section 3. <i>Conjugal Condition</i> .....                                                                                                                                    | 114-116 |
| 12. Conjugal Condition of the Population, by Numbers and Percentages, as Shown by the Censuses of 1871, 1881, 1891, 1901, 1911, 1921 and 1931.....                            | 114     |
| 13. Conjugal Condition of the People of Canada Classified as Single, Married, Widowed, Divorced, and Not Given, by Provinces and Sex, 1931.....                               | 115     |
| 14. Conjugal Condition of the People, 15 Years of Age and Over, 1931.....                                                                                                     | 115-116 |
| Section 4. <i>Age Distribution</i> .....                                                                                                                                      | 117-120 |
| 15. Proportion per 1,000 of the Population by Age Periods, 1871, 1881, 1891, 1901, 1911, 1921 and 1931.....                                                                   | 117     |
| 16. Proportion per 1,000 of the Population by Age Periods, by Provinces, 1931, with Totals for 1921.....                                                                      | 117     |
| 17. Male and Female Population of Canada, by Age Periods, 1881, 1891, 1901, 1911, 1921 and 1931.....                                                                          | 118     |
| 18. Quartile and Decile Ages of the Populations of Canada at each of the Decennial Censuses, by Sex, 1881-1931.....                                                           | 120     |
| Section 5. <i>Racial Origins</i> .....                                                                                                                                        | 120-124 |
| 19. Origins of the People According to the Censuses of 1871, 1881, 1901, 1911, 1921 and 1931.....                                                                             | 122     |
| 20. Percentage which the People of Each Origin Formed of the Total Population, According to the Censuses of 1871, 1881, 1901, 1911, 1921 and 1931.....                        | 123     |
| 21. Racial Origins of the Population, by Provinces and Territories, Census of 1931..                                                                                          | 124-125 |
| Section 6. <i>Religions</i> .....                                                                                                                                             | 124-131 |
| 22. Religions of the People at each Decennial Census, 1871-1931.....                                                                                                          | 126     |
| 23. Percentages of Specified Religions at each Decennial Census, 1871-1931.....                                                                                               | 127     |
| 24. Religions of the People, by Provinces, Census of 1931.....                                                                                                                | 128-129 |
| 25. Religions of the People Classified by Racial Origin, 1931.....                                                                                                            | 130-131 |
| Section 7. <i>Birthplaces</i> .....                                                                                                                                           | 131-140 |
| 26. Birthplaces of the Population of Canada, According to the Censuses of 1871-1931.....                                                                                      | 132     |
| 27. Population Classified by Sex and Nativity, by Provinces and Territories, 1931, with Totals for 1911 and 1921.....                                                         | 132     |
| 28. Birthplaces and Percentage Distributions of the Populations of Canada, Censuses 1911-31, together with Percentage Increase in each Decade, 1901-31.....                   | 133-134 |
| 29. Numbers and Percentages of the Canadian-Born Population Classified by Province of Residence, by Province of Birth, 1931.....                                              | 135     |
| 30. Population Classified by Nativity of Parents, by Provinces, 1931.....                                                                                                     | 136     |
| 31. Canadian-Born Population Classified According to Nativity of Parents, by Racial Origin, 1931.....                                                                         | 138-139 |
| 32. Population other than Canadian Born, Classified by Provinces, According to Year of Arrival in Canada, Rural and Urban, 1931.....                                          | 140     |
| Section 8. <i>Citizenship and Naturalization</i> .....                                                                                                                        | 141-144 |
| 33. Citizenship of Native-Born, British-Born, and Foreign-Born Residents in Canada in 1931, by Sex, According to Country of Allegiance.....                                   | 142-143 |
| 34. Numbers and Percentages of Naturalized and Alien Persons among the Foreign-Born Residents of Canada, by Countries of Birth, 1901, 1911, 1921 and 1931..                   | 144     |
| Section 9. <i>Language Spoken and Mother Tongue</i> .....                                                                                                                     | 145-146 |
| 35. Population of Canada Speaking One, Both or Neither of the Official Languages of Canada, Classified by Racial Origin, 1931.....                                            | 145     |
| 36. Mother Tongues of the Total Population of Canada, by Provinces, 1931.....                                                                                                 | 146     |

## CHAPTER IV.—POPULATION—concluded.

|                                                                                                                                                                   | PAGE.   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 10. <i>Rural and Urban Population</i> .....                                                                                                               | 146-157 |
| 37. Rural and Urban Populations, by Sex and by Provinces, 1921 and 1931.....                                                                                      | 147     |
| 38. Rural and Urban Populations, by Provinces and Territories, Decennial Censuses 1891-1931 and Numerical Increases 1921-1931.....                                | 149     |
| 39. Percentage Distribution of Rural and Urban Populations, by Provinces and Territories, 1891, 1901, 1911, 1921 and 1931.....                                    | 150     |
| 40. Urban Populations of Canada, Divided by Size of Municipality Groups, 1911, 1921 and 1931.....                                                                 | 150     |
| 41. Populations of Cities and Towns having over 5,000 Inhabitants in 1931, Compared with 1871-81-91-1901-11-21.....                                               | 151-153 |
| 42. Populations of Towns and Villages having between 1,000 and 5,000 Inhabitants in 1931, Compared with 1901, 1911 and 1921.....                                  | 153-156 |
| 43. Rural and Urban Farms, Farm Populations and Average Numbers of Persons per Farm, by Provinces, 1931.....                                                      | 156     |
| Section 11. <i>Literacy</i> .....                                                                                                                                 | 157-160 |
| 44. Ability to Read and Write of the Population 5 Years of Age and Over, by Provinces, for each Census Year 1901-31.....                                          | 157-158 |
| 45. Literacy of the Population of 10 Years of Age and Over, by Sexes and Provinces, 1931.....                                                                     | 159     |
| 46. Literacy of the Populations of 10 Years of Age and Over in Cities and Towns of 30,000 and Over, by Numbers and Percentages, 1931.....                         | 160     |
| Section 12. <i>School Attendance</i> .....                                                                                                                        | 161-163 |
| 47. Numerical and Percentage Distributions of School Attendance of the Population 5-19 Years of Age Inclusive, by Sexes, for all Canada, 1911, 1921 and 1931..... | 161-162 |
| 48. Total Rural and Urban Populations of All Ages Attending School, by Sex, 1931.....                                                                             | 162     |
| 49. Numerical and Percentage Distributions of the School Attendance of the Population of Canada, 7-14 Years of Age, by Nativity and Sex, 1931.....                | 163     |
| Section 13. <i>Annual Estimates of Population</i> .....                                                                                                           | 163-164 |
| 50. Estimates of the Populations of Canada for Inter-Censal Years, by Provinces, 1867-1934.....                                                                   | 164     |
| Section 14. <i>Area and Population of the British Empire</i> .....                                                                                                | 165-167 |
| 51. Area and Population of the British Empire, by Continents and Countries, 1911, 1921 and 1931.....                                                              | 165-167 |
| Section 15. <i>Area and Population of the World</i> .....                                                                                                         | 168-169 |
| 52. Area and Population of the World, by Continents and Countries, 1931.....                                                                                      | 168-169 |

## CHAPTER V.—VITAL STATISTICS.

|                                                                                                                                                                       |         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>Natural Increase</i> .....                                                                                                                              | 172-176 |
| 1. Summary of Births, Marriages, Deaths and Natural Increase, by Provinces, for the calendar years 1931-33, with Averages 1921-25 and 1926-30.....                    | 174     |
| 2. Summary of Births, Marriages, Deaths and Natural Increase, in Cities and Towns of 10,000 Population and Over, 1931-32.....                                         | 175-176 |
| 3. Births, Deaths and Natural Increase in Canada, by Provinces and for each Sex, with Totals, 1931-33 and Average 1926-30.....                                        | 176     |
| Section 2. <i>Births</i> .....                                                                                                                                        | 177-186 |
| 4. Numbers of Live Births and Birth Rates, by Provinces, 1931-33, with Averages, 1921-25 and 1926-30.....                                                             | 177     |
| 5. Live Births in Cities and Towns of 10,000 Population and Over, 1929-33.....                                                                                        | 178     |
| 6. Percentages of Legitimate Children Born Alive to Canadian-Born, British-Born or Foreign-Born Mothers, by Provinces, 1931-32.....                                   | 179     |
| 7. Births (Exclusive of Stillbirths) by Sex, and Ratio of Males to Females, for Canada and by Provinces, 1931-33, with Averages for 1921-25 and 1926-30.....          | 180     |
| 8. Quartile and Decile Ages of Married Fathers and Mothers, in Canada, 1926, 1930-32.....                                                                             | 181     |
| 9. Numbers and Percentages of Births (Exclusive of Stillbirths) in Canada to Fathers and Mothers Born in Specified Countries, 1931.....                               | 182     |
| 9A. Numbers and Percentages of Births (Exclusive of Stillbirths) in Canada to Fathers and Mothers Born in Specified Countries, 1932.....                              | 182     |
| 10. Numbers and Percentages of Births (Exclusive of Stillbirths) in Canada to Fathers and Mothers of Specified Origins, 1931.....                                     | 183     |
| 10A. Numbers and Percentages of Births (Exclusive of Stillbirths) in Canada to Fathers and Mothers of Specified Origins, 1932.....                                    | 184     |
| 11. Numbers of Illegitimate Births, Classified by Age of Mother, with the Percentages to Total Live Births, by Provinces, 1931 and 1932, with Totals for 1931-33..... | 184-185 |
| 12. Stillbirths by Age of Mother and Legitimacy of Child in 1931 and 1932, with Totals for 1931-33.....                                                               | 185     |
| 13. Crude Birth Rates of Various Countries in Recent Years.....                                                                                                       | 186     |
| Section 3. <i>Marriages and Divorces</i> .....                                                                                                                        | 186-191 |
| Subsection 1. <i>Marriages</i> .....                                                                                                                                  | 186-190 |
| 14. Numbers of Marriages and Marriage Rates, by Provinces, 1931-33 with Averages for 1921-25 and 1926-30.....                                                         | 187     |
| 15. Differences in Ages of Bridegrooms and Brides, 1931 and 1932.....                                                                                                 | 187     |
| 16. Average Ages of Parties Contracting Marriages, by Provinces, 1931 and 1932.....                                                                                   | 188     |
| 17. Nativity of Persons Married in Canada, by Provinces, 1931 and 1932 with Averages for 1921-25 and 1926-30.....                                                     | 189     |
| 18. Crude Marriage Rates of Various Countries in Recent Years.....                                                                                                    | 190     |
| Subsection 2. <i>Divorces</i> .....                                                                                                                                   | 190-191 |
| 19. Statistics of Divorces Granted in Canada, 1911-33.....                                                                                                            | 191     |

## CHAPTER V.—VITAL STATISTICS—concluded.

|                                                                                                                                                                                 | PAGE.   |

| Section 1. <i>Deaths</i> .....                                                                                                                                                  | 191-210 |
| Subsection 1. General Mortality.....                                                                                                                                            | 192-201 |
| 20. Deaths and Death Rates, by Provinces, 1931-33, with Averages 1921-25 and 1926-30.....                                                                                       | 192     |
| 21. Distribution of Deaths in Canada by Sex and Certain Age Groups, Numbers and Percentages, 1931-32.....                                                                       | 193     |
| 22. Quartile and Decile Ages of Decedents, by Sex, 1926, 1931 and 1932.....                                                                                                     | 194     |
| 23. Crude and Adjusted Death Rates in Canada, by Provinces, 1921-32.....                                                                                                        | 195-196 |
| 24. Deaths in Canada, by Principal Causes, 1928-33.....                                                                                                                         | 197     |
| 25. Death Rates per 100,000 Population in Canada, by Principal Causes, 1928-33.....                                                                                             | 197-199 |
| 26. Total Deaths (Exclusive of Stillbirths) in Cities and Towns of 10,000 Population and Over, 1929-33.....                                                                     | 199-200 |
| 27. Crude Death Rates of Various Countries in Recent Years.....                                                                                                                 | 201     |
| Subsection 2. Infantile and Maternal Mortality.....                                                                                                                             | 201-210 |
| 28. Infantile Mortality, by Provinces, together with the Rate per 1,000 Live Births, 1931-33 with Averages for 1921-25 and 1926-30.....                                         | 202     |
| 29. Infantile Mortality in Canada by Principal Causes of Death, 1926, 1931-33.....                                                                                              | 202-203 |
| 30. Proportion per 1,000 Deaths of Infants under 1 Year of Age Occurring at each Age Period, 1931-32.....                                                                       | 204     |
| 31. Deaths and Death Rates of Children Under One Year of Age (Exclusive of Stillbirths) in Cities and Towns of 10,000 and Over, 1930-33.....                                    | 205     |
| 32. Infantile Mortality per 1,000 Live Births in Various Countries of the World and Provinces of Canada in Recent Years.....                                                    | 206     |
| 33. Infantile Mortality per 1,000 Live Births in Great Cities of the World in 1932 or the Most Recent Year.....                                                                 | 207     |
| 34. Maternal Deaths in Canada, by Age Groups, with Rates per 1,000 Live Births, 1928-32.....                                                                                    | 208     |
| 35. Maternal Deaths in each Province, by Age Groups, 1932 and 1933, with Totals and Rates per 1,000 Live Births for 1931-33 and Five-Year Averages for 1921-25 and 1926-30..... | 208-209 |
| 36. Maternal Deaths in each Province, by Causes of Death, 1932.....                                                                                                             | 209     |
| 36A. Maternal Deaths in each Province, by Causes of Death, 1933.....                                                                                                            | 210     |

## CHAPTER VI.—IMMIGRATION AND COLONIZATION.

|                                                                                                                                                                                            |         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>Statistics of Immigration</i> .....                                                                                                                                          | 211-228 |
| 1. Number of Immigrants Settling in Canada in each of the calendar years 1867-80.....                                                                                                      | 212     |
| 2. Number of Immigrant Arrivals in Canada from the United Kingdom, the United States and other Countries, calendar or fiscal years ended 1881-1934.....                                    | 213     |
| 3. Sex and Conjugal Condition of Immigrants into Canada, by Age Groups, fiscal years ended Mar. 31, 1933 and 1934.....                                                                     | 213-214 |
| 4. Sex Distribution of Immigrants as Adult Males, Adult Females and Children, fiscal years ended Mar. 31, 1911-34.....                                                                     | 214     |
| 5. Racial Origins of Immigrants into Canada, fiscal years ended Mar. 31, 1923-34.....                                                                                                      | 215     |
| 6. Languages of Immigrants Ten Years of Age and Over, fiscal years ended Mar. 31, 1928-34.....                                                                                             | 216     |
| 7. Nationalities of Immigrants, fiscal years ended Mar. 31, 1929-34.....                                                                                                                   | 217     |
| 8. Countries of Birth of Immigrants, fiscal years ended Mar. 31, 1929-34.....                                                                                                              | 218     |
| 9. Immigrants Arriving in Canada, by Chief Ports of Arrival, fiscal years ended Mar. 31, 1928-34.....                                                                                      | 219     |
| 10. Destinations of Immigrants into Canada, by Provinces, fiscal years ended June 30, 1901-06, and Mar. 31, 1907-34.....                                                                   | 219-220 |
| 11. Occupations and Destinations of Immigrants Arriving in Canada, fiscal years ended Mar. 31, 1933 and 1934.....                                                                          | 220-221 |
| 12. Rejections of Immigrants upon Arrival at Ocean Ports, by Principal Causes and Nationalities, fiscal years ended 1923-34, with Totals 1903-22 and 1903-34.....                          | 222     |
| 13. Deportations of Immigrants after Admission, by Principal Causes and by Nationalities, fiscal years ended 1923-34, with Totals 1903-22 and 1903-34.....                                 | 223     |
| 14. British Juvenile Immigrants, fiscal years ended 1901-34.....                                                                                                                           | 223     |
| 15. Record of Oriental Immigrants, fiscal years ended 1901-34.....                                                                                                                         | 224     |
| 16. Record of Chinese Immigrants, fiscal years ended Mar. 31, 1912-34, with Totals 1886-1900 and 1901-11.....                                                                              | 225     |
| 17. Expenditures on Immigration in the fiscal years ended June 30, 1868-1906 and Mar. 31, 1907-34.....                                                                                     | 226     |
| 18. Canadians Returned from the United States, fiscal years ended Mar. 31, 1925-34.....                                                                                                    | 227     |
| 19. Returning Canadians and Other Non-Immigrants entering Canada via Ocean Ports, by Class of Travel, fiscal years ended Mar. 31, 1933 and 1934, with Totals for fiscal years 1926-32..... | 228     |
| Section 2. <i>Colonization Activities</i> .....                                                                                                                                            | 228-229 |

## CHAPTER VII.—SURVEY OF PRODUCTION.

|                                                                                                          |         |
|----------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>The Leading Branches of Production in 1933</i> .....                                       | 232-234 |
| 1. Gross and Net Values of Production in Canada, by Industries, 1928-32.....                             | 233     |
| 2. Detailed Itemized Statement of the Net Values of Production in Canada during 1930, 1931 and 1932..... | 234     |
| Section 2. <i>The Provincial Distribution of Production</i> .....                                        | 235-236 |
| 3. Gross and Net Values of Production in Canada, by Provinces, 1928-32.....                              | 236     |
| Section 3. <i>Leading Branches of Production in each Province, 1932</i> .....                            | 236-241 |
| 4. Gross and Net Values of Production in Canada, by Industries and Provinces, 1932.....                  | 238-239 |

**CHAPTER VII.—SURVEY OF PRODUCTION—concluded.**

|                                                                                                                       | Page.   |
|-----------------------------------------------------------------------------------------------------------------------|---------|
| 4A. Gross and Net Values of Production in Canada, by Industries and Provinces, 1931                                   | 239-240 |
| 5. Percentage of the Value of the Net Production in each Industry to the Total Net Production of each Province, 1932  | 240-241 |
| 5A. Percentage of the Value of the Net Production in each Industry to the Total Net Production of each Province, 1931 | 241     |

**CHAPTER VIII.—AGRICULTURE.**

|                                                                                                                                                  |         |
|--------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>The Government in Relation to Agriculture</i>                                                                                      | 242-252 |
| Subsection 1. The Dominion Department of Agriculture                                                                                             | 242-244 |
| Subsection 2. Provincial Departments of Agriculture                                                                                              | 244-246 |
| Subsection 3. Dominion and Provincial Agricultural Experimental Stations                                                                         | 246-252 |
| (A) Dominion Experimental Farms and Stations                                                                                                     | 247-252 |
| (B) Provincial Agricultural Colleges and Experimental Stations                                                                                   | 252     |
| Section 2. <i>Statistics of Agriculture</i>                                                                                                      | 253-310 |
| Subsection 1. Agricultural Revenue and Wealth                                                                                                    | 254-257 |
| 1. Estimated Gross Annual Agricultural Revenue of Canada, Itemized by Provinces, 1929-33                                                         | 254-256 |
| 2. Estimated Gross Agricultural Wealth of Canada, by Provinces, 1933                                                                             | 256     |
| Subsection 2. Acreages, Yields and Values of Field Crops                                                                                         | 257-270 |
| 3. Acreages, Yields and Values of Principal Crops Grown in Canada, 1925-34                                                                       | 257-259 |
| 4. Total Acreages and Values of Field Crops in Canada, by Provinces, 1929-34                                                                     | 259     |
| 5. Field Crops of Canada, Compared as to Quantity and Value, 1933 and 1934                                                                       | 260     |
| 6. Acreages, Yields and Values of Principal Field Crops of Canada, Itemized by Provinces, 1933 and 1934                                          | 260-266 |
| 7. Estimated Acreages under Pasture in Canada, 1928-34                                                                                           | 266     |
| 8. Annual Average Yields per Acre of Field Crops for Canada, 1927-34, with Long-Time Averages                                                    | 267     |
| 9. Areas and Yields of Wheat, Oats, Barley, Rye and Flaxseed in the Prairie Provinces, 1932-34                                                   | 268     |
| 10. Stocks of Grain in Farmers' Hands on July 31, 1934, as Compared with July 31, 1933 and 1932, with Totals of Production of the Previous Crops | 268     |
| 11. Detailed Stocks of Grain in Canada on July 31, 1932, 1933 and 1934                                                                           | 269     |
| 12. Distribution of the Canadian Wheat Crops, by crop years, 1932-33 and 1933-34                                                                 | 269     |
| 13. Distribution of the Canadian Oat Crops, by crop years, 1932-33 and 1933-34                                                                   | 270     |
| Subsection 3. Farm Live Stock and Poultry                                                                                                        | 270-274 |
| 14. Summary Statistics of the Numbers of Live Stock and Poultry on Farms in the Dominion of Canada, Censuses of 1871-1931                        | 270     |
| 15. Estimated Numbers and Values of Farm Live Stock in Canada, by Provinces, 1931-34                                                             | 271-272 |
| 16. Average Values per Head of Farm Live Stock in Canada, as Estimated by Crop Correspondents, 1925-34                                           | 272-273 |
| 17. Estimated Numbers and Values of Farm Poultry in Canada, 1933 and 1934                                                                        | 273-274 |
| 18. Estimated Quantities and Values of Canadian Wool Clip, 1915-34                                                                               | 274     |
| Subsection 4. Dairying Statistics—See Appendix II, pp. 1210-1212                                                                                 |         |
| Subsection 5. Fur Farming                                                                                                                        | 275-278 |
| 19. Numbers of Fur-Bearing Animals on Fur Farms in Canada at Dec. 31, 1925-33                                                                    | 276     |
| 20. Values of Fur-Bearing Animals on Fur Farms in Canada, at Dec. 31, 1925-33                                                                    | 276     |
| 21. Values of Fur-Bearing Animals Sold from Fur Farms in Canada, 1925-33                                                                         | 277     |
| 22. Values of Pelts Sold from Fur Farms in Canada, 1925-33                                                                                       | 277     |
| 23. Numbers of Fur Farms, Values of Land and Buildings and Values of Fur-Bearing Animals, by Provinces, 1931-33                                  | 278     |
| Subsection 6. Horticulture                                                                                                                       | 278-282 |
| 24. Fruit Trees, of Bearing Age and not of Bearing Age, and Acreages of Fruit in Canada, 1911, 1921 and 1931                                     | 279     |
| 25. Numbers of Farms in Canada Reporting Orchards, According to Size of Farm and Number of Trees Reported, 1931                                  | 279     |
| 26. Quantities and Values of the Production of Tree Fruits and Small Fruits in Canada, 1910, 1920 and 1930                                       | 280     |
| 27. Areas, Quantities and Values of Vegetables Produced for Sale on Farms in Canada, 1920 and 1930                                               | 281     |
| 28. Estimated Quantities and Values of Commercial Fruit Production in Canada, 1932-33                                                            | 281     |
| 29. Numbers and Values of Fruit Trees, Bushes and Plants, Sold by Nurserymen in Canada, years ended May 31, 1930-33                              | 282     |
| 30. Quantities and Values of Floricultural and Decorative Plants Grown in Canada and Sold during the year ended May 31, 1933                     | 282     |
| Subsection 7. Special Agricultural Crops                                                                                                         | 282-285 |
| 31. Estimated Quantities and Values of Maple Sugar and Maple Syrup Produced in Canada, by Provinces, 1932-34                                     | 283     |
| 32. Acreages, Yields and Values of Sugar Beets in Canada and Quantities of Refined Beetroot Sugar Produced, 1924-33                              | 283     |
| 33. Acreages and Yields of Tobacco in Canada, by Provinces, 1900, 1910, 1911 and 1920-33                                                         | 284     |
| 34. Acreages, Yields and Values of Flax Fibre, etc., in Canada, 1915-34                                                                          | 284     |
| 35. Numbers of Hives of Bees and Quantities and Values of Honey Produced in Canada, as Recorded at the Censuses of 1921 and 1931                 | 285     |
| Subsection 8. Farm Labour and Wages                                                                                                              | 286-287 |
| 36. Average Wages and Board of Farm Help in Canada, as Estimated by Crop Correspondents, 1914, 1920, 1930 and 1932-34                            | 286-287 |

## CHAPTER VIII.—AGRICULTURE—concluded.

|                                                                                                                                                                                                                                                             | PAGE.   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Subsection 9. Prices of Agricultural Produce.....                                                                                                                                                                                                           | 287-295 |
| 37. Monthly Average Cash Prices per Bushel at Winnipeg of Representative Grades of Canadian Wheat, Oats, Barley, Flax and Rye—basis, in store at Fort William and Port Arthur—1933-34, and Yearly Average Prices for crop years ended July 31, 1926-34..... | 288     |
| 38. Yearly Average Prices of Home-Grown Wheat, Barley and Oats in England and Wales, 1902-34.....                                                                                                                                                           | 288     |
| 39. Monthly Average Prices of Flour, Bran and Shorts at Principal Markets, 1933 and 1934.....                                                                                                                                                               | 289     |
| 40. Yearly Average Prices per Cwt. of Canadian Live Stock at Principal Markets, 1932 and 1933.....                                                                                                                                                          | 290     |
| 41. Monthly Average Prices per Cwt. of Canadian Live Stock at Principal Markets, 1933.....                                                                                                                                                                  | 291     |
| 41A. Monthly Average Prices per Cwt. of Canadian Live Stock at Principal Markets, 1934.....                                                                                                                                                                 | 292     |
| 42. Index Numbers of Producers' Prices of Agricultural Commodities, for Canada, 1913-34.....                                                                                                                                                                | 294     |
| Subsection 10. Agricultural Statistics of the Census.....                                                                                                                                                                                                   | 295-301 |
| 43. Tenure of Farms by Numbers and Areas, Farm Values, Mortgages and Indebtedness and Farm Expenditures, by Provinces, Census of 1931.....                                                                                                                  | 296-297 |
| 44. Farm Population, Workers, Weeks of Hired Labour and Cost of Labour, by Provinces, Census of 1931.....                                                                                                                                                   | 299     |
| 45. Farm Machinery, Facilities, Kinds of Road and Distances to Market Town and Railway Station, by Provinces, 1931.....                                                                                                                                     | 301     |
| Subsection 11. Miscellaneous Agricultural Statistics.....                                                                                                                                                                                                   | 302-303 |
| 46. Major Irrigation Projects in Southern Alberta, 1932 and 1933.....                                                                                                                                                                                       | 302     |
| 47. Average Values per Acre of Occupied Farm Lands in Canada, as Estimated by Crop Correspondents, 1910 and 1917-34.....                                                                                                                                    | 303     |
| Subsection 12. International Agricultural Statistics.....                                                                                                                                                                                                   | 303-310 |
| 48. Acreages and Yields of Cereals and Potatoes in Countries of the World, 1933 and 1934, with Five-Year Average for 1928-32.....                                                                                                                           | 304-308 |
| 49. Exports of Wheat and Flour from the Principal Wheat-Exporting Countries and Imports of Wheat and Flour into the Principal Wheat-Importing Countries, crop years ended July 31, 1933 and 1934.....                                                       | 309     |
| 50. Numbers of Live Stock in Principal Countries, circa 1932.....                                                                                                                                                                                           | 309-310 |

## CHAPTER IX.—FORESTRY.

|                                                                                                                                                 |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>Physiography, Geology and Climate as Affecting the Forests</i> .....                                                              | 311-313 |
| Section 2. <i>Main Types of Forest Growth</i> .....                                                                                             | 314-316 |
| Section 3. <i>Important Tree Species</i> .....                                                                                                  | 316     |
| Section 4. <i>Forest Resources</i> .....                                                                                                        | 317-319 |
| 1. Estimate of Total Accessible Stand of Timber in Canada, by Regions and Classes, with Estimate of Grand Total Stand, 1933.....                | 319     |
| Section 5. <i>Forest Administration</i> .....                                                                                                   | 319-325 |
| Subsection 1. Administration of Dominion and Provincial Timber Lands.....                                                                       | 319-321 |
| Subsection 2. Forest Fire Protection.....                                                                                                       | 321-323 |
| Subsection 3. Scientific Forestry.....                                                                                                          | 323-325 |
| Section 6. <i>Forest Utilization</i> .....                                                                                                      | 325-342 |
| Subsection 1. Woods operations.....                                                                                                             | 326-328 |
| 2. Values of Woods Operations, by Products, 1928-32.....                                                                                        | 327     |
| 3. Quantities of Wood Cut in Woods Operations in Canada, Equivalents in Standing Timber and Total Values, by Chief Products, 1931 and 1932..... | 327-328 |
| 4. Equivalent Volumes of Standing Timber Cut in Canada and Values of Products of Woods Operations, by Provinces, 1931 and 1932.....             | 328     |
| Subsection 2. The Pulp and Paper Industry.....                                                                                                  | 328-337 |
| 5. Production, Consumption, Exports and Imports of Pulpwood, calendar years 1920-33.....                                                        | 329     |
| 6. Pulp Production, Mechanical and Chemical, calendar years 1920-33.....                                                                        | 330     |
| 7. Production of Wood-Pulp in Canada, by Chief Producing Provinces, 1928-33.....                                                                | 332     |
| 8. Exports of Wood-Pulp from Principal Wood-Pulp Producing Countries of the World, calendar years 1913, 1932 and 1933.....                      | 332     |
| 9. Summary of Paper Production in Canada, calendar years 1917-33.....                                                                           | 334     |
| 10. Production of Paper in Canada, by Provinces, 1933.....                                                                                      | 335     |
| 11. Estimated Quantities of Newsprint Produced in Leading Countries, 1932 and 1933, and the Five-Year Averages, 1929-33.....                    | 335     |
| 12. Exports of Newsprint Paper from Principal Paper-Producing Countries of the World, 1913, 1931, 1932 and 1933.....                            | 336     |
| Subsection 3. The Lumber Industry.....                                                                                                          | 337-339 |
| 13. Quantities and Values of Lumber, Lath, and Shingles Produced in Canada, calendar years 1920-33.....                                         | 338     |
| 14. Quantities and Values of Lumber and Values of Other and All Sawmill Products made in Canada, by Provinces, 1932 and 1933.....               | 338     |
| 15. Exports of Planks, Boards and Square Timber, by Importing Countries, calendar years 1931-34.....                                            | 339     |
| Subsection 4. Summary of Primary Forest Production.....                                                                                         | 340     |
| Subsection 5. Other Forest Industries.....                                                                                                      | 340     |
| Subsection 6. Manufactures of Wood and Paper.....                                                                                               | 340-341 |
| Subsection 7. Forest Depletion and Increment.....                                                                                               | 341-342 |

## CHAPTER X.—THE FUR TRADE.

|                                                                                                                                             | PAGE. |
|---------------------------------------------------------------------------------------------------------------------------------------------|-------|
| 1. Summary of the Numbers and Values of Pelts of Fur-Bearing Animals Taken in Canada, years ended June 30, 1920-33.....                     | 346   |
| 2. Numbers and Values of Pelts of Fur-Bearing Animals Taken in Canada, years ended June 30, 1932 and 1933.....                              | 346   |
| 3. Kinds, Numbers, Total Values and Average Values of Pelts of Fur-Bearing Animals Taken in Canada, years ended June 30, 1932 and 1933..... | 347   |

## CHAPTER XI.—THE FISHERIES.

|                                                                                                                                                                                 |         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>The Early Fisheries</i> .....                                                                                                                                     | 348     |
| Section 2. <i>The Canadian Fishing Grounds</i> .....                                                                                                                            | 348-350 |
| Section 3. <i>The Government and the Fisheries</i> .....                                                                                                                        | 350-354 |
| 1. Government Bounties Paid to Fishermen for the calendar years 1930-33.....                                                                                                    | 353     |
| Section 4. <i>The Modern Fishing Industry</i> .....                                                                                                                             | 354-366 |
| 2. Total Values of Products of the Fisheries of Canada, 1870-1933.....                                                                                                          | 355     |
| 3. Total Values of the Products of the Fisheries, by Provinces, calendar years 1928-33.....                                                                                     | 355     |
| 4. Quantities and Values of the Chief Commercial Fishes, calendar years 1929-33.....                                                                                            | 356     |
| 5. Yields of the Fisheries of Canada, Compared as to Quantity and Value, for 1931 and 1932.....                                                                                 | 357     |
| 5A. Yields of the Fisheries of Canada, Compared as to Quantity and Value, for 1932 and 1933.....                                                                                | 358     |
| 6. Quantities and Values of Sea Fish and Products Marketed, calendar years 1932 and 1933.....                                                                                   | 359-360 |
| 7. Quantities and Values of Inland Fish Marketed, calendar years 1932 and 1933.....                                                                                             | 361     |
| 8. Numbers of Fish-Canning and -Curing Establishments, by Provinces, 1932 and 1933.....                                                                                         | 361     |
| 9. Values of Materials Used and of Products of Fish-Canning and -Curing Establishments, 1929-33.....                                                                            | 362     |
| 10. Numbers and Capital Values of Fishing Vessels, Boats, Nets, Traps, etc., Used in the Fisheries of Canada, and of Establishments Processing the Products, 1932 and 1933..... | 362-363 |
| 11. Numbers of Persons Employed in the Fisheries of Canada and in Processing Establishments Connected Therewith, 1931-33.....                                                   | 363     |
| 12. Employees and Salaries and Wages in Fish-Canning and -Curing Establishments, 1929-33.....                                                                                   | 364     |
| 13. Values of Exports and Imports of Fish and Fish Products, fiscal years 1902-34.....                                                                                          | 364     |
| 14. Exports of the Fisheries, the Produce of Canada, by Principal Countries, calendar years 1932 and 1933.....                                                                  | 365     |
| 15. Exports of the Fisheries of Canada, by Quantities and Values, calendar years 1931-33.....                                                                                   | 365-366 |

## CHAPTER XII.—MINES AND MINERALS.

|                                                                                                                                      |         |
|--------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>Mineral Lands Administration and Mining Laws</i> .....                                                                 | 369-374 |
| Subsection 1. Dominion Mining Laws and Regulations.....                                                                              | 369-370 |
| Subsection 2. Provincial Mining Laws and Regulations.....                                                                            | 370-374 |
| Section 2. <i>Summary of General Production</i> .....                                                                                | 374-388 |
| Subsection 1. General Statistics of Mineral Production.....                                                                          | 375-381 |
| 1. Value of Mineral Production in Canada, calendar years 1880-1934.....                                                              | 375     |
| 2. Mineral Production of Canada, calendar years 1932 and 1933.....                                                                   | 376-377 |
| 2A. Mineral Production of Canada, calendar year 1934.....                                                                            | 378     |
| 3. Mineral Production of Canada, Compared as to Quantity and Value, calendar years 1932 and 1933.....                                | 380-381 |
| Subsection 2. Provincial Distribution of Mineral Production.....                                                                     | 381-388 |
| 4. Mineral Production of Canada, by Provinces, calendar years 1911-34.....                                                           | 382     |
| 5. Mineral Production of Canada, by Provinces, calendar year 1932.....                                                               | 382-385 |
| 5A. Mineral Production of Canada, by Provinces, calendar year 1933.....                                                              | 385-388 |
| Section 3. <i>Industrial Statistics of Mines and Minerals—Capital, Labour, Wages, etc., in Principal Industries</i> .....            | 388-394 |
| 6. Summary of the Principal Statistics of the Mineral Industries in Canada, by Groups, 1921-33, and by Provinces, 1932 and 1933..... | 391-392 |
| 7. Summary of the Principal Statistics of the Mineral Industries of Canada, by Industries, 1932 and 1933.....                        | 393-394 |
| Section 4. <i>Production of Metallic Minerals</i> .....                                                                              | 395-412 |
| Subsection 1. Gold.....                                                                                                              | 395-400 |
| 8. Quantities of Gold Produced in Canada, by Provinces, calendar years 1911-34.....                                                  | 397     |
| 9. Values of Gold Produced in Canada, by Provinces, calendar years 1911-34.....                                                      | 398     |
| 10. Quantities and Values of World Production of Gold, 1891-1933.....                                                                | 399     |
| 11. Quantities and Values of the World Production of Gold and Silver, by Countries, calendar years 1932 and 1933.....                | 399-400 |
| Subsection 2. Silver.....                                                                                                            | 401-404 |
| 12. Quantities and Values of Silver Produced in Canada during the calendar years 1911-34.....                                        | 402     |
| 13. Quantities and Values of Silver Produced in Canada, by Provinces, during the calendar years 1911-34.....                         | 402     |
| 14. Quantities and Values of World Production of Silver, with Annual Average Prices, 1860-1933.....                                  | 403     |

## CHAPTER XII.—MINES AND MINERALS—concluded.

|                                                                                                                                         | PAGE.   |
|-----------------------------------------------------------------------------------------------------------------------------------------|---------|
| Subsection 3. Copper.....                                                                                                               | 404-406 |
| 15. Quantities of Copper Produced in Canada, by Provinces, with Total Values, calendar years 1911-34.....                               | 406     |
| 16. Copper Production of the Leading Countries and of the World, 1913-33.....                                                           | 406     |
| Subsection 4. Lead.....                                                                                                                 | 407-408 |
| 17. Quantities and Values of Lead Produced from Canadian Ores, calendar years 1911-34.....                                              | 408     |
| Subsection 5. Nickel.....                                                                                                               | 408-409 |
| 18. Quantities and Values of Nickel Produced in Canada during the calendar years 1911-34.....                                           | 409     |
| Subsection 6. Cobalt.....                                                                                                               | 409     |
| Subsection 7. Zinc.....                                                                                                                 | 410     |
| 19. Production of Zinc in Canada, calendar years 1911-34.....                                                                           | 410     |
| Subsection 8. Iron.....                                                                                                                 | 411-412 |
| 20. Iron Ore Shipments and Production of Pig Iron and of Steel Ingots and Castings, calendar years 1909-34.....                         | 412     |
| Section 5. <i>Production of Non-Metallic Minerals</i> .....                                                                             | 412-420 |
| Subsection 1. Fuels.....                                                                                                                | 412-418 |
| 21. Coal Resources of Canada, by Provinces and Classes of Coal.....                                                                     | 413     |
| 22. Production of Coal in Canada, by Provinces, calendar years 1911-34.....                                                             | 414     |
| 23. Imports into Canada of Anthracite, Bituminous and Lignite Coal for Home Consumption, calendar years 1911-33.....                    | 414     |
| 24. Exports of Coal, the Produce of Canada, calendar years 1911-33.....                                                                 | 415     |
| 25. Annual Consumption of Canadian and Imported Coal in Canada, by Quantities and Percentages, calendar years 1911-33 (short tons)..... | 415     |
| 26. Coal Output, Exports, Receipts from Other Countries and Coal Made Available for Consumption in Canada during 1932 and 1933.....     | 416     |
| 27. Coal Produced in the Principal Countries of the World, 1913, 1921-33.....                                                           | 416-417 |
| 28. Quantities and Values of Natural Gas Produced in Canada, by Provinces, calendar years 1920-34.....                                  | 417     |
| 29. Quantities and Values of Crude Petroleum Produced in Canada, calendar years 1911-34.....                                            | 418     |
| Subsection 2. Other Non-Metallic Minerals.....                                                                                          | 418-420 |
| 30. Quantities and Values of Asbestos Produced in Canada, calendar years 1911-34.....                                                   | 419     |
| Section 6. <i>Production of Clay Products and Other Structural Materials</i> .....                                                      | 420-422 |
| 31. Production, Imports, Exports and Apparent Consumption of Portland Cement, by Quantities and Values, calendar years 1910-34.....     | 421     |
| 32. Production of Sand, Gravel and Stone in Canada, Showing the Principal Purposes, calendar years 1931-33.....                         | 422     |

## CHAPTER XIII.—WATER POWERS.

|                                                                                                                                                                                                              |         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>The Water Powers of Canada</i> .....                                                                                                                                                           | 423-427 |
| 1. Available and Developed Water Power in Canada, by Provinces, Jan. 1, 1935.....                                                                                                                            | 425     |
| 2. Hydraulic Turbine Horse Power Installed in Canada, by Provinces, as at Dec. 31, 1900-34.....                                                                                                              | 427     |
| 3. Developed Water Power in Canada: Distribution, by Provinces and Industries, and per 1,000 Population, as at Jan. 1, 1935.....                                                                             | 427     |
| Section 2. <i>Central Electric Stations</i> .....                                                                                                                                                            | 427-430 |
| 4. Summary Statistics of Central Electric Stations, calendar years 1917-33.....                                                                                                                              | 428     |
| 5. Main Plant Equipment of Central Electric Stations, by Provinces and Total Auxiliary Equipment, 1933.....                                                                                                  | 429     |
| 6. Electrical Energy Generated in Central Electric Stations, by Provinces, calendar years 1928-33.....                                                                                                       | 430     |
| 7. Electrical Energy Generated or Produced for Export under Authority of the Electricity and Fluid Exportation Act, fiscal years ended Mar. 31, 1931-34.....                                                 | 430     |
| Section 3. <i>Public Ownership of Hydro-Electric Power</i> .....                                                                                                                                             | 431-440 |
| Subsection 1. The Hydro-Electric Power Commission of Ontario.....                                                                                                                                            | 431-437 |
| 8. Summary Statistics Representative of the Growth of the Ontario Hydro-Electric Power Commission's Undertaking, 1910-33.....                                                                                | 432     |
| 9. Distribution of Power to Systems of the Ontario Hydro-Electric Power Commission, 1929-33.....                                                                                                             | 433     |
| 10. Capital Investments in Ontario's Hydro Undertakings, 1929-33.....                                                                                                                                        | 433     |
| 11. Accumulated Reserves of the Ontario Hydro-Electric Power Commission and of the Local Electric Utilities of the Co-operating Municipalities, 1929-33.....                                                 | 434     |
| 12. Consolidated Statement of Assets, Liabilities, Reserves and Surpluses of Electric Departments of Urban Municipalities Served by the Ontario Hydro-Electric Power Commission, calendar years 1929-33..... | 435     |
| 13. Statement of Earnings and Expenses of Electric Departments of Urban Municipalities Served by the Ontario Hydro-Electric Power Commission, calendar years 1929-33.....                                    | 436     |
| 14. Statistics Relating to Electrical Service in Rural Power Districts Operated by the Ontario Hydro-Electric Power Commission, years ended Oct. 31, 1929-33.....                                            | 437     |
| Subsection 2. Hydro-Electric and Power Commissions in Other Provinces.....                                                                                                                                   | 437-440 |

## CHAPTER XIV.—MANUFACTURES.

|                                                                                      |         |
|--------------------------------------------------------------------------------------|---------|
| Section 1. <i>The Evolution of Canadian Manufacturing Industries</i> .....           | 441-454 |
| Subsection 1. Growth of Manufacturing in Canada since 1870.....                      | 442-448 |
| 1. Historical Summary of Statistics of Manufactures for the Dominion, 1870-1933..... | 443     |

CHAPTER XIV.—MANUFACTURES—continued.

|                                                                                                                                                                                                                                   | PAGE.   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 2. Summary of Statistics of Manufactures, by Provinces, for Representative Years, 1917-33.....                                                                                                                                    | 444-445 |
| 3. Summary of Statistics of Manufactures, by Industrial Groups, for Representative Years, 1917-33.....                                                                                                                            | 445-448 |
| Subsection 2. Summary Statistics of Manufacturing Production.....                                                                                                                                                                 | 448-454 |
| 4. Summary Statistics of Manufactures for Representative Years, 1917-33.....                                                                                                                                                      | 449     |
| 5. Indexes of the Volume of Manufacturing Production, According to Component Material and Purposes Classifications, 1924-32.....                                                                                                  | 453     |
| 6. Consumption of Manufactured Products, by Groups, 1932, with Totals for 1922-32.....                                                                                                                                            | 454     |
| Section 2. <i>Production of Industrial Groups and Individual Industries</i> .....                                                                                                                                                 | 455-478 |
| Subsection 1. Manufactures Grouped by Chief Component Materials.....                                                                                                                                                              | 455-467 |
| 7. Statistics of the Numbers, Capital, Employees, Salaries and Wages, Power, Fuel, Materials and Values of Products of Canadian Manufacturing Industries, 1932.....                                                               | 462-467 |
| Subsection 2. Manufactures Classified by the Purpose of the Products.....                                                                                                                                                         | 468-470 |
| 8. Principal Statistics of the Manufacturing Industries of Canada, Classified According to the Purpose of the Principal Product, by Main Groups for Representative Years 1922-32, and in Detail for 1932.....                     | 468-470 |
| Subsection 3. Manufactures Classified by Origin of the Materials.....                                                                                                                                                             | 471-474 |
| 9. Principal Statistics of the Manufacturing Industries of Canada, Classified According to the Origin of the Material Used, by Main Groups for Representative Years 1924-32.....                                                  | 472-474 |
| Subsection 4. The Forty Leading Manufacturing Industries.....                                                                                                                                                                     | 474-478 |
| 10. Principal Statistics of the Forty Leading Industries of Canada, Ranked According to Gross Value of the Products, 1932.....                                                                                                    | 475     |
| 10A. Principal Statistics of the Forty Leading Industries of Canada, Ranked According to Gross Value of the Products, 1933.....                                                                                                   | 476     |
| 11. Principal Statistics of the Forty Leading Industries of Canada, Ranked According to Net Value of the Products, 1932.....                                                                                                      | 477     |
| 12. Principal Statistics of the Forty Leading Industries of Canada, Ranked According to Salaries and Wages Paid, 1932.....                                                                                                        | 478     |
| Section 3. <i>Provincial Distribution of Manufacturing Production</i> .....                                                                                                                                                       | 479-486 |
| Subsection 1. The Manufactures of the Maritime Provinces, 1932.....                                                                                                                                                               | 479-480 |
| 13. Statistics of the Leading Industries of each of the Maritime Provinces, 1932.....                                                                                                                                             | 479-480 |
| Subsection 2. The Manufactures of Quebec, 1932.....                                                                                                                                                                               | 480-481 |
| 14. Principal Statistics of the Forty Leading Industries of the Province of Quebec, 1932.....                                                                                                                                     | 481     |
| Subsection 3. The Manufactures of Ontario, 1932.....                                                                                                                                                                              | 482-483 |
| 15. Principal Statistics of the Forty Leading Industries of the Province of Ontario, 1932.....                                                                                                                                    | 483     |
| Subsection 4. The Manufactures of the Prairie Provinces, 1932.....                                                                                                                                                                | 483-485 |
| 16. Principal Statistics of the Leading Industries of Manitoba, Saskatchewan and Alberta, 1932.....                                                                                                                               | 484-485 |
| Subsection 5. The Manufactures of British Columbia, 1932.....                                                                                                                                                                     | 485-486 |
| 17. Principal Statistics of the Leading Industries of British Columbia and the Yukon Territory, 1932.....                                                                                                                         | 486     |
| Section 4. <i>Principal Factors in Manufacturing Production</i> .....                                                                                                                                                             | 486-506 |
| Subsection 1. Capital Employed.....                                                                                                                                                                                               | 486-488 |
| 18. Percentage Distribution of Capital Employed in the Manufacturing Industries of Canada, by Provinces and Industrial Groups, 1917-32.....                                                                                       | 487     |
| 19. Forms of Capital Employed in the Manufacturing Industries of Canada, by Provinces and by Groups of Industries, 1932, and Totals for Representative Years, 1923-32.....                                                        | 488     |
| Subsection 2. Employment in Manufactures.....                                                                                                                                                                                     | 488-494 |
| 20. Salaried Employees and Wage-Earners in the Manufacturing Industries of Canada, with Volume of Manufacturing Production and Comparative Efficiency of Production, 1917-32.....                                                 | 490     |
| 21. Percentages of Male and Female Employees on Salaries and Wages and Percentages of Total Salaries and Wages, by Provinces and Groups of Industries, 1932.....                                                                  | 491     |
| 22. Total Number of Wage-Earners Employed in the Manufacturing Industries of Canada, by Months, 1922-1932 and by Sex, 1922 and 1932.....                                                                                          | 492     |
| 23. Wage-Earners Working Specified Numbers of Hours in the Month of Highest Employment in 1932, by Provinces and Groups.....                                                                                                      | 493     |
| 24. Wage-Earners Working Specified Numbers of Hours in the Month of Highest Employment in 1932, in each of the Forty Leading Industries.....                                                                                      | 494     |
| Subsection 3. Wages and Salaries in Canadian Manufacturing Industries, 1932.....                                                                                                                                                  | 495-499 |
| 25. Employees on Salaries and Wages in Manufacturing Industries, 1932, and Average Salaries and Wages, by Provinces and Groups, 1931 and 1932.....                                                                                | 496     |
| 26. Statistics of Salaries and Wages Paid in the Forty Leading Industries, 1932, together with Comparative Figures of Average Salaries and Wages Paid in 1931, and Totals and Averages Paid in Previous Representative Years..... | 497     |
| 27. Average Yearly Earnings and Index Numbers of Earnings and Real Wages of Wage-Earners in Manufacturing Industries, 1917-32.....                                                                                                | 498     |
| 28. Percentages of Wages and Salaries Paid to Total Net Values of Manufacturing Production, 1917-32.....                                                                                                                          | 499     |
| Subsection 4. Sizes of Manufacturing Establishments.....                                                                                                                                                                          | 499-502 |
| 29. Manufacturing Establishments Grouped According to Gross Values of Products, with Total and Average Values of Products in each Class, for Canada, 1922 and 1932.....                                                           | 500     |
| 30. Manufacturing Establishments, Grouped According to Gross Values of Products, with Total Values of Products in each Class, by Provinces, 1932.....                                                                             | 501     |
| 31. Establishments and Employees in Canadian Manufactures, Grouped According to the Number of Employees per Establishment, 1923 and 1932.....                                                                                     | 502     |

## CHAPTER XIV.—MANUFACTURES—concluded.

|                                                                                                                                                                                                                               | PAGE.   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 32. Establishments and Employees in Canadian Manufactures, by Provinces, Grouped According to the Number of Employees per Establishment, 1932.....                                                                            | 502     |
| Subsection 5. Power and Fuel.....                                                                                                                                                                                             | 503-506 |
| 33. Totals for Canada of Power Installed in the Manufacturing Industries other than Central Electric Stations and in Central Electric Stations, 1921-32, with Details by Provinces and Groups of Industries for 1932.....     | 504-505 |
| 34. Total Values of Fuels Used in the Manufacturing Industries of Canada, 1921-32, with Details by Provinces and Groups, 1932.....                                                                                            | 506     |
| Section 5. <i>Manufacturing Industries in Cities and Towns</i> .....                                                                                                                                                          | 507-510 |
| 35. Cities and Towns with a Gross Manufacturing Production of over \$1,000,000 each, Number of Establishments and Total Gross Production in such Cities and Towns as a Percentage of the Grand Total, by Provinces, 1932..... | 507     |
| 36. Principal Statistics of the Manufacturing Industries of the Five Leading Manufacturing Cities of Canada, 1929-33.....                                                                                                     | 508     |
| 37. Statistics of Manufactures of Municipalities with a Gross Production of \$1,000,000 or over each, and with Three or more Establishments, 1932.....                                                                        | 508-510 |

## CHAPTER XV.—CONSTRUCTION.

|                                                                                                                                                 |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1. Summary of the Value of Construction Contracts Awarded in Canada, 1911-34, as Compiled by MacLean Building Reports, Ltd.....                 | 512     |
| 2. Construction Contracts Awarded in Canada, 1929-34, by Provinces and Types of Construction, as Compiled by MacLean Building Reports, Ltd..... | 513     |
| 3. Values of Building Permits Taken Out in 61 Cities for the calendar years 1929-34.....                                                        | 514-515 |
| 4. Values of Building Permits Issued by 35 Cities in the calendar years 1910-34 and Index Numbers of the Construction Industries.....           | 516     |

## CHAPTER XVI.—EXTERNAL TRADE.

|                                                                                                                                                                                                    |         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>The Development of Tariffs</i> .....                                                                                                                                                 | 517-526 |
| Subsection 1. Historical Sketch of External Trade and Tariffs.....                                                                                                                                 | 517-519 |
| Subsection 2. Preferential Tariff and Trade Treaties.....                                                                                                                                          | 520-526 |
| Section 2. <i>The Commercial Intelligence Service</i> .....                                                                                                                                        | 526-528 |
| Canadian Tariff Arrangements with Foreign Countries.....                                                                                                                                           | 524-526 |
| Canadian Government Trade Commissioners.....                                                                                                                                                       | 527-528 |
| Section 3. <i>Statistics of External Trade</i> .....                                                                                                                                               | 529-635 |
| Subsection 1. Historical Statistics of Canadian Trade.....                                                                                                                                         | 530-531 |
| Subsection 2. General Analysis of Current Import and Export Trade.....                                                                                                                             | 531-533 |
| I. Summary of Canada's Trade with the World.....                                                                                                                                                   | 532     |
| Subsection 3. Trade with the United Kingdom and the British Empire.....                                                                                                                            | 533-535 |
| II. Summary of Canada's Trade with the United Kingdom.....                                                                                                                                         | 534     |
| III. Canada's Trade with the British Empire.....                                                                                                                                                   | 535     |
| Subsection 4. Trade with the United States and Other Foreign Countries.....                                                                                                                        | 536-538 |
| IV. Summary of Canada's Trade with the United States.....                                                                                                                                          | 537     |
| V. Canada's Trade with the United States and Other Foreign Countries.....                                                                                                                          | 538     |
| Subsection 5. Geographical Distribution of Canadian Trade by Continents and Countries.....                                                                                                         | 539-541 |
| VI. Canada's Trade by Continents, Fiscal Years 1929 to 1934.....                                                                                                                                   | 539     |
| VII. Canada's Imports from Thirty-Five Leading Countries, 1934.....                                                                                                                                | 540     |
| VIII. Canada's Domestic Exports to Forty Leading Countries, 1934.....                                                                                                                              | 541     |
| Subsection 6. Principal Commodities Imported and Exported.....                                                                                                                                     | 542-545 |
| IX. Canada's Leading Imports, fiscal years 1890, 1900, 1910, 1920, 1930, 1934.....                                                                                                                 | 542-543 |
| X. Canada's Leading Domestic Exports, fiscal years 1890, 1900, 1910, 1920, 1930, 1934.....                                                                                                         | 544-545 |
| Subsection 7. Proportions of Trade in Raw and Manufactured Products.....                                                                                                                           | 545-547 |
| XI. Canada's Imports and Exports, by Continents and Leading Countries, According to Degree of Manufacture, year ended Mar. 31, 1934.....                                                           | 546-547 |
| Subsection 8. Canada's Position in International Trade in 1933.....                                                                                                                                | 547-552 |
| XII. Trade of Twelve Leading Commercial Countries Expressed in Canadian Currency, calendar year 1933.....                                                                                          | 548     |
| XIII. Comparison of the Trade of Twenty Principal Countries of the World, calendar years 1913 and 1933.....                                                                                        | 549     |
| XIV. Trade of Twenty Principal Trading Countries of the World, Expressed in Canadian Currency, calendar years 1923-33.....                                                                         | 550     |
| XV. Per Capita Trade of Twenty Principal Trading Countries of the World, calendar years 1923-33.....                                                                                               | 551     |
| XVI. Trade Balances of Twenty Principal Countries of the World, calendar years 1913, 1932 and 1933.....                                                                                            | 552     |
| Subsection 9. Main Historical Tables and Tables showing Current Trends in External Trade.....                                                                                                      | 552-631 |
| 1. Aggregate External Trade of Canada, fiscal years 1868-1934.....                                                                                                                                 | 554     |
| 2. Ratio of Exports to Imports and Value per Capita of Exports, Imports and Total Trade, fiscal years 1868-1934.....                                                                               | 555     |
| 3. Movement of Coin and Bullion, fiscal years 1868-1934.....                                                                                                                                       | 556     |
| 4. Duties Collected on Exports, 1868-92, and on Imports for Home Consumption, 1868-1934, with Percentages of Expense of Collection to Gross Customs Revenue Collected, fiscal years 1868-1934..... | 557     |
| 5. Exports to the United Kingdom, to the United States and to Other Countries, of Merchandise the Produce of Canada, fiscal years 1868-1934.....                                                   | 558     |
| 6. Imports from the United Kingdom, from the United States and from Other Countries, of Merchandise Entered for Home Consumption, fiscal years 1868-1934.....                                      | 559     |

## CHAPTER XVI.—EXTERNAL TRADE—concluded.

|                                                                                                                                                                                                                 | PAGE.   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 7. Percentage Proportions of Imports from the United Kingdom and the United States, respectively, to Totals of Dutiable and Free in the fiscal years 1911-34                                                    | 560     |
| 8. Average <i>ad valorem</i> Rates of Duty Collected on Dutiable and Total Imports from United Kingdom, the United States and All Countries, fiscal years 1868-1934                                             | 560     |
| 9. Imports for Home Consumption of Certain Raw Materials Used in Canadian Manufactures, fiscal years 1911-34                                                                                                    | 561     |
| 10. Exports to the United Kingdom, to the United States and to All Countries, of Classes of Merchandise the Produce of Canada by Values and Percentages, fiscal years 1931-34                                   | 562     |
| 11. Imports from the United Kingdom, from the United States and from All Countries, of Classes of Merchandise Entered for Home Consumption, by Values and Percentages, fiscal years 1931-34                     | 563     |
| 12. Principal Exports of Canadian Produce from Canada to United Kingdom, United States and All Countries, fiscal years 1931-34                                                                                  | 564-583 |
| 13. Principal Imports into Canada for Consumption from United Kingdom, United States and All Countries, fiscal years 1931-34                                                                                    | 584-615 |
| 14. Imports (Dutiable and Free) and Exports of Canadian and Foreign Produce, by Main Classes, and Totals of Duties Collected during the fiscal years ended Mar. 31, 1930-34                                     | 616-617 |
| 15. External Trade of Canada, by Main Groups and Degree of Manufacture, According to Origin, fiscal year ended Mar. 31, 1934                                                                                    | 618-619 |
| 16. Summary of the External Trade of Canada, by Main Groups, Compiled on a Classification According to Purpose, fiscal year ended Mar. 31, 1934                                                                 | 620-624 |
| 17. Values of Total Exports, Imports Entered for Consumption, and Duties Collected Thereon, at certain Ports and by Provinces, fiscal years ended Mar 31, 1933 and 1934                                         | 625-626 |
| 18. Imports of Canada, by Values Entered for Consumption from British Empire and Foreign Countries, Dutiable and Free, under the General, Preferential and Treaty Rate Tariffs, fiscal year ended Mar. 31, 1934 | 627     |
| 19. Values of Imports into Canada of Merchandise Entered for Consumption, from the British Empire and from Foreign Countries, fiscal years ended Mar. 31, 1930-34                                               | 627-629 |
| 20. Values of Exports of Canadian Produce, from Canada to the British Empire and to Foreign Countries, fiscal years ended Mar. 31, 1930-34                                                                      | 629-630 |
| 21. Values and Percentages of Canadian Imports and Exports from and to Stated Countries, passing through the United States, fiscal years ended Mar. 31, 1933 and 1934                                           | 631     |
| Subsection 10. Comparison of the Volume of Imports and Exports                                                                                                                                                  | 632-635 |
| 22. Comparison of the Values and Volumes of the External Trade of Canada, by Main Groups, fiscal years ended Mar. 31, 1926 and 1929-34                                                                          | 633-635 |
| Section 4. <i>The Tourist Trade of Canada</i>                                                                                                                                                                   | 635-637 |
| 23. Tourist Expenditures in Canada and of Canadians Abroad, 1924-33                                                                                                                                             | 636     |
| Section 5. <i>Balance of International Payments 1920-32</i>                                                                                                                                                     | 637-639 |
| 24. Estimated Balance of International Payments, 1933 and 1934                                                                                                                                                  | 639     |

## CHAPTER XVII.—INTERNAL TRADE.

|                                                                                                                                                                                                        |         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Section 1. <i>Interprovincial Trade</i>                                                                                                                                                                | 640-641 |
| 1. Railway Revenue Freight Traffic Movement in Canada and the Provinces, calendar years 1932 and 1933                                                                                                  | 641     |
| Section 2. <i>Grain Trade Statistics</i>                                                                                                                                                               | 642-652 |
| 2. Summary of the Distribution of Canadian Grain, crop year ended July 31, 1933                                                                                                                        | 642-643 |
| 2A. Summary of the Distribution of Canadian Grain, crop year ended July 31, 1934                                                                                                                       | 646-647 |
| 3. Numbers and Storage Capacities of Canadian Grain Elevators, licence years 1933 and 1934                                                                                                             | 647-648 |
| 4. Quantities of Canadian Grain Inspected during the crop years ended July 31, 1931-34                                                                                                                 | 648-649 |
| 5. Shipments of Grain by Vessels from Fort William and Port Arthur for the navigation seasons 1933 and 1934                                                                                            | 649     |
| 6. Shipments of Grain by Lake and All-Rail Routes from Fort William and Port Arthur for the crop years ended July 31, 1933 and 1934                                                                    | 649     |
| 7. Canadian Grain Handled at Eastern Elevators, by crop years ended July 31, 1930-34                                                                                                                   | 650     |
| 8. Canadian Grain Handled at Eastern Elevators, by Classes of Ports, during the crop year ended July 31, 1933                                                                                          | 650     |
| 9. Approximate Average Handling and Freight (c.i.f.) Charges Between the Producer in Western Canada and British Ports, per Bushel of Wheat Exported via Montreal-Sorel-Quebec, calendar year 1934      | 651     |
| 10. Approximate Average Handling and Freight (c.i.f.) Charges Between the Producer in Western Canada and British Ports, per Bushel of Wheat Exported via Vancouver-New Westminster, calendar year 1934 | 651     |
| 11. Flour Mills of Canada, with Their Equipment and Capacities, 1932 and 1933                                                                                                                          | 652     |
| Section 3. <i>Marketing of Live Stock and Animal Products</i>                                                                                                                                          | 652-660 |
| 12. Animals in Canada and Animals Killed or Sold by Farmers in Canada, by census years, 1871-1931                                                                                                      | 653     |
| 13. Index Numbers of Animals on Farms in Canada, calendar years 1921-34                                                                                                                                | 653     |
| 14. Total Receipts of Live Stock and Disposition of Slaughter and Store Stock at Principal Markets in Canada, calendar years 1932 and 1933                                                             | 654     |

## CHAPTER XVII.—INTERNAL TRADE—concluded.

|                                                                                                                                                                                                                                | PAGE.   |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 15. Live Stock from Several Provinces of Canada, Marketed through Stockyards, Packers, etc., calendar year 1933.....                                                                                                           | 655     |
| 16. Grading of the Live Stock from Several Provinces of Canada, Marketed at the Stockyards, calendar year 1933.....                                                                                                            | 655-656 |
| 17. Principal Statistics of the Slaughtering and Meat-Packing Industry of Canada, decennially 1871-1921, annually 1928-33.....                                                                                                 | 657     |
| 18. Live Stock Slaughtered at Canadian Inspected Establishments, by months, 1932 and 1933.....                                                                                                                                 | 657     |
| 19. Total and Per Capita Consumption of Meats and Live-Stock Products in Canada, calendar years 1929-33.....                                                                                                                   | 658-659 |
| 20. Provincial Shipments of Meat Products, with Total Interprovincial and Export Shipments, calendar year 1932.....                                                                                                            | 659     |
| Section 4. <i>Cold Storage</i> .....                                                                                                                                                                                           | 660-661 |
| 21. Cold Storage Warehouses in Canada, by Provinces, 1933 and 1934.....                                                                                                                                                        | 660     |
| 22. Stocks of Food on Hand in Cold Storage and in Process of Cure, by Months and Commodities, 1933 and 1934.....                                                                                                               | 661     |
| Section 5. <i>Bounties</i> .....                                                                                                                                                                                               | 662-663 |
| Section 6. <i>Patents, Copyrights and Trade Marks</i> .....                                                                                                                                                                    | 663-665 |
| 23. Number of Canadian Patentees, by Province of Residence, for the fiscal years ended Mar. 31, 1923-34.....                                                                                                                   | 664     |
| 24. Statistics of Patents Applied for, Granted, etc., fiscal years ended Mar. 31, 1929-34.....                                                                                                                                 | 664     |
| 25. Statistics of Copyrights, Trade Marks, etc., fiscal years ended Mar. 31, 1929-34.....                                                                                                                                      | 665     |
| 26. Receipts, Expenditures and Surplus on Account of Patents, Copyrights and Trade Marks, fiscal years ended Mar. 31, 1929-34.....                                                                                             | 665     |
| Section 7. <i>Weights and Measures</i> .....                                                                                                                                                                                   | 666-667 |
| 27. Inspections by the Weights and Measures Service, fiscal years ended Mar. 31, 1933 and 1934.....                                                                                                                            | 667     |
| Section 8. <i>Electricity and Gas Inspection</i> .....                                                                                                                                                                         | 667-668 |
| 28. Numbers of Electricity Meters in Use, fiscal years ended Mar. 31, 1915-34.....                                                                                                                                             | 668     |
| 29. Numbers of Gas Meters in Use, by Kinds of Gas Consumed, fiscal years ended Mar. 31, 1916-34.....                                                                                                                           | 668     |
| 30. Numbers of Cubic Feet of each Kind of Gas Sold in Canada, fiscal years ended Mar. 31, 1920-34.....                                                                                                                         | 668     |
| Section 9. <i>Census of Merchandising and Service Establishments</i> .....                                                                                                                                                     | 669-690 |
| 31. Retail Merchandise Trade—Total Sales and Indexes of Sales by Groups and Provinces, 1930-33.....                                                                                                                            | 670     |
| Subsection 1. Wholesale and Other Bulk or Non-Retail Merchandising.....                                                                                                                                                        | 670-672 |
| 32. Bulk Merchandising (Wholesale and Other Non-Retail) in Canada, by Provinces, 1930.....                                                                                                                                     | 671     |
| 33. Bulk Merchandising (Wholesale and Other Non-Retail) in Canada, by Type of Distributor, 1930.....                                                                                                                           | 672     |
| Subsection 2. Retail Trade.....                                                                                                                                                                                                | 673-690 |
| 34. Value of the Known Retail Trade in Canada, by Provinces, 1930.....                                                                                                                                                         | 674-675 |
| 35. Summary Statistics of Retail Merchandising and Service Establishments in Canada, by Provinces and Business Groups, 1930.....                                                                                               | 674-677 |
| 36. Retail Merchandise Trade in Canada, by Provinces, 1930.....                                                                                                                                                                | 676     |
| 37. Total Retail Merchandising Establishments Grouped According to Annual Net Sales, with Numbers and Proportions of Full-Time Employees, Stores and Sales in Each Class, and Average Number of Employees per Store, 1930..... | 677     |

| 7. Distribution of Operating Expenses of Steam Railways, calendar years 1930-33                                                                                                                                             | 704     |
| 8. Earnings and Operating Expenses of Steam Railways per Mile of Line and per Train Mile, for the years ended June 30, 1915-19, and the calendar years 1919-33                                                              | 705     |
| 9. Summary Analysis of Statistics of Passenger and Freight Services and Receipts, for the years ended June 30, 1915-19, and the calendar years 1919-33                                                                      | 706-707 |
| 10. Numbers of Steam Railway Employees, Totals and Averages of Salaries and Wages, and Ratios of the Latter to Gross Earnings and Operating Expenses, for years ended June 30, 1912-19, and for calendar years 1919-33      | 708     |
| 11. Rolling Stock of Steam Railways, calendar years 1927-33                                                                                                                                                                 | 709     |
| 12. Commodities Hauled as Freight on Steam Railways during the calendar years 1929-33                                                                                                                                       | 709-710 |
| 13. Areas of Land Granted to Steam Railways by the Dominion and Provincial Governments up to Dec. 31, 1933                                                                                                                  | 711-712 |
| 14. Analysis of the Total Financial Aid Given to Steam Railways up to Dec. 31, 1933                                                                                                                                         | 712     |
| 15. Railway Bonds Guaranteed by Dominion and Provincial Governments, as at Dec. 31, 1933                                                                                                                                    | 713     |
| 16. Numbers of Passengers, Employees and Others Killed and Injured on Steam Railways, calendar years 1920-33                                                                                                                | 713     |
| 17. Numbers of Persons Killed and Injured on Steam Railways in the calendar years 1931-33                                                                                                                                   | 714     |
| Section 3. <i>Origin and Growth of Government-Owned Railways</i>                                                                                                                                                            | 714-725 |
| 18. Government Investments in Railways to Mar. 31, 1934                                                                                                                                                                     | 715-716 |
| 19. Canadian National Railways (Canadian and U.S. Lines) Train Traffic Statistics, for the calendar years 1932 and 1933                                                                                                     | 717-718 |
| 20. Gross Revenues, Operating Expenses, Net Revenues, Interest on Funded Debt and Deficits of the Canadian National Railways, calendar years 1923-33                                                                        | 719     |
| 21. Long-Term Debt of Canadian National Railways (Including Appropriations for Canadian Government Railways), Showing Principal Outstanding at ends of calendar years 1922-33, and New Funds Raised, calendar years 1923-33 | 721     |
| 22. Capital Received by Canadian National Railways, calendar years 1923-33                                                                                                                                                  | 722     |
| 22A. Capital Expended by Canadian National Railways, calendar years 1923-33                                                                                                                                                 | 723     |
| 23. Adjustments Accounting for Difference in Railway Obligations as shown by Public Accounts, Mar. 31, 1934, and by Canadian National Railways Balance Sheet, Dec. 31, 1933                                                 | 724     |
| 24. Assets of the Canadian National Railways System, Dec. 31, 1922 and 1933                                                                                                                                                 | 724-725 |
| <b>Part III.—Electric Railways</b>                                                                                                                                                                                          | 725-730 |
| 25. Summary of Statistics of Electric Railway Operation, years ended June 30, 1911-19, and calendar years 1919-33                                                                                                           | 727     |
| 26. Mileage and Equipment of Electric Railways in the calendar years 1930-33                                                                                                                                                | 727     |
| 27. Capital Liability of Electric Railways, years ended June 30, 1908-19, and calendar years 1919-33                                                                                                                        | 728     |
| 28. Mileage, Capital, Earnings, Operating Expenses, Passengers, Employees, and Salaries and Wages of Electric Railways in Canada, calendar year 1932                                                                        | 728-729 |
| 28A. Mileage, Capital, Earnings, Operating Expenses, Passengers, Employees, and Salaries and Wages of Electric Railways in Canada, calendar year 1933                                                                       | 729-730 |
| 29. Numbers of Passengers, Employees and Others Killed and Injured on Electric Railways, calendar years 1919-33, with Totals from 1894 to June 30, 1919                                                                     | 730     |
| <b>Part IV.—Express Companies</b>                                                                                                                                                                                           | 731-732 |
| 30. Summary Statistics of Revenues and Expenses of Express Companies, calendar years 1919-33                                                                                                                                | 732     |
| 31. Revenues, Expenses and Operating Mileage of Express Companies, by Companies, calendar years 1932 and 1933                                                                                                               | 732     |
| 32. Business Transacted by Express Companies in Financial Paper, calendar years 1929-33                                                                                                                                     | 732     |
| <b>Part V.—Roads and Highways</b>                                                                                                                                                                                           | 733-736 |
| 33. Classification of Canadian Highways, by Provinces, Dec. 31, 1933                                                                                                                                                        | 734     |
| 34. Capital and Maintenance Expenditures on Provincial Highways or Provincially Subsidized Highways in Canada, calendar years 1929-33                                                                                       | 735     |
| 35. Provincial Government Funded Highway Debt and Annual Charges thereon, Dec. 31, 1932 and 1933                                                                                                                            | 736     |
| <b>Part VI.—Motor Vehicles</b>                                                                                                                                                                                              | 736-744 |
| Section 1. <i>Statistics of Motor Vehicle Operation</i>                                                                                                                                                                     | 737-740 |
| 36. Numbers of Motor Vehicles Registered in Canada, by Provinces, calendar years 1907-33                                                                                                                                    | 738     |
| 37. Types of Motor Vehicles Registered in Canada, by Provinces, calendar years 1932 and 1933                                                                                                                                | 738     |
| 38. Provincial Revenues from the Taxation of the Distribution and Operation of Motor Vehicles, for the years 1932 and 1933                                                                                                  | 739     |
| 39. Apparent Consumption of Automobiles in Canada, 1917-33                                                                                                                                                                  | 740     |
| Section 2. <i>Motor Vehicle Acts and Regulations</i>                                                                                                                                                                        | 740-744 |
| <b>Part VII.—Air Navigation</b>                                                                                                                                                                                             | 744-746 |
| 40. Statistical Summary of Civil Aviation in Canada, 1929-34                                                                                                                                                                | 745-746 |

## CHAPTER XVIII.—TRANSPORTATION AND COMMUNICATIONS—continued.

|                                                                                                                                                                                                                 | PAGE.   |

| Section 1. <i>Dominion Public Finance</i> .....                                                                                                                                                       | 881-915 |
| Subsection 1. The Current Balance Sheet of the Dominion.....                                                                                                                                          | 886-887 |
| 1. Balance Sheets of the Dominion of Canada, as at Mar. 31, 1933 and 1934.....                                                                                                                        | 887     |
| Subsection 2. Receipts and Disbursements.....                                                                                                                                                         | 888-896 |
| 2. Details of Revenue Receipts, fiscal years ended Mar. 31, 1930-34.....                                                                                                                              | 888-889 |
| 3. Details of Expenditures, fiscal years ended Mar. 31, 1930-34.....                                                                                                                                  | 889-890 |
| 4. Principal Items of Dominion Expenditure, 1868-1934.....                                                                                                                                            | 891-893 |
| 5. Principal Items of Receipts (Consolidated Fund) and Total Receipts, 1868-1934.....                                                                                                                 | 894     |
| 6. Per Capita Figures of Taxation, Total Revenue Receipts, Expenditure on Consolidated Fund Account and Total Expenditure, 1868-1934.....                                                             | 895     |
| 7. Per Capita Revenue Receipts and Expenditure, by Principal Items, 1928-34.....                                                                                                                      | 895-899 |
| Subsection 3. War Tax Revenue.....                                                                                                                                                                    | 896-899 |
| 8. War Tax Revenue Received by the Receiver General, fiscal years ended Mar. 31, 1913-34.....                                                                                                         | 897     |
| 9. Summary of Excise War Taxes Collected by the Department of National Revenue, (formerly the Department of Customs and Excise), fiscal years ended Mar. 31, 1929-34.....                             | 897     |
| 10. Excise War Taxes Collected by the Department of National Revenue, by Provinces, fiscal year ended Mar. 31, 1933.....                                                                              | 898     |
| 11. Excise War Taxes Collected by the Department of National Revenue, by Provinces, fiscal year ended Mar. 31, 1934.....                                                                              | 899     |
| Subsection 4. Inland Revenue.....                                                                                                                                                                     | 900-902 |
| 12. Details of Excise Duties Collected, fiscal years ended Mar. 31, 1929-34.....                                                                                                                      | 901     |
| 13. Number of Excise Licences Issued, fiscal years ended Mar. 31, 1928-34.....                                                                                                                        | 901     |
| 14. Statistics of Distillation, fiscal years ended Mar. 31, 1929-34.....                                                                                                                              | 901-902 |
| 15. Quantities of Spirits, Malt Liquor, Malt and Tobacco Taken Out of Bond for Consumption, fiscal years ended Mar. 31, 1911-34.....                                                                  | 902     |
| Subsection 5. Subsidies and Loans to Provinces.....                                                                                                                                                   | 903-905 |
| 16. Subsidies of Dominion to Provincial Governments, fiscal years ended 1929-34.....                                                                                                                  | 903     |
| 17. Total of Subsidy Allowances from July 1, 1867 to Mar. 31, 1934.....                                                                                                                               | 903     |
| 18. Loans to Provincial Governments Under the Relief Acts, by Provinces, fiscal years ended Mar. 31, 1932-35.....                                                                                     | 904     |
| 19. Loans to Provincial Governments Outstanding, on Account of Housing, by Provinces, as at Mar. 31, 1920-34.....                                                                                     | 905     |
| Subsection 6. National Debt.....                                                                                                                                                                      | 905-915 |
| 20. Summary of the Public Debt of Canada and Interest Payments Thereon, July 1, 1867 to Mar. 31, 1934.....                                                                                            | 908     |
| 21. Details of the Active Assets of the Public Debt of Canada, as at Mar. 31, 1923-34.....                                                                                                            | 909     |
| 22. Details of the Gross Liabilities of Canada, as at Mar. 31, 1923-34.....                                                                                                                           | 909-910 |
| 23. Funded Debt and Treasury Bills of the Dominion, Interest Thereon, Date of Maturity, Rate of Interest and Centres at Which Loans are Payable, as at Mar. 31, 1934.....                             | 910-911 |
| 24. The Interest-Bearing Debt, the Annual Interest Charge Thereon and the Average Rate of Interest, as at Mar. 31, 1913-34.....                                                                       | 912     |
| 25. Securities Guaranteed by the Dominion Government (Amounts Held by the Public), as at Mar. 31, 1914-34.....                                                                                        | 913     |
| 26. Securities Guaranteed by the Dominion Government, as at Mar. 31, 1934.....                                                                                                                        | 913-915 |
| Section 2. <i>Provincial Public Finance</i> .....                                                                                                                                                     | 915-931 |
| Subsection 1. Provincial Revenues and Expenditures.....                                                                                                                                               | 916-924 |
| 27. Ordinary Revenues of Provincial Governments for their respective fiscal years ended 1933.....                                                                                                     | 918-919 |
| 28. Ordinary Expenditures of Provincial Governments for their respective fiscal years ended 1933.....                                                                                                 | 920-921 |
| 29. Ordinary Revenues and Expenditures of the Provincial Governments for their respective fiscal years ended in the census years 1871-1911 and in each year from 1916 to 1933.....                    | 922-923 |
| 30. Ordinary Revenues and Expenditures of Provincial Governments per head of Population for their respective fiscal years ended in the census years 1871-1911 and in each year from 1916 to 1933..... | 924     |
| Subsection 2. Provincial Debts and Assets.....                                                                                                                                                        | 925-931 |
| 31. Balance Sheets of the Provincial Governments for their respective fiscal years ended 1933.....                                                                                                    | 926-929 |
| 32. Gross Bonded Debt (Exclusive of Treasury Bills) of Provincial Governments, by Provinces, fiscal years 1916 to 1933.....                                                                           | 930     |
| Section 3. <i>Municipal Public Finance</i> .....                                                                                                                                                      | 931-936 |
| 33. Number of Municipalities in Canada, by Provinces and Classes, 1932.....                                                                                                                           | 932     |
| 34. Summary Statement Showing Total Assessment Valuations of Municipalities, by Provinces, for 1929-32.....                                                                                           | 933-934 |
| 35. Total Bonded Indebtedness of All Classes of Municipalities, by Provinces, 1919-32.....                                                                                                            | 935     |

## CHAPTER XXI.—PUBLIC FINANCE—concluded.

|                                                                                                                                                                                                                                             | PAGE.   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 36. Principal Financial and Other Statistics of Canadian Cities and Towns with Populations of 10,000 and over, 1932.....                                                                                                                    | 935-936 |
| Section 4. <i>National Wealth and Income</i> .....                                                                                                                                                                                          | 937-947 |
| Subsection 1. <i>National Wealth</i> .....                                                                                                                                                                                                  | 937-939 |
| 37. Provincial Distribution of the National Wealth of Canada, with Percentage and Per Capita Analyses, 1929.....                                                                                                                            | 938     |
| 38. Estimate of the National Wealth of Canada, with Percentage and Per Capita Distribution of Component Items, 1929.....                                                                                                                    | 939     |
| Subsection 2. <i>National Income and Income Tax Statistics</i> .....                                                                                                                                                                        | 940-946 |
| 39. Total and Per Capita Production of the Gainfully Occupied Population in 1932, Based upon the Survey of Production, 1932, and the Percentage of Persons Occupied in the Production of Form Utilities as Found at the Census of 1931..... | 942     |

<sup>1</sup>Estimated populations are given for inter-censal and post-censal years. <sup>2</sup>1897. <sup>3</sup>The figures for the decennial census years 1871-1921 are for the next preceding years, those for 1871 are for the four original provinces only. Export prices have been used in working out values of dairy products. <sup>4</sup>The figures for 1934 are subject to revision. <sup>5</sup>Cwt.

<sup>1</sup> 1887. <sup>2</sup> 1874. <sup>3</sup> 1886. <sup>4</sup> 000's omitted. <sup>5</sup> The statistics of manufactures in 1871 and 1881 include works employing fewer than 5 hands, while those of 1891, 1901, 1911 and 1916 are for works with 5 hands and over except in the case of butter and cheese factories, flour and grist mills, electric light plants, lumber, lath and shingle mills, lime kilns, brick and tile works, and fish canneries. The figures for these years are for the preceding years in each case. From 1922 statistics are exclusive of construction, hand trades, repair and custom work. Figures for 1925-30 include non-ferrous metal smelting not included in earlier

relate to the fiscal years ended June 30 up to 1906, and from then on to the years ended Mar. 31. Agricultural, dairying, fisheries (1922-26), mineral, manufacturing, banking, insurance, loan and trust companies statistics relate to the calendar years and railway statistics to the years ended June 30, 1871-1916, and to the calendar years 1921 and 1924-28. Canal statistics are those of the navigation seasons. The telegraph statistics relate to the fiscal years for Government lines and to the calendar years for other lines.

#### ERRATUM.

- P 85. Number of votes polled for Quebec in 1921 should read 779,591 instead of 779,951.

## CHAPTER I.—PHYSIOGRAPHY.

### PART I.—GEOGRAPHICAL FEATURES.\*

**Situation.**—The Dominion of Canada comprises the whole northern half of the North American continent except the United States territory of Alaska, and the Coast of Labrador, a dependency of the Colony of Newfoundland. It also includes the Arctic archipelago between Davis strait and the connecting waters northward to the 60th meridian on the east, and the 141st meridian on the west.

The Dominion is bounded on the west by the Pacific ocean and Alaska; on the south by the 49th parallel, the Great Lakes, the St. Lawrence river and additional lines set out by the Ashburton Treaty, signed Aug. 9, 1842; and on the east by the Atlantic ocean, the gulf of St. Lawrence, the territory of the Coast of Labrador (as defined by the award of the Privy Council, Mar. 1, 1927), and Davis strait. As regards the far north, Canada includes all the lands in the area bounded on the east by a line passing midway between Greenland and Baffin, Devon and Ellesmere islands to the 60th meridian of longitude, following this longitude to the pole, and on the west by the 141st meridian of longitude, following this longitude to the pole. The southernmost point is Middle island in lake Erie, in north latitude  $41^{\circ} 41'$ , while from east to west the Dominion extends from about west longitude  $57^{\circ}$ —at the southernmost point of the boundary with the Coast of Labrador—to west longitude  $141^{\circ}$ , the boundary with Alaska. Canadian territory thus extends over  $84^{\circ}$  of longitude and  $48^{\circ}$  of latitude.

**Area.**—The area of the Dominion is 3,694,863 square miles, a figure which may be compared with that of 3,738,395 square miles for the United States and its dependent territories, 3,776,700 the total area of Europe, 2,974,581 the total area of Australia, 4,277,655 the total area of China inclusive of dependencies, 3,275,510 the area of Brazil, 1,805,252 the area of India, 121,633 the area of the British Isles and 13,318,000 the area of the British Empire. By comparison with the last two figures, Canada is seen to be over 30 times as large as the British Isles and to comprise over 27 p.c. of the total area of the British Empire.

**Political Subdivisions.**—Canada is divided from east to west into the following provinces: the Maritime Provinces of Prince Edward Island, Nova Scotia and New Brunswick, all three comparatively small in area; Quebec, covering a strip south of the St. Lawrence and the whole territory north of the St. Lawrence and east of the Ottawa to Hudson strait, except the territory of the Coast of Labrador; Ontario, extending northward from the Great Lakes to Hudson bay; Manitoba, Saskatchewan and Alberta, the provinces of the interior continental plain, extending from  $49^{\circ}$  to  $60^{\circ}$  north latitude; and British Columbia, the province of the western mountain and Pacific Coast region, also extending from  $49^{\circ}$  to  $60^{\circ}$ . North of the 60th parallel of latitude, the country is divided into the Yukon Territory and the Northwest Territories, the latter area composed of the provisional districts of Mackenzie, Keewatin and Franklin.

*Prince Edward Island.*—This, the smallest province of the Dominion, lies in the southern bend of the gulf of St. Lawrence and is separated from the mainland

\*Revised by F. H. Peters, Director of the Topographical Survey, Department of the Interior, Ottawa, 87473—1

by Northumberland strait. It is about 120 miles in length and, with an average width of 20 miles, covers an area of 2,184 square miles, approximately 200 square miles more than the State of Delaware. The island is almost trisected by the deep indentations of Malpeque bay north of Summerside and by the mouth of the Hillsborough river at Charlottetown, which nearly meets Tracadie bay on the north side. Its rich red soil and red sandstone formations are a distinctive feature, and no point in the island attains a greater altitude than about 450 feet above sea-level. A climate tempered by the surrounding waters of the gulf and yet free from the rigours of Atlantic storms, combined with a fertile soil and sheltered harbours, offers great inducements to the pursuits of agriculture and fishing. The province is noted for its relative predominance in the fox-farming industry, its lobster canneries, and its production of oats and potatoes.

*Nova Scotia*.—The province of Nova Scotia is 381 miles in length by from 50 to 105 miles in width, a long, narrow strip of land lying parallel to the Maine and New Brunswick coast and joined to the latter province by the isthmus of Chignecto. It includes at the north the island of Cape Breton, which is separated from the mainland by the narrow strait of Canso. The total area of the province is 21,068 square miles, a little over 2,000 square miles less than the combined area of Belgium and Holland. Cape Breton island, south of the main entrance to the gulf of St. Lawrence and sheltering Prince Edward island from the Atlantic, is roughly 100 miles in length with an extreme breadth of 87 miles. Its area of 3,970 square miles encloses the salt-water lakes of Bras d'Or, connected with the sea at the north by two natural channels and at the south by the St. Peters ship canal. The ridge of low mountainous country running through the centre of the Nova Scotia mainland, the highest altitude of which is less than 1,500 feet, divides it roughly into two slopes. That facing the Atlantic is generally rocky and open to the sweep of Atlantic storms, but the other, facing the bay of Fundy and Northumberland strait, consists for the most part of fertile plains and river valleys noted for general farming and for fruit-farming districts which produce the famous Nova Scotian apples. The Atlantic coast is deeply indented with numerous excellent harbours many of which provided splendid homes and refuges for the old sail fishing fleets.

*New Brunswick*.—With a total area of 27,985 square miles, New Brunswick may be compared in size to Scotland with its area of 30,405 square miles. The province is very compact and in shape nearly rectangular, with its depth not greatly exceeding its width. The conformation is in general undulating and of low relief. In the southeastern half of the province the ground elevation does not generally exceed 500 feet above sea-level except for a narrow strip in the south which produces the highlands bordering the bay of Fundy east of Saint John. In the northwestern half the ground elevation is in general from 500 to 1,000 feet above sea-level and reaches its greatest elevation of about 2,690 feet in Northumberland county northeast of Grand Falls. The St. John, rising in the sister province of Quebec and the bordering State of Maine, is a river with many distinctive beauties, while its length of nearly 400 miles makes it quite noteworthy as to size. In the northeastern half of the province there are very extensive areas of Crown lands still carrying valuable stands of merchantable timber. While New Brunswick is essentially a part of the mainland, the bay of Chaleur at the north, the gulf of St. Lawrence and Northumberland strait at the east, the bay of Fundy at the south and Passamaquoddy bay at the southwest, provide the province with a very extensive sea-coast. To its southwest is a group of islands belonging to the province, the most important of

which are Grand Manan, Campobello, and the West Isles. New Brunswick has been called the best watered country in the world; numerous rivers provide access to extensive lumbering areas in its interior and to many of the most attractive hunting and fishing resorts in the Dominion.

*Quebec.*—Quebec might with considerable accuracy be included among the Maritime Provinces, for the gulf of St. Lawrence is really a part of the Atlantic, and altogether salt water washes the coasts of the province for a length of over 2,700 miles. Besides including a narrow strip of land between the St. Lawrence and the International and New Brunswick boundaries, Quebec extends northward from the St. Lawrence and Ottawa rivers to Labrador and Hudson strait, covering over 17° of latitude and an area of 594,534 square miles, about 38 p.c. of which lies south of the isotherm of 60°F. mean July temperature.\* The combined areas of France, Germany and Spain are about 2,600 square miles less than the area of Quebec. The conformity of the surface of Quebec is in general that characteristic of the Precambrian rocks, being quite even in general but much diversified by minor hills and hollows. North of the St. Lawrence the land takes the form of a ridge, parallel to the river and rising from sea-level to the Height of Land at an elevation of from 1,000 to 3,000 feet and then descending gently again to the sea-level of Hudson bay to the northwest; but to the northeast the ridge carries its height to end abruptly in the high headlands of Labrador. South of the river, the area is comprised of the St. Lawrence Lowlands between Montreal and Quebec which, rising to the east, produce the highest elevation in the province, of about 4,200 feet, in the Gaspé peninsula. With the exception of the treeless zone extending somewhat south of Ungava bay the whole of the province supports a valuable tree growth varying from the mixed forest in the southwest to the eastern and northern coniferous in the areas of higher latitude. Apart from its importance as the threshold of Canada and the gateway through which ocean vessels must pass on their way to the interior of the continent Quebec is also noted for its natural resources. The extensive timber limits of its northern areas form the basis for the great pulp and paper industry of the present and the future. Its rivers, many of them as yet comparatively unknown, may be harnessed to supply about two-fifths of the electric power available in Canada. Its mineral deposits, particularly those of asbestos, have long been known for their quality and extent, while more recent developments of copper and gold deposits in Rouyn and the neighbouring townships in the western part have brought the province up to third place in mineral production in Canada. The fisheries of the St. Lawrence river and gulf are well known. Agriculturally, the climate and soil of the upper St. Lawrence River valley and the plains of the Eastern Townships are eminently adapted to general farming operations.

*Ontario.*—The province of Ontario is the section of the Dominion contained between the great international lakes and Hudson bay and between the western boundary of Quebec and the eastern limits of Manitoba. Although generally regarded as an inland province, Ontario has a fresh-water shore line on the Great Lakes of more than 2,362 miles and on the north a salt-water shore line of about 680 miles with a tidal port at Moosonee at the southern end of James bay. The southernmost point of Ontario, which is also the southernmost point of the Dominion, is in north latitude 41° 41'—a little further south than the northern boundary of the State of California—and its most northern, in north latitude 56° 48'. The total area comprised within its limits, of which about 82 p.c. lies south of the isotherm of

\*The isotherm of 60° F. mean July temperature is generally considered as the northern limit for the economic production of cereals.

60° F. mean July temperature,\* is 412,582 square miles, of which its fresh-water area of 49,300 square miles forms the unusually large proportion of 12 p.c. The province is over 17,000 square miles greater in area than are France and Germany together, and when compared with the States to the south, Ontario is found to be almost equal in extent to the combined areas of the six New England States, together with New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Michigan and Wisconsin. Excepting in the southwestern part, the surface conformity of Ontario is influenced by the characteristics of the Precambrian rocks. In northern Ontario a large area with elevations of 1,000 feet or over adjoins the north shore of the Great Lakes and going north a short distance over the Height of Land the slope descends very gently to Hudson bay, which has a wide marginal strip less than 500 feet above sea-level. The highest point in Ontario is 2,120 feet, on the promontory at the northeastern corner of lake Superior. The whole province supports a valuable covering of trees, varying from south to north, from the mixed forest to the eastern and northern coniferous. Many varieties of climate and soil are encountered, from the distinctively southern conditions found along the shores of lake Erie to the very different ones of Hudson and James bays. Ontario, of all the provinces of Canada, is the centre of the country's manufacturing life, owing to its abundant water-power resources and its proximity to the coal fields of Pennsylvania, but the many resources of its rural districts are not on this account neglected. Mining is an important industry in the Sudbury, Porcupine, and Kirkland Lake districts, the nickel coming from the Sudbury field amounting to 90 p.c. of the world production, while as regards gold production the province ranks first in Canada. Fruit farming in the Niagara district and general farming throughout the entire southern part of the province are carried on extensively under unusually favourable conditions, while timber, pulp and furs are among the most important products of more northern parts.

*Manitoba.*—Manitoba, the most easterly of the Prairie Provinces, and also the oldest of them in point of settlement, includes the area between Ontario on the east and Saskatchewan on the west. Its southerly limit is the International Boundary, while its northerly boundary is the 60th parallel of latitude and Hudson bay, where its coast of over 400 miles includes the harbour and port of Churchill. The total area of Manitoba, of which about 56 p.c. lies south of the isotherm of 60° F. mean July temperature,\* is 246,512 square miles—3,246 square miles greater than twice the total area of the British Isles. The conformity of the surface of Manitoba is quite even; commencing on the north with a strip bordering on Hudson bay perhaps 100 miles wide and less than 500 feet in elevation, the surface rises gradually towards the west and south. The bulk of the province has an elevation of between 500 and 1,000 feet, with the greatest height of 2,727 feet attained in Duck mountain, northwest of lake Dauphin. East and north of lake Winnipeg the Precambrian formation intrudes, producing a rock formation, but the remainder of the province is overlain by very fertile soil of great depth. The treeless prairie belt extends into the southwest corner of the province, but the greater portion of the developed area is in the grove belt, characterized by groves of poplar interspersed with open prairie patches; to the north there are great areas of northern mixed forest, blending into the northern coniferous, which thin again to some treeless areas along the coast line farther north. The province has been regarded as typically agricultural, its southern lands being specially adapted to this form of industry. Its northern districts, however, are of importance in the production of timber and also contain large mineral

\*See footnote, p. 3.

deposits particularly of copper-gold ore. About three-fifths of the area of this province is underlain by the Precambrian rocks which have been found so rich in minerals in northern Ontario and northern Quebec.

*Saskatchewan.*—This central prairie province lies between Manitoba and Alberta; it reaches to the International Boundary on the south and its northerly limit is the 60th parallel of latitude, which divides it from the Northwest Territories. The area, of which about 89 p.c. lies south of the isotherm of 60°F. mean July temperature,\* is 251,700 square miles, approximating that of Manitoba, and greater by 5,000 square miles than the combined areas of the British Isles and Norway. With the exception of a point of the Precambrian rocks jutting in from the east at the Height of Land, well to the north, and again covering a narrow strip along the northern boundary, the whole of the province is overlain by generally fertile soil of great depth. The greater part of the developed area in the south is comprised in the great treeless prairie belt, fringed to the north with a zone of poplar, interspersed with open prairie, which gradually changes into the northern mixed forest covering all the northerly parts. Apart from the southern prairies, which are extraordinarily smooth, the surface topography is generally of low relief and with a general rising slope towards the west. The bulk of the province has a general elevation of between 1,000 and 2,000 feet, with the maximum elevation of about 4,500 feet on the eastern point of the Cypress hills in the southwest corner. The climate is quite different from that of Eastern Canada, with less precipitation and perhaps slightly more severe features than are encountered in many other parts of the country, but is nevertheless most favourable to plant and animal growth. The northern districts, abundantly watered by lakes and rivers, are rich in timber resources and have prospective mineral wealth, while the southern plains include a large portion of the wonderful western wheat fields.

*Alberta.*—Lying between Saskatchewan on the east, and the Rocky mountains and the 120th meridian on the west, and bounded on the north and south by the Northwest Territories and the United States respectively, is the province of Alberta. Its area is slightly greater than that of Saskatchewan or Manitoba, comprising a total of 255,285 square miles, of which about 90 p.c. lies south of the isotherm of 60°F. mean July temperature.\* The area of the province is over 8,600 square miles greater than the combined areas of the British Isles and Norway. Like Saskatchewan, the southern part of the province is comprised in the dry treeless prairie belt, changing to the north into a zone of poplar interspersed with open prairie, which again gives way to the northern mixed forest covering the northerly parts. The Precambrian rocks just touch Alberta at its northeast corner, so that excepting the fringe of mountainous country on its western border the whole of the province is overlain by arable soil of great depth. Alberta has two marked features: (1) the great valley of the Peace river, which has already resulted in the extension of settlement farther north than in any other part of Canada, and (2) the wonderful grazing lands in the foothills district, which, rising sharply on the west, commences the ascent which continues to the very peaks of the Rocky mountains. The southern half of the province, rising toward the west, lies at a general elevation of from 2,000 to 4,000 feet; but in the northern half the slope descends until elevations of well under 1,000 feet are reached at lake Athabaska in the northeast corner. Mount Columbia, with an elevation of 12,294 feet, is the highest point in the province. Considerable coal and oil-mining are carried on, lumbering is important in the more mountainous western parts and in the north, while some ranching is still pursued in

\*See footnote, p. 3.

the less populous sections. The climate of Alberta is a particularly pleasant one, cooler in summer than more eastern parts of the country and tempered in winter by the "Chinook" winds.

*British Columbia.*—British Columbia, the most westerly province of the Dominion, comprises an area of 366,255 square miles, slightly more than three times the area of the British Isles. The predominant feature of the province is the parallel ranges of mountains which cover all of it except the northeast corner and produce a conformation characterized by high mountain ranges interspaced with valleys, many of which are extremely fertile, with climatic conditions well adapted to mixed agriculture or fruit growing. Apart from the smoother area in the northeast corner which extends up from the "Peace River Block" there is another notably large area of smoother terrain in the Stuart Lake district traversed by the Canadian National Railways running west from Fort George to Prince Rupert. The highest point in the province is Mount Fairweather (15,287 feet). The shore line of the Pacific is deeply indented with many inlets ideal for harbourage and with wonderful scenic aspects. With two ocean ports served by transcontinental railways British Columbia is well situated and equipped to carry on trade with the Orient, while its great stands of fir, spruce and cedar timber constitute a natural resource of great value. The province includes many islands of the Pacific, notably the Queen Charlotte group and Vancouver island; the latter, with an area of about 12,408 square miles, is noted for its temperate climate and abundant natural resources. The mines, timber, fisheries and agricultural resources of the province are remarkable for their quality and extent. The boundaries of the province extend from Alberta on the east to the Pacific ocean and Alaska on the west, and from the International Boundary northward to Yukon.

*Yukon and Northwest Territories.*—The vast area of 1,516,758 square miles is included within the boundaries of Canada's northern subdivisions, the Yukon Territory and the three provisional districts of the Northwest Territories. This is over twelve times the area of the British Isles, nearly half the area of the United States, and more than the combined areas of the Argentine Republic and Chile in South America. The northern territories are as yet, in parts, unexplored and excepting the main through water routes are still in many places unmapped in any accurate way. The territories are known to include mighty rivers like the Mackenzie and the Yukon and great inland bodies of water such as Great Slave and Great Bear lakes; but with the present paucity of accurate knowledge the potentialities of this great area are at present unknown. The many general indications of mineral wealth in the country together with the recent mineral discoveries in the Great Bear Lake-Coppermine River area suggest that the future may well reproduce the great gold rush to Yukon in 1897. Because a large portion lies within the Arctic circle the tendency has been to associate with the Northwest Territories thoughts of ice and snow, but as our knowledge is increased the argument steadily gains more weight that what have been regarded in the past as the great 'barren lands' of the north are more appropriately described as our great northern prairies. The opening of the port of Churchill, making the Hudson Bay coast of the district of Keewatin readily approachable, adds considerably to the transportation facilities, which previously have been confined to a regular steamboat summer route down the Mackenzie river. In the future it is likely that travel and transport by air will have a great influence in the further development of these territories, while a net of established radio stations already brings a large area within the realm of quick

communication. The production of minerals in Yukon in 1933 was valued at \$2,041,223, while the value of the production of furs in the Northwest Territories and Yukon in the 1932-33 season was \$1,241,281.

**Summary of Land and Water Area.**—The total land and fresh-water area of the Dominion, together with its distribution by provinces and territories, is shown in Table 1.

**1.—Land and Fresh-Water Area of Canada, by Provinces and Territories, as in 1934.<sup>1</sup>**

| Province or Territory.    | Land. <sup>2</sup> | Fresh Water. <sup>2</sup> | Total. <sup>2</sup> | Per cent of Total Area. |

<sup>1</sup>The salt-water areas of Canada are excluded.    <sup>2</sup>Approximate.

## Section 1.—Orography.

The conformation of the present surface of the North American continent admits of its apportionment, in Canada, into several orographic divisions. The exposed surface of the old Precambrian continent forms one of the largest divisions and has been called the Canadian Shield, the Archaean Peneplain and in its southern portion, the Laurentian Highland. The mountainous country of the west constitutes the Cordilleras, while the mountains of eastern United States, in their continuation across the border, form the Appalachian Highland of Eastern Canada. The Great Plains, with various subdivisions, occupy the area between the mountainous area of the west and the great roughened surface of the Canadian Shield. The St. Lawrence Lowlands lie between the Laurentian and Appalachian Highlands. Within the borders of the Canadian Shield an area on the southern margin of Hudson bay has been referred to as the "clay belt". It occupies a part of the basin that during the glacial period was submerged and covered with a coating of clay which smoothed over its inequalities and concealed most of the underlying rocks. Since its emergence the surface has been but slightly altered by drainage channels cut across it.

Orographical maps of Eastern and Western Canada, showing elevations above sea-level, will be found on pp. 8 and 10 of this volume.

**Canadian Shield.**—The portion of the Precambrian continent whose exposed surface still forms a large part of Canada has an area of about two and a half million square miles. Its northern border crosses the Arctic archipelago and the eastern lies beyond Baffin island and Labrador and reaches the depressed area occupied by

OROGRAPHY OF EASTERN CANADA AND LABRADOR.

the St. Lawrence river, a short spur or point crossing this valley at the outlet of lake Ontario to join the Adirondack mountains in New York. The southern boundary runs from this spur west to Georgian bay, skirts the north shore of lake Huron and sweeps almost around the ancient depressed area occupied by lake Superior. The western edge, from the lake of the Woods and lake Winnipeg, bears northwest to the western end of lake Athabaska, and passes through the basins occupied by Great Slave and Great Bear lakes, reaching the Arctic ocean east of the Mackenzie River delta. In detail, the surface features of the Canadian Shield are irregular, but, viewed broadly, it has the conformation of a great plain, depressed toward the centre and in the north and slightly elevated along the eastern and southern borders where it presents a rather steep outward slope. The general elevation in the eastern portion is under 2,000 feet and over the larger part of the plain is about 1,000 feet. The highest portion is along the northeastern margin, where it presents a steep face to the sea, rising to a maximum altitude of about 5,500 feet.

**Appalachian Region.**—The continuation of the Green mountains of Vermont into Canada may be traced in the Notre Dame mountains, which approach the St. Lawrence northeast of Quebec and, continuing with more easterly trend, form the highland of the Gaspé peninsula. Over a large part of the region, these hills hardly attain the dignity of mountains, but peaks rising more than 3,500 feet above the nearby coast are found in the Gaspé peninsula. The continuation of the White mountains of New Hampshire is found in the highlands of Maine and New Brunswick, the continuity being shown quite plainly by the rock-folding and other evidences of the great earth movements which caused the topography. An additional ridge apparently forms the present province of Nova Scotia, and although the highlands of that province do not attain elevations of even 1,500 feet, the rock structure indicates that it was a mountainous country at no very remote geological period.

**St. Lawrence Lowlands.**—The southern interior of the continent consists of a plain of low relief, bordered on the east by the Appalachian mountains, on the west by the Cordilleran Mountain systems, and on the north by the Laurentian plateau. This plain, in its Canadian portion, is known as the St. Lawrence Lowlands, and extends from a short distance below Quebec city to lake Huron, south of Georgian bay, having a length of 600 miles and an area of 35,000 square miles. To the northeast it becomes reduced in width, and in the vicinity of Quebec is represented by a narrow plateau or shelf on each side of the St. Lawrence river.

**Great Plains.**—A great area, including diverse features, lies to the east of the Cordilleras. The portion that is included under the term Great Plains extends from the southwestern edge of the ancient surface, forming the Canadian Shield, to the eastern edge of the mountainous region of the Cordilleras. This area is characteristically different from other parts of Canada in that any exposure of surface rock is rare. Generally, it is overlain by great depths of soil, through which the streams have cut themselves down into deep coulees and the rivers into deep wide valleys. Lakes of any considerable extent are infrequent and usually quite shallow; in the dry prairie section there are many places where the absorption from the broad and shallow bodies of water is so great that they have little or no outflowage and consequently the concentration of mineral salts in the water makes it unfit for domestic use. The terrain is generally smooth or gently undulating and with elevations of from 600 to 3,500 feet has a general upward slope toward the south and west where, rising more sharply in the foothills, the real ascent to the high mountains commences.

**Cordilleran Region.**—The western part of the American continent is more or less mountainous. The Andean chain, which extends throughout the length of South America and broadens out in the United States has, in Canada, an average width of about 475 miles. This region, covering about 530,000 square miles, is the most elevated in the Dominion, many of the summits reaching heights of 10,000 feet, with occasional peaks over 13,000 feet above sea-level. The mountainous tract forming the Cordilleras can be divided broadly into three parallel bands: a series of plateaus and mountains, comprised in the Columbia, Interior, Cassiar, and Yukon systems, forming the central part, referred to as the Central Belt; another series of parallel ridges east of the central plateaus, formed of fault rocks and folds and including the Rocky and Arctic systems, known as the Eastern Belt; and a third division between the plateau country and the Pacific, composed of the Pacific and Insular systems, called the Western Belt.

Table 2 shows the principal named Canadian Cordilleran peaks exceeding 11,000 feet in elevation.

**2.—Mountain Peaks over 11,000 Feet in Elevation, with Latitude and Longitude.**

NOTE.—The highest mountain in Eastern Canada, with the exception of the Torngats in Labrador peaks of which rise to about 5,500 feet, is Tabletop mountain (recently re-named Mount Jacques Cartier by the Geographic Board of Canada) in N. lat. 48° 59', W. long. 65° 56', Gaspé district, Quebec, the summit of which is 4,160 feet above sea-level.

<sup>1</sup>This peak is on the international boundary between British Columbia and Alaska.<sup>2</sup>The enumerated peaks in Yukon are on or near the Yukon-Alaska Boundary.

## Section 2.—Rivers and Lakes.

**General.**—The waterways of Canada constitute not only one of its most remarkable geographic features, but one of the most vital elements of its national existence. The fresh-water area of 228,070 square miles is unusually large, constituting over 6 p.c. of the total area of the country. The Great Lakes, with the St. Lawrence river, form the most important system of waterways on the continent and one of the most notable fresh-water transportation routes in the world. Their value in facilitating the cheap and speedy shipment of grain from the Prairie Provinces cannot be overestimated. These lakes never freeze over, but usually most of their harbours are closed by ice about the middle of December and remain frozen over until the end of March or the beginning of April.

**Drainage Basins.**—The great drainage basins of Canada are the Atlantic (524,900 square miles), the Hudson Bay (1,486,000 square miles), the Pacific (387,300 square miles), the Arctic (1,290,000 square miles) and the Gulf of Mexico (12,365 square miles). Table 3 indicates the drainage areas of the more important rivers.

## 3.—Drainage Basins of Canada.

NOTE.—Owing to overlapping and to the fact that minor basins are omitted, the totals of each drainage basin do not represent an addition of the drainage areas as given. Tributaries and sub-tributaries are indicated by indentation of the names. The Gulf of Mexico basin is that part of the southern area of the Prairie Provinces drained by the Missouri and Mississippi rivers and their tributaries.

<sup>1</sup> Added or revised since the publication of the 1933 Year Book.

**The St. Lawrence River System.**—Most important of the lakes and rivers of Canada is the chain of the Great Lakes with their connecting rivers, the St. Lawrence river and its tributaries. This chain is called the St. Lawrence River system. The Great Lakes, separating the province of Ontario from the United States and connected by a series of canals with the St. Lawrence river, allow vessels to proceed from the Atlantic ocean to the interior of the Dominion as far as Fort William and Port Arthur, twin cities situated on lake Superior, practically half way across the continent. The present waterway provides a draught of 30 feet as far as Montreal, 14 feet through the remainder of the St. Lawrence river and 20 feet on the Great Lakes.

**Other River Systems.**—Apart from the St. Lawrence, the great waterway of the eastern half of the Dominion, other systems also merit some attention. The Saskatchewan river, for example, flowing eastward from the Rocky mountains to lake Winnipeg and thence northward by the Nelson river into Hudson bay, drains a great part of the plains of the western provinces. In the north, the Mackenzie river, with its tributaries the Slave, Liard, Athabaska and Peace rivers, follows the northerly slope of the Great Plain and empties into the Arctic ocean, its waters having traversed in all a distance of 2,514 miles. The Yukon river, after draining a

great part of the Yukon Territory, flows northward through Alaska into the Behring sea after a course of 1,765 miles. The Fraser, Columbia, Skeena and Stikine rivers flow into the Pacific ocean after draining the western slopes of the mountains of British Columbia. Table 4 gives the lengths of the principal rivers with their tributaries, classified according to the course taken by their waters.

#### 4.—Lengths of Principal Rivers and Tributaries in Canada.

NOTE.—In this table the tributaries and sub-tributaries are indicated by indentation of the names. Thus the Ottawa and other rivers are shown as tributary to the St. Lawrence, and the Gatineau and other rivers as tributary to the Ottawa.

| River.                                          | Miles. | River.                                         | Miles.           |

<sup>1</sup> Added or revised since the publication of the 1933 Year Book.

**The Great Lakes.**—Table 5 shows the length, breadth, area, elevation above sea-level and maximum depth of each of the Great Lakes. Particularly notable are the depth of lake Superior and the shallowness of lake St. Clair and lake Erie.

**5.—Areas, Elevations and Depths of the Great Lakes.**

| Lake.          | Length. | Breadth. | Maximum Depth. | Area.         | Elevation above Sea-level. |
|----------------|---------|----------|----------------|---------------|----------------------------|
|                | miles.  | miles.   | feet.          | square miles. | feet.                      |
| Superior.....  | 383     | 160      | 1,180          | 31,810        | 602.29                     |
| Michigan.....  | 320     | 118      | 870            | 22,400        | 581.13                     |
| Huron.....     | 247     | 101      | 750            | 23,010        | 581.13                     |
| St. Clair..... | 26      | 24       | 23             | 460           | 575.62                     |

| Ontario.....   | 180     | 53       | 738            | 7,540         | 246.17                     |

Lake Superior, with an area of 31,810 square miles, is the largest body of fresh water in the world. As the international boundary between Canada and the United States passes through the centre of lakes Superior, Huron, St. Clair, Erie and Ontario, only a part of the areas of these lakes given in the above statement is Canadian, while the whole of lake Michigan is within United States territory. The total length of the St. Lawrence waterway, from the head of the St. Louis river in Minnesota to Pointe-des-Monts at the entrance of the gulf of St. Lawrence, is 1,900 miles. The tributaries of the St. Lawrence, several of which have themselves important tributaries, include the Ottawa river, 696 miles long, the St. Maurice river, 325 miles long, and the Saguenay (to head of Peribonka), 405 miles long.

**Other Inland Waters.**—In addition to the Great Lakes, there are large bodies of inland water in other parts of Canada. Of these only the following principal lakes, with their respective areas, need be mentioned: in Quebec, lake Mistassini (840 square miles); in Ontario, lake Nipigon (1,590 square miles); in Manitoba, lake Winnipeg (9,398 square miles), lake Winnipegosis (2,086 square miles) and lake Manitoba (1,817 square miles); in Manitoba and Saskatchewan, Reindeer lake (2,444 square miles); in Saskatchewan and Alberta, lake Athabaska (2,762 square miles). All these are within the boundaries of the provinces as at present constituted and are exclusive of lakes situated in the Northwest Territories, the largest of which are Great Bear lake (11,660 square miles) and Great Slave lake (11,170 square miles) in the district of Mackenzie.

Table 6 gives a list of the principal lakes of Canada by provinces, with the area of each in square miles. The table corresponds with the delimitation of the provinces as altered by the Boundary Extension Acts, 1912 (2 Geo. V, cc. 32, 40 and 45).

**6.—Areas of Principal Canadian Lakes, by Provinces.**

| Province and Lake.             | Area.            | Province and Lake.               | Area.         |
|--------------------------------|------------------|----------------------------------|---------------|
|                                | square miles.    |                                  | square miles. |

<sup>1</sup> Added or revised since the publication of the 1933 Year Book.

## Section 3.—Islands.

The islands of Canada are among its most remarkable geographic features. They include the numerous unsurveyed and little known areas of the Arctic regions, the fringe of both large and small islands off the Pacific coast, those of the Maritime Provinces and Quebec in the Atlantic ocean and the gulf of St. Lawrence, together with the islands of the Great Lakes and other inland waters. Of the Arctic islands, but little need be said. They are known to be of vast extent, Baffin, Victoria and Ellesmere, the three largest, being approximately 201,600, 80,450 and 75,024 square miles in area respectively, but Banks, Devon, Southampton, Somerset, Prince of Wales, Melville and Axel Heiberg are also of considerable size. Their economic possibilities, beyond scattered deposits of coal and other minerals, have not been established. The Pacific Coast islands, with the exception of Vancouver island and the Queen Charlotte group, are small and dot the western coast of British Columbia from Dixon entrance to the southern boundary of the province. Vancouver island is 285 miles long and from 40 to 80 miles broad, covering an area of about 12,408 square miles; the mountain range which forms its backbone rises again to form the Queen Charlotte islands farther north. These islands figure largely in the mining, lumbering and fishing industries of the West.

On the eastern coast of the Dominion are the island province of Prince Edward Island, the island of Cape Breton (an integral part of Nova Scotia), Anticosti and the Magdalen group (included in the province of Quebec) and the islands of Grand

Manan and Campobello (part of the province of New Brunswick) in the bay of Fundy. Prince Edward island is 2,184 square miles in area, Cape Breton 3,970 and Anticosti of about the same extent. Fishing activities in these eastern islands are important, while agriculture on Prince Edward island and mining on Cape Breton are among the chief occupations of the inhabitants.

Manitoulin island in lake Huron and the Thousand Islands group in the St. Lawrence river, at its outlet from lake Ontario, are the more important islands of the inland waters.

## PART II.—GEOLOGY.

### Section 1.—Geology of Canada.\*

The outstanding feature of Canadian geology is the vast area underlain by formations of Precambrian age. These occupy nearly the whole of Canada east of a line joining lake Winnipeg and Great Bear lake with the exception of the Maritime Provinces, the extreme southern parts of Ontario and Quebec, and a part of Ontario adjacent to the southern coast of Hudson bay. The Precambrian rocks are the oldest rocks exposed on the earth's surface, and the vast area which they underlie is one that has probably existed as a land mass throughout longer periods than any other part of Canada.

These ancient formations extend, with gentle sloping surface, in almost all directions beneath a mantling series of nearly flat-lying sedimentary rocks of Palæozoic, Mesozoic and Cenozoic age. These little disturbed sediments occupy southern Quebec, southern Ontario, the Prairie Provinces and the Northwest Territories. Some of them were at one time of much wider extent and covered part or all of the Precambrian area.

Towards the Atlantic and Pacific coasts the Palæozoic and later sediments together with the older rocks on which they rest and assemblages of volcanic rocks are intensely folded and faulted, forming the Appalachian system of mountains on the east and the great Cordillera, comprising nearly all of British Columbia and Yukon, on the west.

#### Subsection 1.—Topography.

The present topography of Canada is the temporary outward expression of a half continent which is subject to unceasing change. It is the result of the operation of geological processes at the surface of the earth or at depth throughout hundreds of millions of years. It derives from the injection of igneous rock masses in liquid form beneath the surface, the ejection of lavas and volcanic fragments of material, the deposition of sediments, the folding and faulting of rock formations and the disintegration of solid rocks and transportation of the products of disintegration by surface agencies. The slow rising and sinking of broad continental land masses and the upheaval and subsequent gradual levelling of mountain ranges are involved.

The great area in Eastern Canada underlain by rocks of Precambrian age is known as the Canadian (or Precambrian) Shield or the Laurentian Plateau. It may be regarded as a subdued plateau or perhaps, more strictly speaking, a peneplanated surface that has been rejuvenated by Pleistocene glaciation and uplift.

\*By Wyatt Malcolm, M.A., Geological Survey, Ottawa.

GEOLOGY OF EASTERN CANADA AND NEWFOUNDLAND.

Its average elevation probably does not exceed 1,500 feet, and, except in the north-east, there are few areas that exceed 2,000 feet. In general, the surface slopes gently to the surrounding plain and there are long stretches of the boundary in which there is no marked difference of elevation between the Precambrian Shield and the adjacent Palæozoic plain; there are other long stretches in which there is an abrupt rise of several hundred feet above the plain or the sea. The greatest known elevations are in the eastern part of Baffin island and along the coast of northern Labrador. Peaks of the Torngat mountains of Labrador have elevations of between 4,000 and 5,000 feet. The coast is one of the boldest and most rugged in the world, with nearly vertical cliffs rising 1,000 to 2,000 feet in height. Though the Canadian Shield is an area of low relief and has a remarkably even sky line, the surface is generally rugged with successions of rocky hills 100 to 200 feet high. Occasional exceptions occur in which there is a relief of several hundred feet, as in the hills on the north shores of lake Huron and lake Superior. The area is dotted with lakes, large and small, of irregular outline and with numerous islands. They are rock basins that spill their waters from one to another by streams with rapids and falls. In an area of 250 square miles in western Ontario that cannot be considered exceptional, aerial surveys have shown that there are 700 lakes. There are well-defined deep trenches like that occupied by lake Timiskaming, related to faulting or other structural features. The Saguenay river flows in a trench that descends to more than 800 feet below sea-level, and lake Superior, the largest body of fresh water on the face of the earth, fills a basin in the Canadian Shield that reaches about 400 feet below sea-level.

Extending south and west from the Canadian Shield and limited on the east by the Appalachian Mountain system and on the west by the western Cordillera of America, is the great North American plain. The northeastern part of this plain occupies southern Ontario south of a line extending from Georgian bay to the east end of lake Ontario, that part of eastern Ontario lying between the Ottawa and St. Lawrence rivers, and the part of Quebec lying adjacent to the St. Lawrence between Montreal and Quebec. The part of the plain west of the Canadian Shield is of wide extent, and stretches northward to the Arctic ocean between a line approximately joining lake Winnipeg, lake Athabaska, Great Slave lake and Great Bear lake on the east, and the foothills of the Rocky mountains on the west.

Although these areas are but parts of one great plain and are disconnected in Canada only because the Canadian Shield happens to project across the International Boundary in a narrow belt east of lake Ontario and in a wide zone between lake Huron and the lake of the Woods, they will, for convenience of treatment, be considered separately. Those parts lying in the basin of the St. Lawrence and the Great Lakes have been designated the St. Lawrence Lowlands, while the western area has been named the Interior Plains.

The part of the St. Lawrence Lowlands lying in the eastern angle of Ontario and in Quebec south of Montreal, and extending down the St. Lawrence, is comparatively flat and lies less than 500 feet above sea-level. On the lower St. Lawrence it is greatly narrowed by the near approach of the Appalachian system to the Canadian Shield. The part lying adjacent to lakes Ontario, Erie and Huron is of less even surface, has its greatest elevation of over 1,700 feet south of Georgian bay, and slopes rather gently to the Great Lakes. A striking topographical feature is the Niagara escarpment. This is an eastward-facing escarpment having a height of 250 to 300 feet and extending from the Niagara peninsula northwest to Bruce peninsula.

GEOLOGY OF WESTERN CANADA.

The Interior Plains region is in general a rolling country with broad undulations and a slope eastward and northward of a few feet per mile, descending from an elevation of 3,000 to 5,000 feet near the mountains on the west to less than 1,000 feet at its eastern border. The elevation of the Canadian Pacific Railway at Calgary is 3,439 feet and at Winnipeg 772 feet. The rolling character of the area is relieved by several flat-topped hills—erosion remnants rising hundreds of feet above the surrounding country, by flat areas that formed the beds of lakes of considerable extent, and by deeply incised river valleys. A striking feature is the broken escarpment of western Manitoba and eastern Saskatchewan, marking the rise of 400 to 1,000 feet from the Manitoba lowland to the upland of the west. A lowland of considerable extent stretches for some distance into Ontario and Manitoba from the south shore of Hudson bay.

The Arctic archipelago consists of large islands, many of which rise prominently from the sea as sloping table lands while others are comparatively low.

The Appalachian and Acadian regions occupy practically all that part of Canada lying east of the St. Lawrence, with the exception of the lowland west of a line joining Quebec city and lake Champlain. The Appalachian region is a continuation northward into the province of Quebec of three chains of the Appalachian system of mountains. The most westerly of these ranges stretches northeast into Gaspé peninsula, where it forms flat-topped hills over 3,000 feet high. Mount Jacques Cartier or Tabletop mountain has an elevation of 4,350 feet. The Acadian region, which includes New Brunswick, Nova Scotia, and Prince Edward Island, is an alternation of uplands and lowlands. The northwest part of New Brunswick is an upland with hills and ridges rising to 2,500 feet or higher. Adjacent to the bay of Fundy is a series of ridges rising in places to an elevation of 1,200 feet or more. Between these two New Brunswick uplands, which converge towards the southwest, is a lowland forming the whole eastern part of the province. This lowland extends east so as to include Prince Edward island, the western fringe of Cape Breton island and the mainland of Nova Scotia north of the Cobequid mountains, which have an elevation of 800 to 1,000 feet. South of them lies a long narrow lowland stretching from Chedabucto bay to Minas basin and along the Cornwallis-Annapolis valley between North and South mountains. South of this is a highland sloping to the Atlantic coast and having an elevation at its highest part of about 700 feet. The northern part of Cape Breton island is a tableland 1,200 feet high, with its central part rising to an elevation considerably in excess of this, one point at the headwaters of Clyburn and Cheticamp rivers being 1,747 feet above sea-level.

The Cordilleran region, the mountainous area bordering the Pacific, extends northward from the United States through Canada into Alaska, and embraces nearly all of British Columbia and Yukon, and the western edge of Alberta and the Northwest Territories. The eastern part of the Cordillera is occupied by the Rocky mountains. They consist of overlapping chains with peaks rising to heights of 10,000 to 12,000 feet. They extend northwest and fall away towards the Liard river. North of this river the mountains with a similar trend lie 100 miles farther east and are known as the Mackenzie mountains. The western part of the Cordillera is occupied by the Coast range and the mountains of Vancouver and Queen Charlotte islands. The Coast range rises to heights of 7,000 to 9,000 feet. Between the Rocky mountains and the Coast range lies a vast plateau system having elevations of 3,000 to 4,000 feet, and cut by deep river valleys. The plateau region merges into rugged mountain ranges as it approaches the Rocky mountains; it also breaks into mountains in northern British Columbia, but becomes subdued to a plateau

again in Yukon. A striking feature of the Cordillera is the deep trench that lies immediately to the west of the Rocky mountains, extends northwesterly from the International Boundary into Yukon and is occupied by the head waters of the Kootenay, Columbia and Fraser rivers, and tributaries of the Peace and Liard rivers.

### Subsection 2.—Geology.

**Canadian Shield.**—The Canadian Shield is underlain by rocks of Precambrian age. These consist of series of sedimentary and volcanic formations and igneous intrusives of great variety. They were subjected to mountain-building processes, folded, crushed and metamorphosed, and the mountains were reduced nearly to their present level before the earliest Palæozoic sediments were deposited. The Precambrian period was probably of greater duration than all the subsequent geological periods taken together.

Geologists do not agree on the main subdivisions of the Precambrian formations. There is one great unconformity, which represents a long period of erosion, and which divides the stratified rocks into two groups, the earlier group consisting of a great mass of volcanics with associated sedimentary rocks and the later group consisting more fully of sediments. The earlier group is greatly folded and altered; the later group has in general been less disturbed and altered.

In the earlier group the most important series is the Keewatin. The Keewatin consists essentially of lava flows accompanied in many places by tuffs and basic intrusives, and includes iron formation, which frequently is made up of thin layers of chert-like quartz, alternating with quartzose layers holding magnetite or hematite or both. Sedimentary rocks consisting of conglomeratic, sandy and slaty strata are frequently associated with the volcanics and are, in places, of considerable thickness and extent. They may underlie the volcanics, like the Couchiching of the Rainy Lake area; they may be interbedded with the volcanics, like the Doré formation of Michipicoten; or they may overlie the volcanics, like the Timiskaming formation of northeastern Ontario and western Quebec. Between the volcanics and overlying sediments of northeastern Ontario and western Quebec there is an unconformity that is regarded by some geologists as of major importance. The early Precambrian formations occupy numerous areas of various sizes up to several hundred square miles in western Quebec, northern Ontario, eastern and central Manitoba, and to a less degree in Saskatchewan and the Northwest Territories.

The later Precambrian formations consist in a large measure of sedimentary rocks—conglomerates, quartzites and slates. In an area lying immediately north of lake Huron and stretching northeast to beyond lake Timiskaming lies a succession of sediments known as the Huronian. These consist of: (a) the Bruce series, made up of conglomerates, quartzites and impure dolomitic limestone with an aggregate thickness of 2,700 to 12,000 feet; and (b) the Gowganda series, made up of boulder conglomerate and other materials probably of glacial origin, overlain by quartzite and calcareous quartzite, with an aggregate thickness of 12,000 feet. An erosion interval of considerable time intervened between the deposition of these two series. These strata are undulating with gentle dips except on the north shore of lake Huron and eastward, where they stand at high angles and represent the core of an ancient mountain range that probably flanked the southern edge of the continent.

North of lake Superior the later Precambrian rocks are represented by a group of nearly flat-lying sediments known as the Kaministiquian group. This group

embraces: the Animikie series of conglomerate, iron formation, and shale; the Sibley series of conglomerate, sandstone, limestone, and tuff; and the Osler series of lavas, conglomerate, sandstone and tuff.

In northwestern Manitoba the Precambrian formations are separated by an unconformity into an earlier Wekuskoan group of lavas and sediments and a later group of Missian sediments. Farther north in the Canadian Shield, the areas underlain by the complex of altered volcanics and sediments of early Precambrian age are fewer and smaller and are found on Great Slave lake, Great Bear lake, Ferguson river, and at Cape Smith and a few other places.

Strata, presumably of late Precambrian age, are known to occur on lake Athabaska, Great Slave lake, east of Great Bear lake, on Belcher islands, on the east of Hudson bay and at other points in the Ungava peninsula. In the southern part of Ungava peninsula sediments are found that bear a resemblance to the Grenville-Hastings group of southern Quebec and southeastern Ontario.

The Grenville-Hastings group consists of closely folded, highly altered sediments intruded by, and in places interleaved with, granite. They are in general rusty-weathering banded gneisses, quartzose gneisses grading into quartzites, crystalline limestones, amphibolites, pyroxene-rich rocks and volcanic schists. Pegmatite dykes are common and anorthosite occupies large areas. The Grenville-Hastings group forms a belt in the southern part of the Canadian Shield, extending east from Georgian bay. The formations have not as yet been indubitably correlated with the Keewatin and Huronian rocks to the north.

The Precambrian sediments have suffered intrusion at various times by granites. These have been unroofed at different stages in the history of the Precambrian, and pebbles of granite are found in the conglomerates as early as those of Keewatin age. So complete has been the unroofing of the granites that they are exposed over the greater portion of the Canadian Shield. Basic intrusives were common in later Precambrian times. Sills and dykes of diabase cut the late Precambrian sediments around lake Nipigon, to the west of lake Timiskaming and at many other points. A thick laccolith of norite and micropegmatite is found in the Sudbury district.

The Canadian Shield was intensely glaciated during Pleistocene times, and in general only a scant amount of soil was left, sufficient partially to conceal the rocks and maintain a forest growth. In some areas, as in part of northern Ontario and Quebec, adjacent to the Canadian National Railway, stratified fine sediments were deposited in lakes formed in front of the retreating glacier.

The Precambrian formations are prolific of mineral deposits of great number, variety and extent. These latter occur generally at or near the contact of the intrusives and the intruded rocks. Among them are the gold deposits of Porcupine and Kirkland Lake, associated with intrusions of porphyry, the silver deposits of Cobalt, South Lorrain and Gowganda, associated with diabase sills, the enormous nickel-copper deposits of Sudbury, associated with norite of a thick laccolithic intrusion, the auriferous copper sulphides of western Quebec, the copper-zinc sulphides of Manitoba, the pitchblende and silver deposits of Great Bear lake, and the iron ores and iron pyrites of many localities of Ontario; in the Grenville-Hastings area are found deposits of galena, mica, graphite, feldspar, magnesite, fluorite, kaolin, molybdenite, talc and apatite.

**St. Lawrence Lowlands.**—The St. Lawrence Lowlands are divided into two parts by an arm of the Laurentian Plateau that extends southward into New York State, crossing the St. Lawrence between Kingston and Brockville. They are

underlain by nearly horizontal Palæozoic sediments dipping gently away from the Canadian Shield and resting on the sloping surface of Precambrian rocks which, prior to the deposition of the Palæozoic strata, had been reduced to a physiographic condition similar to that existing on the Canadian Shield to-day.

The sediments are almost wholly of marine origin, consist mainly of limestone, magnesian limestone and shale, and range in age from late Cambrian to late Devonian.

In the Ottawa-Montreal division the latest strata are Ordovician; these, together with the Potsdam sandstone (Cambrian), have a thickness of about 6,000 feet. In the Great Lakes region of southern Ontario the Ordovician formations are succeeded upward by those of Silurian age and these in turn by strata of Devonian age. The Ordovician formations form a zone extending from Kingston to the Niagara escarpment and stretching northwest to Georgian bay and into Manitoulin island. The Silurian formations are exposed in the Niagara escarpment and westward in a belt 25 to 50 miles wide stretching northwest from Niagara peninsula into Manitoulin island. West of this nearly the whole of the area between lake Erie and lake Huron is underlain by Devonian limestones and shales. Each in turn is exposed over an area farther to the southwest than the older and underlying formation, so that in travelling westward from Kingston to Sarnia one passes over the bevelled edges of successively younger strata. Borings made at Courtright, in the township of Moore, show a thickness of nearly 4,260 feet of sedimentary rocks.

It is probable that the seas in which some of these sedimentary rocks were formed extended northward over the Precambrian rocks through Hudson bay into the Arctic ocean. The presence of outliers on lake St. John, lake Nipissing, and lake Timiskaming in the south, and on lake Nicholson west of Hudson bay, of broad areas of Ordovician, Silurian and Devonian formations south of Hudson bay, and of Cambrian, Ordovician, Silurian and Devonian formations on the islands of the northern part of Hudson bay and of the Arctic seas, is clearly indicative of wide submergence. On the Arctic islands formations of Carboniferous (with coal seams) and Triassic ages are widespread, and there are patches of Tertiary sediments (with lignite). Sediments of Cretaceous age with lignite are found in Moose River basin.

The St. Lawrence Lowlands were covered by the glaciers of Pleistocene time, and the bedrock is to a great extent concealed by thick deposits of glacial till. In places are found stratified deposits that formed in lakes at the edge of the retreating ice sheet. Marine deposits were laid down in an arm of the sea that extended up the St. Lawrence and Ottawa valleys to a point above Ottawa.

The only intrusives worthy of mention are the igneous rocks of alkali types that form the Monteregian hills in southern Quebec, Mount Royal and seven others to the east. They are circular or oval hills that rise 600 to 1,200 feet above the plain and appear to be stock-like bodies or fillings of conduits that may have led to volcanic vents or larger masses of intrusives.

The mineral deposits are such as are usually found in the less altered sedimentary rocks. Petroleum has been produced in southern Ontario for 70 years; natural gas has been produced for 40 years in the counties bordering on lake Erie; salt has been obtained for a great many years from thick beds lying at a depth of about 1,000 feet in the counties bordering on lake Huron and lake St. Clair; gypsum is produced in the Grand River valley; limestone and dolomite, utilized in chemical and metallurgical industries, are widespread; materials for construction, for brick, tile and cement manufacture are abundant.

**Appalachian and Acadian Regions.**—The Appalachian and Acadian regions are composed of geological formations ranging from Precambrian through Palæozoic to Mesozoic. The Palæozoic sediments pass upward from dominantly marine formations into dominantly continental formations. A complete succession is not found and there are several breaks in sedimentation.

Sediments, probably of Precambrian age, occur in southeastern Quebec, southern New Brunswick, northern Cape Breton island and on the Atlantic coast of the mainland of Nova Scotia. The thick series of slates and quartzites, known as the Gold-bearing series, forms a belt occupying a very considerable part of the mainland of Nova Scotia, faces the Atlantic coast and is probably of late Precambrian age.

During the Palæozoic period numerous disturbances took place in sedimentation; there were periods of uplift, of folding, and of erosion. Cambrian formations are found in southeastern Quebec, Ordovician formations are of extensive development in the Appalachian region from Vermont to Gaspé, Silurian and Devonian are well developed in Gaspé and the northwestern part of New Brunswick. Patches of Cambrian, Ordovician, Silurian and Devonian rocks are found in other parts of the Appalachian and Acadian regions.

The system of sediments most widely distributed in the Maritime Provinces is the Carboniferous. The formations are mainly of continental deposition although during Mississippian time a part of the area was submerged and received marine sediments. Towards the close of Devonian time there was a period of intense mountain building and igneous activity. Granite masses of large size were intruded in Nova Scotia and New Brunswick and of smaller size in Gaspé and southeastern Quebec. The upheaval was succeeded by intense erosion, and in early Carboniferous time granite masses were exposed by the removal of the overlying rocks.

The Carboniferous system occupies the triangular lowland forming much of the southeastern half of New Brunswick, the part of Nova Scotia north of Cobequid mountains, part of the lowland to the south of these mountains, southwestern and northeastern Cape Breton island and Prince Edward island. On Prince Edward island the Carboniferous may pass upward into the Permian. In the Carboniferous system are found the coal measures of Sydney and Glace bay, of Inverness, Pictou and Cumberland counties, Nova Scotia; and of the Minto coal field, New Brunswick. The extensive gypsum deposits and the salt beds of Nova Scotia and New Brunswick are found in a formation of Mississippian age, and the bituminous shales of New Brunswick and Nova Scotia are also of early Carboniferous age. The Carboniferous system has in places been subjected to folding and faulting, but considerable areas have suffered little disturbance since these sediments were laid down.

Sandstone and lava flows of Triassic age are exposed on the bay of Fundy, particularly on the south coast. North Mountain is composed of basic lava flows capping Triassic sandstone. During the Pleistocene period the whole of the Appalachian and Acadian regions, with the exception of the higher parts of Gaspé, was subjected to glaciation.

The most important economic minerals of the Appalachian and Acadian regions are coal, asbestos, and gypsum. Reference has already been made to the occurrence of coal and gypsum. Asbestos occurs in altered peridotite in southeastern Quebec. These are the most productive deposits of the world. Chromite also occurs in the peridotite. Auriferous quartz veins, mainly of the interbedded type, are found on domes and pitching anticlines of the gold-bearing series of Nova Scotia. Zinc-lead deposits occur in the Devonian shales and limestones of Gaspé peninsula, zinc-lead-

copper sulphides in the southern part of Cape Breton island in a series of lava flows, copper deposits in southern Quebec, and salt in Nova Scotia and southeastern New Brunswick.

**Interior Plains.**—The Interior Plains are underlain by a series of nearly horizontal sedimentary rocks of Palæozoic, Mesozoic and Tertiary ages. The Palæozoic rocks, consisting mainly of limestone, dolomite and shale of Ordovician, Silurian and Devonian ages, form a belt extending north through Manitoba and northwest through Saskatchewan and northeastern Alberta down the basin of the Mackenzie river. East of the Mackenzie, rocks of Cambrian age are exposed in an area of limited extent. The Palæozoic formations rest upon the gently sloping shelf of the Canadian Shield and pass westward with a dip of a few feet a mile beneath the shales and sandstones of Cretaceous age. The Cretaceous formations occupy nearly the whole of the plain from western Manitoba to the Rocky mountains and extend northward nearly to the Mackenzie river. There are also large parts of the Mackenzie basin, particularly of the lower half, in which the Devonian limestones are overlain by Cretaceous sediments. The Cretaceous sediments vary from shales predominantly of marine origin in the east to sandstones predominantly of continental origin in the west. Between the two are alternations of shales of marine origin with sandstones of brackish-water or fresh-water origin.

The Cretaceous beds are overlain in places by sediments of Tertiary age. The most extensive Tertiary formations are found in the hills of southern Saskatchewan and in a belt running north through central Alberta, where they lie in a broad syncline. Glacial till is widespread and clays were deposited in large lakes formed on the retreat of the ice-sheet. A large part of southern Manitoba formed the bed of glacial lake Agassiz.

The Interior Plains region is the great wheat-producing area of Canada. The mining of coal is one of the important industries; bituminous coal and lignite are produced in large quantities in Alberta and lignite in smaller quantities in Saskatchewan. The Cretaceous sediments are the reservoirs of great quantities of natural gas, and these and underlying formations are the source of the oil of the Turner Valley and other oil fields of Alberta. Oil has also been struck in the Devonian rocks north of Norman on the Mackenzie river. Gypsum is obtained from the Palæozoic rocks of Manitoba and also occurs in northern Alberta.

**Western Cordillera.**—In the western Cordillera is a very thick complete succession of sediments of Precambrian, Palæozoic, Mesozoic and Tertiary ages.

The Rocky mountains consist of a series of great fault blocks in which an enormous thickness of Palæozoic and Mesozoic sediments is exposed. Many thrusts of great extent have resulted in an over-riding of the Mesozoic sediments by the Palæozoic, and the erosion of the softer strata of the former has produced longitudinal valleys between the harder Palæozoic blocks. The Palæozoic formations consist mainly of limestones with less amounts of sandstone and shale. A succession with few breaks from the Cambrian through the Ordovician, Silurian, Devonian and Carboniferous is found, and probably extends with certain deviations throughout the length of the Rocky mountains and Mackenzie mountains. Between the Cambrian and Precambrian beds there is apparently little angular unconformity, but the variation horizontally in the Precambrian strata, on which the Cambrian formations rest, and a similar variation in the ages of the over-lying Cambrian strata furnish evidence of a long period of erosion. The Mesozoic strata consist of soft shales and sandstones some of which are coal-bearing. Strata of Triassic, Jurassic, and Cretaceous ages are represented.

The mountains to the west of the Rocky Mountain trench in southern British Columbia are composed of a series of late Precambrian quartzites, slates and magnesian limestones of great thickness. There are wide areas in the vicinity of granitic intrusives in which intensive alteration of these sediments has taken place. The Precambrian rocks extend west as far as Upper Arrow and Shuswap lakes and north from the International Boundary probably half the length of the province. Quartzites, mica schists and crystalline limestones with interbands and broad areas of schists of various kinds, and intrusive granite gneiss are found over a wide stretch of the Yukon plateau and are probably of Precambrian age. Slates, quartzites and conglomerates, also probably of the same age, occur along the northern part of the Alaska-Yukon boundary, in the Ogilvie range and in the Kluane district.

On the interior plateau of British Columbia, limestones, quartzites and argillites of Carboniferous age and known as the Cache Creek group are of wide distribution. These are succeeded upward by argillites and limestones and a great mass of volcanic intrusives and effusives of Triassic age, and these are succeeded by sediments and volcanics of Jurassic age. The Triassic and Jurassic formations are widely distributed, are found on the islands to the west, and some at least extend into Yukon.

Formations of Cretaceous age are found on Vancouver and Queen Charlotte islands and in a belt extending up the Fraser and along the eastern edge of the Coast range into the Skeena valley. They are mainly formations of continental origin and carry coal seams, but also include sediments of marine origin and volcanics.

Very early Tertiary times were characterized by widespread orogenic disturbances in the Cordillera. The Rocky mountains were formed and there was much folding and faulting in places in the interior, followed by intense erosion. Tertiary sediments, partly of continental deposition with seams of lignite and partly of marine deposition, occur at many points throughout the interior of the Cordillera and on Vancouver island. Lava flows capping some of these sediments cover broad stretches of the interior plateau.

In Pleistocene time, nearly the whole of the Cordillera with the exception of a large area in Yukon was subjected to glaciation, and glaciation still persists in the mountainous regions. Volcanics of recent age are found in areas of limited extent.

An episode of great economic importance in the geological history of the West was the intrusion of the granitic rocks of the Coast Range batholith and of acid rocks at different points in the interior, particularly in the southern part of British Columbia in Mesozoic times. Many of the more important mineral deposits of British Columbia, such as the copper deposits of Hidden Creek, Britannia and Allenby mountain, the gold-silver deposits of Salmon River district and the silver-lead deposits of the Slocan, had their origin in solutions given off by the magmas of these acid intrusives.

The lead-zinc deposit of the Sullivan mine lies in sedimentary rocks of Precambrian age. The Cretaceous and Tertiary formations carry seams of coal and lignite of great importance. There are economic deposits of other minerals in great variety throughout the Cordillera, and British Columbia is one of the leading mineral-producing provinces of Canada. The gold of the once famous Klondike region was found in placers of an unglaciated area and the gold of the Cariboo district occurs mainly in Tertiary placers that were unaffected or little affected by glaciation.

## Section 2.—Economic Geology of Canada, 1932 and 1933.\*

The purpose of this paper, continuing a series which has been published in the Year Book over many years, is to call attention to the most important reports and articles treating of the economic geology of Canada and published during 1932 and 1933. The particular articles here referred to, although recently published, do not necessarily contain the best and most complete information on the subjects treated. For further information it is advisable to consult the Dominion and Provincial Departments of Mines. The reference numbers appearing throughout the text indicate the publishers as listed at the end of this paper.

**Asbestos.**—In a bulletin of the Department of Mines of British Columbia, a description is given by A. M. Richmond of asbestos deposits of British Columbia. The available data upon these deposits is not encouraging; the fibre in general is unsuited for anything but the lowest grade products.

An examination of the geology and asbestos deposits of Thetford map-area, Quebec,<sup>1</sup> is made by H. C. Cooke. Cambrian sericite and chlorite schists, quartzite, basaltic lavas, and grey, green, and red slates, Ordovician black slates and impure quartzites, and post-Ordovician serpentinized dunite, peridotite, pyroxenite, and granite underlie the area. Alteration of the igneous rocks, faulting, the asbestos veins and other veins, and origin and localization of the asbestos deposits are described. Magnetometer observations made by A. H. Miller are also incorporated.

**Barite.**—In a bulletin of the Department of Mines of British Columbia, A. M. Richmond provides a description of barite deposits of British Columbia. Barite occurring in these deposits would have to be concentrated to be rendered suitable for industrial purposes; markets outside the province are difficult to reach on account of excessive haulage costs; and the United States tariff prevents shipping into that country.

**Chromite.**—A report is made by M. E. Hurst upon the chromite deposits of Obonga Lake area, Thunder Bay district, Ontario.<sup>3</sup> The basement complex, consisting of volcanics and sediments, is intruded successively by pre-Algonian peridotite, Algonian granite, granite gneiss and pegmatites, and Keeweenawan diabase. Keeweenawan dolomite also occurs in the area. The chromite deposits are associated with a lenticular mass of serpentine and are found close to the contact. The concentrations of chromite are of two types, disseminated and massive.

**Clays.**—A report upon some undeveloped clay deposits of British Columbia by A. M. Richmond, is presented in a bulletin of the British Columbia Department of Mines. There are many undeveloped common clay deposits suitable for the manufacture of common red brick. Summarized information concerning them and other clay deposits may be found in this report.

A comprehensive study of the clay and shale resources of Turner valley and nearby districts, Alberta,<sup>2</sup> is afforded by W. G. Worcester. The examination of these clay deposits was undertaken with the hope that clays and shales of a kind of quality to warrant their development along commercial lines might be found, thereby helping to provide a market for part of the gas now being wasted. Notwithstanding the many deposits of excellent red-burning shales in the area, their commercial development at this time is not to be recommended on account of lack of suitable transportation and uncertainty of markets for finished products.

\*Contributed by P. J. Moran, B.Sc., Geological Survey, Department of Mines, Ottawa.

"Some Clay Deposits of Willowbunch Area, Saskatchewan",<sup>1</sup> is the subject of a report by F. H. McLearn. Refractory and semi-refractory clays occur at two horizons. The lower is that of the Whitemud formation of late Cretaceous age and the higher that of the Willowbunch member of Palæogene age.

A description of the refractory clays of northern Ontario<sup>5</sup> is provided by W. S. Dyer and A. R. Crozier. The clays all belong to the Mattagami or Lower Cretaceous age and occur within a structural depression or basin, the boundaries of which have never been defined but which appear to cover at least 1,500 square miles of territory.

**Coal.**—B. R. MacKay describes the Corbin coal field, British Columbia<sup>1</sup> and the geology and coal deposits of the Crowsnest Pass area, Alberta.<sup>1</sup> The Corbin field is one of the smallest and at the same time one of the principal producing coal areas in southwestern British Columbia and has gained prominence on account of the great original thickness of one of its coal seams and the remarkable concentration of coal in a small area that has occurred through intense folding and faulting of the measures. The Crowsnest Pass coal area is one of the most important steam-coal producing districts in Alberta. The coals occur on the Lower and Upper Cretaceous ages; they are of bituminous rank and range in quality from poorly coking to strongly coking.

**Copper.**—Reports upon some of the mineral properties of the Taku district<sup>1</sup> and upon explorations between the Stikine and Taku rivers, British Columbia,<sup>1</sup> are made by F. A. Kerr. Practically all observed deposits are in the main replacement lenses of pyrite, sphalerite, chalcopyrite, and galena in volcanics.

An examination of the Nimpkish Lake quadrangle, Vancouver island, British Columbia<sup>1</sup> is made by H. C. Gunning. The most important mineralization is in Quatsino limestone in the immediate vicinity of intrusives. They are contact metamorphic deposits containing as valuable minerals, chalcopyrite, zinc-blende, sphalerite, galena, with minor amounts of grey copper, and low values in gold.

H. C. Gunning also presents a study of Buttle Lake map-area, Vancouver island, British Columbia.<sup>1</sup> Schistified zones in volcanics are mineralized by pyrite, chalcopyrite, sphalerite, galena with minor amounts of grey copper, and low gold and silver values. Native copper is found in volcanics at Coal creek.

A summary of the geology and mineral resources of northwest Manitoba<sup>1</sup> is furnished by J. F. Wright. Sulphide replacement bodies are found in volcanics, sediments, and sedimentary gneisses; gold quartz veins are found in volcanics, sediments, and in the granites. A detailed description of the geology and progress of development of all important prospects and mines in the area is given.

L. J. Weeks outlines the geology of Rankin Inlet area, west coast of Hudson bay, Northwest Territories.<sup>1</sup> On the south shore of Johnston bay a deposit of copper and nickel sulphides carrying traces of platinum occurs near the base of a lenticular mass of serpentinized basic intrusive.

A description of the Cape Smith sulphide deposits, upper east coast of Hudson bay, Quebec<sup>4</sup> is given by W. B. Airth. In the vicinity of a huge mass of gabbro intruding lava flows are found extensive deposits of massive sulphides containing pyrrhotite with minor amounts of pyrite, arsenopyrite, and chalcopyrite.

The geology of the southern part of Opimiska map-area, Quebec<sup>1</sup> is described by C. Tolman. The most important deposits so far discovered occur in compara-

tively narrow zones of shearing traversing volcanics and sediments or the intermediate and basic rocks intruding them. The metallic minerals are mainly chalcopyrite, pyrite, pyrrhotite, and magnetite.

E. L. Bruce presents a study of the geology and ore deposits of the Arntfield-Aldermac map-area, Beauchastel township, Quebec, in the Annual Report of the Quebec Bureau of Mines. The consolidated rocks of the northern part of the township are chiefly volcanic flows which are intruded by masses of quartz diorite, granitic rocks of various types, and diabase. In the southern part, occupied by the Kekeko hills the rock is conglomerate of the Cobalt series. Deposits of metallic minerals are of two kinds: (1) replacements of shear zones by gold-bearing pyrite and quartz; (2) massive sulphide bodies consisting chiefly of pyrite and pyrrhotite but containing some chalcopyrite and a little gold.

A study of the Waite-Ackerman-Montgomery property, Duprat and Dufresnoy townships, Quebec,<sup>5</sup> is made by J. E. Gill and N. R. Schindler. The known ore deposits occur in volcanics and consist of sulphide lenses arranged in a stack near a high angle fault.

H. W. Fairbairn briefly describes some recent developments in southern Quebec.<sup>1</sup> At South Stukeley, bornite and chalcopyrite are found disseminated in marble; at the Memphremagog mine, four miles east of Bolton, a massive sulphide body mostly pyrrhotite but containing a small amount of chalcopyrite, lies between a black slate and a fine grained igneous rock and copper-lead-zinc sulphides occur in the vicinity of Leadville on the west side of lake Memphremagog.

**Gold.**—The search for gold in Canada, which has been actively prosecuted for the past few years, is increasing in intensity as the demand for the metal becomes greater on account of the premium in currency which obtains for gold.

H. C. Cooke and W. A. Johnston present a concise résumé of the geology of lode and placer deposits in the Dominion,<sup>1</sup> and the gold industry of Canada is comprehensively reviewed by A. H. A. Robinson.<sup>2</sup>

H. S. Bostock provides a brief statement of the mining industry of Yukon, 1932<sup>1</sup> and upon a gold strike northwest of Carmacks, Yukon.<sup>1</sup>

Lode gold developments in British Columbia are summarized by J. D. Gallo-way and others in a bulletin of the Department of Mines of British Columbia.

A description of Whitewater gold belt, Taku River district, British Columbia,<sup>1</sup> is given by F. A. Kerr. In replacement zones in volcanics are found pyrite, stibnite, and arsenopyrite. Gold appears to be intimately associated with arsenopyrite.

An examination of the Zeballos River area, Vancouver island, British Columbia<sup>1</sup> is made by H. C. Gunning. Contact metamorphic deposits in sediments and volcanics carry copper and zinc; free gold is found in quartz or quartz and calcite veins associated with pyrrhotite, pyrite, arsenopyrite, zinc-blende, chalcopyrite and galena.

A report upon an examination of part of Cadwallader Creek mining area, Lillooet district, British Columbia<sup>1</sup> is written by W. E. Cockfield. Quartz veins containing minor amounts of sulphides, tellurides, and free gold are found in augite-diorite. The Pioneer and Bralorne properties are located in this area.

A summary of the gold deposits of Manitoba<sup>1</sup> is afforded by A. H. McLaren. The known mineral deposits of importance lie in schists close to granite bodies and consist of sulphide replacement bodies and gold-bearing quartz veins.

The geology and ore deposits of Island Lake and Oxford House areas<sup>1,5</sup> and of Amisk Lake area, Manitoba<sup>1</sup> are indicated by J. F. Wright. Quartz veins carrying free gold and small quantities of sulphides and schistose rock carrying disseminated sulphides are found in the areas.

The vicinity adjoining Rice lake, Manitoba, is occupied by an irregular wedge-shaped roof pendant of metamorphic sedimentary and igneous rocks, enclosed within granite and granite gneiss, all of Precambrian age. A description of the San Antonio mine<sup>5</sup> in this area is given by J. A. Reid and D. J. Kennedy. Free gold associated with pyrite is found in quartz stringers, lenses, and veins in carbonized greenstone.

Available information upon metalliferous possibilities of the mainland portion of the Northwest Territories, outside of Great Bear Lake area,<sup>1</sup> is summarized by C. H. Stockwell and D. F. Kidd.

M. E. Hurst provides a description of the geology of the Sioux Lookout area,<sup>3</sup> Kenora district, Ontario. Sediments and greenstones are invaded by small bodies of quartz porphyry, syenite, and diorite. Mineralization occurs in the form of quartz veins or pyrite replacement zones occupying fractures or shear zones in the greenstones and sediments.

A preliminary study of the Kowkash-Ogoki gold area, Thunder Bay district, Ontario<sup>3</sup> is made by L. F. Kindle. Gold is found in sheared veins of quartz occupying fissures passing through Keewatin greenstones in which rhyolite and iron formation are commonly interbedded, and in mineralized quartz veins which impregnate quartz and feldspar-porphyry dykes. The deposits are generally a combination of these two types. Silver, copper, and iron are also found in the vicinity.

E. S. Moore reports upon the Goudreau and Michipicoten gold area, Algoma district, Ontario.<sup>3</sup> Quartz and sometimes carbonate and quartz fissure veins carrying gold values occur in sheared portions of greenstone and acid lavas and in sheared and brecciated parts of Algonian intrusives.

The geology of the McIntyre mine, Porcupine area, Ontario, by H. G. Skavlem is incorporated in an article entitled "The Story of McIntyre".<sup>6</sup>

The outstanding features of Hollinger geology<sup>5</sup> are indicated by L. C. Gratton and H. E. McKinstry.

A study of the Tyrell-Knight area, Timiskaming district, Ontario,<sup>3</sup> is made by A. R. Graham. Gold-quartz veins are found filling shear zones in volcanics adjacent to granodiorite or dyke rocks.

Bannockburn gold area, Matachewan district, Ontario<sup>3,5</sup> is the subject of papers by H. C. Rickaby. Quartz veins of the fissure type carrying gold values are found in fractures and faults of small displacement mostly in greenstone and close to intrusives.

The geology of the Swayze area<sup>3</sup> and its westward extension<sup>3,4,5</sup> are described by G. D. Furse and H. C. Rickaby. The essential features of all discoveries appear to be favourable structures in form of fractures or shear zones in lavas or sediments combined with the proximity of porphyry or granite intrusions. Gold-bearing quartz veins mineralized with minor amounts of chalcopyrite, galena, sphalerite, and molybdenite are found in the vicinity. Some gold showings are spectacular.

In a report entitled "The Geology of Three Duck Lakes Area, Sudbury District, Ontario",<sup>3</sup> H. C. Laird states that narrow gold-bearing quartz veins occupy well-defined fractures or 'breaks' in the younger granite, or in quartz veins along the contact between an acid intrusive and a basic dyke, commonly lamprophyre.

A description of the geology of the townships of Janes, McNish, Pardoe, and Dana, Sudbury district, Ontario,<sup>3</sup> is given by E. L. Bruce. Veins containing some gold are found in diabase.

R. C. Rowe describes the geology of the Kenty gold prospect,<sup>4</sup> as consisting of Keewatin lavas, bounded north and south by steeply folded ancient sediments, which have been intruded by a large mass of porphyry. The gold-bearing veins occur in a fracture zone which has an approximate length of 500 feet and a width that has not yet been determined. Visible gold is partly associated with tourmaline or pyrite and sometimes it occurs within the quartz and sometimes in quartz crystals.

"Gold Prospecting, Rouyn-Bell River Region, Quebec"<sup>4</sup> by A. H. Lang, provides a popular summary of existing knowledge of gold deposits in this vicinity.

R. C. Rowe describes the geology, mining methods, and milling practice at the Beattie gold mine, Duparquet township, Quebec.<sup>4</sup>

J. J. O'Neil presents the results of a detailed investigation of the Beattie gold mine, in the Annual Report of the Quebec Bureau of Mines. Keewatin lavas and tufaceous sediments, intruded by syenite porphyry and bostonite porphyry, occupy the vicinity. The main Beattie ore body lies on the north border of the syenite porphyry in a sheared zone which is partly in the syenite porphyry and partly bordering bostonite porphyry.

The geology and ore deposits of Palmarolle and Taschereau map-areas, Abitibi county, Quebec<sup>1</sup> are described by A. H. Lang. Mineral deposits discovered to date are quartz veins, shear zones, and replacements, containing disseminated sulphides. A description of the geology of the Beattie mine is incorporated.

A description of the gold deposits of Pascalis and Louvicourt townships, Abitibi county, Quebec,<sup>5</sup> is given by L. V. Bell. The more important deposits may be divided into two classes as follows: quartz-tourmaline veins carrying pyrite and gold and silicified, carbonated, and pyritized bodies carrying gold.

J. E. Hawley gives a description of the Siscoe gold deposit, Dubuisson township, Quebec.<sup>5</sup> The deposits consist of auriferous quartz-tourmaline veins of the fissure-filled type occurring in altered granodiorite.

A detailed description of the gold and copper deposits of Dubuisson township, Quebec, by J. E. Hawley, appears in the Annual Report of the Quebec Bureau of Mines. Gold quartz veins are found in or close to small stocks or tongues of granodiorite or related rocks and in fractures in Keewatin rocks near the intrusive. The veins consist of the following types: quartz and tourmaline, quartz-pyrite-carbonate, quartz-chalcopyrite, and quartz-pyrite-galena-carbonate.

E. A. Goranson describes the mineral deposits of New Ross, Indian Path, Middle River, and Meat Cove, Nova Scotia.<sup>1</sup> At Middle River, auriferous quartz veins occur in metamorphosed, arenaceous, and argillaceous sedimentary rocks which are probably of Precambrian age; manganese mineralization occurs along steeply dipping fissures in a porphyritic biotite granite at New Ross; the Indian Path scheelite deposit occurs in quartz veins near the crest of an anticline. The country rocks are slates and argillites.

**Gold Placers.**—An article by W. E. Cockfield is written upon the geology of placer deposits.<sup>5</sup> The requisites for formation of placer deposits are: the occurrence of gold in veins or lodes in the country rock, a period of erosion during which

the gold is set free from the country rock, concentration of gold by some agency, but chiefly that of running water, and freedom from glaciation. The last requisite although not absolutely essential is at least highly desirable.

The mining industry in Yukon and parts of northern British Columbia in 1930<sup>1</sup> is summarized by W. E. Cockfield. Dredges are operating in the Klondike district and Sixtymile area, Yukon; placer developments are continued on Otter creek, and Pine creek, Atlin district, British Columbia and the Mayo district, Yukon, furnished the only production from lode mining during the year. An account of a number of operating lode deposits in the Yukon and Atlin districts is given, including latest developments at the Engineer and Ruffner properties.

In a report by H. S. Bostock upon the Livingston placer camp, Yukon,<sup>1</sup> a description of the various creeks and factors that led to the formation and preservation of the deposits are provided.

Douglas Lay in a bulletin of the British Columbia Department of Mines, makes some comments upon the McConnell Creek placer area, British Columbia, in which fine gold and platinum are found. The placer ground at present receiving attention is a concentration of glacial deposits.

Placer and lode gold deposits at Barkerville, Cariboo district, British Columbia, by W. A. Johnston and W. L. Uglow<sup>1</sup> provides a summary of information concerning known gold deposits in the vicinity.

The geology and placer deposits of Quesnel Forks area, Cariboo district, British Columbia,<sup>1</sup> are described by W. E. Cockfield and J. F. Walker. Placer gold is found in ancient stream or pre-glacial gravels, in glacial gravels, in interglacial deposits, and in post-glacial gravels. A description of deposits occurring in the various streams is given.

A study of the geology of the Brisco-Dogtooth map-area, British Columbia,<sup>1</sup> is submitted by C. S. Evans. Late Precambrian to Devonian strata are exposed within the map-area. The only igneous rocks observed are thin flows of Lower Cambrian age and several highly altered beds of volcanic origin occurring in late Precambrian strata. Placer gold and lead-zinc deposits are found in the vicinity.

Articles upon the mineral possibilities of northern Okanagan<sup>1</sup> and the Monashee Creek placers<sup>4</sup> are written by C. E. Cairnes. Placer gold values are found in several creeks; developments upon bench leases on Monashee creek have been encouraging.

An examination of some mineral occurrences in the vicinity of Cranbrook, British Columbia<sup>1</sup> is made by C. E. Cairnes. Placer gold, gold-quartz, silver-lead-zinc, and copper-gold deposits, magnesite, and ornamental stone occur in the area.

**Iron.**—A study of a deposit of titaniferous magnetite near Burmis, Alberta, by J. A. Allan, appearing in the Annual Report of the Research Council of Alberta, indicates that the quantity of iron rock is relatively small and that the occurrence cannot be regarded as a commercial deposit at the present time.

W. M. Goodwin describes the results of a magnetic survey of Steeprock lake, Ontario,<sup>4</sup> made by Julian Cross. The evidence of the survey appears to indicate that two bodies of hæmatite lie beneath the surface of the lake.

M. E. Hurst provides a description of a deposit of titaniferous magnetite in Angus township, Nipissing district, Ontario.<sup>3</sup> The body of diabase in which the deposit lies is a "Y" shaped mass about four miles long and from one half to one and a half miles wide. It is surrounded by granite gneiss.

A study of the genesis of the ilmenite deposits of St. Urbain, Charlevoix county, Quebec,<sup>7</sup> is made by Joseph L. Gillson. The author concludes that the ores were formed by replacement in the already solid anorthosite and were deposited from solutions, either gaseous or liquid, which soaked through the rock.

**Lead.**—A report is made by H. C. Gunning upon the H.P.H. group, Nahwitti lake, Vancouver island, British Columbia.<sup>1</sup> Mineralization of the replacement type occurs in limestone. The most important and common type consists of galena and sphalerite; in some places small quantities of pyrite, pyrrhotite, and chalcopyrite are present.

The Clearwater River and Foghorn Creek map-area, Kamloops district, British Columbia,<sup>1</sup> is described by J. F. Walker as being underlain by argillaceous, arenaceous, and calcareous sediments, showing varying degrees of metamorphism, and intrusive granodiorite, granite, greenstone, and numerous granitic dykes and sills. The sedimentary rocks are of Precambrian, Paleozoic, and Tertiary age; the intrusive rocks appear to be Mesozoic. Most of the mineral deposits occur in sedimentary rocks and consist of small quartz-sphalerite-galena veins and small replacements and disseminations of sphalerite and galena in quartzose sediments. There is one occurrence of chalcopyrite with pyrite in the bedded quartz veins and disseminations in the adjacent country rock. Fluorspar and celestite occur as disseminated replacements in the contact phase of an aplitic intrusion.

**Manganese.**—A compilation of available information upon manganese in Canada<sup>1</sup> is presented by George Hanson. The known manganese deposits of the Dominion are confined chiefly to the Maritime Provinces and to British Columbia. In other parts of Canada there are only a few small non-commercial bog deposits.

**Molybdenite.**—The Annual Report of the Quebec Bureau of Mines contains a report by J. E. Hawley upon molybdenite deposits of Lacorne township, Abitibi county, Quebec. The bed rocks of the area consist of pre-Keewatin sedimentary and hornblende schist, Keewatin volcanics, and pre-Cobalt intrusives. The molybdenite occurs in quartzose to feldspathic veins or pegmatites.

**Nickel.**—A preliminary report upon the geology of Great Slave Lake-Coppermine River area, Northwest Territories,<sup>1</sup> is provided by C. H. Stockwell. Precambrian volcanics, sediments and intrusives are found in the area. A nickel-cobalt deposit east of François river and other mineralization found in the area are described.

A paper upon the origin of the Frood ore deposit, Sudbury district, Ontario,<sup>7</sup> is submitted by B. C. Freeman. Mr. Freeman concludes that the Frood ore is not in norite but in reorganized greywacke gabbro and greenstone, that the rocks were altered by ore-depositing agencies, which caused the formation of hornblende, biotite, quartz and andesine, that the four main ore minerals—chalcopyrite, cubanite, pyrrhotite and pentlandite—were formed essentially simultaneously and that the ore body is a magmatic deposit, but it is not wholly the result of crystallization from the melt.

**Oil and Gas.**—The oil possibilities of Soda creek and Quesnel, Cariboo district, British Columbia,<sup>1</sup> are described by W. E. Cockfield. The chief interest from the point of view of petroleum and natural gas production lies in the rocks of the Fraser River formation of Tertiary age. As all the evidence points to a freshwater origin for the rocks of this formation and as there is no evidence of closely associated marine sediments which may have served as a source of oil, it must therefore be

concluded that the chances of securing commercial supplies of petroleum are not very bright. It is possible some natural gas may be found but it is unlikely that large supplies exist.

A detailed report upon the Milk River area and the Red Coulee oil field, Alberta, is submitted by C. S. Evans.<sup>1</sup> The rocks in the area range from Jurassic to Upper Cretaceous. Logs of wells drilled in the area are incorporated.

B. R. MacKay presents a study of the Mesozoic-Palaeozoic contact and associated sediments, Crowsnest district, Alberta, and British Columbia.<sup>1</sup> Operations carried on in Turner valley and other oil fields in Alberta have demonstrated that oil occurs in both the Mesozoic and Palaeozoic measures and that one of the most important horizons is at or near the Mesozoic-Palaeozoic contact. With the object of gradually accumulating data pertaining to the nature and extent of any unconformities that exist and the changes in thickness and lithological character of the associated sediments that takes place, this examination has been undertaken.

A preliminary study of the oil and gas possibility of the Waterton Lakes-Flathead area, Alberta, and British Columbia,<sup>1</sup> is made by G. S. Hume.

The stratigraphy and structure of the east portion of the Blood Indian Reserve Alberta,<sup>1</sup> is indicated by Loris S. Russell.

A detailed description of oil prospects of Fisher Creek, Two Pine, and Birch Ridge structures, eastern foothills of Alberta,<sup>1</sup> is given and the oil prospects of Great Slave Lake and MacKenzie River areas, Northwest Territories<sup>5</sup> are summarized by G. S. Hume.

An inventory of available data upon oil and gas in Eastern Canada<sup>1</sup> is also made by G. S. Hume. A chapter upon the origin of oil and gas is followed by a comprehensive description of the southern Ontario oil fields; physical features, stratigraphy, structural geology, history of development, and relation of oil and gas production to the stratigraphy are summarized. The stratigraphy, structural geology, and oil and gas prospects of the Moose River basin, the Eastern St. Lawrence region, the Gaspé peninsula and the Maritime Provinces is also described.

**Phosphate.**—L. Telfer presents a paper upon phosphate in the Canadian Rockies.<sup>5</sup> During Palaeozoic time there were deposited in the Canadian Rockies four beds of phosphate rocks, ranging in age from Mississippian to Jurassic. Two of these beds are of probable economic importance if some means of separating the phosphate from the gangue can be devised.

**Radium.**—H. V. Ellsworth presents a comprehensive treatise upon rare-element minerals of Canada.<sup>1</sup> The chemical and physical properties of metals in this group are stated, the geology is outlined, and the Canadian occurrences indicated. Of especial interest at the present time are two chapters upon radioactivity, radio-elements, and radioactive minerals as geological age indicators.

Accounts of the Great Bear Lake and Coppermine River areas, MacKenzie district, Northwest Territories<sup>1,4,5,7</sup> are given by D. F. Kidd. Copper is found as disseminated native copper in basalts, as amygdaloidal copper in tops of volcanic flows, as sheet native copper in cracks in the basalt, and in large quartz veins in volcanic rocks of the Coppermine River series. Pitchblende associated with silver and silver deposits without pitchblende are found in shear zones in folded sediments and volcanics.

Hugh S. Spence provides a description of the character of the pitchblende ore from Great Bear lake, Northwest Territories.<sup>4,2</sup> Spence classifies the vein types occurring in the areas as: pitchblende-quartz veins, silver-carbonate veins, silver-cobalt-carbonate veins, and cobalt-bismuth-quartz veins.

J. A. Reid also provides a statement upon the geology and mineralization of the Echo Bay region, Great Bear lake, Northwest Territories.<sup>4</sup>

Christopher Riley points out some mineral relationships in the Great Bear Lake area, Northwest Territories.<sup>4</sup> Precambrian volcanics and sediments are intruded by diorite, granite, granite porphyry, rhyolite porphyry, quartz veins, and basic dykes and sills. The most favourable prospecting ground is near the contact of the granites and sedimentaries and volcanics.

**Salt.**—A short article entitled the "Salt Deposits of Nova Scotia and New Brunswick",<sup>1</sup> by G. W. H. Norman, deals with all known deposits of salt in the Mississippian rocks in these provinces. It is pointed out that further deposits may be established by drilling.

**Silica.**—A bulletin of the British Columbia Department of Mines includes a survey by A. M. Richmond of the possibilities of manufacturing bottles and glassware in the province. Deposits of fuel, lime, and sodium salts suitable for glass manufacture exist; deposits of silica sand suitable for glass-making have not yet been found close to transportation.

**Silver.**—The geology of the Bowser River area, Portland Canal district, British Columbia,<sup>1</sup> is described by George Hanson. Those in American Creek area are in the main of the silver-lead type carrying gold values. The deposits of Bowser River country appear to contain more gold than those in the American Creek area.

C. E. Cairnes provides studies of Lightning Peak area, St. Paul group of mineral claims, and mineral deposits of Aberdeen mountain, Osoyoos district, British Columbia.<sup>1</sup> Attractive mineralization, containing important percentages of lead, zinc, and gold values in small amounts, is found in the Lightning Creek area. Quartz veins occur carrying in places free gold and in other places high values in silver and some gold in the St. Paul group.

Aberdeen mountain is underlain by dark grey argillaceous beds interbedded with quartzite strata, limestone, tuffs, and beds resembling conglomerates. Overlying this assemblage of stratified rocks is a wide belt of igneous rocks chiefly of volcanic origin. A quartz ledge carries galena, pyrite, and chalcopyrite.

Some notes on Wallace Mountain camp, Beaverdell area, British Columbia<sup>5</sup> are provided by A. W. Davis. Ore deposits, in which high grade silver predominate, occur in shear zones in quartz diorite. In some cases there is an abundance of pyrite and ruby silver, in others much galena, and in still others quartz is the main constituent.

**Water.**—D. C. Maddox affords a summary of the Darmody-Riverhurst artesian area, southern Saskatchewan.<sup>1</sup> With exception of a few scattered outcrops of Cretaceous shales and sandstones, the area is underlain by glacial deposits. The limits of the artesian area, general structural conditions, and water levels are outlined. A list of wells in the area is appended.

R. T. D. Wickenden submits a study of interglacial deposits in southern Saskatchewan.<sup>1</sup> The interglacial sands and gravels are of importance as a source of ground water supply at many places, for example at Regina, where the city supply is derived from deposits of this character.

Ground water resources of Moose Jaw, Saskatchewan<sup>1</sup> is the title of an article by W. A. Johnston and R. T. D. Wickenden. The surface deposits of the area are the unconsolidated, chiefly glacial deposits which overlie consolidated or partly hardened rocks. The water resources of the clay plain were investigated to some extent as well as those in the vicinity of Moose Jaw. It was found that these were limited in general, but that there is a large artesian water area lying between Moose Jaw and the southern Saskatchewan river. This area may prove to be of importance as a future source of supply not only to Moose Jaw but for the clay plain in general.

A study of artesian water areas of the west half of Rush Lake and the east half of Elbow quadrangles, southern Saskatchewan<sup>1</sup> is provided by D. C. Maddox.

**Miscellaneous.**—J. P. Messervey, in the report of the Nova Scotia Department of Public Works and Mines, surveys operations up to date in the exploitation of antimony deposits in Nova Scotia.

The results of an examination by J. A. Allan of a Paskapoo sandstone at Oliver quarry in the vicinity of Cochrane, Alberta, appearing in the Annual Report of the Research Council of Alberta, indicates a satisfactory building stone.

"Feldspar"<sup>2</sup> by Hugh S. Spence, affords a recent study of the occurrences, and production of feldspar in Canada and foreign countries.

In the Annual Report of the Research Council of Alberta, J. A. Allan describes the gypsum deposits near Mowitch and Rock creeks, Jasper Park, Alberta. The gypsum occurs in lenses in steeply dipping Triassic strata.

B. R. MacKay describes phosphate as being found in several localities in the Crowsnest district, B.C., and Alberta<sup>1</sup> at or near the base of the Fernie formation, Jurassic age. The deposit has its greatest development on the borders of the Fernie coal basin and near Crowsnest station has been opened up by a tunnel over 2,000 feet in length. The grade of the deposit, however, is too low to warrant development at the present time.

### PART III.—SEISMOLOGY IN CANADA.

An article on Seismology in Canada, by Ernest A. Hodgson, M.A., appeared at p. 37 of the Canada Year Book, 1931.

### PART IV.—THE FLORA OF CANADA.

Under the above heading the Canada Year Book, 1922-23, contained an article prepared by the late J. M. Macoun, C.M.G., F.L.S., and M. O. Malte, Ph.D., and revised by the latter. See p. 25 of the 1922-23 edition or p. 73 of the 1921 edition.

### PART V.—FAUNAS OF CANADA.

The Canada Year Book, 1922-23, contained an article under the above heading by P. A. Taverner, of the Department of Mines, Ottawa. See p. 32 of the 1922-23 edition or p. 82 of the 1921 edition.

### PART VI.—THE NATURAL RESOURCES OF CANADA.

The economic life of new countries must at first depend entirely, and later mainly, upon their natural resources. Older countries, after exhausting their most

easily obtained resources, turn for a livelihood to manufacturing and similar pursuits, conserving their remaining resources and utilizing those of less developed areas as far as practicable.

Canada is distinctly a new country, and her resources are for the most part in the early stages of development. The fur, fishery and forest resources have, it is true, been the basis of trade for two or three hundred years, but exploitation on the present commercial scale is of relatively recent growth. A notable feature, especially in so young a country, has been the effort directed to conservation and, in the cases of those resources which admit of such methods, the actual replenishment or augmentation of the sources of supply by the practice of reforestation, silviculture, fur-farming or the establishment of fish hatcheries.

In recent years numerous surveys and investigations of the extent and value of the resources have been made. A short summary of important details regarding them follows. Fuller information will be found in the introductions to later chapters—Agriculture, Furs, Fisheries, Forestry, Minerals, Water Powers—of this volume.

**Agricultural Lands.**—Of the total land area of the nine provinces (1,282,067,200 acres), it is estimated that approximately 352,157,190 acres are potential agricultural lands, including grazing lands associated with farm lands. The estimate is based on the best information available, which, for the more northerly parts, is uncertain; the total is made up by adding to the area now occupied by agriculturists all lands considered to be possible of devotion to similar purposes. The area at present under cultivation is but a fraction of this total, the extent under field crops in 1934 being 56,042,420 acres, while the total area under pasture in the same year was 8,353,400 acres. Statistics of farm lands at the Census of 1931 place the area then occupied at 163,114,034 acres; the area of what may be considered as agricultural land still available for occupation was, therefore, 189,043,156 acres. In Yukon and the Northwest Territories there were 5,197 acres in occupied farms in 1931, while it is officially estimated that there are 9,000,000 acres of potential agricultural land. Thus the total area of occupied farms in the Dominion in 1931 was 163,119,231 acres and that of potential agricultural land 198,043,156 acres, making a grand total of 361,162,387 acres of agricultural land out of the total land area of 2,218,747,200 acres. Details are given by provinces in Table 7.

**7.—Area of Occupied and Estimated Potential Agricultural Lands in the Nine Provinces and in all Canada, 1931, with Estimated Land Area, 1935.**

| Province.                            | Area Occupied.                 | Area Available for Occupation. | Total Potential Agricultural Land. <sup>1</sup> | Total Land Area, 1935.           |
|--------------------------------------|--------------------------------|--------------------------------|-------------------------------------------------|----------------------------------|
|                                      | acres.                         | acres.                         | acres.                                          | acres.                           |
| Prince Edward Island.....            | 1,191,202                      | 66,988                         | 1,258,190                                       | 1,397,760                        |
| Nova Scotia.....                     | 4,302,031                      | 3,789,969                      | 8,092,000                                       | 13,275,520                       |

<sup>1</sup>These estimates have been made by the Topographical Survey, Department of the Interior.

<sup>2</sup>Subject to revision. <sup>3</sup>These figures have been revised since the publication of the 1933 Year Book.

Thus, in all the provinces but Prince Edward Island, large areas are still available for settlement, and while the nature of the soil and of the climate may in some cases restrict the variety of crops, in general the grain, root and fodder crops can be profitably grown in all the provinces, while stock raising is carried on successfully both in the more densely settled areas and beyond their frontiers.

The Maritime Provinces are noted for their fruit and vegetable crops, particularly for the oat and potato crops of Prince Edward Island and New Brunswick, and the apples of the Annapolis valley in Nova Scotia. Quebec and Ontario are pre-eminently mixed-farming communities, various districts specializing in dairying, tobacco, sheep, etc., while the Niagara peninsula in Ontario has long been famous for its fruit crops of both large and small varieties. In Manitoba, Saskatchewan, and Alberta the production of grains, especially wheat, is still of primary importance but is giving way to more diversified types of agriculture, while the stock-raising industry, once so typical of the prairies, is regaining much of its former importance. In British Columbia the fertile valleys are devoted principally to apple and other fruit crops, and numerous districts along the coast and on Vancouver island are given over to general farming and market gardening.

Of the larger areas of land still available for settlement, the clay belt of northern Ontario and Quebec, which is suited to the growing of splendid crops, is to a large extent undeveloped, and even larger areas in northern Saskatchewan and Alberta await cultivation.

**Forests.**—The forests of Canada rank second only to agriculture in their contribution to the national income. It is estimated that forest products make up about 15 p.c. of all the freight hauled on Canadian railways, and the heavy excess of exports over imports which the wood and paper group provides, amounting to \$123,784,411 for the fiscal year ended March, 1934, constitutes an important factor in Canada's balance of international trade.

Canada's forest area may be roughly divided into three main parts: (1) the great coniferous forest of the Pacific slope, (2) the northern forest, principally coniferous, which stretches from the east slopes of the Rockies, north of the prairies and of the Great Lakes to Labrador, and (3) the mixed softwood and hardwood forests extending from lake Superior through southern Ontario and Quebec to the Maritime Provinces.

Canada's forest area is estimated at 1,153,000 square miles, or 32.8 p.c. of the land area. Some of this is agricultural land, but it is considered that about 1,100,000 square miles is essentially forest land which can best be utilized in the production of wood. Not all of this area can be considered as capable of producing timber at the present time, only some 791,670 square miles being regarded as accessible and productive, of which 412,725 is young growth, leaving 378,945 square miles of land carrying timber of merchantable size. With regard to quantity of timber, the accessible stand has been estimated at 165,846 million cubic feet, or 290,230 million feet board measure of saw timber and 920,335,000 cords of pulpwood, cordwood, etc. The stands in Eastern Canada make up 64.3 p.c. of the total, those in British Columbia account for 24.2 p.c., leaving 11.5 p.c. of the accessible timber in the Prairie Provinces. During recent years the annual drain on our forest resources (estimated at 2,812,000,000 cubic feet in 1932) has generally exceeded the new growth. This annual depletion includes enormous losses which have been caused by fire and other destructive agencies. In spite of

the vast extent of the uncut and unburned forests it cannot be said that the measures so far taken by legislation and the application of scientific forestry to preserve them and encourage their reproduction have been sufficient to assure us an adequate supply of timber for the future. Yet an annual increment of 10 cubic feet per acre, which is quite possible under forest management, would provide in perpetuity for the needs of a population of 26 millions at the present annual rate of use.

A classification of Canada's forest area is given in Table 8. The total of forest land is divided into the areas at present carrying timber of merchantable sizes or valuable young growth, and other areas unsuited for present exploitation. It may be pointed out, however, that many of these latter will develop into productive areas as the demand increases and transportation facilities are extended. The totals of forest land given in this table refer to areas which are on the whole better suited to forest production than to any other purpose, although they include about 26,652 square miles of occupied agricultural land at present covered with forest.

8.—Classification of Forest Land in Canada, 1933.

| Province or<br>Region.                    | Productive.             |                  |                         |                  |                         |                  |                         |                  | Non-<br>productive. | Total<br>Forested. |

Forest products have always formed a large part of the raw material used in all kinds of industrial activity. At the present time products of forest origin form a quarter of our total exports, being exceeded only by the products of the farm.

Because of our climate, coniferous trees form over 80 p.c. of our forest resources and over 95 p.c. of our forest products as at present exploited. Because of their universal use in industry, the softwoods are in greatest demand, not only in Canada but in the markets of the world. Canada enjoys the distinction of holding the Empire's reserve of softwood timber, being rivalled in her coniferous forests only by Asiatic Russia and the United States. The Canadian species of both hardwoods and softwoods yield lumber and timber of dimensions and quality that are equal or superior to those produced by forests elsewhere.

Statistics of forest production (operations in the woods) in 1932 place its total value at \$92,106,252, with a corresponding equivalent in standing timber of

1,882,228,308 cubic feet. The most important items are logs for sawing, valued at \$18,029,759, and pulpwood for use and export, valued at \$36,750,910. The total value of sawmill products in 1932 was \$38,506,647 and that of pulp and paper-mill products \$135,648,729.

**Furs.**—Although the rapid advance of settlement has greatly restricted the reservoir of fur-bearing animal life cradled in the vast expanses of northern Canada, yet Canada, after three and a half centuries of exploitation, still holds a foremost place in the ranks of the world's fur-producing countries. Raw furs are at present the only economic return from hundreds of thousands of square miles of the area of the Dominion and are an important product in all the provinces and territories.

The large uninhabited areas of northern Quebec, Ontario and Western Canada furnish subsistence for many of the most highly prized fur-bearing animals, among the most important of which are various varieties of fox, muskrat, mink, beaver and others. The animals are usually caught in traps during the winter months, when the country is more accessible than during the summer and the pelts are in the best condition.

The successful breeding of the fox on fur farms came with the period of rising prices after 1890, and has since developed into an important industry. Prince Edward Island was formerly the centre of the industry, but farms are now found in all provinces of the Dominion. On Dec. 31, 1932, 5,221 fox farms were in operation with a total of 99,109 foxes, principally of the "silver" variety.

Although the fox has proved the most suited to domestication, other kinds of fur-bearing wild animals are being raised in captivity—mink, raccoon, skunk, coyote, marten and fisher. The mink, in particular, is easily domesticated, and thrives in captivity if care is exercised in the selection of environment and proper attention given to its requirements in the matter of diet. In 1932 the number of farms engaged in the raising of fur-bearing animals other than foxes was 1,075. Mink farms are the most numerous of the miscellaneous class, raccoon farms coming second and muskrat third. Over 395 of the fox farms also raise miscellaneous fur-bearing animals in addition to the foxes.

The total value of the raw fur production of Canada for the season 1932-33 was \$10,305,154. This total comprises the value of pelts of fur-bearing animals taken by trappers and of those raised on fur farms. Pelts sold from fur farms in the calendar year 1932 were valued at \$3,046,627, and animals sold at \$243,193—thus reversing the position of earlier years, when the sales of live animals rather than of pelts, provided the principal source of revenue to the fur farmers.

**Fisheries.**—The first of Canada's resources to be exploited by Europeans was the fishing banks of the Atlantic coast. It is believed that, for many years before the actual discovery and settlement of North America, the cod banks southeast of Newfoundland and east of Nova Scotia had attracted French fishermen by their abundance of fish. These fishing grounds alone extend along a coast line of more than 5,000 miles, comprising an area of not less than 200,000 square miles, and are in the course of the cold Arctic current, a fact which tends greatly to improve the quality of the fish. The most important fishes of the off-shore fisheries are the cod, halibut, haddock, herring and mackerel, while the inshore and inland fisheries number the lobster, oyster, salmon, gaspereau, smelt, trout and maskinonge among their catches. Other fishing grounds include the inshore expanses of the St. Lawrence river; the Great Lakes, where whitefish and herring form perhaps the most valued catches, and innumerable other inland water areas abounding with trout, pike, bass and other game fish; and the Pacific coast. The fisheries of British Columbia, with its coast line of 7,000 miles, have in recent years shown a rapid development, and the products of the estuarine salmon fisheries of the Fraser, Skeena and other rivers now make up two-fifths of the value of fish products of the Dominion, while in addition large catches of halibut and herring are made off the western coast. The total value of the fisheries in the calendar year 1933 was \$27,553,053.

The above statistics give a general survey of the commercial aspects of the fisheries but do not indicate the advantages which Canada has to offer to those who fish for sport. This too has its economic features in a country of such famous

game fish as the salmon of the Restigouche and other rivers of the Maritime Provinces, the black bass of the Quebec and Ontario highlands, the red trout of the Nipigon and the salmon and rainbow trout of British Columbia. A considerable public revenue is derived from the leasing of waters in sparsely settled districts to clubs and individuals for sporting purposes.

**Minerals.**—The mineral deposits of Canada are among the Dominion's greatest assets and their economic importance as a factor in the well-being of the nation is demonstrated by the expansion of the mining industry during 1933. The total value of the mineral production of Canada in 1933 was \$221,495,253, an increase of 21.2 p.c. over 1932. Exports of the non-ferrous metals (excluding bullion) and their products amounted to \$69,340,625 in 1933 compared with \$48,130,177 in 1932. This increase, following the greatest industrial depression ever experienced, not only reflects the stability of the industry but suggests also a world-wide recuperation in the mineral-using industries.

Canadian mineral deposits of commercial value are numerous and varied and the exceptionally large area of Precambrian rocks in Canada comprises a favourable field for mining development and exploration. The history of Canadian mining since the reported discovery of iron in Nova Scotia in 1604 by one of Champlain's companions, is replete with romance.

For many years the output of coal from the large reserves in Nova Scotia, the Prairie Provinces and British Columbia held a leading position in Canadian mineral production. The recent pronounced increase in the price of gold, together with the expansion of activities in the older mining camps and the development of new gold-bearing deposits, have resulted, since 1931, in an almost continuous increase in the value of the output of this precious metal, an increase culminating in a production valued in 1933 at \$84,350,237 (Canadian funds), constituting the largest item in Canadian mineral production.

From the mines of the Sudbury area, Ontario, which constitute the world's largest reserves of nickel ore, were produced 83,264,658 pounds of nickel in 1933, a gain of 174.5 p.c. over 1932; this distinct increase followed continuous annual declines in Canadian nickel production since 1929. There was also an improvement in lead and zinc production, the output of the former metal showing a 4.1 p.c. increase over 1932, while zinc production was 15.6 p.c. higher. Silver production at 15,187,950 fine ounces represents a recession from 1932, and declines were also recorded in cobalt and arsenic. Copper production in 1933 was up 21.1 p.c. over 1932 and was the largest recorded since the high record quantity in 1930. It is interesting to note that radium and uranium salts were produced commercially in Canada for the first time in 1933, as these elements were extracted from pitchblende-silver ores mined at Great Bear Lake, N.W.T.

In the fuel group increases in quantity over 1932 were registered for coal and petroleum; natural gas, however, was less. Other non-metallics to suffer declines included gypsum and quartz (silica). Shipments of asbestos in 1933 totalled 158,367 tons, an increase of 28.8 p.c. over 1932; the value showed a gain of 71.4 p.c. Production of asbestos, as during recent years, came entirely from Quebec. Increases in quantity in 1933 were also reported for diatomite, feldspar, salt, magnesite, mica, sodium carbonate, sodium sulphate, sulphur and talc.

The value of structural materials, including clay products, cement, lime, sand and gravel and stone, totalled \$16,696,687 compared with \$22,398,283 in 1932, a falling-off that emphasizes the "lag" in recovery in building and general construction.

**Water Powers.**—Canada's fresh water area of 228,070 square miles, distributed as it is throughout all parts of the country, provides a large amount of potential electric energy. It is estimated that 20,347,400 h.p. are available at a minimum yearly flow, 33,617,200 at ordinary six-months flow and that a turbine installation of 43,700,000 h.p. is possible. The installation at Jan. 1st, 1935, was 7,547,035 h.p., which represents only about 17.27 p.c. of the possible installation. Perhaps the greatest use to which these resources have yet been put has been in the pulp and paper industry, and to a lesser degree in the mining, the electro-chemical, the electro-metallurgical and the flour-milling industries. The water power utilized in the pulp and paper industry alone amounted on Jan. 1, 1935 to 1,636,000 h.p. not including large amounts of secondary power purchased for use in electric boilers. Over 94 p.c. of the power available is in Quebec, Ontario, Manitoba and British Columbia; Quebec, with 8,459,000 h.p. available at ordinary minimum flow, has the largest resources in the Dominion.

**Game and Scenery.**—Canada's resources as a country for the sportsman and tourist are both unique and varied. Owing to the growth of tourist travel and its demands, great areas of uninhabited land have become accessible, and hitherto almost unknown parts may now be reached and traversed with ease. The valleys of Nova Scotia and New Brunswick, the broken lake country of northern Ontario and Quebec, northern Manitoba and Saskatchewan, as well as the mountain districts of British Columbia, offer to the tourist, the hunter and the fisherman new, scenic effects and innumerable game preserves, and have won for the Dominion a reputation as a paradise for sportsmen and campers. And not only is this possible for those who travel by land; the series of lakes and rivers which form a network over the eastern part of the country particularly, has made water travel in smaller craft both feasible and attractive. Further, facilities for winter sports, the unusual attractions of winter scenery and the bracing though rigorous winter climate, have done much to add to the reputations of resorts formerly noted for their advantages in the summer season. In both Dominion and provincial parks, the hunting of game is forbidden, and the wild-life resources preserved. Elsewhere, however, there is available for the hunter and angler, at proper seasons, a wealth of game species. The deer and moose of Eastern Canada, the bear and mountain sheep of the Rockies, game animals, birds and fishes in unusual variety, have given the Dominion exceptional advantages for this means of recreation.

**National Parks of Canada.** The Dominion Government maintains, as the medium through which some of the most outstanding natural beauties of the country may be preserved and popularized, the National Parks Branch of the Department of the Interior, which administers the scenic and recreational parks set aside for this purpose. Under the supervision of this same body are the national wild animal preserves large fenced areas for the protection and propagation of species in danger of extinction, the national historic parks, and the historic sites of national interest which have been acquired throughout the country. In the national parks, all wild life is given rigid protection, and primal natural conditions are maintained as far as possible. Access to many outstanding points of interest is provided by fine motor roads or well constructed trails. Several of the provinces, including Alberta, British Columbia, Ontario, Quebec, and Saskatchewan, also maintain provincial parks for similar purposes; among these are the Algonquin park (2,740 square miles) in Ontario and the Laurentides park (3,565 square miles) in Quebec.

A list of the Dominion national parks and reserves is given in Table 9.

### 9.—Details Regarding Locations, Dates Established, Areas and Characteristics of the National Parks of Canada and Dominion Reserves, 1935.<sup>1</sup>

(Twenty in number with a total area of 29,368.1 square miles.)

| Park.                                                             | Location.                                                        | Date<br>Estab-<br>lished. | Area.             | Characteristics.                                                                                                                                                                                                                                                                                                                                                                              |

Renamed Fort Cumberland in 1755 by British; original name was later restored.                                                                                                |

<sup>1</sup> Reserved by Order in Council and became a Dominion reserve by agreement with the province of Alberta in 1931. <sup>2</sup> Administered by the Lands, Northwest Territories and Yukon Branch of the Department of the Interior.

## PART VII.—CLIMATE AND METEOROLOGY.

### Section 1.—The Climate of Canada.

An article on this subject by Sir Frederic Stupart, Director of the Dominion Meteorological Service, Toronto, appeared in the 1929 edition of the Year Book at pp. 42-51.

### Section 2.—The Factors which Control Canadian Weather.

Under the above heading, Sir Frederick Stupart, Director of the Dominion Meteorological Service, Toronto, contributed an article which appeared at pp. 26-31 of the 1924 edition of the Year Book, also at pp. 36-40 of the 1925 edition.

### Section 3.—The Distribution of Precipitation in Canada.

An article on "The Distribution of Precipitation in Canada", contributed by A. J. Connor, Climatologist, Dominion Meteorological Office, Toronto, appeared at pp. 42-46 of the 1926 edition of the Year Book.

### Section 4.—The Temperature and Precipitation of Northern Canada.

An article on the climate of northern Canada, accompanied by meteorological tables showing the normal temperature and precipitation at selected northern stations, was contributed by A. J. Connor, of the Meteorological Service of the Department of Marine, Toronto, to the 1930 edition of the Year Book, where it will be found at pp. 41-56.

### Section 5.—The Meteorological Service of Canada.

Under the above heading Sir Frederic Stupart contributed a short article descriptive of the growth and present activities of the Meteorological Service, to the 1922-23 edition of the Year Book (pp. 43-47); to it the interested reader is referred.

### Section 6.—Meteorological Tables.

Tables showing the normal temperature and precipitation at selected Canadian stations in each of the provinces, together with the recorded extremes, also the averages of sunshine, wind and weather at such stations, will be found at pp. 51-63 inclusive of the 1927-28 edition of the Year Book. The 1931 edition of the Year Book contains at pp. 48-76 additional and more comprehensive tables, contributed by A. J. Connor, of monthly average temperatures and precipitation throughout Canada, as well as of normal snowfall and duration of bright sunshine.

### Section 7.—Droughts in Western Canada.

An article on the above subject by A. J. Connor, of the Meteorological Service of the Department of Marine, Ottawa, accompanied by diagrams and tables showing the precipitation and sun-spot incidence in the Prairie Provinces, appeared at pp. 47-59 of the 1933 edition of the Year Book.

## Section 8.—Standard Time and Time Zones in Canada.\*

In former times, when transportation was slow and people for the most part lived within their own communities, it was natural enough that each community should have its own local time based on sun time. The difference in sun time as between communities is, of course, determined by the difference in their longitude. Inasmuch as the sun appears to travel the 360 degrees around the world in 24 hours or 1,440 minutes, a community which is precisely one degree of longitude west of another community in the same latitude naturally has the sun rise and set four minutes later than it rises and sets in the community which is one degree farther east. Local time, in so far as it was accurately kept, tended therefore to conform to "sun time" and noon came when the sun reached its highest point.

The advent of more rapid transportation, however, made these local times extremely inconvenient for travellers. In particular, railway time tables were found almost impossible to work out on the basis of the local times of each community. Consequently in Great Britain, where the differences of longitude are comparatively small, the problem was solved in 1880 by placing the whole country on the time of Greenwich observatory, while Irish time was standardized at twenty-five minutes behind English time, being the time of Dublin. The American continent, however, extends over such an enormous distance from east to west that it was impracticable to have a single standard of time. Accordingly, in the United States the railways for their own purposes divided the country into four time regions, which were called Eastern, Central, Mountain and Pacific, the time used in these zones being five, six, seven and eight hours, respectively, behind Greenwich time. The change from one time to another was made at divisional points on the several railways and this time, known as railway time, was adopted by most towns in place of their own local time.

From 1878 on, Sir Sandford Fleming had been advocating the general use of what are called standard time zones and this suggestion was adopted at a world conference held at Washington in 1884. Sir Sandford Fleming proposed that the number of times in the world should be reduced to twenty-four, each time zone to extend over one twenty-fourth of the surface of the earth and to include all the territory between two meridians, fifteen degrees of longitude apart, the standard for all times being Greenwich time, and all other time zones being a definite number of hours either in advance of or behind Greenwich. These proposals have been very generally accepted. Mid-European and East European time are to-day respectively one hour and two hours in advance of Greenwich, while on this continent the Atlantic, Eastern, Central, Mountain, Pacific, Yukon and Alaska time zones have times, respectively, four, five, six, seven, eight, nine and ten hours behind Greenwich. The differences are usually expressed in intervals of so many hours' difference from Greenwich. However, some countries and localities of smaller area have times which are not an exact hour's difference from Greenwich, Newfoundland and Labrador, for example, having a time three hours and thirty-one minutes behind Greenwich. This difference of three hours and thirty-one minutes would correspond to west longitude  $52^{\circ} 45'$ , which is nearly the longitude of St. Johns, Newfoundland.

In Canada, Atlantic standard time, which is the local time at the 60th meridian running near Sydney, Nova Scotia, and is four hours behind Greenwich, is used in the Maritime Provinces and those parts of Quebec and the Northwest Territories

\*Based on a paper "Standard Time and Time Zones in Canada", by C. C. Smith, Dominion Observatory, Ottawa.

east of the 68th meridian of west longitude. Eastern standard time, which is the local time at the 75th meridian running near Cornwall, Ontario, and is thus five hours behind Greenwich, is used in Quebec west of the 68th meridian and in Ontario east of the 90th meridian and in the Northwest Territories between the 68th and 85th meridians. Central standard time, which is the local time at the 90th meridian, is six hours behind Greenwich and is used in Ontario west of the 90th meridian, in Manitoba, in the Northwest between the 85th and the 102nd meridians and in the southeasterly part of Saskatchewan. Mountain time, which is the local time at the 105th meridian running near Regina, is seven hours behind Greenwich and is used throughout Saskatchewan except in the southeasterly part, throughout Alberta and in that part of the Northwest Territories between the 102nd and 120th meridians. Pacific standard time, which is the local time of the 120th meridian running near Kamloops, British Columbia, is eight hours behind Greenwich and is used throughout British Columbia and in that part of the Northwest Territories lying west of the 120th meridian. Yukon standard time, which is the local time at the 135th meridian, running near Whitehorse, Yukon, is nine hours behind Greenwich and is used throughout the Yukon Territory. Thus in the far-flung area of the Dominion there are no fewer than six different standard times roughly corresponding with the 84 degrees of longitude between the Labrador boundary and the Alaskan boundary. The existence of the different time zones is to-day brought home to the average man by the radio; especially in such programs as the Empire Christmas broadcasts.

Some municipalities adopt the time used by the local railways, which in some cases differs from the standard, and there are also villages which adopt such time as seems to best suit their convenience, but, in general, the legal boundaries of the different time zones are actually in use. The boundaries of the standard time zones in Canada and Newfoundland are shown in the map on p. 52.

**Daylight Saving Time.**—For some years before the Great War there had been an active propaganda, particularly in the cities, for the use of an earlier time, usually referred to as "daylight saving time", and one hour ahead of standard time, during the summer months. It was considered that both from the economic and from the health point of view, the people, particularly in industrial towns and cities, would gain by beginning work earlier in the morning and having a longer period of sunlight at their disposal for recreation after the work of the day was over. The opponents of the scheme pointed out that the same results might be achieved if everyone went to work an hour earlier and quit work an hour earlier, but it was replied that this ignored the extent to which man is a creature of habit. In Great Britain the use of daylight saving time during the summer months was legalized in 1916 in order to economize the use of light and power for ammunition-making and other related manufactures, and it has since been maintained there by law. The United States and Canada adopted daylight saving for the entire country in 1918, but the Canadian Act lapsed at the end of that year. Since that date, however, various towns and cities have adopted daylight saving by-laws for varying periods in the summer months. There is, indeed, a good deal of confusion and inconvenience arising out of this situation, since, of two towns a few miles apart, one may adopt daylight saving and the other may not, while in other cases they may both adopt daylight saving but one of them for a shorter term than the other. Generally speaking, in the United States and Canada the agricultural element in the population has been opposed to daylight saving and this has made it impracticable to adopt daylight saving time on a nation-wide basis.

It may be added that the adoption of daylight saving time brings greater benefit to communities situated near the eastern ends of their respective time zones, since in their cases standard time is sometimes slower than sun time, while daylight saving time may be as near to sun time as is standard time. Again, in proportion as places are situated in a more northerly latitude, their days are longer in summer even without daylight saving and this is probably the reason why in the Canadian West, where in the settled areas the summer day is an hour or even two hours longer than in the industrial east, daylight saving is not in vogue. Generally speaking, in Canada daylight saving exists only in the industrial cities and towns between Quebec city and Windsor, Ontario, though Halifax and Saint John in the Maritimes and Regina in Saskatchewan adopted local daylight saving time in the summer of 1930.

**Legal Authority for the Time Zones.**—All regulations made in Canada concerning standard time, except the Daylight Saving Act of 1918 (which is understood to have lapsed at the end of that year) have been passed by the Provincial Legislatures and the Northwest Territories Council.

The boundaries of the zones are those laid down in the Statutes of the different provinces and the Northwest Territories. They are usually provincial boundaries or meridians. In the more thickly settled portions of the country this leads to some confusion. The Interstate Commerce Commission have charge of the placing of the boundaries of the time zones in the United States and bend the lines around to fit, so far as convenient, the divisional points of the railways and the requirements of the public. Such a national body can deal more effectively with such matters as the time tables of interstate carriers.

The official legislation in Canada in regard to time chiefly affects such matters as the times of coming into effect or expiration of Acts, ordinances, contracts and agreements, times of opening and closing registration offices, law courts, post offices and other public offices, times of open or close seasons for game, times of opening and closing business houses and places of amusement.

## CHAPTER II.—HISTORY AND CHRONOLOGY.

### PART I.—HISTORY.

In the 1922-23 edition of the Canada Year Book, pp. 60-80, will be found an outline of the history of Canada, not reprinted here for lack of space.

A select bibliography of historical works relating to Canada was contributed by the late Adam Shortt, C.M.G., LL.D., F.R.S.C., Chairman of the Historical Documents Publication Board, Ottawa, to the 1925 edition of the Canada Year Book, where it appears on pp. 53-55.

### PART II.—CHRONOLOGY, 1497 to 1934.

1497. June 24, Eastern coast of North America discovered by John Cabot.  
1498. Cabot discovers Hudson strait.  
1501. Gaspar Corte Real visits Newfoundland and Labrador.  
1524. Verrazano explores the coast of Nova Scotia.  
1534. June 21, Landing of Jacques Cartier at Esquimaux bay.  
1535. Cartier's second voyage. He ascends the St. Lawrence to Stadacona (Quebec), (Sept. 14) and Hochelaga (Montreal), (Oct. 2).  
1541. Cartier's third voyage. He plants wheat, cabbages, turnips and lettuces near Cap Rouge river.  
1542-3. De Roberval and his party winter at Cape Rouge, and are rescued by Cartier on his fourth voyage.  
1557. Sept. 1, Death of Cartier at St. Malo, France.  
1592. Straits of Juan de Fuca discovered by de Fuca.  
1603. June 22, Champlain's first landing in Canada, at Quebec.  
1604. De Monts settles colony on island in the St. Croix river.  
1605. Founding of Port Royal (Annapolis, N.S.).  
1608. Champlain's second visit. July 3, Founding of Quebec.  
1609. July, Champlain discovers lake Champlain.  
1610-11. Hudson explores Hudson bay and James bay.  
1611. Brûlé ascends the Ottawa river.  
1612. Oct. 15, Champlain made Lieutenant-General of New France.  
1613. June, Champlain ascends the Ottawa river.  
1615. Champlain explores lakes Nipissing, Huron and Ontario (discovered by Brûlé and Le Caron).  
1616. First schools opened at Tadoussac and on the site of the city of Three Rivers.  
1617. Arrival at Quebec of the first colonist, Louis Hébert and his family.  
1620. Population of Quebec, 60 persons.  
1621. Code of laws issued and register of births, deaths and marriages opened in Quebec. Nova Scotia granted to Sir William Alexander by King James I.  
1622. Lake Superior discovered by Brûlé.  
1623. First British settlement of Nova Scotia.  
1627. New France and Acadia granted to the Company of 100 Associates.  
1628. Port Royal taken by Sir David Kirke.  
1629. April 24, Treaty of Susa between France and England. July 20, Quebec taken by Sir David Kirke.  
1632. Mar. 29, Canada and Acadia restored to France by the Treaty of St. Germain-en-Laye.  
1633. May 23, Champlain made first Governor of New France.  
1634. July 4, Founding of Three Rivers.  
1634-35. Exploration of the Great Lakes by Nicolet.  
1635. Dec. 25, Death of Champlain at Quebec. Founding of the first college at Quebec.  
1638. June 11, First recorded earthquake in Canada.  
1640. Discovery of lake Erie by Chaumonot and Brébeuf.  
1641. Resident population of New France, 240.  
1642. May 17, Founding of Ville-Marie (Montreal) by Maisonneuve.  
1646. Exploration of the Saguenay by Dablon.  
1647. Lake St. John discovered by de Quen.  
1648. Mar. 5, Council of New France created.  
1649. Mar. 16-17, Murder of Fathers Brébeuf and Lalemant by Indians and massacre of the Hurons.  
1654. August, Acadia taken by an expedition from New England.  
1656. Acadia granted by Cromwell to La Tour, Temple and Crowne.  
1659. June 16, François de Laval arrives in Canada as Vicar-Apostolic.  
1660. May 21, Dollard des Ormeaux and sixteen companions killed by Iroquois at the Long Sault, Ottawa river.  
1663. Company of 100 Associates dissolved. Feb. 5, severe earthquake. April, Sovereign Council of New France established. Population of New France, 2,500, of whom 800 were in Quebec. Foundation of the "Grand Séminary" at Quebec, by Laval.  
1664. May, Company of the West Indies founded.  
1665. Mar. 23, Talon appointed Intendant.

1666. Feb.-Mar., First census. Population of New France, 3,215.
1667. July 21, Acadia restored to France by the Treaty of Breda. Sept.-Oct., Second census; white population of New France, 3,918.
1668. Foundation of the "Little Seminary" at Quebec by Laval. Mission at Sault Ste. Marie founded by Marquette.
1670. May 13, Charter of the Hudson's Bay Company granted.
1671. Population of Acadia, 441.
1672. Population of New France, 6,705. April 6, Comte de Frontenac, Governor.
1673. June 13, Cataragui (Kingston) founded.
1674. Oct. 1, Laval becomes first Bishop of Quebec.
1675. Population of New France, 7,832.
1678. Niagara falls visited by Hennepin.
1679. Ship *Le Griffon* built on Niagara river above the falls by La Salle. Third census; population of New France, 9,400; of Acadia, 515.
1681. Fourth census; population of New France, 9,677.
1682. Frontenac recalled.
1683. Population of New France, 10,251.
1685. First issue of card money. Fifth census; population of New France, 12,263, including 1,538 settled Indians.
1686. Population of New France, 12,373; of Acadia, 885.
1687. Mar. 18, La Salle assassinated.
1688. Sixth census; population of New France, 11,562, including 1,259 settled Indians.
1689. June 7, Frontenac re-appointed Governor. Aug. 5, Massacre of whites by Indians at Lachine.
1690. May 21, Sir William Phips captures Port Royal, but is repulsed in an attack on Quebec (Oct. 16-21).
1692. Seventh census; population of New France, 12,431. Oct. 22, Defence of Verchères against Indians by Madeleine de Verchères.
1693. Population of Acadia, 1,009.
1695. Eighth census; population of New France, 13,639, including 853 settled Indians.
1697. Sept. 20, By the treaty of Ryswick, places taken during the war were mutually restored. D'Iberville defeats the Hudson's Bay Co.'s ships on Hudson bay.
1698. Nov. 28, Death of Frontenac. Ninth census; population of New France, 15,355.
1701. La Motte Cadillac builds a fort at Detroit.
1703. June 16, Sovereign Council of Canada becomes Superior Council and membership increased from 7 to 12.
1706. Tenth census; population of New France, 16,417.
1708. Death of Laval.
1709. British invasion of Canada.
1710. Oct. 13, Port Royal taken by Nicholson.
1711. Sept. 1, Part of Sir H. Walker's fleet, proceeding against Quebec, wrecked off the Seven Islands.
1713. April 11, Treaty of Utrecht; Hudson bay, Acadia and Newfoundland ceded to Great Britain. August, Louisbourg founded by the French. Population of New France, 18,119.
1718. Foundation of New Orleans in carrying out French plan to control the Mississippi as well as the St. Lawrence.
1719. Census population of New France, 22,530.
1720. Population of New France, 24,234; of Isle St. Jean (P.E.I.), about 100. April 25, Governor and Council of Nova Scotia appointed.
1721. June 19, Burning of about one-half of Montreal. Census population of New France, 24,951.
1727. Population of New France, 30,613.
1728. Population of Isle St. Jean (P.E.I.), 330.
1731. Population of the north of the peninsula of Acadia, 6,000.
1733. Discovery of lake Winnipeg by La Vérendrye.
1734. Road opened from Quebec to Montreal. Census population of New France, 37,716.

Feb. 26-July 1, Fourth session of the thirteenth Parliament of Canada. May 31-June 18, Trade Conference at Ottawa between Dominion and West Indian Governments. July 10, Sir Robert Borden is succeeded by Rt. Hon. Arthur Meighen as Prime Minister. July 16, Ratifications of the Treaty of St. Germain-en-Laye. Aug. 9, Ratifications of the Treaty of Neuilly-sur-Seine. Nov. 15, First meeting of League of Nations Assembly begins at Geneva, Switzerland.
1921. Feb. 14-June 4, Fifth session of thirteenth Parliament of Canada. May 10, Preferential tariff arrangement with British West Indies becomes effective. June 1, Sixth Dominion Census. June 20-Aug. 5, Imperial Conference. Sept. 5-Oct. 5, Second meeting of Assembly of League of Nations at Geneva. Nov. 11, Opening of conference on limitation of armament at Washington. Dec. 6, Dominion general election. Dec. 29, New Ministry (Liberal), with Right Hon. W. L. Mackenzie King as Prime Minister, is sworn in.
1922. Feb. 1, Arms Conference at Washington approves 5-power treaty, limiting capital fighting ships and disapproving unrestricted submarine warfare and use of poison gas. Mar. 8-June 28, First session of fourteenth Parliament of Canada. April 10, General Economic Conference opened at Genoa. July 13, Conference between Canada and the United States re perpetuating the Rush-Bagot treaty regarding armament on the Great Lakes. Aug. 7, Allies' Conference on war debts and reparations opened at London. Sept. 4, Third Assembly

- of League of Nations opened at Geneva. Oct. 10, Mudania Armistice signed by Britain, France and Turkey. Oct. 14, Fourth International Labour Conference at Geneva. Nov. 20, Turkish Peace Conference opened at Lausanne. Dec. 9, Reparations Conference opened at London. Dec. 15, Signing of trade agreement between Canada and France.
1923. Jan. 4, Signing of trade agreement between Canada and Italy. Jan. 31-June 30, Second session of fourteenth Parliament of Canada. April 1, Removal of British embargo on Canadian cattle effective. Sept. 3, Fourth session of League of Nations at Geneva. Oct. 1, Imperial Conference and Economic Conference at London.
1924. Feb. 28-July 19, Third session of the fourteenth Parliament of Canada. April 23, British Empire Exhibition opened by King George at Wembley, England, with the Prince of Wales as President. July 3, Trade agreement between Canada and Belgium signed at Ottawa. Aug. 6-16, Meeting of the British Association for the Advancement of Science at Toronto. Aug. 11-16, Meeting of International Mathematical Congress at Toronto. Sept. 1, Opening of fifth session of League of Nations at Geneva, Switzerland.
1925. Feb. 5-June 27, Fourth session of fourteenth Parliament of Canada. June 2, Provincial general election in Saskatchewan. Liberal party under Hon. C. A. Dunning returned to office. June 10, Inauguration of the United Church of Canada. June 25, Provincial general election in Nova Scotia; Conservative party under Hon. E. N. Rhodes returned to office. July 6, Signing at Ottawa of trade agreement between Canada and the British West Indies. Aug. 10, Provincial general election in New Brunswick; Conservative party under Hon. J. B. M. Baxter returned to office. Sept. 5, Fourteenth Parliament dissolved. Oct. 29, Dominion general elections. Nov. 20, Death of Queen Alexandra.
1926. Jan. 7-July 1, First session of fifteenth Parliament of Canada. April 15, Budget speech; reductions of income and other taxes announced. June 28, Resignation of Rt. Hon. W. L. Mackenzie King, Prime Minister, and his Cabinet. Provincial general elections in Alberta; United Farmers under Premier Brownlee retain office. June 29, Rt. Hon. Arthur Meighen becomes Prime Minister. July 1, Two-cent domestic rate of postage restored. July 2, Fifteenth Parliament dissolved. July 13, Composition of Mr. Meighen's Cabinet announced (see p. 77 of the 1927-28 Year Book). Sept. 14, Dominion general elections. Sept. 25, Rt. Hon. W. L. Mackenzie King becomes Prime Minister (for composition of Cabinet see p. 69 of the 1930 Year Book). Oct. 19-Nov. 23, Imperial Conference in London. Nov. 26, Hon. C. Vincent Massey is appointed Envoy Extraordinary and Minister Plenipotentiary to the United States. Dec. 1, General election in Ontario; Ferguson Government retains office. Dec. 9, Opening of first session of sixteenth Parliament.
1927. Feb. 8-April 14, Continuation of first session of the sixteenth Parliament of Canada. Feb. 17, Budget speech; reductions of income tax, sales tax and stamp tax on cheques announced. May 16, General elections in Quebec; the Liberal Government of Hon. L. A. Taschereau sustained. June 1, Hon. Wm. Phillips, first U.S. Minister to Canada, reaches Ottawa. June 25, General election in Prince Edward Island; the Conservative Government of Hon. J. D. Stewart defeated. June 28, General election in Manitoba; the Government of Hon. John Bracken sustained. July 1-3, Diamond Jubilee of Confederation celebrated throughout the Dominion. July 30, The Prince of Wales, Prince George, the Rt. Hon. Stanley Baldwin and party, arrive at Quebec on a visit to Canada. September, Canada elected as a non-permanent member of the Council of the League of Nations at Geneva. November, Dominion-Provincial Conference on the relations between the Dominion and the provinces.
1928. Jan. 26-June 11, Second session of the sixteenth Parliament of Canada. Jan. 30, President Cosgrave of the Irish Free State visits Ottawa. Feb. 16, Budget speech announces reduction in taxation. April 25, Sir Wm. H. Clark appointed first British High Commissioner to Canada. May 31, Legislative Council of Nova Scotia ceases to exist, leaving Quebec as the only province with a bi-cameral Legislature. July 18, General elections in British Columbia; Conservatives successful. Aug. 24-Oct. 5, Empire Parliamentary Association visits Canada. Oct. 1, General elections in Nova Scotia; Conservatives retain power.
1929. Feb. 7-June 14, Third session of the sixteenth Parliament of Canada. Mar. 29, Death of Sir Lomer Gouin. June 5, General election in Saskatchewan. Sept. 9, Dr. J. T. M. Anderson becomes Premier of Saskatchewan. Oct. 15-25, The Rt. Hon. J. Ramsay MacDonald, Prime Minister of Great Britain, visits Canada. Oct. 30, General

- elections in Ontario; Conservatives retain power. Nov. 11, Death of Hon. Jas. A. Robb, Minister of Finance. Dec. 14, Transfer of natural resources to Manitoba and Alberta.
1930. Jan. 21, Five power naval arms conference opens at London; Canada represented by Hon. J. L. Ralston. Feb. 3, Death of Hon. P. C. Larkin. Feb. 20, Fourth session of the sixteenth Parliament of Canada commences. Transfer of natural resources to British Columbia. Mar. 20, Transfer of natural resources to Saskatchewan. May 30, Dissolution of sixteenth Parliament of Canada. June 19, General elections in Alberta; United Farmers retain power. June 20, General election in New Brunswick; Conservatives retain power. July 28, Dominion general election. Liberal Government of Rt. Hon. W. L. Mackenzie King defeated. Aug. 1, H.M. Airship R-100 arrives at Montreal, being the first transatlantic lighter-than-air craft to reach Canada. Aug. 7, Conservative Government of Hon. R. B. Bennett takes office as the fifteenth Ministry since Confederation (for the names of the Ministers see p. 67). Sept. 8-22, First (special) session of the seventeenth Parliament of Canada. Oct. 1, Imperial Conference in London. Dec. 20, Viscount Willingdon, Governor General of Canada, is appointed Viceroy of India by the King.
1931. Feb. 9, The Earl of Bessborough is appointed Governor General of Canada. Mar. 12-Aug. 3, Second session of the seventeenth Parliament of Canada. June 1, Seventh Dominion Census. June 11, Remembrance Day (Nov. 11) proclaimed a general holiday by Act of Parliament. June 22, The U.S. Government grants a one-year moratorium on war debts owing by foreign governments on condition that similar treatment is accorded to Germany in regard to reparation payments. June 30, The Statute of Westminster exempting the Dominion and the provinces from the operation of the Colonial Laws Validity Act and the Merchant Shipping Act is approved by the House of Commons. Aug. 6, Provincial election in Prince Edward Island results in defeat of the Liberal Administration of Hon. D. M. Lea by the Conservatives under Hon. J. D. Stewart. Aug. 24, Hon. L. A. Taschereau's Liberal Administration is sustained in a general election in Quebec. Sept. 21, Great Britain suspends specie payments, following which Canada restricts the export of gold. Nov. 21, Abnormal Importations Act, extending preference to Empire products, assented to in the United Kingdom. Dec. 1, Ottawa Branch of the Royal Mint transferred to the Dominion. Dec. 12, Statute of Westminster establishing complete legislative equality of the Parliament of Canada with that of the United Kingdom becomes effective.
1932. Feb. 4-May 26, Third session of the seventeenth Parliament of Canada. June 16, General election in Manitoba; the Bracken Government retains power. July 18, Treaty between Canada and the United States, providing for the construction of the St. Lawrence Seaway, signed at Washington. July 21-Aug. 20, Imperial Economic Conference at Ottawa. Aug. 6, Official opening of the Welland Ship Canal. Oct. 6-Nov. 25, Beginning of fourth session of the seventeenth Parliament of Canada.
1933. Jan. 17-19, Dominion-Provincial Conference. Jan. 30-May 27, Continuation of fourth session of the seventeenth Parliament. May 18, Celebration of the 150th anniversary of the landing of the Loyalists at Saint John. July 13, Visit of Italian hydroplanes *en route* to Chicago Exhibition. Aug. 22, Provincial general election in Nova Scotia; Liberals under A. L. Macdonald returned. Nov. 2, Provincial general election in British Columbia; Liberals under T. D. Pattullo returned.
1934. Jan. 1, Resumption of granting of titles in Canada. Jan. 25-July 3, Fifth session of the seventeenth Parliament of Canada. Mar. 6, Centenary of city of Toronto celebrated. June 19, General elections in Ontario and Saskatchewan; Liberals under M. F. Hepburn in Ontario and J. G. Gardiner in Saskatchewan returned. July 15th, Three Rivers begins Tercentenary celebrations. August, Celebration at Gaspé of the four-hundredth anniversary of the first landing of Jacques Cartier in Canada.

## CHAPTER III.—CONSTITUTION AND GOVERNMENT.

The Dominion of Canada is the largest in area and the most populous of the great self-governing Dominions of the British Empire, which also include the Irish Free State (Saorstát Éireann), the Commonwealth of Australia, the Union of South Africa, the Dominion of New Zealand, the island colony of Newfoundland (with the Labrador coast),\* and the colony of Southern Rhodesia. These Dominions enjoy responsible government of the British type, administered by Executive Councils (or Cabinets), acting as advisers to the representatives of the Sovereign, the Executive Councils being themselves responsible to, and possessing the confidence of, the representatives elected to Parliament by the people, and giving place to other persons more acceptable to Parliament whenever that confidence is shown to have ceased to exist. The Imperial Conference of 1926 defined the group of self-governing communities consisting of Great Britain and the Dominions as "autonomous Communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations". The Conference further laid down that, as a consequence of this equality of status, the Governor General of a Dominion "is the representative of the Crown, holding in all essential respects the same position in relation to the administration of public affairs in the Dominion as is held by His Majesty the King in Great Britain", and that "it is the right of the Government of each Dominion to advise the Crown in all matters relating to its own affairs". The Conference also recognized certain treaty-making rights as appertaining to the Dominion. At the Imperial Conference of 1930 the constitutional status of the Dominions was further strengthened by the decisions to repeal the Colonial Laws Validity Act and to establish a voluntary Empire judicial tribunal. It was also definitely laid down that the King appoints his Governors General through the Dominion Governments. An Address of the Parliament of Canada to His Majesty was adopted by the House of Commons on June 30, and by the Senate on July 6, 1931, praying for the enactment by the Parliament of the United Kingdom of the Statute of Westminster removing the remaining legal limitations under the Colonial Laws Validity Act of 1895, the Merchant Shipping Act of 1894 and the Colonial Courts of Admiralty Act of 1890 on the legislative autonomy of the Dominions. In compliance with this Address and similar Addresses from the Parliaments of other Dominions, the Parliament of the United Kingdom having enacted legislation to this effect, the Royal Assent was given thereto on Dec. 12, 1931.

Of the Dominions, Canada, Australia and South Africa extend over enormous areas of territory, each of the first two approximating in area to Europe, and including great provinces or states larger than most of its Great Powers. Each province or state has its own problems and its own point of view, so that local Parliaments for each section, as well as the central Parliament for the whole country, are required. These local Parliaments, established when transportation and communication were more difficult and expensive than at present, were chronologically prior to the central body, to which on its formation they either resigned certain powers, as in the case

\* As the result of the depression and the consequent financial embarrassments, the Constitution of Newfoundland, on the initiative of the Newfoundland Legislature, was temporarily suspended by the Newfoundland Act passed by the British Parliament on Dec. 21, 1933.

of Australia, or surrendered all their powers with certain specified exceptions, as in Canada and South Africa. Of such local Parliaments, Canada at the present time has nine, Australia six, and South Africa four.

Besides the Dominions above enumerated, the great Empire of India has been accepted internationally as a member of the League of Nations, and in its internal administration has been placed on the road, formerly traversed by the Dominions which are now fully self-governing, towards responsible government. India proved her loyalty to the Empire in the Great War and, as the result of the work of Royal Commissions and conferences, a constitution for India along Dominion lines is now (January, 1935), nearing its final stages of preparation before presentation to the British House of Commons.\* Although the steps so far taken do not meet the demands of the more radical elements, the result will probably mark as great an advance as the country is now prepared to make. The whole evolution of the Empire, throughout all its parts which are more than mere fortresses like Gibraltar or trading stations like Hong Kong, is in the direction of responsible government, to be attained in the dependencies as it has been in what used to be called the colonies, by the gradual extension of self-government in proportion to the growing capacities of their respective populations. It is the recognized aim of British administrators, by the extension of educational facilities and by just administration to develop these capacities to the utmost, so that in the dependencies, as well as in the Dominions and in the Mother Country, the constitutional history of the future may be a record of "freedom slowly broadening down from precedent to precedent".

## PART I.—CONSTITUTION AND GENERAL GOVERNMENT.

Under the above heading a brief historical and descriptive account of the evolution of the general government of Canada was given on pp. 89-100 of the Canada Year Book, 1922-23.

## PART II.—PROVINCIAL AND LOCAL GOVERNMENT.

Under the heading "Provincial and Local Government in Canada", a brief account of the government of each of the provinces of Canada and of its municipal institutions and judicial organization was published on pp. 101-115 of the 1922-23 edition of the Year Book.

## PART III.—LEGISLATIVE AND EXECUTIVE AUTHORITIES.

### Section 1.—Dominion Parliament and Ministry.

The Dominion Parliament is composed of the King, represented by the Governor General, the Senate and the House of Commons. The Governor General is appointed by the King on the advice of the Government of Canada. Members of the Senate are appointed for life by the Governor General in Council and members of the House of Commons are elected by the people. As a result of the working out of the democratic principle, the part played by the King's Representative and the Upper Chamber of Parliament in the country's legislation has been, in Canada as in the Mother Country, a steadily decreasing one, the chief responsibilities involved in legislation being assumed by the House of Commons.

\* Sir Samuel Hoare, Secretary of State for India, moved the Second Reading of the India Constitution Bill in the British House of Commons on Feb. 6, 1935. In instructions later issued to the Governor General the British Government renewed the pledge, given in 1919, that the ultimate goal was Dominion status for India.

**Subsection 1.—The Governor General of Canada.**

The Governor General is appointed by the King as his representative in Canada, usually for a term of five years, with a salary fixed at £10,000 sterling per annum and forming a charge against the consolidated revenue of the country. The Governor General is bound by the terms of his commission and can exercise only such authority as is expressly entrusted to him. He acts under the advice of his Ministry, which is responsible to Parliament, and, as the acting head of the Executive, summons, prorogues, and dissolves Parliament and assents to or reserves bills. In the discharge of these and other executive duties, he acts entirely by and with the advice of his Ministry (the Governor General in Council). The royal prerogative of mercy in capital cases, formerly exercised on the Governor General's own judgment and responsibility, is now exercised pursuant to the advice of the Ministry. The practice whereby the Governor General served as the medium of communication between the Canadian and the British Governments has been given up; since July 1, 1927, direct communication between His Majesty's Government in Canada and His Majesty's Government in Great Britain has been instituted.

A list of the Governors General from the time of Confederation, with the dates of their appointment and assumption of office, is given in Table 1.

**1.—Governors General of Canada, 1867-1935.**

| Name.                                                         | Date of Appointment. | Date of Assumption of Office. |
|---------------------------------------------------------------|----------------------|-------------------------------|
| Viscount Monck, G.C.M.G.....                                  | June 1, 1867         | July 1, 1867                  |
| Lord Lisgar, G.C.M.G.....                                     | Dec. 29, 1868        | Feb. 2, 1869                  |
| The Earl of Dufferin, K.P., K.C.B., G.C.M.G.....              | May 22, 1872         | June 25, 1872                 |
| The Marquis of Lorne, K.T., G.C.M.G.....                      | Oct. 5, 1878         | Nov. 25, 1878                 |
| The Marquis of Lansdowne, G.C.M.G.....                        | Aug. 18, 1883        | Oct. 23, 1883                 |
| Lord Stanley of Preston, G.C.B.....                           | May 1, 1888          | June 11, 1888                 |
| The Earl of Aberdeen, K.T., G.C.M.G.....                      | May 22, 1893         | Sept. 18, 1893                |
| The Earl of Minto, G.C.M.G.....                               | July 30, 1898        | Nov. 12, 1898                 |
| Earl Grey, G.C.M.G.....                                       | Sept. 26, 1904       | Dec. 10, 1904                 |
| Field Marshal H.R.H. the Duke of Connaught, K.G.....          | Mar. 21, 1911        | Oct. 13, 1911                 |
| The Duke of Devonshire, K.G., G.C.M.G., G.C.V.O.....          | Aug. 19, 1916        | Nov. 11, 1916                 |
| General the Lord Byng of Vimy, G.C.B., G.C.M.G., M.V.O.....   | Aug. 2, 1921         | Aug. 11, 1921                 |
| Viscount Willingdon of Rattou, G.C.S.I., G.C.I.E., G.B.E..... | Aug. 5, 1926         | Oct. 2, 1926                  |
| The Earl of Bessborough, G.C.M.G.....                         | Feb. 9, 1931         | April 4, 1931                 |

**Subsection 2.—The Ministry.**

A system of government based upon the British, by which a Cabinet or Ministry (composed of members of the House of Commons or the Senate), responsible to Parliament, holds office while it enjoys the confidence of the people's representatives, is found in Canada. The Cabinet is actually a committee of the King's Privy Council for Canada. Without enlarging upon the features of the system, it may be sufficient to note that the Cabinet is responsible to the House of Commons, and, following established precedent, resigns office when it becomes evident that it no longer holds the confidence of the people's representatives. Members of the Cabinet are chosen by the Prime Minister; each of them generally assumes charge of one of the various Departments of the Government, although one Minister may hold two portfolios at the same time, while other Ministers may be without portfolio.

The Prime Ministers since Confederation and the dates of their tenures of office, together with the members of the Fifteenth Ministry, are given in Table 2. The complete list of the members of the King's Privy Council for Canada, as at Mar. 1, 1935, is added as Table 3.

## 2.—Ministries since Confederation and Members of the Fifteenth Ministry.

NOTE.—A complete list of the members of Dominion Ministries from Confederation to 1913 appeared in the Year Book of 1912, pp. 422-429. A list of the members of Dominion Ministries from 1911 to 1921 appeared in the Year Book of 1920, pp. 651-653. A list of the members of the Twelfth and Thirteenth Ministries appeared on pp. 76-77 of the 1927-28 Year Book. Members of the Fourteenth Ministry are listed at p. 65 of the 1929 Year Book and p. 69 of the 1930 Year Book.

1. Rt. Hon. Sir John A. Macdonald, Prime Minister. From July 1, 1867, to Nov. 6, 1873.
2. Hon. Alexander Mackenzie, Prime Minister. From Nov. 7, 1873, to Oct. 16, 1878.
3. Rt. Hon. Sir John A. Macdonald, Prime Minister. From Oct. 17, 1878, to June 6, 1891.
4. Hon. Sir John J. C. Abbott, Prime Minister. From June 16, 1891, to Dec. 5, 1892.
5. Hon. Sir John S. D. Thompson, Prime Minister. From Dec. 5, 1892, to December 12, 1894.
6. Hon. Sir Mackenzie Bowell, Prime Minister. From Dec. 21, 1894, to April 27, 1896.
7. Hon. Sir Charles Tupper, Prime Minister. From May 1, 1896, to July 8, 1896.
8. Rt. Hon. Sir Wilfrid Laurier, Prime Minister. From July 11, 1896, to Oct. 6, 1911.
9. Rt. Hon. Sir Robert L. Borden, Prime Minister. (Conservative Administration.) From Oct. 10, 1911, to Oct. 12, 1917.
10. Rt. Hon. Sir Robert L. Borden, Prime Minister. (Unionist Administration.) From Oct. 12, 1917, to July 10, 1920.
11. Rt. Hon. Arthur Meighen, Prime Minister. (Unionist—"National Liberal and Conservative Party".) From July 10, 1920, to Dec. 29, 1921.
12. Rt. Hon. William Lyon Mackenzie King, Prime Minister. From Dec. 29, 1921, to June 28, 1926.
13. Rt. Hon. Arthur Meighen, Prime Minister. From June 29, 1926, to Sept. 25, 1926.
14. Rt. Hon. William Lyon Mackenzie King, Prime Minister. From Sept. 25, 1926, to Aug. 6, 1930.
15. Rt. Hon. R. B. Bennett, Prime Minister. From Aug. 7, 1930.

### FIFTEENTH DOMINION MINISTRY.

(According to precedence of the Ministers as at the formation of the Cabinet.)

| Office.                                                                                      | Occupant.                                                             | Date of Appointment. |
|----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|----------------------|
| Prime Minister, President of the Privy Council, Secretary of State for External Affairs..... | Right Hon. R. B. Bennett, K.C.                                        | Aug. 7, 1930         |
| Minister of Finance.....                                                                     | Right Hon. R. B. Bennett, K.C.                                        | Aug. 7, 1930         |
| Minister without portfolio.....                                                              | Hon. E. N. Rhodes, K.C.                                               | Feb. 3, 1932         |
| Minister without portfolio.....                                                              | Rt. Hon. Sir Geo. H. Perley, G.C.M.G.                                 | Aug. 7, 1930         |
| Minister without portfolio.....                                                              | Right Hon. Arthur Meighen (Senator).....                              | Feb. 3, 1932         |
| Minister of Labour.....                                                                      | Hon. Gideon D. Robertson (Senator).....                               | Aug. 7, 1930         |
| Minister of Justice and Attorney-General.....                                                | Hon. W. A. Gordon, K.C.                                               | Feb. 3, 1932         |
| Minister of Fisheries.....                                                                   | Hon. Hugh Guthrie, K.C.                                               | Aug. 7, 1930         |

The life of a Parliament is counted from the date of return of election writs to the date of dissolution, both days inclusive. <sup>7</sup> The ordinary legal limit of duration for each Parliament is five years. <sup>8</sup> Not including days (65) of adjournment from Nov. 25 to Jan. 30.

A brief résumé of the history of parliamentary representation follows. Attention may be drawn to the growth in the number of members of both the Senate and the House of Commons since Confederation and to the greatly increased unit of representation in the Lower House.

## Subsection 3.—The Senate.

The British North America Act, 1867, provides in Sections 21 and 22 that "the Senate shall consist of seventy-two members, who shall be styled Senators. In relation to the constitution of the Senate, Canada shall be deemed to consist of three divisions—(1) Ontario; (2) Quebec; (3) The Maritime Provinces, Nova Scotia and New Brunswick; which three divisions shall be equally represented in the Senate as follows: Ontario by twenty-four senators; Quebec by twenty-four senators; and the Maritime Provinces by twenty-four senators, twelve thereof representing New Brunswick and twelve thereof representing Nova Scotia. In the case of Quebec, each of the twenty-four senators representing the province shall be appointed for one of the electoral divisions of Lower Canada, specified in Schedule A to Chapter I of the Consolidated Statutes of Canada". Further, under Section 147 of the same Act, it is provided that "in case of the admission to Confederation of Newfoundland or Prince Edward Island, . . . each shall be entitled to a representation in the Senate of four members". "Prince Edward Island, when admitted, shall be deemed to be comprised in the third of the three divisions into which Canada is divided by this Act" and on its admission "the representation of Nova Scotia and New Brunswick shall, as vacancies occur, be reduced from twelve to ten members respectively". In case of the admission of Newfoundland, the normal membership of the Senate of 72 members was to be increased to 76, while the maximum number of 78 (Sec. 28) was to be 82, Sec. 26 containing a provision for the appointment of three or six additional members in certain cases, to represent equally the three divisions of Canada.

By 33 Vict., c. 3, an Act to establish and provide for the government of the province of Manitoba, passed in 1870, the newly formed province was given representation of two members in the Senate, provision being made at the same time for increases in representation to three and four on increases of population, according to the decennial census, to 50,000 and 75,000 respectively. In the following year, British Columbia, on being admitted to the Union by an Imperial Order in Council of May 16, 1871, was given representation by three senators. Two years later, when Prince Edward Island was admitted to Confederation by an Imperial Order in Council of June 26, 1873, it was granted representation in the Senate of four members under the terms of the British North America Act, as cited above. Thus, in 1873, the seven provinces of Ontario, Quebec, Nova Scotia, New Brunswick, Manitoba, British Columbia and Prince Edward Island were represented by a total of 77 members in the Senate, their individual representation at the time being 24, 24, 10, 10, 2, 3 and 4 members respectively.

In 1882, following the Census of 1881 and an increase of population in Manitoba to 62,260 persons, the representation of this province was increased to three members under authority of the Manitoba Act, 1870. Later, by 50-51 Vict., c. 38, an Act of 1887, the representation of the Northwest Territories in the Senate was fixed at two members. A subsequent increase resulted from the growth of population in Manitoba to 152,506, as shown by the Census of 1891, the province being granted a fourth senator under the terms of the Manitoba Act of 1870. An Act passed in the session of 1903, 3. Edw. VII, c. 42, provided for an increase in the representation of the Northwest Territories from two to four members, bringing the total representation at this date to 83 members.

On the establishment of the provinces of Alberta and Saskatchewan out of the former Northwest Territories in 1905, under 4-5 Edw. VII, cc. 3 and 42, provision was made for their representation in the Senate by 4 members each, which might be increased by Parliament to 6 on the completion of the next decennial census. This change in representation brought the membership of the Upper Chamber to a total of 87.

In 1915, by an amendment to the British North America Act (5-6 Geo. V, c. 45), an important change was made with regard to the constitution of the Senate. The number of divisions provided for by Section 22 of the original Act was increased from three to four, the fourth comprising the four western provinces of Manitoba, Saskatchewan, Alberta and British Columbia. Each of these provinces was to be represented by 6 members under the Act, the division being thus represented by 24 members and placed on an equality with the others with respect to membership. A corresponding change was made in the number of additional senators provided for by the original British North America Act by substituting increases of four or eight members for the three or six cited in Section 26 of the Act of 1867. Normal representation, therefore, is at present fixed at 96, which number may be increased if necessary to 100 or to a maximum of 104.

The entry of Newfoundland to the Union is still provided for by the above Act, Subsection 6 of Sec. 1 of which sets out its representation as six members instead of the four granted by the Act of 1867. If Newfoundland were admitted to the Dominion, the normal number of senators would be 102 with a maximum of 110.

In Table 5 the growth of membership in the Senate is shown by divisions and provinces from 1867 to 1915, since when no change has taken place. The names and addresses of the senators from each province are given as at Mar. 1, 1935, in Table 6.

### 5.—Growth of Representation in the Senate, 1867-1934.

| Province.                   | 1867.     | 1870.     | 1871.     | 1873.     | 1882.     | 1887.     | 1892.     | 1903.     | 1905.     | 1915-1934. |

**Subsection 4.—The House of Commons.**

In Section 37 of the original British North America Act of 1867 (30 Vict., c. 3), it was provided that "The House of Commons shall . . . consist of one hundred and eighty-one members, of whom eighty-two shall be elected for Ontario, sixty-five for Quebec, nineteen for Nova Scotia, and fifteen for New Brunswick". Further, under Section 51, it was enacted that after the completion of the Census of 1871 and of each subsequent decennial census, the representation of the four provinces should be readjusted by such authority, in such manner, and from such time, as the Parliament of Canada provided, subject to and according to the following rules:—

- "(1) Quebec shall have the fixed number of Sixty-five Members;
- "(2) There shall be assigned to each of the other Provinces such a Number of Members as will bear the same Proportion to the Number of its Population (ascertained at such Census) as the Number Sixty-five bears to the Number of the Population of Quebec (so ascertained);
- "(3) In the Computation of the Number of Members for a Province a fractional Part not exceeding One Half of the whole Number requisite for entitling the Province to a Member shall be disregarded; but a fractional Part exceeding One Half of that Number shall be equivalent to the whole Number;
- "(4) On any such Readjustment the Number of Members for a Province shall not be reduced unless the Proportion which the Number of the Population of the Province bore to the Number of the aggregate Population of Canada at the then last preceding Re-adjustment of the Number of Members for the Province is ascertained at the then latest Census to be diminished by One Twentieth Part or upwards;
- "(5) Such Readjustment shall not take effect until the Termination of the then existing Parliament".

Again, in Section 52, it was enacted that "the number of members of the House of Commons may be from time to time increased by the Parliament of Canada, provided the proportionate representation of the Provinces prescribed by this Act is not thereby disturbed".

Later on, by the British North America Act of 1886 (49-50 Vict., c. 35), provision was made in Section 1 that "the Parliament of Canada may from time to time make provision for the representation in the Senate and House of Commons of Canada, or in either of them, of any territories which for the time being form part of the Dominion of Canada, but are not included in any province thereof".

Again in 1915, an amendment to the British North America Act (5-6 Geo. V, c. 45) was passed by the Imperial Parliament, providing that "notwithstanding anything in the said Act, a province shall always be entitled to a number of members in the House of Commons not less than the number of senators representing such province".

**Readjustments in Representation.**—As set out in the above-mentioned provisions of the British North America Act, the first Dominion Parliament of 1867 consisted at its commencement of 181 members, 82 for Ontario, 65 for Quebec, 19 for Nova Scotia and 15 for New Brunswick. To this number were added, under the Manitoba Act of 1870 (33 Vict., c. 3), 4 members to represent the newly created province of Manitoba; also, according to the agreement under which British Columbia entered Confederation, ratified by Imperial Order in Council of May 16, 1871, 6 members were added to represent the new province, making a total of 191 members at the end of the first Parliament of Canada.

Arising out of the first census of the Dominion in 1871, a readjustment of representation took place in 1872 (c. 15 of 1872), increasing the representation of Ontario from 82 to 88, of Nova Scotia from 19 to 21, and of New Brunswick from 15 to 16 members, the 9 additional members bringing the total number of representatives up to 200. To these were added in 1874, as a result of the agreement under which Prince Edward Island entered Confederation (ratified by Imperial Order in Council of June 26, 1873), 6 members representing that province—bringing the membership of the House of Commons to 206.

Results of the second census, that of 1881, necessitated the passage of a new Representation Act (45 Vict., c. 3), increasing the representation of Ontario from 88 to 92 and that of Manitoba from 4 to 5, thus bringing the membership of the House of Commons to 211 members. To these were added, under the provisions of 49 Vict., c. 24, passed in 1886, 4 members for the Northwest Territories (2 for the then provisional district of Assiniboia and 1 each for the then provisional districts of Alberta and Saskatchewan), bringing the total membership to 215.

The third census, of 1891, was followed by another readjustment of representation, reducing the representation of Nova Scotia from 21 to 20, of New Brunswick from 16 to 14, of Prince Edward Island from 6 to 5, and increasing the representation of Manitoba from 5 to 7, the representation of the other provinces remaining as before. The net result was a reduction in the number of members of the House from 215 to 213.

The fourth census, of 1901, resulted in a readjustment in 1903, reducing the representation of Ontario from 92 to 86, of Nova Scotia from 20 to 18, of New Brunswick from 14 to 13, of Prince Edward Island from 5 to 4. On the other hand, the representation of Manitoba was increased from 7 to 10, of British Columbia from 6 to 7, of the Northwest Territories from 4 to 10. By Chapter 37 of the Statutes of 1902, a member was added for the Yukon Territory, so that the net effect of the changes was to keep the membership at 214 in the early years of the present century. The extremely rapid growth of the Northwest Territories, however, led to their division and the admission to Confederation in 1905 of the provinces of Alberta and Saskatchewan. In the Acts admitting them—the Alberta Act (4-5 Edw. VII,

c. 3) and the Saskatchewan Act (4-5 Edw. VII, c. 42)—it was provided that their representation should be readjusted on the basis of the results of the Quinquennial Census of 1906. The Representation Act of 1907, implementing this pledge, increased the representation of Saskatchewan from 6 to 10 and of Alberta from 4 to 7 members, thus raising the total membership of the House of Commons to 221.

The Census of 1911, with its very large but very unevenly distributed increase of population, led to considerable changes in representation, enacted by the Representation Act of 1914. The representation of Ontario was reduced from 86 to 82, of Nova Scotia from 18 to 16, of New Brunswick from 13 to 11, of Prince Edward Island from 4 to 3. On the other hand, the representation of Manitoba was raised from 10 to 15, of Saskatchewan from 10 to 16, of Alberta from 7 to 12 and of British Columbia from 7 to 13. The net result was an increase of 13 members in the total membership of the House of Commons, bringing the figure to 234. However, in the following session the amendment to the British North America Act, already referred to, resulted in the retention by Prince Edward Island of her fourth member (since she had 4 senators). (See also 5 Geo. V, c. 19.) The total membership, therefore, of the House of Commons in the thirteenth and fourteenth Parliaments (elected in 1917 and 1921 respectively) was 235.

As a result of the smaller increase of population shown by the Census of 1921, the changes in representation were less far-reaching. Nova Scotia lost 2 members and the West gained 12, 2 of these being added to Manitoba, 5 to Saskatchewan, 4 to Alberta and 1 to British Columbia. The representation of the remaining four provinces was unchanged. Prince Edward Island retained its 4 members because of the provisions of the British North America Act of 1915, to the effect that the members of the House of Commons returned by a province shall never be fewer than its senators. Ontario, again, retained its 82 members because under Sub-section 4 of Section 51 of the British North America Act (quoted p. 73), the proportion which its population bore to the aggregate population of the Dominion had not declined by one-twentieth. Further, by the Quebec Boundaries Extension Act of 1912, it had been stipulated that the population of the added area (Ungava) should not be included for the purpose of determining the unit of representation, so that the 1921 population of Quebec, within its 1911 boundaries, *viz.*, 2,358,412, divided by the fixed number of 65 seats for that province, became the new unit of representation, 36,283.

The number of representatives of each province elected at each of the seventeen general elections since Confederation is given in Table 7.

<sup>1</sup>The representation at the general elections of 1926 and 1930 was the same as in 1925.

**The Unit of Representation.**—While the number of members of the House of Commons has been growing fairly steadily since Confederation, the unit of representation—one-sixty-fifth of the population of Quebec within its 1911 boundaries—has also been increased after each census in consequence of the growth of the population of Quebec. The units of representation, as determined by the decennial censuses taken since Confederation, are as follows: 1871, 18,331 persons; 1881, 20,908; 1891, 22,901; 1901, 25,368; 1911, 30,819; 1921, 36,283; 1931, 44,186, being one-sixty-fifth of the population of Quebec exclusive of Ungava.

**The 1931 Redistribution Problem.**—The population of Quebec in 1931, exclusive of the population (2,177) of the territory added to Quebec by the Boundaries Extension Act of 1912, was 2,872,078, which, divided by 65, gives a unit of representation of 44,186. The quotient obtained by dividing the population of each province as shown at the date of the census by 44,186 indicates (except where Subsection 4 of Section 51 of the British North America Act and the Amending Act of 1915 apply) the number of members to which each province is entitled. These numbers as determined by the Census of 1931 and the two preceding censuses are shown in Table 8.

**8.—Representation of the Provinces and Territories of Canada in the House of Commons, as Determined by the Censuses of 1931, 1921 and 1911.**

<sup>1</sup> Represents the population in the area added to Quebec by the Quebec Boundaries Extension Act, 1912, the population of which by Sae. 2, ss. "A" of said Act, is to be excluded from the population of the province in ascertaining the unit of representation.

The application of the provisions of Subsection 4 of Section 51 of the British North America Act (quoted on p. 73) to Prince Edward Island, Nova Scotia,

New Brunswick, Ontario, Manitoba (the provinces in which a decrease in the rate of growth of population as compared with the rate of Canada as a whole, has taken place), is shown in the following statement:—

| Province.                 | Proportion which Population of each Province Bears to the Total Population in Canada. |           | Decrease in Proportion from 1921-1931. | Ratio of Decrease in Proportion from 1921 to 1931 to Proportion in 1921. | Decrease greater than, equal to or less than One-twentieth of Proportion in 1931. |
|---------------------------|---------------------------------------------------------------------------------------|-----------|----------------------------------------|--------------------------------------------------------------------------|-----------------------------------------------------------------------------------|

| Ontario.....              | ·33384627                                                                             | ·33070769 | ·00313858                              | ·0094                                                                    | less                                                                              |
| Manitoba.....             | ·06943053                                                                             | ·06747166 | ·00195887                              | ·0282                                                                    | less                                                                              |

The above figures show that no reduction should take place in the representation of Ontario or Manitoba, since the proportion which the population of each of these provinces bore to the number of the aggregate population of Canada at the readjustment of the number of members for the provinces, based on the Census of 1921, was ascertained at the Census of 1931 to be diminished by less than one-twentieth part. The situation as regards the other three provinces and Yukon is as follows:—

*Nova Scotia.*—The proportion for Nova Scotia having diminished by more than one-twentieth part, the provisions of Subsection 4 of Section 51 do not apply and the representation of Nova Scotia should be reduced, in accordance with the provisions of Section 51, Subsections 2 and 3 of the Act, by two members.

*Prince Edward Island.*—Prince Edward Island would only have two members on the strict basis of population but its representation remains unchanged at 4 under the B.N.A. Act of 1915 referred to above.

*New Brunswick.*—The representation of New Brunswick if fixed by the unit of representation (44,186) would be reduced from 11 to 9; but as the B.N.A. Act of 1915 provided that "a province shall always be entitled to a number of members in the House of Commons, not less than the number of senators representing such province", the representation of New Brunswick will be 10 instead of 9, corresponding with the number of senators from that province.

*Yukon.*—The representation of Yukon is not determined by the B.N.A. Act, but is within the competence of Parliament to decide. Pursuant to the Representation Act 1933, it will continue to be represented.

An Act to readjust the representation in the House of Commons (23-24 George V, Chapter 54) and cited as "The Representation Act, 1933" was assented to on May 27, 1933. The changes in representation made by the Act are exactly as outlined above, the provisions being:—

The House of Commons shall consist of two hundred and forty-five members, of whom eighty-two shall be elected for the province of Ontario, sixty-five for the province of Quebec, twelve for the province of Nova Scotia, ten for the province of New Brunswick, seventeen for the province of Manitoba, sixteen for the province of British Columbia, four for the province of Prince Edward Island, twenty-one for the province of Saskatchewan, seventeen for the province of Alberta, and one for Yukon Territory.

### Constituencies and Representatives in the Seventeenth Parliament.—

A complete list of the constituencies, with their 1931 populations, the voters on the list and votes polled at the general election of July 28, 1930, together with the

names and addresses of those then elected to the House of Commons of the seventeenth Parliament of Canada, will be found in Table 9. Changes occurring at subsequent by-elections to Mar. 5, 1935, are indicated in the footnotes.

**Subsection 5.—The Dominion Franchise.\***

It was provided by the B.N.A. Act, 1867, that, until otherwise directed by Parliament, elections to the House of Commons should be governed by the electoral laws of the several provinces. The qualifications of electors throughout the Dominion consequently remained the same for both Dominion and provincial elections until, in 1885, Parliament legislated on the subject by passing the Electoral Franchise Act (1885, c. 40). That Act defined a uniform qualification for voters throughout Canada for Dominion purposes, the basis of this new franchise being the ownership or occupation of land of a specified value, although the sons of owners, and particularly farmers' sons, were given the right to vote on special conditions; each province, of course, continued separately to define the qualifications of voters at provincial elections. This Dominion franchise remained in force for thirteen years, but between 1898 and 1920, under the Franchise Act of the former year (1898, c. 14), the provincial franchises were again made applicable at Dominion elections, except that on the constitution of the provinces of Alberta and Saskatchewan it was provided that manhood suffrage, which had already been adopted for the Northwest Territories under an Act to amend the N.W.T. Act (1895, c. 16), should continue in force for Dominion purposes independently of any action that might be taken by the newly elected legislatures of these two provinces (R.S.C. 1906, c. 6, ss. 31-65). In the other provinces the rules as to the qualifications of voters varied from time to time. In Manitoba manhood suffrage had been adopted in 1888 (1888, c. 2), and the franchise was extended to women on the same terms as to men in 1916 (1916, c. 36). Alberta and Saskatchewan, on their establishment as provinces, continued the previously existing manhood suffrage and both extended the franchise to women on the same terms as to men in 1916 (Alta. 1916, c. 5; Sask. 1916, c. 37). British Columbia adopted manhood suffrage in 1904 (1903-1904, c. 7), Ontario in 1907 (7 Edw. VII, c. 5), and New Brunswick in 1916 (6 Geo. V, c. 16); in British Columbia (1917, c. 23) and in Ontario (7 Geo. V, c. 5), the franchise was extended equally to women in 1917, and in New Brunswick this was done in 1919 (9 Geo. V, c. 63). In Quebec and Prince Edward Island the provincial franchises throughout the period in question were not so wide; in neither were women admitted to vote and certain property or other special qualifications were required in each. A property qualification was also required in Nova Scotia until 1920 (10-11 Geo. V, c. 49), but between 1918 and 1920 men and women had voted on equal terms (9 Geo. V, c. 3). The adoption of the provincial franchise laws for Dominion purposes was temporarily modified by the War Times Elections Act (1917, c. 39), which admitted certain near female relatives of serving soldiers and

\*Revised by John Thompson, Dominion Franchise Commissioner.

sailors to vote at Dominion elections, and three years later, on the adoption of a New Dominion Elections Act (1920, c. 46), the provincial franchises were again wholly abandoned and a new electoral qualification was established for Dominion elections throughout Canada. Subject to a modification of the usual rules as to changes of nationality, which was amended in 1921 (1921, c. 29, s. 3) and repealed in 1922 (1922, c. 20, s. 1), the right to vote was conferred by the new Act upon all British subjects, male and female, of 21 years and upwards, who had resided in Canada for a year, and for two months in the electoral district in which they desired to vote, this last restriction having been removed two years later (1922, c. 20), so far as it applied to general elections.

The right to vote is at present provided for in the Dominion Franchise Act, (24-25 Geo. V, c. 51). The franchise is conferred upon all British subjects who are of the full age of twenty-one years and who have been ordinarily resident in Canada for at least one year and for three months resident in the electoral district in which application is made for registration.

Those denied the right to vote are: prisoners undergoing punishment for any offence; persons restrained of their liberty or management of their property by reason of mental disease; Indians ordinarily resident on an Indian reservation who did not serve in the war 1914-1918; Judges appointed by Order in Council; persons who are disqualified under the law of Canada relating to the disqualification of electors for corrupt and illegal practices; inmates of an institution which is maintained by any government or municipality for the housing of the poor; Eskimos, whether born in Canada or elsewhere; persons who are disqualified by reason of race from voting at an election of a member of the Legislative Assembly of a province in which they are residing, and who did not serve in the war of 1914-1918; in the province of British Columbia, every Doukhobor or any descendant of such, whether born in that province or elsewhere who is by the law of that province disqualified to vote at an election of a member of the Legislative Assembly of that province.

**The Use of the Franchise.**—The number of voters on the lists and the number of votes polled at the general elections of 1921, 1925, 1926 and 1930, are given in Table 11.

# 11.—Number of Voters and Votes Polled in the General Elections of 1921, 1925, 1926 and 1930.

<sup>1</sup>The area of Ontario was extended by the Ontario Boundaries Extension Act, 1912 (2 Geo. V, c. 40).

<sup>2</sup>Extended by Quebec Boundaries Extension Act, 1912 (2 Geo. V, c. 45), and diminished in consequence of the award of the Judicial Committee of the British Privy Council (Mar. 1, 1927), whereby some 112,400 square miles of territory, formerly considered as part of Quebec, were assigned to Newfoundland.

<sup>3</sup>Extended by Extension of Boundaries of Manitoba Act, 1881, and Manitoba Boundaries Extension Act, 1912 (2 Geo. V, c. 32).

<sup>4</sup>Alberta and Saskatchewan now cover approximately the area formerly comprised in the districts of Assiniboia, Athabaska, Alberta and Saskatchewan, established May 17, 1882, by minute of Canadian P.C., concurred in by Dominion Parliament and Order in Council of Oct. 2, 1895.

<sup>5</sup>By an Order in Council of June 23, 1870, Rupert's Land, acquired under the Rupert's Land Acts of 1867 and 1868, and the undefined Northern Territories were admitted into the Confederation. The original Northwest Territories, mentioned in the Manitoba Act, 1870, were established by the Northwest Territories Act, 1880 (43 Vict., c. 25), the district of Keewatin having been previously defined by an Act of the Dominion Parliament (39 Vict., c. 21). The provisional districts of Yukon, Mackenzie, Franklin and Ungava were defined in an Order in Council of Oct. 2, 1895, their boundaries being changed by Order in Council of Dec. 18, 1897. By Order in Council of July 24, 1905, the area of Keewatin, not included in the Northwest Territories, was annexed to the latter from Sept. 1, 1905. By the Extension of Boundaries Act, 1912, Ungava was made a part of the province of Quebec, and the remaining area of the Northwest Territories south of 60° N. latitude was divided between Manitoba and Ontario.

In each of the provinces the King is represented by a Lieutenant-Governor appointed by the Governor General in Council, and governs with the advice and assistance of his Ministry or Executive Council, which is responsible to the Legislature and resigns office when it ceases to enjoy the confidence of that body. The Legislatures of all the provinces with the exception of Quebec are now unicameral,\* consisting of a Legislative Assembly elected by the people. In Quebec there is a Legislative Council as well as a Legislative Assembly. For detailed description of the Provincial Governments, the reader is referred to pp. 101-115 of the 1922-23 edition of the Year Book.

The Lieutenant-Governors of the provinces, together with the names of the Ministers of the present administrations, are given in Table 13. Details regarding Provincial Legislatures and Ministries from Confederation to 1924 were given on pp. 75-84 of the 1924 Year Book.

\*The Legislative Council of Nova Scotia ceased to exist in 1923.

**13.—Lieutenant-Governors of Provinces, 1867-1934, and Present Ministries.**

NOTE.—The Lieutenant-Governor of a province is styled "His Honour" and is also styled "Honourable" throughout his life.

THE TERRITORIES.

NOTE.—In 1883 the districts of Alberta, Assiniboia, Athabaska and Saskatchewan, then called the Northwest Territories, with their capital at Regina, were given local responsible government, and the old Northwest Council was replaced by the Northwest Legislature, which existed until Aug. 31, 1905. When the area included in these districts was formed into the provinces of Alberta and Saskatchewan, on Sept. 1, 1905, these provinces were given systems of government similar to the other provinces of the Dominion. The remaining areas (Yukon and the provisional districts of Franklin, Keewatin and Mackenzie) are now administered by the Lands, Northwest Territories and Yukon Branch, Department of the Interior. The Deputy Minister of the Department is, *ex officio*, the Commissioner of the Northwest Territories which comprises the three provisional districts.

<sup>1</sup>Second term.

PART IV.—REPRESENTATIVES IN OTHER COUNTRIES.\*

Section 1.—Representatives within the Empire.

The policy of the early North American colonies, of maintaining in London accredited representatives for business and diplomatic purposes, was recognized in the eighteenth century as being a more satisfactory means of communication

\*Revised by the Department of External Affairs, Ottawa.

with the British Government than that provided by occasional official visits or by correspondence. Edmund Burke, the noted British statesman, held the position of agent for the colony of New York for some years following 1771. Of the Canadian colonies, Nova Scotia was the first to adopt this plan, its Legislature having appointed an agent in London in 1761. New Brunswick was similarly represented in 1786, Upper Canada as early as 1794, Lower Canada in 1812 and British Columbia in 1857. Following Confederation, several of the provinces continued to adhere to, and in certain cases enlarge upon, the practice to the extent of themselves appointing Crown Agents or Agents General. Such developments as have taken place are dealt with in the following paragraphs.

*Prince Edward Island.*—Prince Edward Island appointed its first official Agent General to London, England, by Order in Council of May 14, 1902. The appointee held office until his resignation on Aug. 17, 1917. Since 1917, the province has been without an Agent General in England or elsewhere.

*Nova Scotia.*—The first Agent General from Nova Scotia was appointed on Oct. 24, 1885, by Order in Council. This appointment was honorary but later the Legislature estimated for a salary to be paid. The office has never been abolished, although the last appointee died in 1929 and, since the end of the fiscal year 1932 no estimate has been made by the Legislature for remuneration or other expenses in connection with the office.

*New Brunswick.*—A London office was opened by the province of New Brunswick on April 6, 1887. The last appointee to the position of Agent died in 1920; no successor was appointed and the office was then closed.

*Quebec.*—This province appointed its first "Agent-General for the Province [of Quebec] in the United Kingdom of Great Britain and Ireland" on Aug. 7, 1911, although legislative action had been taken to establish the office in 1908, the Act being declared to come into force by proclamation. The office of Agent General of Quebec has not been abolished and is still functioning. The Agent General is located in London.

*Ontario.*—In 1872 the Ontario Government had Agents established in various important centres in England and also in Scotland and Ireland, in connection with immigration matters. Later all these, excepting the Agent at London, were withdrawn. It is only during the past fifteen or twenty years, however, that the term "Agent General" has been used in connection with the London appointee. The London office was closed on Aug. 31, 1934.

*Manitoba.*—The Provincial Government of Manitoba has never had an Agent or Agent General in London.

*Saskatchewan.*—The province of Saskatchewan is represented by one of its government officials in Canada House, but has never established its own headquarters nor the office of Agent General.

*Alberta.*—The office of the Agent General for the province of Alberta was established in London on Feb. 2, 1927, by order of the Lieutenant-Governor in Council. The office was abolished on Aug. 31, 1933.

*British Columbia.*—By the Agent General Act, 1901, (B.C. I Ed. VII, c. 1) assented to on May 11 of that year, the office of Agent General for British Columbia, was established, and London was made the seat of this official representative.

**The High Commissioner for Canada.**—With the federation of the provinces of British North America in 1867, a new political entity which could not avail itself of the services of the provincial agents was brought into existence. To supplement the ordinary method of communication between the Canadian and British Governments (which at that time was by correspondence between the Governor General and the Secretary of State for the Colonies, and is now between the Secretary of State for External Affairs of Canada and the Secretary of State for Dominion Affairs in London), the position of High Commissioner for Canada was created in 1880 (see R.S.C. 1927, c. 92). The duties of the office are defined in the Act as follows:—

“The High Commissioner shall—

- “(a) act as representative and resident agent of Canada in Great Britain and in that capacity, execute such powers and perform such duties as are, from time to time, conferred upon and assigned to him by the Governor in Council;
- “(b) take the charge, supervision and control of the immigration offices and agencies in Great Britain, under the Minister of Immigration and Colonization;
- “(c) carry out such instructions as he, from time to time, receives from the Governor in Council respecting the commercial, financial and general interests of Canada in Great Britain and elsewhere.”

Sir Alexander Galt was the first Canadian High Commissioner, holding office from May 11, 1880, until May, 1883; in 1884 he was succeeded by Sir Charles Tupper. Lord Strathcona and Mount Royal was appointed in 1896. Sir George H. Perley took charge of the High Commissioner's Office in 1914 but was appointed High Commissioner only on Oct. 12, 1917. The Hon. P. C. Larkin was appointed in February, 1922, and after his decease (Feb. 3, 1930) the Hon. G. Howard Ferguson was appointed on Nov. 28, 1930. The office of the High Commissioner for Canada is in Canada House, Trafalgar Square, London, S.W. 1.

**High Commissioner of the United Kingdom in Canada.**—His Majesty's Government in the United Kingdom appointed in April, 1928, a High Commissioner in Canada, Sir William H. Clark, who was succeeded in January, 1935, by Sir Francis Floud, K.C.B. The High Commissioner resides in Ottawa, and his position corresponds to that of the High Commissioner for Canada in the United Kingdom. This appointment was made in consequence of discussions at the Imperial Conference of 1926. The relevant passage in the report of the Inter-Imperial Relations Committee runs as follows:—

“A special aspect of the question of consultation which we considered was that concerning the representation of Great Britain in the Dominions. By reason of his constitutional position, as explained in Section IV (b) of this report, the Governor General is no longer the representative of His Majesty's Government in Great Britain. There is no one therefore in the Dominion capitals in a position to represent with authority the views of His Majesty's Government in Great Britain.

“We summed up our conclusions in the following resolution which is submitted for the consideration of the Conference:—

“The Governments represented at the Imperial Conference are impressed with the desirability of developing a system of personal contact, both in London and in the Dominion capitals, to supplement the present system of intercommunication and the reciprocal supply of information on affairs requiring joint consideration. The manner in which any new system is to be worked out is a matter for consideration and settlement between His Majesty's Governments in Great Britain and the Dominions, with due regard to the circumstances of

each particular part of the Empire, it being understood that any new arrangements should be supplementary to, and not in replacement of, the system of direct communication from Government to Government and the special arrangements which have been in force since 1918 for communications between Prime Ministers' ”.

## Section 2.—Representatives outside the Empire.

**The Canadian Minister to the United States.**—For many years the diplomatic business between Canada and the United States has been steadily increasing, as the natural result of the proximity of the two countries and the closeness of the business relationships between their citizens. Before the Great War a former British Ambassador at Washington, Lord Bryce, said that between two-thirds and three-quarters of the work of the British Embassy in the United States was occasioned by Canadian affairs.

In January, 1918, a temporary Canadian War Mission was established at Washington under the chairmanship of Mr. Lloyd Harris, and was maintained for some years after the close of the War. Though not a formal diplomatic mission, its duties extended to questions usually dealt with through diplomatic channels. After the retirement of this mission Canada was represented in Washington by Mr. M. M. Mahoney, who acted as agent of the Department of External Affairs, and, through the courtesy of the British Government, occupied an office at the British Embassy.

In 1920, following discussions between the British and Canadian Governments, it was announced that agreement had been reached upon the appointment of a Canadian Minister at Washington, who would act for the British Ambassador in the latter's absence. No appointment was made until Nov. 26, 1926, when, after decision to omit the arrangement that the Canadian Minister should substitute for the British Ambassador, Hon. Vincent Massey was appointed as His Majesty's Envoy Extraordinary and Minister Plenipotentiary in the United States of America to represent the interests of the Dominion of Canada. Mr. Massey took up his duties in February, 1927, and held office until July 23, 1930. Hon. W. D. Herridge was appointed Minister to the United States on Mar. 7, 1931. The Canadian Legation in Washington is situated at 1746 Massachusetts Ave.

The United States Government reciprocated in 1927 by appointing Hon. William Phillips its first Minister to Canada; his successor, Hon. Hanford MacNider, was appointed in August, 1930, and resigned in September, 1932. The United States Minister in Ottawa is now the Hon. W. D. Robbins, appointed in May, 1933.

**The Canadian Minister to France.**—For many years the Canadian Government maintained an agency at Paris. The post was first occupied in 1882 by Hon. Hector Fabre, who also represented for a time the Government of Quebec. After his death Hon. Philippe Roy was appointed in May, 1911, with the title of Commissioner-General of Canada in France. In 1928 an exchange of Ministers was agreed upon between Canada and France, and in September of that year Hon. Philippe Roy was appointed as His Majesty's Envoy Extraordinary and Minister Plenipotentiary in France to represent the interests of the Dominion of Canada. The Canadian Legation in Paris is situated at No. 1, rue François premier.

The French Government appointed M. Georges Jean Knight as its first Minister in Canada in 1928. From March, 1931, to September, 1934, M. Charles Arsène Henry was Minister. He was succeeded in September, 1934, by M. R. Brugère.

**The Canadian Minister to Japan.**—In 1928 an exchange of Ministers was agreed upon between the Governments of Canada and Japan, and Hon. H. M. Marler was appointed in 1929 as His Majesty's Envoy Extraordinary and Minister Plenipotentiary in Japan to represent the interests of the Dominion of Canada. The Canadian Legation is at 16 Omote-Cho, Sanchome, Akasaka-Ku, Tokyo.

The Japanese Government appointed Mr. Iyemasa Tokugawa as its first Minister in Canada in 1929. Mr. Tokugawa presented his Letters of Recall towards the close of 1934. A successor has not yet (Mar. 1, 1935), been appointed.

**Canadian Advisory Officer, League of Nations.**—The practice of appointing permanent representatives at Geneva accredited to the League of Nations has been largely followed by those nations which are situated at a distance from Geneva. It was found that, while countries adjacent to the seat of the League were able without difficulty to include in the personnel of their delegations to the Assembly and Council various advisors and assistants at a minimum of expense, distant countries were at a disadvantage in this respect. Canada's duties as a member of the Assembly and of the International Labour Conference, and as one of the countries represented on the Governing Body of the International Labour Office, made this disadvantage especially felt. Accordingly, the position of Dominion of Canada Advisory Officer, League of Nations, was created by Order in Council P.C. 2174 of Dec. 17, 1924, and Dr. W. A. Riddell was appointed to the post on Jan. 1, 1925.

The duties of the Canadian Advisory Officer are "to establish and maintain as close relations as possible with the Secretariats of the League of Nations and the International Labour Office", to "communicate with the Government of Canada as to all matters arising and requiring its attention", and to "act in all such matters in an advisory capacity to the Government of Canada and to delegates from the Government of Canada to conferences arising out of the organizations before-named". The office of the Canadian Advisory Officer is situated at 41, Quai Wilson, Geneva.

## PART V.—CANADA AND THE LEAGUE OF NATIONS.\*

The League of Nations is an association of fully self-governing States whose relations are governed by the Covenant. The League of Nations acts through an Assembly and Council composed of representatives of Governments. Sixty States are at present Members of the League, as compared with forty-two at the time of the first Assembly in 1920. Canada, as a signatory of the Treaties of Peace, is an original Member of the League.

The League of Nations has two aims: (1) to preserve peace and to seek a settlement of international disputes; and (2) to organize in the most varied spheres co-operation of peoples, with a view to the material and moral welfare of humanity.

The Covenant, which constitutes the fundamental charter of the League of

---

\*Prepared by N. A. Robertson, Department of External Affairs. A fuller article on Canada and the League of Nations, contributed by Mr. N. A. Robertson of the Department of External Affairs to the 1931 Year Book, gave information regarding the budget of the League, mandates, minorities, the economic and financial organization, the organization for communications and transit, the health organization and social and humanitarian work of the League, in addition to fuller treatment of the subjects here dealt with. This article appeared at pp. 115-22 of the 1931 Year Book. The League of Nations Society in Canada, 124 Wellington St., Ottawa, is the authorized agent for the publications of the League of Nations.

Nations, was formed in 1919 by a Commission set up for the purpose, which drew up the twenty-six articles of which it is composed. The Covenant was inserted at the head of the several Treaties of Peace and came into force on Jan. 10, 1920.

**The Organs of the League.**—The organs of the League are:—

- (a) The Assembly;
- (b) The Council;
- (c) The Secretariat;
- (d) The International Labour Organization; (see Chapter XIX).
- (e) The Permanent Court of International Justice.

*The Assembly.*—The Assembly consists of representatives of the members of the League, and meets annually in regular session each September in Geneva. At the 15th Assembly in September, 1934, the Canadian Delegation was headed by the Rt. Hon. R. B. Bennett, Prime Minister and Secretary of State for External Affairs.

*The Council.*—The Council, which originally consisted of five permanent members and four non-permanent members, now consists of six permanent members (the British Empire, France, Italy, Germany,\* Japan† and the U.S.S.R.) together with ten non-permanent members elected for three years (three retiring each year) from among the sixty States which are Members of the League. The non-permanent members of the Council are at present as follows: Czechoslovakia, the United States of Mexico and Poland, terms expiring 1935; Argentine Republic, Australia, Denmark and Portugal, terms expiring 1936; Chile, Spain and Turkey, terms expiring 1937. Canada was a member of the Council of the League from 1927 to 1930.

The Council, which normally meets four times a year and more frequently if circumstances should require it to do so, may deal at its meetings with any matter within the sphere of action of the League or affecting the peace of the world.

*The Secretariat.*—The Permanent Secretariat represents the Civil Service of the League. The staff is appointed by the Secretary General with the approval of the Council. The officials of the Secretariat of the League are exclusively international officials, having international and not national duties. The first Secretary General, Sir Eric Drummond, who was named in the Annex to the Covenant, resigned in 1933 and was succeeded by M. Joseph Avenol, who is assisted by two Deputy Secretaries General (one Spanish and one Italian) and by one Under-Secretary General (British).

*Permanent Court of International Justice.*—The Permanent Court of International Justice was established by the Protocol of Dec. 16, 1920, in accordance with Article 14 of the Covenant of the League of Nations. It is composed of a body of fifteen judges elected by the Assembly and Council of the League of Nations for a term of nine years, and sits at the Hague. The Court is competent to hear and determine any dispute of an international character which the parties thereto submit to it; it may also give an advisory opinion upon any dispute or question referred to it by the Council or the Assembly. Article 36 of the Statute of the Court provides that any State may recognize as compulsory the jurisdiction of the Court in all or any classes of legal dispute concerning:—

For footnotes see end of article, p. 97.

(a) The interpretation of a Treaty.

(b) Any question of international law.

(c) The existence of any fact which, if established, would constitute a breach of an international obligation, and the nature and extent of the reparations to be made for the breach of the international obligation.

Canada has been a Member of the Court from its establishment, and in 1929 accepted, subject to certain reservations, the compulsory jurisdiction of the Court in the cases contemplated in Article 36.

**The Budget of the League.**—The expenditure of the League is covered by the contributions of States Members which are fixed in accordance with a scale which takes into account the population, area and public revenue of each State concerned. The Budget for the year 1934 was 30,827,805 gold francs, of which 20,031,102 francs were for the work of the Assembly, Council and Secretariat, 8,257,576 francs for the International Labour Office, and 2,538,827 for the Permanent Court of International Justice. Canada's share of this outlay assessed at 35/1013 of the total was 1,065,126.55 francs gold, or 205,569.42 dollars gold.

**Membership of the League of Nations.**—The 60 States which are Members of the League (November, 1934), are as follows:—

|                       |                         |                     |
|-----------------------|-------------------------|---------------------|
| Abyssinia             | Estonia                 | New Zealand         |

\*By a letter received on Oct. 21, 1933, Germany gave notice of her intention to withdraw from the League of Nations, in accordance with Article 1, paragraph 3, of the Covenant, which provides that after two years' notice a Member which has discharged its international obligations and other obligations under the Covenant, may withdraw from the League.

†By a telegram received Mar. 27, 1933, Japan gave notice of her intention to withdraw from the League of Nations, in accordance with Article 1, paragraph 3, of the Covenant.

‡By a telegram sent May 23, 1934, Paraguay gave notice of her intention to withdraw from the League of Nations, in accordance with Article 1, paragraph 3, of the Covenant.

## CHAPTER IV.—POPULATION.\*

The Population chapter of the Year Book is a *précis* of the results of investigations into the number and the constitution of the population made in the seven censuses of Canada since Confederation, summarizing the growth and distribution of population between 1871 and 1931, as shown by the successive decennial censuses, in regard to the chief matters investigated at the censuses.

The modern census, now established in all civilized countries as the chief method of measuring periodically the population and its social and economic condition, has been described by a modern United States' writer as the greatest single peace-time activity in which a government engages, both in respect of the physical extent of its organization and the important part which its results play in the general administration of public affairs.

Under the Canadian constitution, the legal *raison d'être* of the census is to determine representation in the House of Commons; after each decennial census a redistribution of seats in the House, following the course of the movement of population, is made in the manner described on pp. 74-77 of this volume. But the census, especially since the introduction of methods of mechanical tabulation, has become far more than a mere counting of heads. It is a great periodical stock-taking of the people and their affairs, designed to show as fully as possible the stage which has been reached in the progress of the nation. Thus the numbers, local distribution, age, sex, racial origin, nationality, language, religion, education, housing and occupations of the people, severally, constitute investigations of enormous importance, to which all the continuous and routine statistics collected in the ordinary course of administration must be related if their importance is to be realized. The census, in fine, rounds out and completes the scheme of information upon which the Government relies in conducting the business of the country.

On account of the requirements as to parliamentary representation and the payment of provincial subsidies, which are based on population, the Canadian census is taken on the *de jure* principle; *i.e.*, each person is counted as belonging to the locality in which he is regularly domiciled, irrespective of where he may be at the date of the enumeration. Under the *de facto* method, adopted in the United Kingdom, each individual is counted as belonging to the locality where he is found on the census date. The *de facto* method is undoubtedly simpler, but the *de jure* plan better portrays the permanent condition of the population. The chief difficulty in the application of the latter method is found in connection with holiday resorts, in the segregation of "visitors" and the tracing of "absentees". A date prior to the opening of the holiday season is accordingly chosen for the date of the census. In the Canadian census, students and inmates of hospitals are assigned to their home localities, while inmates of prisons, jails, lunatic asylums, etc., are counted where found.

### Section 1.—Census Statistics of General Population.

Since the creation of the Dominion of Canada, in 1867, decennial censuses have been taken on the *de jure* plan as of the dates April 2, 1871, April 4, 1881, April 5, 1891, April 1, 1901, June 1, 1911, 1921, and 1931. The population of Canada and its percentage distribution as on each date, together with the absolute and percentage increases from decade to decade, are given in Tables 1 to 4 immediately following.

\*This chapter has been revised by A. J. Pelletier, Chief, Demography Branch, Dominion Bureau of Statistics. A list of the publications of this branch will be found in Chapter XXIX, Section I, under "Population".

<sup>1</sup>The population of the Prairie Provinces in 1906, 1916 and 1926 is shown on pp. 127-128 of the 1930 Year Book. For intercensal estimated populations, see Table 50, p. 164. <sup>2</sup>Corrected as a result of the Extension of Boundaries Act, 1912. <sup>3</sup>Corrected by transfer of population of Fort Smith (368) to Northwest Territories. <sup>4</sup>The decreases shown in the population of the Northwest Territories since 1891 are due to the separation therefrom of vast areas to form Alberta, Saskatchewan and Yukon and to extend the boundaries of Quebec, Ontario and Manitoba. <sup>5</sup>Revised in accordance with the Labrador award of the Privy Council, Mar. 1, 1927. <sup>6</sup>Members of the Royal Canadian Navy were counted in their homes in the Census of 1931.

**4.—Population of Canada, by Provinces and Territories, in 1871, and Increase Per Cent, by Decades, from 1871 to 1931.**

<sup>1</sup>The decreases shown in the population of the Northwest Territories since 1891 are due to the separation therefrom of immense areas to form Yukon and the provinces of Alberta and Saskatchewan as well as to extend the boundaries of the older provinces of Quebec, Ontario and Manitoba.

<sup>2</sup>Revised in accordance with the Labrador award of the Privy Council, Mar. 1, 1927.

**Early Censuses.**—The credit of taking the first census of modern times belongs to Canada. The year was 1666, the census that of the colony of New France. Still earlier records of settlement at Port Royal (1605) and Quebec (1608) are extant; but the Census of 1666 was a systematic “nominal” enumeration of the people, taken on the *de jure* principle on a fixed date, showing age, sex, occupation and conjugal and family condition. A second census in 1667 included the areas under cultivation and the numbers of sheep and cattle. When it is recalled that in Europe the first census dates only from the eighteenth century (those of France and England from the first year of the nineteenth) and that, in the United States, the census begins only with 1790, the achievement of the primitive St. Lawrence colony, in instituting what is to-day one of the principal instruments of government throughout the civilized world, may call for more than passing appreciation.

The Census of 1666 (the results occupy 154 pages in manuscript, and are still to be seen in the Archives in Paris, or in a transcript at Ottawa) showed some 3,215 souls. It was repeated at intervals more or less regularly for a hundred years. By 1685 the total had risen to 10,904, including 1,538 Indians settled in villages and living a civilized life under the supervision of the missionaries. By the end of the century it had passed 15,000, and this was doubled in the next twenty-five years. Not to present further details, some of which will be found in the Chronology on pp. 54-63, it may be said that at the time of the cession (1763) the population of New France was nearly 70,000 (69,810 in 1765), whilst another 10,000 French (thinned to these proportions by the expulsion of the Acadians) were scattered through what are now Nova Scotia, New Brunswick and Prince Edward Island. The British population of Nova Scotia was 8,104 in 1762, thirteen years after the foundation of Halifax in 1749.

Our chief sources of statistics for half a century and more after the cession are the reports—more or less sporadic—of colonial governors, though censuses of the different sections under British rule were taken at irregular intervals. British settlement on a substantial scale in the Gulf provinces and in Ontario dates only from the Loyalist movement which followed the American Revolution, at the end of which, *i.e.*, about the year of the Constitutional Act (1791), the population of

Lower Canada was approximately 163,000, whilst the newly constituted province of Upper Canada, under Lieutenant-Governor Simcoe, numbered perhaps 15,000, and the addition of the maritime colonies brought the total to well over 200,000. A decade later Canada began the nineteenth century with a population of probably not less than 250,000 or 260,000. Subsequent censuses gave the populations of the different colonies as follows: Upper Canada (1824) 150,066, (1840) 432,159; Lower Canada (1822) 427,465, (1844) 697,084; New Brunswick (1824) 74,176, (1840) 156,162; Nova Scotia (1817) 81,351, (1838) 202,575; Prince Edward Island (1822) 24,600, (1841) 47,042.\*

The policy of irregular census-taking was supposed to have been ended after the union of Upper and Lower Canada by an Act, passed on Sept. 18, 1841, which provided for a census in the year 1842 and every fifth year thereafter, but under this Act only the census of Upper Canada was taken and the following year on Dec. 9, the Act was amended, the reason being stated as follows: "Whereas the Census of the inhabitants of Lower Canada, for the year one thousand eight hundred and forty-two as required by an Act of this Legislature, . . . hath not been duly taken . . . and whereas it is of the greatest importance that such Census should be taken . . . Be it therefore enacted . . . ." The Census of 1844 of Lower Canada was taken under this Act.

Another Act was passed and given Royal Assent on July 28, 1847, creating a "Board of Registration and Statistics" with instructions "to collect statistics and adopt measures for disseminating or publishing the same" and providing for a census to be taken in the year 1848, to be repeated in 1850 and every fifth year thereafter. This Act resulted in the Census of Upper Canada of 1848.

Finally an Act was passed on Aug. 30, 1851, providing for a census to be taken in January, 1852, then in the year 1861 and thereafter every tenth year, and that better provision should be made for taking the census. The first census thereunder was taken in January, 1852, and, as similar censuses were taken by New Brunswick and Nova Scotia, we have a regular measure of population growth in Canada over the past 80 years. The 'fifties saw a very rapid development, especially in Ontario, whilst the 'sixties showed only less substantial gains. In the years following Confederation there was a spurt, the increase between 1871 and 1881 (which included several lean years towards the end) being 635,553, or 17.23 p.c. In neither of the last two decades of the nineteenth century, however, was this record equalled either absolutely or relatively, the gains in each being under 550,000, or 12 p.c. With the end of the century the population of Canada had reached approximately five and a third millions, or twenty times that of 1800. It has increased by five millions in the past thirty years.

**Expansion in the Twentieth Century.** It is within the present century that the most spectacular expansion of the population of Canada has taken place. The outstanding feature was, of course, the opening to settlement of the "last best West". The unorganized territories of British North America had been ceded to the Dominion soon after Confederation, and the West had been tapped and traversed by the Canadian Pacific Railway in the 'eighties and 'nineties. But though western population was doubled in each of these decades, it was only with the launching of a large-scale immigration movement after 1900 that western settlement and production became a first-rate economic factor. Simultaneously an almost equally striking development occurred in the industrial centres of Eastern

\*A résumé of the results of all the censuses taken in Canada between 1666 and 1931 has been published in bulletin form and will be included in Vol. I, Census of 1931.

Canada, forming the immediate basis for the move upon the West. At the back, of course, was the heavy inflow of British and other capital—a total of \$1,500,000,000 between 1900 and 1912—which went to finance the large constructive undertakings (chiefly railway, municipal and industrial) which characterized the movement and which represented at bottom the traditional policy of England in search of cheap and abundant food for her workshop population. The years 1901 to 1911, in brief, form the *decas mirabilis* of Canadian expansion. The immigration movement just mentioned, which had previously run well under 50,000 per annum, rose rapidly to over five times that volume, eventually passing 400,000 in a single year. In the ten years between 1901 and 1911 it exceeded 1,800,000 and, though at least a third of these were lost (partly in the return to Europe of labour temporarily attracted by the railway and other developments in progress, and partly in the never-ceasing and natural “drag” of the United States upon a virile and less wealthy people), it formed the chief factor in the gain of 34 p.c. which the total population of Canada registered in that decade, and which was larger than the relative growth of any other country during the same period. The movement was continued and even intensified in the first three years of the second decade of the century, after which a recession set in to which the outbreak of war gave a new and wholly unexpected turn. Nevertheless, the decade which closed with the census of 1921 showed over 1,700,000 immigrant arrivals in Canada, and, though the proportionate loss of these was very heavy (probably as much as two-thirds), Canada’s relative gain for the decade was again among the largest in the world.

**Results of the Census of 1931.**—According to the final results of the Census of 1931 the total population of the Dominion on June 1, 1931, was 10,376,786, as compared with 8,787,949 on June 1, 1921, an increase of 1,588,837 or 18·08 p.c. in the decade, as compared with 21·94 p.c. and 34·17 p.c. during the decades 1911 to 1921 and 1901 to 1911 respectively.

During the decade 1911-21 the countries which comprise the British Empire, and more especially the United States which was in the Great War for only nineteen months as against Canada’s fifty-two, had suffered less in actual loss of life from the War and its consequences than the continental countries of Europe. None of them declined in population during the period, as many continental European countries did. Their percentage increases, however, were in almost all cases lower than in the previous decade. Thus the population of England and Wales increased between 1911 and 1921 only from 36,070,492 to 37,886,699, or 5·0 p.c., as compared with an increase of 10·9 p.c. in the previous decade; Scotland, again, increased only from 4,760,904 to 4,882,497, or 2·6 p.c., as compared with 6·5 p.c. between 1901 and 1911. Nor has this situation been much improved in the post-war decade 1921-31, for the increase in England and Wales during these years was but 5·4 p.c. and Scotland actually showed a decrease of 0·8 p.c. Of the overseas Dominions, New Zealand, according to the latest official estimate (the 1931 census was postponed), increased her population from 1,218,913 to 1,510,940 or by nearly 24 p.c. for the decade ended 1931, as compared with 20·9 p.c. and 30·5 p.c. respectively for the decades ended 1921 and 1911. In the case of the white population of South Africa, much the same condition obtained. The Commonwealth of Australia, the only Dominion to grow more rapidly in the second decade of the twentieth century than in the first, increased from 4,455,005 in 1911 to 5,435,734 in 1921 or by 22·01 p.c. as compared with 18·05 p.c. for the previous decade and by 19·85 p.c. to 6,630,600 in the most recent twelve-year period 1921-33.\* The population of the

\*As in the case of New Zealand the 1931 census was postponed, but was taken as of June 30, 1933.

continental United States increased between 1920 and 1930 from 105,710,620 to 122,775,046, an increase of 16.1 p.c., as compared with 14.9 p.c. in the decade 1910-20 and 21 p.c. in the decade 1900-10.

Considering now the movement of population within the Dominion of Canada itself, it is evident from Table 1 that in this country, as formerly in the United States, there is a distinct movement of population from east to west. In the decade from 1911 to 1921 this was clearly apparent, for the four western provinces then increased their population by no less than 44 p.c. and for the decade 1921-31 the increase was from 2,480,664 to 3,047,792, or 22.86 p.c. From 1921 to 1931 the five eastern provinces increased from 6,294,655 to 7,315,041, an increase of 1,020,386 persons, which, though absolutely larger than the figure for the West, constitutes an increase of only 16.2 p.c. over the 1921 population. The same conclusion may be deduced from Table 2, which shows that while in 1871 only 2.97 p.c. and in 1881 only 3.89 p.c. of the population of the country dwelt west of the lake of the Woods, the percentage in 1891 was 7.23; in 1901, 12.02; in 1911, 24.08; in 1921, 28.37; and in 1931, 29.51.

On the other hand, the Maritime Provinces, which in 1871 contained 20.80 p.c. of the total population of the Dominion, had in 1881 20.13 p.c., in 1891 18.22 p.c., in 1901 16.64 p.c., in 1911 13.02 p.c., in 1921 11.38 p.c., and in 1931 only 9.72 p.c. of the population. Ontario and Quebec—the old pre-Confederation Province of Canada—still remain the chief centre of population. Their proportion of the total was 60.77 p.c. in 1931, as compared with 76.23 p.c. in 1871, 75.98 p.c. in 1881, 74.54 p.c. in 1891, 71.34 p.c. in 1901, 62.90 p.c. in 1911 and 60.25 p.c. in 1921. In other words, the net result of the sixty years has been that in 1931 three-fifths of the population of the Dominion lived in these provinces as compared with more than three-fourths in 1871.

Table 5 gives the population of each county and census division for each of the census years, 1871 to 1931.

#### 5.—Population of Canada, by Provinces and Counties, or Census Divisions, 1871-1931.

<sup>1</sup>Included in Northwest Territories.

<sup>2</sup>Populations for the provinces of Saskatchewan and Alberta are included in the N.W.T. for censuses prior to 1901. Comparative figures for the census divisions of British Columbia are not available for 1871. The chart on p. 107 shows the boundaries of the census divisions of the Prairie Provinces and British Columbia.

**Centres of Population.**—The “centre of population”\* for the Dominion of Canada has been carefully worked out for each census from 1851-1931 inclusive and shows a definite north-westward movement up to 1911, westward for the next decade and northward for 1931. For the censuses 1851 to 1881 the location was near Valleyfield, Que.; in 1891, it was 25 miles west of Ottawa; in 1901, near Pembroke; in 1911, 45 miles west of Sudbury; in 1921, 50 miles north-east of Sault Ste. Marie; and in 1931, 35 miles north of Sault Ste. Marie.

**Density of Population.**—The density of population in 1931 (*i.e.*, the number of persons per square mile of the land area as in that year), as compared with 1921, 1911 and 1901 is shown by provinces and for the country as a whole in Table 6, and by counties or census divisions in Table 7. Generally speaking the density of population decreases as one travels westward, but the enormous area of the province of Quebec unduly reduces the density of its population, which was 5.49 in 1931. As among the nine provinces, the density of population is greatest in Prince Edward Island and least in British Columbia.

#### 6.—Area and Density of Population of Canada, by Provinces, 1901-31.

| Province.                                         | Land Area in sq. miles. | Population, 1901. <sup>1</sup> |               | Population, 1911. |               | Population, 1921.            |               | Population, 1931. |               |

<sup>1</sup>The populations of Ontario, Quebec, Manitoba and Northwest Territories in 1901 are not adjusted according to the provisions of the Boundary Extensions Act, 1912.

<sup>2</sup>Populations of Northwest River Arm and Rigolet, on Hamilton inlet, as in 1921, have been deducted from Quebec, as these parts were awarded to Newfoundland by decision of the Judicial Committee of the Privy Council, Mar. 1, 1927.

**Elements of Growth.**—The former lack of comprehensive and comparable vital statistics for the whole of Canada, together with the lack of statistics of emigration, makes it difficult to determine how far the growth of population since the

\*The centres of population are the centres of gravity (not the intersection of median lines). The units of area in which the moments (*i.e.*, population multiplied by distance from a fixed point) were calculated were the permanent counties or census divisions, of which there are about 220, the same units being used so far as possible for all censuses from 1851 to 1931. The geographical centre of the unit area was assumed to be the centre of population of that unit except in the cases of the thinly settled northern areas of the counties with very large cities, where special adjustments were made.

commencement of the twentieth century is due to natural increase and how far to immigration. The following estimate (Table 8) may, however, be of interest. During the decade 1911-21, in addition to 60,000 Canadians who died overseas and nearly 20,000 who took their discharge in the United Kingdom, there were also great numbers of residents of Canada—most of them recent immigrants—who left Canada to join the forces of the Mother Country and her allies in the Great War and did not return.

<sup>1</sup>Revised in accordance with the Labrador award of the Privy Council, Mar. 1, 1927.

<sup>2</sup>This figure includes also the 50,000 Canadian lives lost at the front and the soldiers (about 20,000) enlisting in the Canadian forces and receiving their discharge in the United Kingdom.

## Section 2.—Sex Distribution.

Throughout the older countries of the world there is usually found an excess of female over male population, more especially as in most of these countries the census is taken on a *de facto* instead of, as in Canada, on a *de jure* basis. The causes of this excess of female population are: (1) the normally higher rate of mortality among males; (2) the greater number of males who travel; (3) the effects of war; (4) the employment of males in the army, navy and merchant marine; and (5) the preponderance of males among emigrants. In the newer countries of the world, however, the preponderance of males among immigrants results in a general excess of male over female population. These phenomena are exemplified for both the older and the newer countries in Table 11.

In Canada there has been an excess of male population from the commencement of its history, the first census, 1666, showing 2,034 males to only 1,181 females. As the colony increased in numbers, the disproportion between the sexes became smaller, more especially since the French-Canadian population, after about 1680, was not reinforced by immigration from the old world. In 1784, when the English-speaking immigration to Canada for purposes of settlement was commencing, there were 54,064 males and 50,759 females in the colony. At the middle of the nineteenth century, there were 449,967 males to 440,294 females in Lower Canada, and 499,067 males to 452,937 females in the more newly-settled Upper Canada, and since Con-

federation the same phenomenon of considerable excess of males has occurred throughout the growing Northwest. The great immigration of the first decade of the present century resulted in raising what is called the "masculinity" of the Canadian population (*i.e.*, the excess of males over females per 100 of population) to the highest point in recent history, *viz.*, 6.07 p.c. in 1911. The Great War, however, both checked immigration and took about 60,000 young Canadian male lives as its toll, with the result that at the Census of 1921 the masculinity of our population was only 3 p.c.—515 males to 485 females per 1,000 of population.

In 1931 there were 518 males to 482 females for Canada as a whole. It is interesting to note that the masculinity of the population has increased in the eastern provinces and decreased in the western ones, where it was formerly greatest. In Table 9 statistics are presented, showing the number of males and females in each of the provinces and territories at each census since 1871, while Table 10 shows the proportions of the sexes and excess of males per 1,000 of population. The statistics of Table 11 show the position of Canada among other countries of the world in regard to masculinity.

<sup>1</sup>White population only

### Section 3.—Conjugal Condition.

In Table 12 are given, in summary form together with percentages, the statistics of the conjugal condition of the population, as single, married, widowed, divorced and legally separated, for 1871 and subsequent censuses. Especially notable is the larger percentage of married in the more recent years. This is mainly attributable to the larger percentage of adults to total population in our own time. Noteworthy also is the larger percentage of divorced and legally separated in recent years. The reader is referred to p. 191, for details of divorces granted in the years 1901-33.

The conjugal condition of the 1931 population is shown by provinces in Table 13 and by age groups in Table 14.

#### 12.—Conjugal Condition of the Population, by Numbers and Percentages, as Shown by the Censuses of 1871, 1881, 1891, 1901, 1911, 1921 and 1931.

## Section 4.—Age Distribution.

The same causes which have in the past rendered the sex distribution of population in Canada somewhat unusual have also affected its age distribution. In the first stages of the settlement of a new colony, men in the prime of life constitute the bulk of the population, and women and children are conspicuous by their absence, so that there will be a disproportionately large male population between the ages of 20 and 50, together with a low birth rate. Later on in the settlement of a new country where there is land and food for all and where the early disproportion of the sexes has been overcome, there is a very high rate of natural increase, and an extraordinarily large proportion of children among the population. Thus in 1871 (see Table 15), 286·91 out of every 1,000 of the population of Canada were children under 10 years of age and over half the total population (526·76 out of every 1,000) were under 20 years of age. But, with the growing urbanization of population, the average age at marriage increased and children came to be regarded as a liability rather than an asset. Thus in 1911, out of every 1,000 of the population, only 231·83 were under 10 years of age and 423·42 under 20 years of age. In 1921, however, 239·67 per 1,000 of the population were under 10 years of age and 434·81 per 1,000 under 20 years. In 1931, the number of children under 10 years of age had dropped to 212·70 per 1,000 of the population, and of persons under 20 to 416·39 per 1,000.

Table 16 shows the varying age distribution of the population of the respective provinces, while Table 17 gives details of the age distribution of the population of the Dominion, by sex, for the census years 1881 to 1931.

**Age Distribution by Sex.**—Table 18 shows the quartile and decile age distributions by sex of the populations for each decennial census 1881-1931. These quartiles and deciles are obtained by arranging the male and female populations according to age and then dividing each array into four or ten equal parts as the case may be. The increasing average age of the population from census to census is clearly shown in the results. In 1881 one-quarter of the male population were 9.27 years of age and under, one half were 20.05 years and under, and three-quarters were 36.48 years and under. In 1931, on the other hand, one-quarter of the male population were of ages up to 12.10 years, one-half up to 25.48, and three-quarters up to 43.54 years. The female population has not shown quite as pronounced an increase in average age but a substantial increase is, nevertheless, strongly in evidence. Only in the Census of 1911, first quartile for females and third quartile for both males and females, and in the Census of 1921, first quartile for both males and females, was the upward trend of average age interrupted.

In the second part of the table the deciles show with more detail the information given by the quartiles. For instance, we see clearly that the greatest increase in average age over the 50-year period has taken place in the seventh decile, *i.e.*, in the "thirties", for both males and females and that the average age of the population in the "forties" and later, while clearly increasing, has done so with diminishing force. The influences which affect the age distribution are the birth rate and immigration. There is evidence to show that the first showed a steady reduction over the country as a whole in the '70's, '80's and '90's of last century and probably also in the early years of the twentieth century. Its effect would be felt in the younger sections first, but would be carried throughout the entire population with the passage of time, and would account for the gradual increase in average age shown in all quartiles and deciles up to 1911. Quite clearly, there is a break in the degree of increase shown in the first and second quartiles for 1911 and 1921. This could be accounted for by a temporary increase in the birth rate beginning early in the present century, which other evidence supports. The fact that such increase in the birth rate was only temporary is supported, too, by the re-establishment of the trend of increasing age in the data for 1931.

Immigration does not directly affect the younger sections of the population except to a very small degree. It immediately affects the middle-aged groups, but its effect is carried to the older groups as time goes by. The very heavy immigration of the early years of the century (1900-1911) would thus immediately affect mainly the age groups in the late "teens" and the early "twenties", and although immigration was later cut down very severely the influence of these earlier accretions to the population would creep through the upper age groups year by year. The seventh decile shows that it has now reached to those of our people in the "forties" and without doubt it will creep into the higher age groups as future censuses come to be taken.

### Section 5.—Racial Origins.

In six out of the seven censuses of Canada since Confederation the racial origin of each person has been secured, the exception being in 1891. The object of this information is to ascertain from what basic ethnic stocks the Canadian population, more particularly the recently immigrated population, is derived. The answer "Canadian" is not accepted under this heading, as the purpose of the question is to obtain, in so far as possible, a definition of "Canadian" in terms of racial derivation. Of this procedure of the census, criticism has been received on two main grounds: (a) that there are Canadians whose family is of several generations residence in the country who may not know their ultimate racial origin, or who may be of very mixed racial origin; (b) that the practice tends to perpetuate racial distinctions which it is desirable to obliterate. As against these criticisms the following three points must be considered: (a) that the Canadian whose family is of three or more generations residence is enumerated and differentiated through the question on the birth place of parents above described; (b) that notwithstanding the desirability of racial assimilation, there are special features in connection with the process that require appraisalment and study—for example, 271 children of Chinese fathers and 842 of Japanese fathers were born in Canada in 1931. Again, the fact that the constitution of Canada is based on the presence of two dominant races points to the desirability of a measurement of these factors: only recently it has been widely pointed out that the original French colony, numbering 75,000 at the date of the Conquest, has expanded to over three millions to-day. Measurements of this kind would be impossible if the answer "Canadian" instead of "French" were accepted under the heading of racial origin, yet undoubtedly if the descendants of the original French colonists are not "Canadians", no one is; (c) finally, racial origin is an important subject for study in a "new" country like Canada from a

scientific standpoint, *i.e.*, from the standpoint of the student of ethnology, criminology, and the social and "biometric" sciences in general.

To accept the answer "Canadian" to the question on racial origin would confuse the data and defeat the purpose for which the question is asked.

**Racial Distribution.**—The total increase in population over the decade 1921-31 was 1,588,837. The population of English origin increased by only 196,061 compared with 722,208 in the previous decade; that of Scottish origin by 172,725 compared with 175,745; and that of Irish origin by 123,005 compared with 57,419. The population of British origin, taken together, increased from 4,868,738 to 5,381,071, or by 512,333, between 1921 and 1931. This represented 32 p.c. of the total increase as compared with 61 p.c. of the total increase for the previous decade. On the other hand the population of French origin increased from 2,452,743 in 1921 to 2,927,990 in 1931, or by 475,247 (slightly under 30 p.c. of the total increase for the decade) and showed the greatest absolute increase for any decade since 1871. Figures for the minor racial groups which make up the nation (see Table 19) would indicate that the people of Scandinavian, German and Ukrainian origins increased between 1921 and 1931 by 36 p.c., 61 p.c. and 111 p.c., respectively. Owing to the new national and racial alignments in Central and Southeastern Europe following the Great War, comparison of the post-war numerical strength of certain ethnic stocks in Canada with pre-war returns cannot be made with any certainty. For example a number of people reported as of Ukrainian stock in the seventh census were described in the Censuses of 1921 and 1911 as Galician, Bukovinian, Ruthenian or Russian.

A perspective of the actual relationship of the origin groups to the population as a whole is obtained by a study of Table 20 where the proportion which the people of each origin bear to total population is given for each census for which the figures are available. Here it is clearly seen that the relative position of the English group showed substantial improvement up to 1921 (when for the first time it superseded the French) but, in 1931, there was a decided check. The French group, on the other hand, which showed a gradual decline between 1871 and 1901 and a more pronounced one in 1911 and 1921, has improved its relative position considerably and in 1931 is once again the foremost single racial group.

Together the British and French groups now constitute 80 p.c. of the total population, compared with 83 p.c. in 1921 and 1911, 88 p.c. in 1901, 89 p.c. in 1881 and no less than 92 p.c. in 1871.

The pronounced decline after 1901 in the combined proportion of the two major racial groups, *viz.*, British and French, with a corresponding increase in ethnic stocks of minor importance, has in the main been due to the immigration of continental Europeans to Canada during the past thirty years. Altogether, the percentage of the total population of European racial origin, other than British and French,

increased from 8.53 p.c. of the total in 1901, to 12.82 p.c. in 1911, to 14.19 p.c. in 1921, and to 17.59 p.c. in 1931.

Oriental immigration to Canada in the past thirty years has been responsible for the relative increase of the Chinese and Japanese racial groups from 0.41 p.c. in 1901 to 0.67 p.c. in 1931. In the same period the population of Negro origin has declined from 0.32 p.c. to 0.19 p.c. of the total, and that of Indian and Eskimo origin from 2.38 p.c. to 1.24 p.c.

The racial origin of the population of Canada, by provinces and territories, is given in Table 21 for the Census of 1931.

### 19.—Origins of the People According to the Censuses of 1871, 1881, 1901, 1911, 1921 and 1931.

NOTE.—Origins were not taken in the Census of 1891. N.o.p.=Not otherwise provided for.

## Section 6.—Religions.

At each of the censuses from 1871 to 1931 every inhabitant of Canada has been asked to state the religious body of which he is a member or an adherent. During the sixty-year period there have been various fluctuations in the proportions of the population belonging to the leading religious bodies, and these fluctuations are, in a new country like this, largely occasioned by the religious affiliations of immigrants.

From Table 23, it will be seen that throughout the sixty-year period something like two-fifths of the population of Canada has been of the Roman Catholic faith, the 1931 percentage, inclusive of Greek Catholics, being 41·30. Methodists were 16·27 p.c. of the population in 1871 but fell to 13·19 p.c. in 1921, while Presbyterians increased from 15·63 p.c. in 1871 to 16·04 p.c. in 1921, being reinforced by a considerable immigration from Scotland after the beginning of the century. The fusion of the Methodists and Congregationalists in 1925 with a large section of the Presbyterians, as the United Church of Canada, left that body the second largest religious body in the Dominion in 1931 with 19·44 p.c. of the population. The Presbyterians who did not adhere to the United Church of Canada numbered 8·39 p.c. of the population in 1931. The proportion of Anglicans in the population of Canada fell from 14·17 p.c. in 1871 to 12·69 p.c. in 1901 but thereafter the large immigration from the British Isles raised it to 16·02 p.c. in 1921, followed by a

| <b>3,431,683</b> | <b>700,139</b> | <b>921,785</b> | <b>731,605</b> | <b>694,263</b>    | <b>4,230</b> | <b>9,723</b>           | <b>10,376,786</b> |     |

slight falling off to 15.76 p.c. in 1931. The Baptists have shown a fairly steady decline from 6.87 p.c. in 1871 to 4.27 p.c. in 1931.

The immigration from non-English-speaking countries during the first three decades of the twentieth century has led to a great growth of the religious bodies whose members come from the continent of Europe. Thus the Lutherans, who were only 1.09 p.c. of the population in 1871 and 1.72 p.c. in 1901, have risen to 3.80 p.c. in 1931. The Jews, again, who were only 0.03 p.c. in 1871 and 0.31 p.c. in 1901, were 1.50 p.c. in 1931. The adherents of the Greek Orthodox Church, who in earlier years were not distinguished from Greek Catholics (the two together being only 0.29 p.c. in 1901) were 0.99 p.c. in 1931.

Of the total population in 1931 (10,376,786), 16,042 or 0.15 p.c. did not state their religion while 54,164 or 0.52 p.c., persons belonging to small sects, were classed as "various" and 21,071 or 0.20 p.c. as of "no religion". Of the non-Christian sects, 155,614 or 1.50 p.c. were Jews, 24,087 or 0.23 p.c. were Confucians, 15,784 or 0.15 p.c. were Buddhists and 5,008 or 0.05 p.c. were pagans. The figures in the following tables are revised and final. In Table 22 the totals for each religion are brought together for all censuses since Confederation; Table 23 gives the same information as Table 22 in the form of percentages to total populations for the census years; Table 24 gives the 1931 census figures of the numbers of persons accredited to each of 31 specified religions, by provinces.

## 22.—Religions of the People at each Decennial Census, 1871-1931.

<sup>1</sup>Including Tunkers. <sup>2</sup>Practically all Methodists and Congregationalists and a large number of Presbyterians united to form the United Church of Canada in 1925, although a relatively small number reported themselves as "United Church" in 1921, chiefly in Western Canada where the movement towards union began. <sup>3</sup>In earlier censuses only small numbers were involved, and Greek Catholics and Greek Orthodox were included under the general term "Greek Church". A rapid increase of both Greek Catholics and Greek Orthodox has been shown for recent censuses and, since the former owe obedience to the Pope in matters of faith, they have been included with the Roman Catholics for 1931. <sup>4</sup>Including 186,654 Greek Catholics, see footnote 3. <sup>5</sup>Included with "all other" religions for 1891. <sup>6</sup>The figures for 1871 cover the four original provinces of Canada only. <sup>7</sup>Mennonites were included with Baptists prior to 1901.

23.—Percentages of Specified Religions at each Decennial Census, 1871-1931.

In 1931, for the first time in the history of the Dominion Census, the religions of the people were cross-classified according to racial origin. The results, for Canada as a whole, are shown in Table 25.

It is seen from the information there given that in Canada the Anglican, the Baptist, the Presbyterian and the United Church of Canada derive the great proportion of their support from the British races. More than 61 p.c. of these of British race are members either of the United Church of Canada or are Anglicans.

The Roman Catholic Church not only derives very strong support from the French Canadians of Quebec province, where 91.42 p.c. of the population are members of that Church, but also from other continental European races. For instance, such important racial elements in the Canadian population as the Ukrainian, the Polish and even the German have nearly 70 p.c., over 85 p.c. and nearly 23 p.c. of their respective populations reported as Roman Catholic, while such lesser elements, as the Austrian, the Hungarian and the Yugoslavic have over 67 p.c., over 72 p.c. and 76 p.c., respectively, members of the same religion. The Russian element, which ranks between these two groups in numbers, has over 28 p.c. of its people Roman Catholic.

Among the Protestant denominations of the continental European races, the Lutheran ranks very high among the German, the Norwegian, the Swedish and the Finnish elements.

## Classified by Racial Origin, 1931.

## Section 7.—Birthplaces.

The birthplaces of the population of Canada, as at each of the seven censuses, are shown by Canadian born, British born, and foreign born. (United States born and other foreign born) in Table 26. The table shows that, in 1871, 97.28 p.c. of the population was born under the British flag, while, sixty years later, the percentage had declined to 89.18. The proportion of Canadian born increased steadily until the opening of the century, but has declined as a result of the increase of immigration after 1900. The Census of 1931 shows declines in the proportions of British born and United States born as compared with 1921 but a substantial increase in the percentage of "other foreign born". The proportion of Canadian born has remained practically unchanged.

Worthy of note is the fairly steady increase of the United States-born population from 1.85 p.c. in 1871 to 4.25 p.c. in 1921, and the subsequent decline to 3.32 p.c. in 1931. Other foreign born increased from 0.87 p.c. in 1871 to 6.23 p.c. in 1911, declined to 5.87 p.c. of the total population by 1921 but, as already noted, increased substantially to 7.50 p.c. by 1931.

<sup>1</sup>Includes some hundreds of persons born at sea. <sup>2</sup>Revised since the publication of the 1933 Year Book.

The birthplaces of the 1931 population are indicated by sex in Table 27, for the various provinces and territories. In the Maritime Provinces, the population is shown by the census to be about 93 p.c. native born, and in Quebec about 91 p.c. In Ontario, however, the proportion sinks to about 77 p.c., in Manitoba to about 66 p.c., in Saskatchewan to about 65 p.c., in Alberta to about 58 p.c., and in British Columbia to about 54 p.c. The general tendency over the past decade has been for the proportion of the native-born population to remain stationary or show a slight decrease in Eastern Canada, but in Western Canada increases are everywhere shown; thus, the percentages in 1921 were: Maritime Provinces 93, Quebec 92, Ontario 78, Manitoba 64, Saskatchewan 60, Alberta 54 and British Columbia about 50. The proportion of foreign born has naturally decreased in the western provinces as a result of the limited immigration of recent years.

About 44 p.c. of the total British-born population is in Ontario, but the greatest proportion of British-born population in any one province is in British Columbia, viz., 27 p.c., which compares with 31 p.c. for 1921. The foreign-born element reaches its maximum percentage in the rapidly growing provinces of Saskatchewan and Alberta, where it constitutes about 24 p.c. and 27 p.c. of the respective populations as compared with 26 p.c. and 30 p.c. respectively for 1921.

The birthplaces together with the percentage increases in the decades 1901-31 and the percentage distribution in the census years 1911-31 are shown in Table 28. All the nine provinces show percentage increases with the exception of Prince Edward Island, where the native born have decreased since 1891. Of the foreign countries, Yugoslavia shows the largest percentage increase during the last decade, with 77.9 p.c., while the United States, which has always shown an increase in former censuses, decreased 7.87 p.c. between 1921 and 1931.

**28.—Birthplaces and Percentage Distributions of the Populations of Canada, Censuses 1911-31, together with Percentage Increase in each Decade, 1901-31.**

NOTE.—The sign (—) denotes a decrease.

<sup>1</sup>Included with Russia.

In Table 29 the native-born population is classified by province of residence according to the province of birth. The province showing the smallest emigration to other provinces is Quebec, with 94.28 p.c. of its native born still resident within the province, and therefore only 5.72 p.c. of those born within its borders living in other parts of Canada. Of this 5.72 p.c., 3.43 p.c. reside in the neighbouring province of Ontario (largely in counties along the Ottawa river and in northern Ontario). The next province as regards largest percentage of its native born still resident within the province is British Columbia with 94.13. There has commonly been a strong tendency for the native born of the eastern provinces to migrate to the West, although in more recent times Ontario has drawn a fairly large number from the West.

**Nativity of Parents.**—Of the 10,376,786 persons residing in Canada in 1931 there were 54.12 p.c. with both parents Canadian born; 18.88 p.c. with both parents British born; 15.99 p.c. with both parents foreign born; 6.12 p.c. with one parent Canadian born and one parent British born; 3.76 p.c. with one parent Canadian born and one foreign born and 0.97 p.c. with one parent British born and one parent foreign born. It is worthy of notice that 69,468 persons born outside of Canada but living in Canada had both parents Canadian born. This is probably due to persons born in the United States of Canadian-born parents. Table 30 gives the nativity of parents by provinces.

## 29.—Numbers and Percentages of the Canadian-Born Population Classified by Province of Residence, by Province of Birth, 1931.

**Canadian Born, by Racial Origin and Nativity of Parents.**—Table 31 gives the racial composition of the Canadian-born population classified according to the nativity of parents, 1931. Not counting aborigines, among whom a very high proportion of Canadian parentage is naturally to be found, the Canadian born of French origin have the largest number (2,718,318), with both parents Canadian born; this is in excess of the total British races under the same category, and expressed as a percentage to total Canadian born of French origin was no less than 95·36. Of the British races the Irish have the highest percentage with both parents Canadian born (66·43 p.c.). It is to be noted, however, that in the case of the British races there are very much higher proportions than for other races in the class "one parent Canadian, other British". The Canadian born with both parents foreign are most numerous among those of the German and Ukrainian races but relatively, *i.e.*, on a percentage basis, they are highest among the Chinese and Japanese, the Finnish, the Hungarians, the Ukrainians, the Czechs and Slovaks, the Hebrews and the Austrians in the order named. All these have over 80 p.c. of their numbers with both parents foreign born; the maximum proportion is reached in the case of the Chinese and Japanese with 92·03 p.c.

Third generation Canadians, or those Canadian born both of whose parents are Canadian born, are most numerous, absolutely, among the French, English, Irish, Scottish, German and Dutch respectively, and, relatively, among the Indians and Eskimos, the French, the Dutch, the Irish, the Scottish and the English respectively.

**Population, other than Canadian Born, by Year of Arrival.**—Table 32 shows the number of people born outside Canada by year of arrival. Of those whose years of arrival were given, 32 p.c. entered Canada in the ten-year period 1921-31 and 29 p.c. in the previous decade, while nearly 39 p.c. reported a date prior to 1911. It may also be noted that 255,379 of all those born elsewhere than in Canada had been in Canada 30 years or more at the time of the Census of 1931.

This section of the population residing in Canada in 1931 was distributed geographically as follows: Maritime Provinces 3·0 p.c., Quebec 10·9 p.c., Ontario 34·9 p.c., Prairie Provinces, 47·3 p.c.; British Columbia 13·9 p.c. Of those born outside Canada and residing in the Maritime Provinces, 41·8 p.c. were classified as rural and 58·2 p.c. as urban; for Quebec, only 9·6 p.c. were rural and 90·4 p.c. were urban; proportions in Ontario were 27·2 p.c. and 72·8 p.c., respectively; in British Columbia, 41·8 p.c. were rural and 58·2 p.c. urban; in the Prairie Provinces, on the other hand, 60·26 p.c. were rural and 39·74 p.c. urban. Thus it is seen that while less than 10 p.c. of the "other than Canadian born" in the province of Quebec were rural, over 60 p.c. were so classified in the Prairie Provinces. The other provinces fall between these extremes.

31.—Canadian-Born Population Classified According to Nativity of Parents, by Racial Origin, 1931.  
NUMERICAL DISTRIBUTION.

| Persons Born in Canada        |                  | Of Mixed Parentage.                       |                |                                          |                |                                           |                | Parent-<br>age<br>Not<br>Stated.         |                |                                                 |     |

<sup>1</sup>These totals include relatively small numbers who did not state the years of their arrival.<sup>2</sup>This column includes Northwest Territories and Yukon.

## Section 8.—Citizenship and Naturalization.

At the last four decennial censuses, those of 1901, 1911, 1921 and 1931, inquiry has been made into the citizenship of the foreign-born population. The relevant instructions to enumerators at the Census of 1931 were as follows:—

"The term 'Canadian' should be used as descriptive of every person whose home is in the country and who has rights of citizenship in Canada. Every person born in Canada should be entered as 'Canadian' unless he or she has subsequently become the citizen of another country. Similarly any person born in the United Kingdom or in any of the British Dominions or dependencies, who has not subsequently become the citizen of another country, and who is now permanently domiciled\* in Canada, should be entered as 'Canadian'. Similarly also, any person born in the United States, France, Germany or any other foreign country, but whose home is now in Canada, and who has become a naturalized citizen of Canada, should be entered as 'Canadian'.

"An alien person should be classed . . . as of the nationality or citizenship of the country to which he or she professes to owe allegiance.

"A married woman is to be reported as of the same citizenship as her husband.

"A foreign-born child under 21 years of age is to be reported as of the same citizenship as the parents.

"The law of Canada relating to nationality is contained in the Immigration Act, (Chapter 93, Revised Statutes of Canada, 1927) under which a 'Canadian' by nationality is defined as—

"(I) A person born in Canada who has not become an alien;

"(II) A British subject who has Canadian domicile;\*

"(III) A person naturalized under the laws of Canada who has not subsequently become an alien or lost Canadian domicile.\*

" . . . Following the participation of Canada in the Treaty of Versailles and in membership of the League of Nations, Canadian nationality was defined by Act of Parliament ('An Act to define Canadian Nationals and to provide for the Renunciation of Canadian Nationality', Chapter 21, Revised Statutes of Canada, 1927), as including:—

"(a) any British subject who is a Canadian citizen within the meaning of the Immigration Act, Chapter 27 of the Statutes of 1910 as heretofore amended.

"(b) the wife of any such person;

"(c) any person born out of Canada, whose father was a Canadian National at the time of that person's birth, or with regard to persons born before the passing of this Act, any person whose father at the time of such birth possessed all the qualifications of a Canadian National as defined in this Act.

"In connection with the last paragraph it should be noted that a child of Canadian parents domiciled in a foreign country retains Canadian nationality up to the age of 21 years, and should he become domiciled\* in Canada prior to that age does not require to be naturalized.

"It is proper to use the term 'Canadian' . . . when the information furnished by the individual conforms to the foregoing definitions and explanations."

Table 33 deals with the citizenship of the Canadian born, the British born and the foreign born of the population residing in Canada at the date of the Census of 1931. As regards the total (8,069,261) native-born population, 8,052,459 were "Canadian Nationals" and were made up of 8,051,142 persons with uninterrupted citizenship and 1,317 naturalized repatriates. Of the total native born resident in Canada at the date of the census, 16,802 were aliens owing their allegiance to some foreign country—in the case of females usually as a result of marriage. The table also shows that of this number (16,802) of Canadians of alien nationality, 5,991 owed allegiance to various European countries, 286 to Asiatic countries and 10,477 to the United States.

The second part of the table shows that of the total number (1,184,830) of British born in Canada on June 1, 1931, all were not "Canadian Nationals" within the meaning of the Immigration Act already quoted, there being 135,426 who had

\*Canadian domicile can only be acquired for the purposes of the Immigration Act by a person having his domicile for at least five years in Canada after having been landed therein.

not acquired domicile and who were liable to certain disabilities. Many of these however may exercise the rights of citizenship in Canada as provided by Sec. 4 of The Dominion Franchise Act (c. 51 of the Statutes of 1934).

The nationality of the foreign-born population is classified according to their country of birth. The third part of the table shows that in a large measure persons of foreign birth have either become Canadian subjects or have retained allegiance to the country of their birth. While this is generally true, yet in some instances the country of birth of the European population does not indicate their nationality. For example, of the total number of persons (17,033) born in Belgium 8,465 were of Canadian nationality, while of the remainder (8,656) claiming Belgian nationality only 8,258 were born in Belgium, leaving 259 born in contiguous countries—France, Germany, or Holland, while 114 were born in the United States.

<sup>1</sup>This column includes foreign-born persons born in places other than continental Europe, Asia or the United States.

**The Progress of Naturalization.**—The foreign-born residents of Canada numbered 1,122,695 in 1931 as compared with 890,277 in 1921, 752,732 in 1911 and 278,449 in 1901; among these the naturalized numbered 614,971 in 1931, 514,179 in 1921, 344,557 in 1911 and 153,908 in 1901, or 54.78 p.c., 57.75 p.c., 45.77 p.c. and 55.27 p.c. respectively. Alien residents in Canada showed an absolute decline between 1911 and 1921 of from 408,175 to 376,098, *i.e.*, from 5.66 p.c. of the population to 4.28 p.c. Between 1921 and 1931, they increased to 507,724, or 4.89 p.c. of the 1931 population. Among the foreign-born residents of Canada, the United States born exceed those born in any other country, although by continental groups the Europeans are more numerous. Between 1921 and 1931 the U.S. born declined from 374,022 to 344,574, but there was a substantial net increase in the total foreign born due to the large increase of Europeans. On the other hand, the percentage of the U.S. born who are naturalized to total U.S. born has increased from 63.63 in 1921 to 72.44 in 1931, whereas the percentage of continental Europeans who are naturalized has fallen from 57.88 in 1921 to 49.13 in 1931.

Table 34 gives details of the naturalized and alien persons among the foreign-born residents of Canada. The table is divided into pre-war and post-war sections and, while the general totals are comparable throughout the thirty years, the individual totals for those European countries whose boundaries underwent change following the War are not comparable as between the 1901-11 and 1921-31 periods.

### 34.—Numbers and Percentages of Naturalized and Alien Persons Among the Foreign Born Residents of Canada, by Countries of Birth, 1901, 1911, 1921 and 1931.

| Country of Birth.          | PRE-WAR PERIOD.     |                |              |                |              |                     |                |              |                |              |

## Section 9.—Language Spoken and Mother Tongue.

**Official Languages.**—In the Census of 1931 1,322,370 persons were reported as speaking both the official languages of Canada, 6,999,913 speaking English, 1,779,338 speaking French and 275,165 as unable to speak either English or French. In Table 35 the population is classified by racial origin and as able to speak one, both or neither of the official languages. (Children under 5 years of age are classed as speaking the language of the home.)

**Mother Tongue.**—By mother tongue is meant the language learned in childhood and still spoken by the individual. In the case of foreign-born persons it is the native language or the language spoken before coming to Canada. Table 36 giving the mother tongue by provinces shows that 1,630,086 persons did not have either English or French as a mother tongue. The largest number speaking a foreign language as a mother tongue is in Ontario with 398,476 but the largest percentage is in Saskatchewan with 39 p.c.

### 35.—Population of Canada Speaking One, Both or Neither of the Official Languages of Canada, Classified by Racial Origin, 1931.

NOTE.—Children under 5 years of age have been classed as speaking the language of the home.

## Section 10.—Rural and Urban Population.

For the purposes of the census the population residing in cities, towns and incorporated villages has been defined as urban, and that outside of such localities as rural. Thus the distinction here made between 'rural' and 'urban' population is a distinction of provincial legal status rather than of size of aggregations of population within limited areas. Since the laws of the various provinces differ in regard to the population necessary before a municipality may be incorporated as urban (the laws of Saskatchewan, for example, making provision that 50 people actually resident on an area not greater than 640 acres may claim incorporation as a village, while the Ontario law now requires that villages asking for incorporation shall have a population of 750 on an area not exceeding 500 acres), the line of demarcation between rural and urban population is not at all uniformly drawn throughout the Dominion, as far as comparable aggregations of population are concerned.

In order to have closer comparison between provinces, Table 37 divides the incorporated urban centres into two groups, *viz.*, under one thousand, and one thousand and over. The population in urban places having less than one thousand has decreased for the whole of Canada but increased in Prince Edward Island, Nova Scotia and British Columbia. The largest numerical increase in urban centres of 1,000 and over was in the province of Quebec with 480,000, but the largest percentage increase was in British Columbia with 59.13 p.c.

In Tables 38 and 39 are given statistics showing the growth of rural and urban population respectively, by provinces, since 1891. To a limited extent, however, Table 40 will permit the student of population statistics to make, at least for Canada as a whole, his own line of demarcation between rural and urban populations.\*

\*In the United States, urban population, prior to 1930, was classified by the Census Bureau as that residing in cities and other incorporated places having 2,500 inhabitants or more with certain minor qualifications, but in 1930 the definition was slightly modified to include townships and other political divisions, not incorporated as municipalities, having a total population of 10,000 or more each, and a population density of 1,000 or more per square mile. The direct result of this modification has been to slightly increase the proportion of urban population.

### 37.—Rural and Urban Populations, by Sex and by Provinces, 1921 and 1931.

While a summary comparison between urbanization in Canada in 1931 and in the United States in 1930 would lead us to the conclusion that our country, though far less densely peopled than the United States, had an almost equally large percentage of its population in urban communities, *viz.*, 53.70 p.c. in Canada as compared with 56.2 p.c. in the United States, the fact that in the United States inhabitants of places having under 2,500 population are included with rural population must be taken into account. A fairer basis of comparison is secured if the same population limits are taken for both countries, as may be done by using Table 40. Thus, at the Census of 1930, the United States had 29.5 p.c. of its population resident in cities of 100,000 and over, while Canada in 1931 had only 22.44 p.c. of its population in such places. The United States had an additional 18 p.c. of its population residing in cities of between 10,000 and 100,000 population, and 4.8 p.c. in cities and towns of 5,000 to 10,000, while Canada had in cities of these categories only 14.87 p.c., and 4.42 p.c. respectively of its population. Thus, taking all places of 5,000 and over—the lowest population for which comparative figures are readily available—52.3 p.c. of the population of the United States resided in such places as compared with 41.73 p.c. of the population of Canada, showing the much higher degree of urbanization which has been reached in the United States—a natural thing in an older settled and more densely peopled country.

On the basis of the census classification, it is apparent from Table 38 that in the last decade, as in the previous one, urban communities absorbed nearly 77 p.c. of the total increase in population, with the result that the urban population of Canada in 1931 exceeded the rural by 767,330. Out of every 1,000 persons in the country, 463 were resident, on June 1, 1931, in rural and 537 in urban communities, as compared with 505 in rural and 495 in urban communities on June 1, 1921; 546 in rural and 454 in urban communities in 1911; 625 in rural and 375 in urban communities in 1901; and 682 in rural and 318 in urban communities in 1891.

From Table 40, showing the distribution of urban population in Canada by size of cities and towns, it is seen that Canada possesses two cities of more than half a million population. These are Montreal and Toronto, with 818,577 and 631,207 inhabitants respectively. Two other cities, Vancouver and Winnipeg, have attained the 200,000 mark and Hamilton, Quebec and Ottawa each have populations of over 100,000. The two western cities of Calgary and Edmonton are now in the 75,000 to 100,000 class. In this respect London, which excelled Edmonton in 1921, now takes the next lower place with a population of 71,148. Details of the population of these and other smaller cities and towns of 5,000 and over, are given by censuses from 1871 to 1931 in Table 41, while the populations of urban communities having in 1931 a population of from 1,000 to 5,000 each, are given for 1901, 1911, 1921 and 1931 in Table 42.

All the larger cities have in their neighbourhoods growing "satellite" towns or other densely settled areas in close economic relationship with the central municipality. This phenomenon is to-day of increasing importance largely as a result of the greater ease and speed of transportation by motor vehicle. It has therefore been considered advisable to calculate the total populations resident in what the United States census authorities call the "metropolitan areas". On this basis the total populations of the larger cities at the Census of 1931 were as follows: "Greater Montreal", 1,000,157; "Greater Toronto", 808,864; "Greater Vancouver", 308,340; "Greater

Winnipeg", 280,202; "Greater Ottawa" (including Hull), 175,988; "Greater Quebec", 166,435; "Greater Hamilton", 163,710; "Greater Windsor", 110,385; "Greater Halifax", 74,161; and "Greater Saint John", 55,611.

<sup>1</sup>The population (98,967) in territory now comprised in the provinces of Alberta, Saskatchewan and in Yukon and the Northwest Territories was classified as rural in the Census of 1891. <sup>2</sup>Vol. 1, Census 1911, places the urban population of Alberta for that year at 141,937. Included in this figure was the population (5,250) of twelve places which, according to the Report of the Municipal Commissioner for Alberta, were not then incorporated. The places so included were Aetna, Bankhead, Bellevue, Bickerdike, Canmore, Cardiff, Exshaw, Hillcrest, Passburg, Queenston and Elmpark. The correction resulting from this and from other small adjustments consequent upon more definite knowledge as to incorporated areas, places the urban population for 1911 at 137,662. Similar corrections have been made in the urban and rural figures for the Census of 1901. <sup>3</sup>As corrected in Census Report, Prairie Provinces, 1916. <sup>4</sup>As changed by Extension of Boundaries Act, 1912. <sup>5</sup>As changed by Extension of Boundaries Act, 1912. <sup>6</sup>The urban population of 970,791, shown in Volume 1, Census 1911, is reduced to 966,842 by the transfer of the populations of Maniwaki, Martinville, Moisie, St. Bruno, St. Martin and St. Vincent de Paul from urban to rural; by adjustments in area of the villages of St. Anne and Ste. Geneviève; and Extension of Boundaries Act, 1912. <sup>7</sup>Urban and rural populations for 1911 and 1901 are as corrected in Census Report, Prairie Provinces, 1916. <sup>8</sup>As reduced by Extension of Boundaries Act, 1912. <sup>9</sup>Members of the Royal Canadian Navy were counted at their homes in the Census of 1931. <sup>10</sup>This includes South Vancouver and Point Grey, with 1921 populations of 32,267 and 13,736 respectively, which were then classified as "rural".

### 39.—Percentage Distribution of Rural and Urban Populations, by Provinces and Territories, 1891, 1901, 1911, 1921 and 1931.

NOTE.—In using this table, reference should be made to the notes appended to Table 38 showing rural and urban population by numbers.

Population is shown in Table 40 to be increasingly attracted to the larger cities. Thus, not only have cities of over 500,000 population (Montreal and Toronto) increased their proportions to the total, but cities of from 100,000 to 500,000 have increased their aggregate population from 5.90 p.c. of the total to 8.46 p.c., and cities of between 5,000 and 100,000 from 17.68 p.c. to 19.29 p.c. in the decade 1921-31. The classes below 5,000 show slight proportional reductions.

#### 41.—Populations of Cities and Towns having over 5,000 Inhabitants in 1931, Compared with 1871-81-91-1901-11-21.

NOTE.—The cities and towns in which a Board of Trade exists are indicated by an asterisk (\*), and those in which there is a Chamber of Commerce by a dagger (†). In all cases the populations for previous censuses have been rearranged as far as possible to cover the same area as in 1931.

**Rural and Urban Farm Populations.**—Of the 10,362,833 people who form the population of the nine provinces of Canada, exclusive of the Territories, only 3,289,507 or 31·7 p.c. live on farms.

There are 728,623 farms within the nine provinces and, considering the 14,056 farms (see Table 43) which are located within the limits of incorporated cities, towns or villages as "urban", the farm population is classified as 3,224,241 living on rural farms and 65,266 on urban farms. More than one half (50·5 p.c.) of the people on urban farms are in Quebec and only 23·6 p.c. in Ontario. Alberta ranks third with 6·4 p.c. and Nova Scotia fourth with 5·7 p.c. This is in contrast with the distribution on rural farms where 24·4 p.c. are in Ontario, 23·1 in Quebec, 17·4 in Saskatchewan and 11·5 in Alberta; these four provinces therefore have 76·4 p.c. of the rural farm population. The rural and urban farm populations bear a very close relationship to the number of farms of each class in the individual provinces but the distribution of rural farms follows more closely the distribution of total population (see Table 1) than that of urban farms. Among the provinces, Quebec has the greatest number of persons per farm on farms of both the rural and urban classes.

Table 43 gives the number of farms and the farm populations, urban and rural, by provinces as recorded at the Census of 1931.

**43.—Rural and Urban Farms, Farm Populations and Average Numbers of Persons per Farm, by Provinces, 1931.**

Details regarding farm workers and those farms employing hired labour, the period of employment and cost of wages and board, are dealt with in Chapter VIII—Agriculture. The reader is referred to Table 44, p. 299 for this information.

### Section 11.—Literacy.

Literacy in Canada has shown most encouraging progress since the opening of the twentieth century.

In 1901, 14.38 p.c. of the population of five years of age and over could neither read nor write; the corresponding percentage for 1911 was 10.50; for 1921, 9.25; and for 1931 it was only 7.18. (See Table 44.)

**44.—Ability to Read and Write of the Population 5 Years of Age and Over, by Provinces, for each Census Year 1901-31.**

**Literacy of Population over Ten Years of Age, by Age-Groups and Sex.—**

Experience has shown that statistics of literacy among children under ten years of age are practically meaningless. A truer test of progress has been made by taking the statistics for the population of ten years of age and over, but, unfortunately, this comparison cannot be made for earlier censuses than that of 1921. Table 45 shows literacy, by sex and province, of persons ten years of age and over in 1931, and the percentage of illiterates in this significant section of the population was 3.79 p.c. in 1931, as compared with 5.10 p.c. in 1921. It will be noticed that illiteracy is very definitely greater among males than among females. In 1931, 4.32 p.c. of the male population and 3.21 p.c. of the female population were recorded as unable to read or write, as compared with 5.73 p.c. and 4.43 p.c. respectively for 1921. Manitoba, Saskatchewan and Alberta, alone among the provinces, show a higher percentage of female illiteracy; this condition existed also in 1921, although the corresponding percentages for both males and females were then substantially greater, being: Manitoba, males 6.48, females 7.78; Saskatchewan, males 5.00, females 7.08; Alberta, males 4.62, females 5.92.

The figures show that New Brunswick is in the most unfavourable position, though there has been an improvement since 1921. No less than 6.91 p.c. of the population of that province—8.75 p.c. of the males and 4.97 p.c. of the females—could neither read nor write in 1931. For 1921 the figures were: total illiterate, 7.61 p.c.; males 9.24; females 5.90. On the other hand the province of Quebec, which in 1921 recorded the high percentage of 6.19 (7.84 males and 4.54 females) as illiterate, had reduced this proportion to 4.76 (6.21 males and 3.29 females) by 1931.

## 45.—Literacy of the Population of 10 Years of Age and Over, by Sexes and Provinces, 1931.

(Corresponding figures for 1921 are to be found in the 1924 Year Book, p. 131.)

**Literacy among Urban Populations.**—Table 46 shows the literacy of persons residing in cities with populations of 30,000 and over in 1931. The final three columns give percentage figures for persons ten years of age and over, and a comparison with figures for 1921 shows that very definite changes have taken place in the literacy of urban populations. Toronto had, in 1921 as in 1931, a very low percentage of illiteracy—1.68 p.c. in 1921 and 1.26 p.c. in 1931—and the larger cities of Ontario, generally, made a comparatively good showing in 1921. Other large cities of Canada had, in 1921, fairly high percentages of illiteracy, the figures being: Montreal, 3.60 p.c.; Winnipeg, 3.54 p.c.; Vancouver, 3.54 p.c.; Quebec, 3.27 p.c.; Ottawa 2.69 p.c.; and Hamilton, 2.12 p.c. Comparison of 1921 figures\* with those for 1931 in Table 46 brings out the great improvement in the western cities. Marked betterment is evident throughout the list, but the exceptional progress in the west has put Three Rivers, Quebec, Montreal and Halifax in a relatively less favourable position as regards literacy. While Three Rivers has still the highest percentage of persons who can neither read nor write, the proportion has been reduced from 7.03 p.c. in 1921 to 3.45 p.c. in 1931.

The city of Saskatoon, Saskatchewan, had the lowest percentage of illiteracy in 1931, *viz.*, 0.71, London, Ontario, being next with 0.88 p.c. In the cities of Windsor, Ontario, and Regina, Saskatchewan, both of which had low percentages of illiterates in 1921 (1.53 p.c. and 1.44 p.c. respectively), slight increases to 1.78 p.c. and 1.68 p.c., respectively, are shown in 1931.

\*See p. 133 of the 1924 Year Book.

## Section 12.—School Attendance.

The census statistics of school attendance for the population between the ages of 5 and 19 years are presented for 1911, 1921 and 1931 in Table 47 for Canada as a whole. In comparing the statistics of school attendance for the Census of 1931 with those of 1921 and 1911, it is necessary to take into account the fact that in 1931 and 1921, the question as to school attendance covered the nine months ended May 31, while in 1911 the question covered the calendar year 1910. For this reason the figures are not quite comparable, although the general trends as shown by the percentages in the lower part of the table are probably not materially affected.

In 1931 the population of school age, 5-19 years, numbered 3,246,391 or 31.3 p.c. of the total population, as compared with 31.4 p.c. in 1921 and 30.0 p.c. in 1911. The proportion of the total group 5-19 years actually in attendance at school shows progress. In 1911 only 52.88 p.c. of the population of this age were in attendance at school; the proportion rose to 61.33 p.c. in 1921 and 65.59 p.c. in 1931. The proportion of males between these ages attending school increased from 52.15 p.c. in 1911 to 60.80 p.c. in 1921 and 65.12 p.c. in 1931; that of females from 53.63 p.c. in 1911 to 61.86 p.c. in 1921 and 66.08 p.c. in 1931.

Table 48 gives the school attendance by provinces for the rural and urban populations, classified by sex and months at school. Table 49, giving the school attendance of Canadian born, British born and foreign born, shows that, of the 1,755,348 children 7 to 14 years of age in Canada (Territories excluded), 93.09 p.c. attended school. The "not at school" was largest for the foreign born with 7.81 p.c. followed by the Canadian born with 6.97 p.c. and British born with 3.95 p.c.

**47.—Numerical and Percentage Distributions of School Attendance of the Population 5-19 Years of Age Inclusive, by Sexes, for all Canada,<sup>1</sup> 1911, 1921 and 1931.**

## Section 13.—Annual Estimates of Population.

While the populations in different countries are actually counted at decennial or quinquennial censuses, annual estimates of populations are required by modern States for many purposes, such as the calculation of birth, death and marriage rates, and of per capita figures of production, trade, finance, consumption, etc. In different countries various methods of obtaining annual figures of post-censal populations are adopted. For example, it is possible, with good vital statistics and records of arrivals and departures, to obtain the actual population at any particular date with approximate accuracy by the simple method of adding births and arrivals and subtracting deaths and departures during the period elapsed since the census. This method is impracticable for Canada, on account of her 4,000 miles of common boundary line with the United States, crossed every day by many thousands of people in both directions. In almost all civilized countries, the actual methods of making the estimates vary. Thus, the method of arithmetical progression is widely used in estimating the populations in the older countries of the world; this method involves the annual addition to the population of the country and of particular areas within it of one-fifth or one-tenth of the numerical increase in the last quinquennial or decennial inter-censal period. In the case of Canada annual figures of population have been purely estimates, made on the basis of past increases, prior to the Census of 1931. They have now been worked out on a basis which takes into consideration collateral data back to 1867, and the resulting figures are believed to more accurately state the populations at inter-censal periods than any before published.

The new method upon which calculations are based was described at pp. 108-109 of the 1932 Year Book.\*

\*The table of estimates on p. 164 and the description of the method upon which calculations are based are the work of M. C. MacLean, M.A., F.S.S., Chief of Census Analysis, Dominion Bureau of Statistics.

### 50.—Estimates of the Populations of Canada for Inter-Censal Years, by Provinces, 1867-1934.

NOTE.—At every census the previous post-censal data are adjusted to the newly recorded population figure. (000's omitted.)

<sup>1</sup>These estimates are subject to adjustment as later data is made available.

## Section 14.—Area and Population of the British Empire.

Since the War the boundaries of the British Empire have been contracted by the voluntary retirement from Egypt in 1922 and expanded by the addition of various territories under mandate as a result of the Treaty of Versailles. The increases of territory were mainly in Africa, where the Tanganyika Territory, Southwest Africa, and portions of the Cameroons and Togoland, with an aggregate area of 736,000 square miles and an estimated population of over 5,000,000 (1921) came under Empire control. In Asia, the territories acquired by mandate from the League of Nations include Palestine and Transjordan, with 1,335,821 inhabitants on an area of 25,802 square miles. In the Pacific, the territories added to the Empire include Western Samoa, the Territory of New Guinea, the Bismarck archipelago and part of the Solomon islands, all of which were formerly German possessions. According to the most reliable estimates, the total area of these regions is 92,141 square miles and the population 445,650.

Statistics of the areas and populations of the territories included in the British Empire in 1931 are given in Table 51, together with comparative figures of population for 1921 and 1911.

### 51.—Area and Population of the British Empire, by Continents and Countries, 1911, 1921 and 1931.

NOTE.—The source of the following figures is the "Statistical Abstract for the British Empire, 1931" except in the case of Canada, where the data are the latest census figures, and Transjordan, see footnote 23. Totals have been adjusted as far as possible.

<sup>1</sup>Inclusive of the Irish Free State. See footnote 8.

<sup>2</sup>A census of Ireland was not taken in 1921 and 1931. The figures include the estimated population of Ireland at the middle of 1921 and of Northern Ireland at the middle of 1931.

<sup>3</sup>Inclusive of 226,979 sq. miles of fresh water.

<sup>4</sup>The population is exclusive of full-blooded aborigines, of which 61,801 were enumerated at a census taken on June 30, 1929.

<sup>5</sup>The area (293 sq. miles) and population (15,204 persons in 1931) of the Cook and other annexed islands are excluded, as are also the uninhabited "outlying islands" of an area of 307 sq. miles. The Maori population (69,141 persons in 1931), and the inhabitants of the Tokelau Islands Dependency (4 sq. miles—population 1,048 in 1931) are also excluded.

<sup>6</sup>Estimated figures.

<sup>7</sup>Population for 1911 relates to the area which is now the Irish Free State, and is included in the population figure shown for the United Kingdom for that year. The first census of the Irish Free State was taken in 1926 and the figures shown above under 1921 relate to that census.

<sup>8</sup>The population is exclusive of the military and persons on ships in harbours.

<sup>9</sup>The population is exclusive of the military.

<sup>10</sup>Cyprus, which had been administered by the United Kingdom under a Convention, dated June 4, 1878, was annexed on Nov. 5, 1914.

<sup>11</sup>Exclusive of the mandated areas.

<sup>12</sup>Inclusive of particulars for the mandated area of the Cameroons. Estimated population of this area in 1924 was 660,024.

<sup>13</sup>Partly estimated—a census of natives not being available.

<sup>14</sup>Population of administered provinces only.

<sup>15</sup>Inclusive of 13,616 sq. miles of water within the territorial limits of the Uganda Protectorate.

<sup>16</sup>Inclusive of 10,353 sq. miles of water within the territorial limits of the Nyasaland Protectorate.

<sup>17</sup>Estimated mean population—a census of Europeans only was taken in 1931.

<sup>18</sup>Inclusive of Christmas island, Labuan and the Cocos (or Keeling) islands. The military and the floating population are included in the population figures.

<sup>19</sup>The population (17,049 persons at the Census of 1921) of part of the New Territories (New Kowloon) are included with the figures for Hong Kong.

<sup>20</sup>The Gilbert and Ellice groups were placed under British protection in 1892. Ocean island was annexed to the protectorate in 1900 and Union islands in 1911. The protectorates were annexed on Nov. 12, 1915 and are now known as "Gilbert and Ellice Islands Colony". In 1916 Fanning island and Washington island were annexed to the Colony.

<sup>21</sup>Exclusive of aborigines estimated to number 9,700 at the Census of 1921.

<sup>22</sup>Including South Georgia.

<sup>23</sup>Transjordan is not included in the total of mandated territories shown in the "Statistical Abstract of the British Empire" and the figures have been taken from the League of Nations Year Book, 1932-33.

<sup>24</sup>Census of 1922.

<sup>25</sup>Census of Nov. 18, 1931.

<sup>26</sup>Estimated 1924.

<sup>27</sup>Inclusive of estimated figures of non-indigenous population.

<sup>28</sup>Cannot be stated.

<sup>29</sup>Includes Transjordan, see footnote 23.

<sup>30</sup>The totals, especially for population, can only be given approximately since certain of the figures are estimates of native populations, and in other cases data are not available.

## Section 15.—Area and Population of the World.

Statistics showing the areas and the populations of the various continents, and details of each country, are presented in Table 52. There is a wide difference between the dates of the latest censuses of different countries and since the aim of bringing these statistics together is for comparative purposes, it was necessary to fix populations as at a common date. Dec. 31, 1931, was chosen because this is the closest date common to the chief census dates of the important countries and because estimates as at that date were available from reliable sources. This date is not sufficiently remote from the censuses to cause misgiving as to the accuracy of the figures simply because they are estimates. In a number of cases, notably in parts of Asia and Africa, the figures are not as accurate as they are, for instance, in the western world, since complete censuses do not everywhere exist, but the approximations given are considered to be the best available.

### 52.—Area and Population of the World, by Continents and Countries, 1931.

NOTE.—The source of the following figures is the "League of Nations Year Book, 1932-33" estimates as at Dec. 31, 1931, except in the cases of: the British Empire, where the source is the "Statistical Abstract for the British Empire, 1931"; Dec. 31 estimates; of China proper where the source is the "Statesman's Year Book, 1933"; and of Manchuria where the source is the "Manchurian Year Book, 1933". The Continental and World totals have not been adjusted, but are as given in the League of Nations Year Book.

<sup>1</sup>Mandated territory of the Union of South Africa.

<sup>2</sup>The Dec. 31, 1931, figures published in the "Statistical Abstract for the British Empire" give 10,506,000 as the population of Canada. That, however, is the official estimate for June, 1932 (see p. 164).

## CHAPTER V.—VITAL STATISTICS.\*

The collection of vital statistics commenced in Canada, as in England, with the registration of baptisms, marriages and burials by the ecclesiastical authorities. These registers, maintained by the priests from the first settlement of the country, have made it possible for the vital statistics of the French colony to be compiled from the year 1610.† In the beginning only one copy of such records was made, but in 1678 the Sovereign Council of Quebec ordered that in future such records should be made in duplicate, and that one copy, duly authenticated, should be delivered to the civil authorities. This arrangement was continued after the cession of the country to the British, and was extended to the newly-formed Protestant congregations of Lower Canada by an Act of 1795, but the registration among these latter remained seriously defective, both in Lower Canada and in the new province of Upper Canada.

In English-speaking Canada vital statistics were from the commencement incomplete, the pioneer settlers often going out into the wilds far from the authority of government and the ministrations of religion. Although from 1847 a law existed in Upper Canada requiring ministers of religion to deposit duplicates of their registers of baptisms, marriages and deaths with the clerks of the peace for transmission to the Provincial Secretary, this law remained practically a dead letter. Again, the efforts made to secure records of births and deaths at the Censuses of 1851 and 1861 produced most unsatisfactory and even ridiculous results, as was pointed out by Dr. J. C. Taché, Secretary of the Board of Registration and Statistics, in a memorial published in the report of the Canadian Minister of Agriculture for 1865. Nevertheless, in spite of the inherent unsoundness of securing, at a point of time in a decennial census, a record of births and deaths occurring over a considerable period of time, this method was followed down to 1911, when the obviously untrustworthy character of the results led to the discarding of the data obtained at the inquiry.

The Dominion Government instituted in the early '80's a plan for compiling the annual mortuary statistics of cities of 25,000 population and over, by subsidizing local boards of health to supply the information under special regulations. A beginning was made with the five cities of Montreal, Toronto, Hamilton, Halifax and Saint John. By 1891 the list had grown to 25, at a time when, in most of the provinces, the only birth and death statistics were those of the municipalities. Upon the organization of provincial bureaus of vital statistics, however, this work was abandoned, though a conference of Dominion and provincial officials, held in 1893, passed a resolution calling upon the provincial and Dominion authorities to co-operate in the work of collecting, compiling and publishing the vital statistics of the Dominion. This resolution had no immediate practical results in securing accurate or comparable vital statistics.

Following Confederation each of the provinces of the Dominion had enacted its own legislation on vital statistics, where such existed, and administered this legislation according to its own individual methods. While the vital statistics of Ontario were published in considerable detail annually from 1871, the arrangements for the

\*This chapter has been revised by W. R. Tracey, B.A., Chief, Vital Statistics, Dominion Bureau of Statistics. A list of the publications of this Branch will be found in Chapter XXIX, Section 1, under "Population".

†For a summary of the vital statistics of the Roman Catholic population from 1610 to 1883, see the Statistical Year Book of Quebec, 1921, English or French edition, p. 51. For details, by years, of this movement of population, see Vol. V of the Census of Canada, 1871, pp. 160-265, and Vol. IV of the Census of Canada, 1881, pp. 134-145.

collection of data were unsatisfactory. Only in 1906 was the publication of vital statistics begun in Prince Edward Island (no report for 1912 was ever issued). In Nova Scotia no vital statistics were published between 1876 and 1908 and in New Brunswick no vital statistics were available until 1920. Because of the *lacunæ*, and even more because of the incomparability of information collected, of methods of collection and of standard of enforcement, Canadian vital statistics remained extremely unsatisfactory and impossible of compilation on a national basis, as was pointed out by the 1912 Commission on Official Statistics, which recommended that "for the Dominion, now engaged in building up its national unity, it is important that uniform data should render possible to statisticians the institution of true interprovincial and international comparisons. By effective co-operation of the provinces with the Dominion, this object should be capable of attainment without sacrificing the liberty of each province to satisfy its own special statistical requirements".

The scheme of co-operation thus outlined was brought into effect as a consequence of the establishment of the Dominion Bureau of Statistics under the Statistics Act of 1918, which specifically provided that the Bureau should publish an annual report on vital statistics. A scheme was first drawn up in the Bureau and submitted to the various provinces; then Dominion-Provincial conferences on vital statistics were held in June and December, 1918, when comprehensive and final discussions took place.

At the conferences of 1918, it was agreed: (1) that the model Vital Statistics Act prepared by the Dominion Bureau of Statistics, when accepted by the Legislatures, should form the basis of the vital statistics legislation of the several provinces, thus securing uniformity and comparability; (2) that the provinces should undertake to obtain the returns of births, marriages and deaths on the prescribed forms as approved and adopted at the conference, the Dominion Bureau of Statistics to supply the forms free of charge; (3) that the provinces should forward to the Dominion Bureau of Statistics, at such times as might be agreed upon, either the original returns of births, marriages and deaths, or certified transcriptions of the same; the Bureau of Statistics to undertake the mechanical compilation and tabulation.

Under the scheme outlined above, the vital statistics for all the provinces except Quebec were secured and compiled on a uniform basis for the years 1921 to 1925. The annual reports for these years may be obtained on application to the Dominion Statistician.

Quebec has been included in the registration area as from Jan. 1, 1926, from which date her statistics are on a comparable basis with those of the other provinces. The final reports for 1926 to 1932, including the statistics of all the nine provinces, have appeared and may be procured from the Dominion Statistician.

The vital statistics of Yukon and the Northwest Territories have been collected and compiled since 1924. They are not, however, presented with those of the nine provinces in the tables of this chapter because the figures are not regarded as complete, the details are in many cases not available, and the small and varying population is not known with sufficient accuracy for each year to enable the rates to be calculated. As these territories contain less than 1/700th of the population of Canada, their vital statistics are a negligible factor in the total. Births, marriages and deaths in Yukon and the Northwest Territories, for the years 1924-32, are summarized in the statement herewith:—

## VITAL STATISTICS OF YUKON AND THE NORTHWEST TERRITORIES, 1924-32.

| Year.     | Yukon.  |            |         | The Northwest Territories. |            |         |

|           | Births. | Marriages. | Deaths. | Births.                    | Marriages. | Deaths. |
|           | No.     | No.        | No.     | No.                        | No.        | No.     |
| 1924..... | 31      | 5.         | 38      | 95                         | 39         | 47      |
| 1925..... | 22      | 17         | 63      | 57                         | 35         | 32      |
| 1926..... | 27      | 12         | 68      | 75                         | 3          | 51      |
| 1927..... | 29      | 19         | 33      | 126                        | 20         | 133     |
| 1928..... | 30      | 13         | 46      | 222                        | 30         | 367     |
| 1929..... | 35      | 10         | 54      | 133                        | 29         | 168     |
| 1930..... | 45      | 17         | 69      | 232                        | 36         | 206     |
| 1931..... | 40      | 24         | 66      | 141                        | 36         | 106     |
| 1932..... | 44      | 26         | 62      | 195                        | 33         | 122     |

Two important considerations should be borne in mind by the students who use either the tables which follow or the detailed reports issued by the Bureau of Statistics for comparative purposes. First, in spite of the improvements of the past decade, registration generally, and the registration of births in particular, is not universally carried out. The great extent of the country and the isolation of many of its inhabitants partly account for this unsatisfactory situation. Secondly, the very considerable differences in the age and sex distribution of the population in different provinces make comparisons of crude birth rates and crude death rates as among the provinces unfair and misleading. All rates in this chapter have been recalculated on the basis of the revised estimates of population given on p. 164.

The natural increase of the population of Canada is first dealt with, followed by detailed tables of births, marriages and deaths in the order named.

### Section 1.—Natural Increase.

Summary statistics of the births, marriages, deaths and natural increase per 1,000 of population are given for the years 1921 to 1933, by provinces, in Table 1.

The province of Quebec is regarded as having one of the highest rates of natural increase per 1,000 population of any civilized area. The rate was 17.1 in 1931 and, while it has been appreciably reduced in line with common experience almost everywhere, it stood at 15.2 in 1933. Saskatchewan, Alberta and New Brunswick follow Quebec in the order given. In the case of the two western provinces the high rates of natural increase are due to their relatively younger populations and lower crude death rates, but in the case of New Brunswick the condition of an abnormally high birth rate combined with a high death rate exists. In fact, the death rate in New Brunswick is higher than that of any other province. The high rates for these provinces brought the averages for Canada up to 13.3 in 1926, 13.4 in 1927, 13.0 in 1928, 12.2 in 1929, 13.2 in 1930, 13.1 in 1931, 12.6 in 1932 and 11.3 in 1933. The rate of natural increase in 1932 was 8.2 per 1,000 in Australia, 9.1 in New Zealand, 3.3 in England and Wales, 5.1 in Scotland and 4.4 in the Irish Free State, so that Canada compares quite favourably with other British countries.

The rates of natural increase per 1,000 of mean population for other countries in the latest years are as follows, the figures being for 1932, except where stated in parentheses: Denmark, 7.0; Japan, 15.2; Netherlands, 13.0; Norway, 5.4; Finland, 6.1; Italy, 9.1; Switzerland, 4.6; Sweden, 2.9; Spain, 10.1 (1931); France, 1.5; Belgium, 4.5; United States (registration area), 6.5; Union of South Africa (whites), 14.2.

During recent years the rate of natural increase of the population of Canada has shown a tendency to decline. In 1921 the rate was 17.8, declining to 13.3 in 1926 and 12.2 in 1929. After 1929 there was a temporary improvement but, as

BIRTH RATES, DEATH RATES AND RATES OF NATURAL  
INCREASE IN CANADA — 1926-1933  
AND ITS PROVINCES - 1931-33  
EXCLUSIVE OF THE NORTH WEST TERRITORIES AND YUKON  
(RATES PER 1,000 POPULATION)

Table 1 shows, the rates for 1932 and 1933, 12.6 and 11.3 respectively, were a continuation of the downward trend.

Statistics of the births, marriages, deaths and natural increase in cities and towns of 10,000 and over are given for the calendar years 1931 and 1932 in Table 2, but these are not worked out as rates per 1,000 of population, though the census populations in 1931, which are also given, furnish some guide to the rates of natural increase. Particularly notable in this table are the larger proportionate numbers of births in such cities as Montreal and Quebec, as compared with Toronto, Hamilton, Ottawa, Winnipeg and Vancouver. These higher birth rates are in part counter-balanced by considerably higher death rates, but the natural increases in Quebec cities are still considerably higher than in the cities of other provinces.

**1.—Summary of Births, Marriages, Deaths and Natural Increase, by Provinces, for the calendar years 1931-33, with Averages 1921-25 and 1926-30.**

NOTE.—For other than census years birth, marriage and death rates are calculated on estimated population (see p. 164). Figures for individual years 1921-25 will be found at p. 160 of the 1927-28 Year Book and for 1926-30 at p. 150 of the 1933 Year Book.

**Natural Increase by Sex.**—According to Table 3, the number of male children born in 1931, 1932 and 1933 in Canada exceeded the total male deaths for those years by 67,093, 64,929 and 59,663 respectively, while the gains in the female population during the same periods were 68,863, 66,360 and 61,237. Thus, while the number of male children born exceeded the females in each year the higher mortality among males resulted in a net excess of the natural increase of the females in every case.

## 3.—Births, Deaths and Natural Increase in Canada,<sup>1</sup> by Provinces and for each Sex, with Totals, 1931-33 and Average 1926-30.

<sup>1</sup>Exclusive of the Territories.

## Section 2.—Births.

Throughout almost the whole of the civilized world the birth rate has, in the past generation, been on the decline, though the consequent reduction in the rate of natural increase has been partly offset by the synchronous decline in the death rate.

The crude birth rate of England and Wales, for example, was 35.4 per 1,000 population on the average of the decennium 1871-80, 32.5 in 1881-90 and 29.9 in 1891-1900. In 1913 the birth rate was 24.1, and, though it rose to 25.5 in 1920, it fell again to 22.4 in 1921, 19.7 in 1923, thence by successive stages to 16.6 in 1927, rising to 16.7 in 1928, but thereafter falling gradually each year to 15.3 in 1932.

Similarly, in France the crude birth rate declined from an average of 25.4 per 1,000 population in the 1870's, 23.9 in the 1880's and 22.2 in the 1890's to 21.4 in 1920 and 19.1 in 1923, falling slightly to 19.0 in 1925 and again to 18.8 in 1926, 18.1 in 1930, 17.5 in 1931 and 17.3 in 1932. In Germany, again, the crude birth rate was 39.1 in the 1870's, 36.8 in the 1880's, 36.1 in the 1890's, 25.9 in 1920, 20.7 in 1925, 17.5 in 1930, 16.0 in 1931 and 15.1 in 1932.

In Canada the crude birth rate still stands at a comparatively high figure, being 20.9 per 1,000 in 1933. This, however, is largely due to the influence of Quebec, where the rate, although declining, still stood at 25.9 per 1,000 in 1933, as compared with 18.1 per 1,000 in Ontario. In the other provinces the figures varied from lows of 13.5 and 18.4 per 1,000 in British Columbia and Manitoba to highs of 21.3 and 23.9 in Alberta and New Brunswick respectively.

Statistics of births and birth rates for the years 1931-33 with averages for 1921-25 and 1926-30 are given by provinces in Table 4. The averages for the former period are exclusive of the province of Quebec which was not then in the registration area.

### 4.—Numbers of Live Births and Birth Rates, by Provinces, 1931-33, with Averages, 1921-25 and 1926-30.

#### A.—NUMBERS OF LIVE BIRTHS.

| 1933.....              | 21.9   | 21.4 | 23.9 | 25.9         | 18.1 | 18.4 | 21.2  | 21.3  | 13.5 | 20.9         |

<sup>1</sup> Quebec was not included in the registration area prior to 1926.

Table 5 gives the number of live births in cities and towns of 10,000 population and over for the years 1929 to 1933 inclusive. For recent years previous to 1930 there was a definite tendency for such births to increase but the figures given clearly show that the trend has been in the opposite direction since that year.

<sup>1</sup>Live Births in cities of 40,000 population and over, except Montreal and Quebec, are given for 1921-28 on p. 137 in the Canada Year Book of 1930. Those in cities of 10,000 and over for 1926-28 appear at p. 141 of the 1931 Year Book.

**Nativity of Mothers.**—In Table 6 will be found for each of the provinces the percentages of legitimate children born alive to Canadian-born, British-born and foreign-born mothers respectively in 1931 and 1932. It is noteworthy that children born to foreign-born mothers outnumbered children born to Canadian-born mothers in the province of Alberta in 1931 but this condition was reversed and Alberta fell into line with all the other provinces in this respect in 1932. For the Dominion as a whole, in the respective years 73.9 p.c. and 75.5 p.c. of the children of mothers whose birthplaces were known had Canadian-born mothers, 11.1 p.c. and 10.3 p.c. British-born mothers and 15.0 p.c. and 14.3 p.c. foreign-born mothers.

It is also significant that the percentage of legitimate children born alive to Canadian-born mothers between 1921 and 1932 increased from 42.3 p.c. to 60.3 p.c. in Manitoba, from 36.1 p.c. to 51.9 p.c. in Saskatchewan, from 30.0 p.c. to 43.5 p.c. in Alberta, and from 29.7 p.c. to 48.6 p.c. in British Columbia. Thus more and more of the children of the West are coming within the class of third generation Canadians.

**6.—Percentages of Legitimate Children Born Alive to Canadian-Born, British-Born or Foreign-Born Mothers, by Provinces, 1931-32.**

| Province.                                         | Nativity of Mothers. |             |               |             |               |             |
|---------------------------------------------------|----------------------|-------------|---------------|-------------|---------------|-------------|

| <b>Canada (Exclusive of the Territories).....</b> | <b>73.9</b>          | <b>75.5</b> | <b>11.1</b>   | <b>10.3</b> | <b>15.0</b>   | <b>14.3</b> |

**Sex of Live Births.**—Table 7 shows the number and proportion of live male and female births reported for each province in Canada during the calendar years 1931, 1932 and 1933, with averages for the five-year periods 1921-25 and 1926-30. The figures for Quebec commence only with the year 1926 when that province entered the registration area, and the totals for Canada are limited in the same manner in consequence. Every province shows an excess of male births although individual figures for 1928 gave a slight excess of female births in British Columbia. The table shows that among every 1,000 born in 1933 in the whole of Canada, 513 were males and 487 females. In other words, there were 1,054 males born to every 1,000 females.

### 7.—Births (Exclusive of Stillbirths) by Sex, and Ratio of Males to Females, for Canada and by Provinces, 1931-33, with Averages for 1921-25 and 1926-30.

NOTE.—For corresponding figures for single years 1921-25, see p. 165 of the Canada Year Book for 1927-28, and for those for 1926-30, p. 156 of the Canada Year Book for 1933.

<sup>1</sup>Quebec was not included in the registration area prior to 1926.

**Ages of Parents.**—Table 8 shows the age distribution of married fathers and mothers in the year 1926 (the first year for which the figures are available for the whole of Canada) and for 1930-32. The fathers and mothers in each of these years

are arranged according to age and then divided into four equal groups. Each point of age at which a separation comes is called a quartile. To obtain these points of age it is assumed that those in the same year of age are evenly distributed from its lower to its upper limit. In similar manner the deciles divide fathers or mothers in each census year into ten equal groups.

In 1932 one-quarter of the married fathers were under 27·91 years of age, one-half under 32·67 years and three-quarters under 38·78 years. One-quarter of the married mothers were under 24·13 years of age, one-half under 28·45 years and three-quarters under 33·84 years. Nine-tenths of the fathers were under 44·28 years and nine-tenths of the mothers under 38·50 years. It will be noted that the general tendency of the quartile and decile points over the seven years is in a downward direction. In other words, parents generally speaking are gradually becoming younger although in individual years the trend has been reversed.

**Birthplace of Parents.**—Table 9 classifies the children born in 1931 by country of birth of parents, and furnishes some idea to what extent the coming generation of Canadian born will be the offspring of Canadian-born, British-born or foreign-born parents. The term “country not specified”, under country of birth, includes for the father illegitimate births and births of incomplete record, while for the mother it includes births of incomplete record only. Between 1926 and 1932 the percentage of births where both parents were born in Canada rose from 61·4 to 63·0.

<sup>1</sup>Includes the Ukraine. <sup>2</sup>Less than one-tenth of one per cent. <sup>3</sup>This figure gives the number of children whose fathers and mothers were born in the same country. <sup>4</sup>The difference between this figure and the total number of births represents the number of children whose fathers and mothers were born in different countries. <sup>5</sup>This excludes the percentage of "mixed parentage", i.e., where the two parents were not born in the same country.

**Origins of Parents.**—Tables 10 and 10A give the numbers and percentages of births for 1931 and 1932, distributed by the principal origins.

**10.—Numbers and Percentages of Births (Exclusive of Stillbirths) in Canada to Fathers and Mothers of Specified Origins, 1931.**

For footnotes see end of Table 10A, page 184.

**Illegitimacy.**—The ratio of illegitimate to total births is, generally speaking, low in Canada as compared with other countries. The steady increase which is noticeable in recent years is probably due, in some measure, to more complete data.

Out of 240,473 live births in the nine provinces of Canada in 1931, 8,365 or 3.48 p.c., were returned as the issue of unmarried mothers. Figures for 1932 show a total of 235,666 live births, of which 8,460 or 3.59 p.c., were returned as the issue of unmarried mothers. Out of this number 4,366 were males and 4,094 females—a ratio of 1,066 males to every 1,000 females, as compared with 1,088 males per 1,000 females in 1931, and a general 1932 rate for all births of 1,057 males to 1,000 females. In 1933 there were 222,868 live births and 8,426 or 3.78 p.c. of these were illegitimate. Of the illegitimate, 4,362 were males and 4,064 were females—a ratio of 1,073 males to 1,000 females. (See Table 11.)

<sup>1</sup>Less than one-tenth of one per cent    <sup>2</sup>This figure gives the number of children whose fathers and mothers have the same origin. The difference between this figure and the total number of births represents the number of children whose fathers and mothers are of different origins.    <sup>3</sup>This excludes the percentage of "mixed parentage", i.e., parents not of the same origins.    <sup>4</sup>Including Galician and Bukovinian.

**11.—Numbers of Illegitimate Births, Classified by Age of Mother, with the Percentages to Total Live Births, by Provinces, 1931 and 1932, with Totals for 1931-33.**

## Section 3.—Marriages and Divorces.

### Subsection 1.—Marriages.

About a century ago it was observed in the United Kingdom that the number of marriages tended to be high when the price of wheat was low and to be low when the price of wheat was high. This was quite naturally the case among a population, the majority of which was living at a comparatively low standard of comfort, and where the staple food was thus the chief factor in the cost of living.

More recently, the curve showing marriage rates in the United Kingdom and other English-speaking countries has ceased to bear any constant relation to the price of the staple food of the people, though it still does so in poorer countries. Its place in influencing the marriage rate has, however, been taken by the general level of prosperity. Marriages in such countries as the United Kingdom, the United States, Canada and Australia tend to increase in "good times" and to diminish in "hard times", when great numbers of those who are contemplating marriage are led to postpone such marriage until the advent of better industrial conditions. Thus marriages in Canada showed considerable declines from the high 1929 level in 1930, 1931, and 1932, but increased generally (in every province except Saskatchewan) in 1933.

Summary statistics of marriages contracted in 1921-33 appear in Table 14.

#### 14.—Numbers of Marriages and Marriage Rates, by Provinces, 1931-33 with Averages for 1921-25 and 1926-30.

##### A.—NUMBERS OF MARRIAGES.

| Year.              | P.E.I. | N.S.  | N.B.  | Que.   | Ont.   | Man.  | Sask. | Alta. | B.C.  | Canada. |
|--------------------|--------|-------|-------|--------|--------|-------|-------|-------|-------|---------|
| Averages, 1921-25. | 473    | 3,186 | 2,953 | 1      | 24,037 | 4,634 | 4,982 | 4,313 | 3,971 | 1       |
| Averages, 1926-30. | 473    | 3,224 | 2,970 | 18,731 | 25,449 | 4,951 | 6,036 | 5,265 | 4,786 | 71,885  |
| 1931.....          | 490    | 3,394 | 2,544 | 16,783 | 23,771 | 4,888 | 5,700 | 5,142 | 3,879 | 66,591  |
| 1932.....          | 456    | 3,197 | 2,380 | 15,115 | 22,224 | 4,729 | 5,772 | 5,054 | 3,604 | 62,531  |

##### B.—MARRIAGE RATES PER 1,000 POPULATION.

| Year.              | P.E.I. | N.S. | N.B. | Que. | Ont. | Man. | Sask. | Alta. | B.C. | Canada. |
|--------------------|--------|------|------|------|------|------|-------|-------|------|---------|
| Averages, 1921-25. | 5.4    | 6.1  | 7.6  | 1    | 8.0  | 7.5  | 6.4   | 7.3   | 7.1  | 1       |
| Averages, 1926-30. | 5.4    | 6.3  | 7.4  | 6.9  | 7.8  | 7.5  | 7.0   | 8.0   | 7.5  | 7.3     |
| 1931.....          | 5.6    | 6.6  | 6.2  | 5.8  | 6.9  | 7.0  | 6.2   | 7.0   | 5.6  | 6.4     |
| 1932.....          | 5.1    | 6.2  | 5.8  | 5.2  | 6.4  | 6.7  | 6.2   | 6.8   | 5.1  | 6.0     |
| 1933.....          | 5.4    | 6.4  | 6.0  | 5.2  | 6.4  | 6.7  | 5.6   | 7.1   | 5.7  | 6.0     |

<sup>1</sup>Quebec was not included in the registration area prior to 1926.

**Age at Marriage.**—The average age of all bridegrooms in the Dominion in 1932 was 29.2 years and that of all brides 24.9 years. The average excess of the bridegroom's age was thus 4.3 years. It may be noted in Table 15 that when the contracting parties are grouped by age of bridegroom, the average difference in age is less for the younger groups, grooms under 20 being 0.3 years younger than the brides, while the excess of the average bridegroom's age was 1.6 years in the group 20-24, and steadily increased for each quinquennial age group until it was 11.2 years for the bridegrooms 50 years and over in 1931 and 11.6 years in 1932. On the other hand, when the parties are grouped by the age of the bride, it is found that there is not the same regularity as is shown in the table by age of grooms. In the case of brides in the age groups 25-29 years and 50 years and over the bridegrooms approximate most closely in age to their brides. Since these tables are based upon all marriages contracted during the year, the figures given should not be understood to signify the average ages at first marriage. Table 16 gives the average ages of brides and grooms by provinces.

#### 15.—Differences in Ages of Bridegrooms and Brides, 1931 and 1932.

| Year and Age Group of Bridegrooms. | Average Age of Bridegrooms. | Average Age of Brides. | Excess of Average Age of Bridegrooms. | Year and Age Group of Brides. | Average Age of Brides. | Average Age of Bridegrooms. | Excess of Average Age of Bridegrooms. |

Out of each 1,000 bridegrooms in 1932, 906 were bachelors, 83 widowers, 11 divorced men; out of each 1,000 brides 935 were spinsters, 55 widows, 9 divorced women. The first year in which as many as 1 p.c. of those marrying had previously been divorced was 1928. There is a fairly close resemblance between the figures of divorces granted, as shown in Table 19 of this chapter, and the number of divorced persons re-married, more particularly in the case of males. Thus 995 divorces were granted in 1932, while 661 divorced males and 579 divorced females married again. This of course does not mean that these were the same persons.

**Nativity of Brides and Bridegrooms.**—The majority of marriages contracted in the western provinces in past years have been between persons born outside Canada. This condition however is being gradually changed and, although in Alberta and British Columbia, the majority of the bridegrooms in the marriages contracted in 1931 and 1932 were born outside of Canada, as a rule the percentages show a general reduction over the past few years. Canadian-born brides were in the majority, in both years, in each province. In the Maritime Provinces and Quebec, the Canadian-born brides and grooms showed a marked predominance, varying between 86 p.c. and 98 p.c., and in Ontario over 66 p.c. of grooms and 73 p.c. of brides were Canadian born in 1932. Taking Canada as a whole, nearly 68 p.c. of all grooms and exactly 76 p.c. of all brides were born in Canada; these are the highest percentages shown for the period covered by the statistics. Table 17 gives the number of marriages per 1,000 population in each province, as well as the percentage distribution of brides and grooms according to nativity for the years indicated.

**17.—Nativity of Persons Married in Canada, by Provinces, 1931 and 1932 with Averages for 1921-25 and 1926-30.**

NOTE.—For figures for single years 1921-25, see the 1929 Year Book, p. 166, and for 1926-30, the 1933 Year Book, pp. 163-4.

## Subsection 2.—Divorces.

For many years subsequent to Confederation the number of divorces granted in Canada was very small, 1883, with 13 divorces, being the first year in which the number attained two figures, while 1903, with 21 divorces, was the record year up to that time. Thereafter the numbers grew more rapidly, 1909 showing 51 divorces and 1913, the last pre-war year, 60 divorces. This number was, however, less than one per 1,000 of the marriages contracted in Canada in these years.

The effect of the War was to increase very greatly the number of divorces granted in Canada. The causes may be found in the generally unsettling psychological effect of the war period, and the long separations between men on active service and their wives. The provision of new facilities for divorce is also to be considered; owing to a decision of the British Privy Council, divorces in the Prairie Provinces have, subsequently to 1918, been granted by the courts of these provinces, so that Ontario and Quebec have since then been the only provinces in which the applicant for divorce must secure a special Private Act of Parliament. In 1930, however, an Act of the Dominion Parliament (20-21 Geo. V, c. 14) gave jurisdiction in divorce cases to the Supreme Court of Ontario.

The above-mentioned causes have tended to produce the recent increase in the numbers of divorces granted in Canada, which grew steadily from 114 in 1918 to 875 in 1930, these numbers being those of final decrees, which alone really constitute divorces. In 1931 the number decreased to 692, this being largely due to the transfer of jurisdiction in Ontario divorces from the Parliament of Canada to the

Supreme Court of the province, with the consequent delay between the granting of the decree *nisi* and the decree absolute. In 1932 the number rose to 995, this figure being greater than the total divorces granted in the 50 years from 1868 to 1917, but in 1933 it dropped slightly to 923. The statistics of divorces granted in the years from 1911 to 1933 inclusive will be found in Table 19. (For divorces in each year prior to 1911 see the 1921 Year Book, p. 825.)

### 19.—Statistics of Divorces Granted in Canada, 1911-33.

NOTE.—In Prince Edward Island only two divorces have been granted since Confederation, one in 1913 and one in 1931. In consequence of a decision of the British Privy Council, divorces in Manitoba, Saskatchewan and Alberta have, subsequently to 1913, been granted by the courts of these provinces.

| Year.     | Granted by the Dominion Parliament. |         |                  |                   |                  | Granted by the Courts. |                         |                           | Total for Canada. |

<sup>1</sup> Includes one judicial separation. <sup>2</sup> Includes one not effective till court costs are paid. <sup>3</sup> One by Parliament, remainder by courts. <sup>4</sup> Granted by courts. <sup>5</sup> Two granted by Parliament, remainder by courts. <sup>6</sup> Includes one in P.E. Island. <sup>7</sup> Three granted by Parliament, remainder by courts.

### Section 4.—Deaths.

Within the past century, and more especially within the past generation, there has occurred throughout the countries of the white world a notable decline in the death rate, except where man has brought death upon himself through wars and the aftermath of wars. How far this decline has been due to advances in medical science, how far to better sanitation and how far to the improvement in the general conditions of living, as a result of the increase in the productive power of humanity, is in dispute, but concerning the facts there is no doubt.

Perhaps the most impressive testimony regarding this decline in the death rate is furnished by the mortality statistics of Sweden, where vital statistics have been kept with great accuracy for the whole nation ever since 1750. There, the crude death rate declined from an average of 27.4 per 1,000 in the decade 1751-60 to 14.3 in the decade 1911-20 and to 11.6 in 1932.

Similarly, in England, the crude death rate, which was 22.5 per 1,000 in the 60's, 21.4 in the 70's and 18.2 in the 90's of the last century, declined to 15.4 in the first decade of the present century and 12.1 in the third; it was 12.0 in 1932. In

Scotland, again, the average rate was 22.1 in the '60's, 21.8 in the '70's, 18.6 in the '90's, 13.9 in 1921-25, 13.6 in 1926-30, and 13.5 in 1932.

Of course the preceding statements are not to be taken to mean that every year will show a decline in the death rate as compared with the preceding year. There will always be years of specially high mortality, for instance 1918, when the death rate in Ontario, the most populous of the provinces of Canada, was 15.3 per 1,000, owing to the influenza-pneumonia epidemic, as against 12.0 in 1917 and 11.9 in 1919. Over a period, however, these idiosyncrasies of individual years are reduced to negligibility, and it remains true that from decade to decade there is, under normal conditions, a decline in the crude death rates of the countries of the white man's world.

As for Canada, while the period elapsed since the introduction of complete and comprehensive vital statistics in 1920 has been too short to establish a definite downward trend, the rate of 12.4 per 1,000 for that year, in the eight provinces then included in the registration area, was substantially higher than in any subsequent year. From 1926 Quebec, which has a higher death rate than the average, has been included in the registration area and its influence is reflected in the totals for Canada shown in Table 20. A decided improvement is shown in the deaths and death rate of Quebec for the years 1932 and 1933. This has been in evidence ever since 1926, but now, for the first time, Quebec shows a lower rate than any of the provinces to the east of her.

### Subsection 1.—General Mortality.

Total deaths and crude death rates in recent years are given in Table 20 for Canada, by provinces. There was a smaller absolute number of deaths in 1933 than in any other year since the record became available for all the nine provinces.

#### 20.—Deaths and Death Rates, by Provinces, 1931-33, with Averages 1921-25 and 1926-30.

NOTE.—For figures for single years 1921-25 see p. 149 of the 1930 Year Book, and for 1926-30, see p. 167 of the 1933 Year Book.

| Averages, 1926-30..... | 11.0   | 12.4 | 12.5 | 13.5         | 11.2 | 8.3  | 7.3   | 8.4   | 9.3  | 11.1                 |
| 1931.....              | 10.4   | 11.6 | 11.4 | 12.0         | 10.4 | 7.6  | 6.6   | 7.2   | 8.8  | 10.1                 |
| 1932.....              | 11.8   | 11.9 | 11.0 | 11.4         | 10.5 | 7.5  | 6.5   | 7.5   | 8.7  | 9.9                  |
| 1933.....              | 11.6   | 11.6 | 11.7 | 10.7         | 10.0 | 7.6  | 6.3   | 7.1   | 8.7  | 9.6                  |

<sup>1</sup> Quebec was not included in the registration area prior to 1926. <sup>2</sup> Exclusive of the Territories.

**Age Distribution of Decedents.**—The numbers of males and females dying in the nine provinces in 1931 and 1932 are given by single years of age up to 5 and by quinquennial age groups from 5 to 90 years and over in Table 21, together with the percentage of deaths occurring in each group in each of these years. In the eight provinces that have been in the registration area since 1921, the number of males under 1 year dying in 1932 was only 14.0 p.c. of the total number of male deaths, as against 23.6 p.c. in 1921, and of females, 12.6 p.c. as against 20.3 p.c. Similarly, deaths under 5 years of age among males fell from 29.8 p.c. of the total number of deaths in 1921 to 17.3 p.c. in 1932 and among females, from 26.5 p.c. to 15.9 p.c.

The quartile and decile ages of decedents for the years 1926, 1931 and 1932 are given for each sex and for the two sexes combined in Table 22. The fifth decile and second quartile (or the median) both mark the middle points of the arrays, and the deciles, dividing each half into five groups, give a more detailed picture of the age distribution in each half than do the quartiles. It is shown very definitely that the average ages of decedents have been increasing steadily. This is true for each quartile and each decile. Moreover the improvement between 1931 and 1932, while notable for each sex, is more marked in the case of males. In the case of the

first quartile age for males, for instance, the age has risen from 3.82 years in 1931 to 13.42 years in 1932, or by 251 p.e. That this improvement is mainly due to betterment in the early months of life (between the first and second deciles) is indicated in the second part of the table.

## 22.—Quartile and Decile Ages of Decedents, by Sex, 1926, 1931 and 1932.

| Position in Array by Age.         | Both Sexes. |       |       | Males. |       |       | Females. |       |       |

| Ninth deciles..... "              | 80.82       | 80.99 | 82.04 | 79.89  | 80.14 | 81.12 | 81.85    | 82.05 | 82.99 |

**Adjusted Death Rates.**—While the crude death rate gives the actual mortality per 1,000 of population, the differing age constitution of the population in different communities and the high mortality among infants and elderly people make the crude death rate no true test of the relative expectation of life in such communities. Where the age and health constitution of a particular group is particularly favourable to low mortality, for example among the selected lives of soldiers in peace time, the crude and the adjusted death rates will be lower than elsewhere.

When comparisons of the rates of mortality in several communities are made by age groups the effects of differences in age constitution between these communities are eliminated, but by a rather cumbrous process which does not bring together and express as a single figure the facts of the situation. It has therefore been considered desirable to adopt a particular community as a standard, and to find what the death rates of other communities would have been if the age and sex constitution of their population had corresponded to those of the community taken as a standard. The "standard" population chosen for this purpose in England and Wales and the United States is the "standard million", based on the age and sex distribution per million of the population of England and Wales at the Census of 1901. That age and sex distribution was as follows:—

| Age Group.             | Both Sexes. | Males.  | Females. |
|------------------------|-------------|---------|----------|
| All ages.....          | 1,000,000   | 483,543 | 516,457  |
| Under 5 years.....     | 114,262     | 57,039  | 57,223   |
| 5-9 years.....         | 107,209     | 53,462  | 53,747   |
| 10-14 years.....       | 102,735     | 51,370  | 51,365   |
| 15-19 years.....       | 99,796      | 49,420  | 50,376   |
| 20-24 years.....       | 95,946      | 45,273  | 50,673   |
| 25-34 years.....       | 161,579     | 76,425  | 85,154   |
| 35-44 years.....       | 122,849     | 59,394  | 63,455   |
| 45-54 years.....       | 89,222      | 42,924  | 46,298   |
| 55-64 years.....       | 59,741      | 27,913  | 31,828   |
| 65-74 years.....       | 33,080      | 14,691  | 18,389   |
| 75 years and over..... | 13,581      | 5,632   | 7,949    |

Regarding the standard million of England and Wales the Registrar General says: "As the population of this country in 1901 included relatively few infants and old people it forms a standard exceptionally favourable to low mortality". The relative fewness of old people in the population is presumably due to the great increase in English population during the 19th century; the relative fewness of infants, to the marked reduction of the birth rate between the 1870's and the end of the century.

The process above described has been applied to the population of the eight provinces, the former registration area of Canada, for the years 1921-32 and to the population of Quebec for the years 1926-32 in Table 23. Of the rates there given, those for 1921 and 1922 have been calculated directly, the proportion of the population in each sex and age group according to the Census of 1921 being assumed to hold true for 1922 also; similarly the rates for 1930, 1931 and 1932 have been calculated directly from the proportions shown in each sex and age group at the Census of 1931. For the intervening years 1923-29, for which estimates of total population but not of population by age groups were available, the following method was adopted. The proportions which the adjusted rates of 1921 and 1922 (correct to three decimal places) bore to the crude were averaged, similarly those of 1930 and 1931, and the change was assumed to have taken place in an arithmetical progression during the intervening seven years. Quebec not having been in the registration area in the year 1921, an adjusted rate was not available for that year or for 1922, but as the proportion of the adjusted rate to the crude depends primarily on the sex and age distribution of the population, and as this distribution was known for 1921 and 1931, and the actual proportion of adjusted rate to crude rate for 1931, it was possible to compute a theoretical proportion for 1921. The same method was followed for the total of the nine provinces.

In all of the eight provinces for which 1921 figures are given the proportion of the adjusted rate to the crude was higher in 1921 than in 1931; in other words, the age distribution had become more unfavourable in the later year. In the Maritime Provinces and Ontario the process of "standardizing" or "adjusting" the death rate results in a reduced rate. This is particularly true of Prince Edward Island, which has the largest proportion of aged persons of all Canadian provinces. In the western provinces, on the other hand, the adjusted rates are higher than the crude. So much is this so, that in the case of Saskatchewan, while the crude rate in 1931 was only 6.6, as compared with 10.4 in Prince Edward Island, the adjusted rate was actually slightly higher than that of the island province.

### 23.—Crude and Adjusted Death Rates in Canada, by Provinces, 1921-32.

| Province.     | 1921. | 1922. | 1923. | 1924. | 1925. | 1926. | 1927. | 1928. | 1929. | 1930. | 1931. | 1932. |

<sup>1</sup>Quebec was not included in the registration area prior to 1926.<sup>2</sup>Revised since the publication of the 1933 Year Book.

**Causes of Death.**—More than 86 p.c. of deaths recorded in the present registration area in the years 1931 to 1933 were due to the 32 specific causes named in Tables 24 and 25. In these tables the groupings for the years 1931-33 are in accordance with the revision of the International List in 1929, which was first applied to Canadian mortality statistics for the year 1931. In some cases, however, the figures for years earlier than 1931 cannot be made exactly comparable with this grouping. These cases are indicated by footnote 2 to Table 24. In the chart which accompanies the tables, the main object has been to attain the greatest degree of comparability possible over the whole period 1926-33. For this purpose it has been necessary to depart somewhat from the grouping of Tables 24 and 25. The cases in which this occurs are indicated on the chart by asterisks.

Total deaths in 1933 were the lowest they have been since statistics for the whole of Canada were made possible by Quebec coming into the registration area in 1926. The influenza epidemic of 1929 accounted for an increase in the total, but the deaths from this cause have worked back to a normal level since that year. It is significant, however, that cancer and diseases of the arteries are increasingly important causes of death in spite of all efforts to control them. Suicides show an improvement from the high level reached in 1932. Violent deaths other than suicides have shown a very definite improvement since 1930.

## 24.—Deaths in Canada, by Principal Causes, 1928-33.

<sup>1</sup> The numbers given in this column refer to the International List of Causes of Death, as revised in 1929 by the International Commission on the Classification of Diseases and Causes of Death. This classification, in its detailed, intermediate or abridged form, is accepted in almost all civilized countries.

<sup>2</sup> For these causes of death the comparability between the figures for the years 1928-30 and those for the years 1931-33 is not exact, owing to changes in classification.

<sup>3</sup> Revised since the publication of the 1933 Year Book.

## 25.—Death Rates per 100,000 Population in Canada, by Principal Causes, 1928-33.

For footnotes see Table 24.

**Deaths in Canadian Cities.**—Table 26 gives the number of deaths in Canadian cities and towns of 10,000 population and over in each of the years from 1929 to 1933. Generally speaking, 1929 was a year of high death rates, the total number of deaths reported for the Dominion being 113,515 as compared with 105,136 in 1927 and an average of 108,924 for the period 1926-30. The 1929 figures for most cities show a corresponding increase in the number of deaths. It is probable that these cities contained a larger proportion of the total population in 1929 than in 1927 and it is quite likely that the number of non-residents dying in the hospitals of the cities is also on the increase. In view of these probabilities it is noteworthy that only 11 of the 70 cities and towns listed show increases of deaths in 1933 over the 1929 level. None of the larger cities is included in this group; indeed, in all of the larger cities the improvement has been most substantial.

**26.—Total Deaths (Exclusive of Stillbirths) in Cities and Towns of 10,000 Population and Over, 1929-33.**

<sup>1</sup> Including Point Grey and South Vancouver.

**Comparative Crude Death Rates of Different Countries.**—In Table 27 will be found a comparative statement of the crude death rates of various countries and of the provinces of Canada for the latest available year. It is worthy of note that three Canadian provinces show the lowest death rates in the list and that Canada has a lower death rate than most other leading countries. Canada, New Zealand, Australia, and South Africa are the only countries with death rates under

10.0 per 1,000 of population, with the exception of the Netherlands. The low death rates in the Prairie Provinces are in all three cases due in part to a favourable age distribution of population.

### 27.—Crude Death Rates of Various Countries in Recent Years.

| Country or Province.               | Year.       | Crude Death Rate. | Country or Province.     | Year. | Crude Death Rate. |
|------------------------------------|-------------|-------------------|--------------------------|-------|-------------------|
| Saskatchewan.....                  | 1933        | 6.3               | British Isles.....       | 1932  | 12.4              |
| Alberta.....                       | 1933        | 7.1               | Finland.....             | 1932  | 12.6              |

### Subsection 2.—Infantile and Maternal Mortality.

In recent years a great part of the energy devoted by the medical profession and sanitarians to effect a decline in the death rate has gone to reduce infantile mortality, and in this field a large measure of success has been attained. In Canada, the Dominion, provincial and municipal health authorities have all taken part in the struggle to reduce infantile mortality, and usually, in the absence of epidemics, each year is showing an improvement. In the twelve years for which the figures are available there is evident a very considerable decline in infantile mortality. In 1921 the infant death rate for Canada (using figures from provincial sources for Quebec) was 102 per 1,000 live births. This rate had been reduced to 73.1 in 1933. Table 28 gives figures for the whole of Canada for the years 1931 to 1933 and averages for the five-year periods 1921-25 and 1926-30. As in the case of general mortality, the infant mortality in Quebec exceeds that in any other province, although a study of the rates shows that steady improvement has been made in the eight-year period during which the province has been included in the registration area. In Canada as a whole, over 6,000 infant lives were preserved in 1931 which, under conditions prevailing in 1926, would probably have been lost.

# 28.—Infantile Mortality, by Provinces, together with the Rate per 1,000 Live Births, 1931-33 with Averages for 1921-25 and 1926-30.

## A.—INFANT DEATHS.

| Averages, 1921-25 ..... | 76.8 | 93.7 | 105.0 | 1     | 82.7 | 83.7 | 83.0 | 85.8 | 60.6 | 1    |
| Averages, 1926-30 ..... | 70.6 | 84.8 | 100.7 | 127.1 | 74.1 | 71.6 | 73.3 | 75.5 | 55.2 | 93.3 |
| 1931 .....              | 68.1 | 78.7 | 87.4  | 112.9 | 69.8 | 64.3 | 68.6 | 69.4 | 49.4 | 84.7 |
| 1932 .....              | 65.1 | 73.0 | 71.6  | 94.2  | 61.8 | 59.2 | 63.5 | 53.7 | 46.7 | 73.3 |
| 1933 .....              | 60.6 | 70.9 | 81.8  | 94.5  | 59.8 | 63.4 | 61.1 | 59.9 | 45.8 | 73.1 |

<sup>1</sup> Quebec was not included in the registration area prior to 1926.

<sup>2</sup> Exclusive of the Territories.

**Infantile Mortality by Causes of Death.**—Twenty-one principal causes of death accounted in the years 1926 to 1933 for between 91 and 93 p.c. of the infantile mortality experienced in the Dominion, as is shown in Table 29. It is noteworthy that four causes present at birth, *viz.*, premature birth, injury at birth, congenital debility and congenital malformations, accounted for nearly 45 p.c. of the infant deaths of 1933. This percentage shows a definite increase in the years covered. In 1926 it was 41.4 and in 1930, 42.3, and since the total number of infant deaths has decreased by no less than 31 p.c. in the interval since 1926, great improvement in the post-natal care of infants is indicated. In the years 1931 and 1932, 48.6 p.c. and 51.2 p.c., respectively, of all infants dying were less than one month old, and 34.1 p.c. and 36.5 p.c., respectively, were less than one week old, as is shown in Table 30.

## 29.—Infantile Mortality in Canada by Principal Causes of Death, 1926, 1931-33.

NOTE.—Figures for the former registration area for the single years 1921 to 1924 will be found at pp. 182-183 of the 1927-28 Year Book, and for 1925 to 1927 at pp. 177-178 of the 1929 Year Book. Figures for the whole of Canada for the years 1927 and 1928 will be found at pp. 138-140 of the 1932 Year Book, and for 1929 and 1930 at pp. 177-178 of the 1933 Year Book.

**Infantile Mortality in Canadian Cities and Towns.**—Table 31 shows for the cities and towns of 10,000 population and over, the numbers of infant deaths and the death rates per 1,000 live births for the years 1930-33. In the latest year Woodstock, Ont., had the lowest infant death rate, namely, 28.5.

But a very low rate for any particular year means little since wide fluctuations from year to year are the rule. As a matter of fact, Vancouver, B.C., has a finer record over the four years shown than any other place listed, and Victoria, B.C., comes a close second. Three Rivers, Sorel, Chicoutimi, Quebec City, Hull, Timmins, Joliette, Shawinigan Falls, Lévis and Thetford Mines have all rates of over 100 for 1933 and most of them have high rates over the four-year period. Among the large cities, Montreal has recorded a very steady improvement. Apart from Vancouver, already mentioned, Winnipeg and Toronto have very low rates.

31.—Deaths and Death Rates of Children Under One Year of Age (Exclusive of Still-births) in Cities and Towns of 10,000 and Over, 1930-33.

| City or Town.                | Infant Deaths. |       |       |       | Rates per 1000 Live Births. |       |       |       |

<sup>1</sup> Includes Point Grey and South Vancouver.

**Infantile Mortality in Various Countries.**—The rate of infantile mortality to live births has been greatly reduced in civilized countries by the recent advances in medical science and in sanitation. The low record is held at the present time by New Zealand, where in 1932 the rate of infantile mortality was only 31.2 per 1,000 live births as compared with 68 in 1905. The Netherlands, Norway, Switzerland and Sweden with rates of 46.3, 46.8, 51.0 and 51.2 in the latest available years, (1932) are the lowest among European countries.

As showing the improvement in recent years, it may be stated that the rate of infantile mortality in England and Wales has been reduced from 128 per 1,000 live births in 1905 to 65.0 in 1932 while the rate in Germany has declined from 196 in 1904 to 79.2 in 1932. In the Netherlands, again, the rate has declined from 131 per 1,000 live births in 1905 to 46.3 in 1932. Statistics are given in Table 32 by leading countries and by provinces.

**Infantile Mortality in Great Cities of the World.**—In former times cities were considered to be "the graveyards of population". Deaths, consequent upon the rapid spread of infectious diseases, were generally more numerous than births, and it was the prevailing opinion that cities would naturally come to an end if they were not being constantly reinforced by fresh young life from the prolific countryside. The unhealthiness of cities was especially destructive of infant life, and it is one of the greatest triumphs of our time that city life is in our day, if not as healthy, yet not necessarily more dangerous to human nor to infant life than the average living conditions in the country as a whole.

To give particular examples, the rate of infantile mortality in New York was 51 per 1,000 live births in 1932 as against a rate of 58 per 1,000 for the birth registration area of the United States. In the same year, London and Berlin had infant mortality rates of 67 per 1,000 live births, as compared with 69 for the British Isles and 79 for Germany. In Vienna a rate, according to latest statistics, of 79 compared with 106 for Austria. On the other hand, Paris had a rate of 85 in 1932 compared with a rate of 76 for France in the same year, the latest for which comparable statistics are available.

In Canada, Montreal had in 1932 an infantile mortality of 100 per 1,000 live births as compared with 94 for the province of Quebec. Toronto had, in 1932, an infantile mortality rate of 62 per 1,000 live births as against 62.1 for the province of Ontario, while Winnipeg and Vancouver had much lower infantile mortality rates than their respective provinces. Victoria had in 1932 the lowest rate shown in the table and over a number of years both Vancouver and Victoria have shown two of the lowest infantile mortality rates in the world.

**33.—Infantile Mortality per 1,000 Live Births in Great Cities of the World in 1932 or the Most Recent Year.**

| City.               | Year. | Rate of Infantile Mortality. | City.        | Year. | Rate of Infantile Mortality. |

The infant mortality in the cities of Canada has been greatly reduced in the years since the inauguration of Dominion vital statistics. Thus the rate for Toronto has fallen from 90 in 1921 to 60 in 1933, that for Winnipeg from 78 to 39, for Vancouver from 56 to 34, for Hamilton from 88 to 57, for Ottawa from 130 to 89, for London from 92 to 64, for Edmonton from 89 to 53, for Halifax from 135 to 71, for Saint John from 147 to 93. Altogether, in the 13 cities of 40,000 population and over in the former registration area of Canada, there were 41,923 live births in 1921 and 3,833 infant deaths, being a rate of 91 per 1,000 live births. In 1933 in these same cities there were 34,856 live births but only 1,983 infant deaths, or a rate of 57 per 1,000 live births.

**35.—Maternal Deaths in each Province by Age Groups, 1932 and 1933, with Totals and Rates per 1,000 Live Births for 1931-33, and Five-Year Averages for 1921-25 and 1926-30—concluded.**

| <b>Totals.....</b>                                                                        | <b>8</b> | <b>52</b> | <b>60</b> | <b>381</b> | <b>346</b> | <b>54</b> | <b>92</b> | <b>73</b> | <b>45</b> | <b>1,111</b> |

As compared with the previous year, the number of maternal deaths shows a decrease of 34 or nearly 3 p.c., but the decrease from 1930 is nearly 16 p.c. All provinces except Prince Edward Island, New Brunswick, Quebec and Saskatchewan show decreases compared with 1931. For the second time since 1921, when statistics covered the provinces other than Quebec, and since 1926, when figures were made available for all provinces, a significant decrease in such deaths is shown. By far the most serious causes of maternal mortality are puerperal septicæmia and puerperal albuminuria and eclampsia. It is encouraging to observe that the deaths from these causes decreased from 672 in 1931 to 632 in 1932, or by nearly 6 p.c., although it is also necessary to consider that births in the same period declined by 2 p.c. In 1933 deaths from maternal causes declined to 1,111, *i.e.*, by a further 5.9 p.c. from 1932, and births declined 5.4 p.c. from 1932.

## CHAPTER VI.—IMMIGRATION AND COLONIZATION.

While the great majority of French-Canadians can trace their descent to ancestors who left the Old World 250 years ago or even longer, most English-speaking Canadians are comparative newcomers both to Canada and to this continent, though a considerable number of the United Empire Loyalist families had been resident in the old colonies for generations before they moved north to establish English-speaking settlements in what is now the Dominion of Canada. During the middle third of the nineteenth century a great English-speaking migration entered the province of Ontario and made it for the first time more populous than the sister province of Quebec, thus bringing about the agitation for representation by population. Thereafter, immigration slackened until the dawn of the twentieth century brought another flood of settlers to the newly opened territories of the great Northwest, resulting in an increase of population between the Censuses of 1901 and 1911 greater than the combined increase of the three decades from 1871 to 1901.

Immigration during the second decade of the twentieth century promised, at its commencement, to be even greater than during the first. In its first three years no fewer than 1,084,934 persons entered Canada for purposes of settlement, but the Great War, which commenced for Canada on Aug. 4, 1914, dried up the sources of our immigration in the United Kingdom and Continental Europe, where every able-bodied man was needed for the defence of his country. Immigrant arrivals from the United Kingdom in 1918 numbered only about 3,000, as compared with 150,000 in 1913; immigrant arrivals from Continental Europe numbered less than 3,000 in 1916, as compared with approximately 135,000 in 1914. Since the War, immigration to the Dominion has never approached that of the pre-war period.

### Section 1.—Statistics of Immigration.

Immigration to Canada, as to other new countries, is generally greatest in "boom" periods, when capital as well as labour is leaving the older countries for the newer in order to secure the more remunerative investments generally to be found in virgin territories where the natural resources are still unexploited. In periods of depression, however, the sending abroad of both capital and labour is diminished, both preferring at such times to endure the ills which they know at home rather than take the risks of a new adventure at a distance. Indeed, the depression which began about the close of 1929, with its accompanying unemployment and unsold surplus of farm products, raised the question whether it was desirable that Canada should accept immigrants in any considerable number. Therefore, the Government, on Aug. 14, 1930, passed an Order in Council whereby immigrants, except Britishers coming from the Mother Country or self-governing Dominions and United States' citizens coming from the United States, were allowed to come in only if they belonged to one of two classes—(a) wives and unmarried children under eighteen years of age, joining family heads established in Canada and in a position to look after their dependants; (b) agriculturists with sufficient money to begin farming in Canada. This limitation applies to the whole continent of Europe as well as to many other countries. Regulations affecting immigration from the British Isles, the British Dominions or the United States have not been changed but a policy of no solicitation has been rigidly adopted. In harmony with

this policy the Department of Immigration and Colonization, during 1931, closed all its Canadian Government Information Bureaus in the United States and reduced its representation in the British Isles.

For many years the Immigration Regulations have contained a general provision that immigrants coming to Canada must have sufficient funds to look after themselves until employment is secured. Naturally, when employment is readily available a sum would be considered sufficient which would be insufficient in periods of unemployment, and the enforcement of this regulation is an important factor in reducing immigration at the present time. An Order in Council (Aug. 7, 1929), prohibiting the landing in Canada of any immigrant coming under contract or agreement, expressed or implied, to perform labour or service of any kind in Canada, is also in effect but this prohibition does not apply to farmers, farm labourers, or houseworkers. Under the Order, the Minister of Immigration and Colonization may admit any contract labourer if satisfied that his labour or service is required in Canada.

The relationship of prosperity and adversity to immigration is illustrated by Table 2, which shows that, previous to the present depression, immigration was at its minimum in the years centring on 1896; that it steadily increased from that time until 1908; that a decline took place in the fiscal year ended Mar. 31, 1909, on account of the short depression of 1908; and that thereafter immigration steadily increased till 1913. In the fiscal years 1915 to 1919, political rather than economic conditions restricted immigration but, with the expansion of business at the end of the War, our immigration was more than doubled, while the depression which characterized 1921 and 1922 is reflected in the declining immigration of the fiscal years ended Mar. 31, 1922 and 1923. An improvement in business conditions in 1923 was reflected in an increase of immigration during the fiscal year ended Mar. 31, 1924, when 145,250 settlers entered Canada as compared with less than half that number in the preceding year. The fiscal years ended Mar. 31, 1925 and 1926, showed declines of 23.3 and 33.9 p.c. respectively from the 1924 level, but the fiscal years ended 1927 to 1929 showed increases in harmony with the general upward trend of business. The fiscal year ended Mar. 31, 1930, showed a slight falling-off, and the restrictions on immigration imposed since August, 1930, referred to on p. 211 have been mainly instrumental in reducing the total of immigrant arrivals from 163,288 in 1930 to 19,782 and 13,903 for the fiscal years 1933 and 1934 respectively.

The number of immigrant settlers in Canada is shown by calendar years from 1867 to 1880 in Table 1, and the number of immigrant arrivals in Canada from the United Kingdom, the United States and other countries, is given by years from 1881 in Table 2.

#### 1.—Number of Immigrants Settling in Canada in each of the calendar years 1867-1880.

(Compiled from the Reports of the Minister of Agriculture.)

| Year.     | Number. | Year.     | Number. |
|-----------|---------|-----------|---------|
| 1867..... | 14,666  | 1874..... | 39,373  |
| 1868..... | 12,765  | 1875..... | 27,382  |
| 1869..... | 18,630  | 1876..... | 25,633  |
| 1870..... | 21,700  | 1877..... | 27,082  |
| 1871..... | 27,773  | 1878..... | 29,807  |
| 1872..... | 36,578  | 1879..... | 40,492  |
| 1873..... | 50,050  | 1880..... | 38,505  |

## 2.—Number of Immigrant Arrivals in Canada from the United Kingdom, the United States and other Countries, calendar or fiscal years ended 1881-1931.

NOTE.—The figures of immigration from the United States for the years 1901 to 1921, inclusive, differ from the figures published in previous issues of the Year Book owing to the discovery that prior to April 1, 1924, certain persons returning to Canada from the United States after having previously resided in Canada had been improperly included in the immigration figures.

<sup>1</sup> The figures of immigration from the United States for the years 1881 to 1891 do not distinguish between immigrants and non-immigrants. As the U.S.-born population of Canada, according to the censuses, increased only from 77,753 to 80,915 between 1881 and 1891, it would appear that the number of permanent immigrants from the United States in these years must have been comparatively small. No statistics of immigrants from the U.S. were collected for the years 1892 to 1896. <sup>2</sup> Calendar year. <sup>3</sup> Six months, January to June, inclusive. <sup>4</sup> Nine months ended March 31.

**Sex and Conjugal Condition of Immigrants.** — As shown by Table 3, the 13,903 immigrants who came to Canada in the fiscal year ended Mar. 31, 1934, included 5,945 males and 7,958 females, males constituting only 42.8 p.c. of the total, as compared with 46.4 p.c. in the fiscal year 1933. Prior to 1932 they normally exceeded females, as is shown in Table 4.

<sup>1</sup> "Children" since 1926 has included all under 18 years of age.

**Racial Origins of Immigrants.**—Where there is any considerable immigration into a democratic country, the racial and linguistic composition of the immigrants is of great importance. Canadians prefer that settlers should be of a readily assimilable type, already identified by race or language with one or other of the two great races now inhabiting this country and prepared for the duties of Canadian citizenship. Since the French are not, to any great extent, an emigrating people, this means in practice that the great bulk of the preferable settlers are those who speak the English language—those coming from the United Kingdom or the United States. Next in order of readiness of assimilation are the Scandinavians, Dutch and Germans, who readily learn English and are already acquainted with the working of democratic institutions. Settlers from Southern and Eastern Europe, however desirable from a purely economic point of view, are less readily assimilated, and the Canadianizing of the people who have come to Canada from these regions in the present century is a problem both in the agricultural Prairie Provinces and in the cities of the East. Less assimilable still, are those who come to Canada from the Orient. On the whole the great bulk of Canadian immigration of the past generation has been drawn from the English-speaking countries and from those continental European countries where the population is ethnically nearly related to the British, though for some years there was an increasing immigration of Slavs.

The racial origins of the immigrants who arrived in Canada in the fiscal years ended Mar. 31, 1928 to 1934, are shown in Table 5. In the latest year the British races contributed 50 p.c. of the immigrants, French 9 p.c., and German 8 p.c.

5.—Racial Origins of Immigrants into Canada, fiscal years ended Mar. 31, 1928-34.

**Countries of Birth of Immigrants.**—In Table 8 will be found the countries of birth of the immigrants into Canada in the latest two fiscal years. The figures show that the United States with 5,648 was the birthplace of more of our 1934 immigrants than any other single country. This has been the case since 1930. In 1934 England came second with 1,609, Poland third with 1,275 and Scotland fourth with 735.

## 8.—Countries of Birth of Immigrants, fiscal years ended Mar. 31, 1929-34.

**Ports of Arrival of Immigrants.**—Throughout the greater part of our history, Quebec has been the port at which the greatest number of our immigrants have landed. In the past years, up to 1934, there was a great increase in the per-

centage of immigrants arriving at the port of Halifax. This would appear to have been due to increasing immigration in the early spring months before the St. Lawrence is open for traffic. Figures for recent years are given in Table 9.

**Destinations of Immigrants.**—The immediate destinations of the immigrants arriving in Canada are given for the years from 1901 to 1934 in Table 10.

While immigration to the Maritime Provinces during the first 34 years of the twentieth century was comparatively small, that to Quebec and Ontario was very large. From 1905, with the exception of 1929, Ontario received more immigrants annually than any other province of the Dominion, while Saskatchewan was usually second in this respect. In 1929 immigration to Manitoba exceeded that to Ontario by 10,000 persons, but in the years 1930-34 Ontario was again in first place. The immigration to Eastern Canada (Maritime Provinces, Quebec and Ontario) has almost equalled that to Western Canada (Manitoba, Saskatchewan, Alberta and British Columbia) in the 34-year period.

**10.—Destinations of Immigrants into Canada, by Provinces, fiscal years ended June 30, 1901-06, and Mar. 31, 1907-34.**

NOTE.—The figures for the years 1904-24 inclusive have been revised; see headnote to Table 2.

| Fiscal Year.       | Maritime Provinces. | Quebec. | Ontario. | Manitoba. | Saskatchewan. | Alberta. | British Columbia and Yukon. | Not Shown. | Total.  |

<sup>1</sup> Includes immigrants destined for the Northwest Territories: 3 in 1927, 39 in 1928, 1 in 1929, 8 in 1930, 3 in 1931, 11 in 1932, 3 in 1933, and 2 in 1934.

**Occupations of Immigrant Arrivals.**—The immigrants most universally acceptable to Canadians are those who settle on the land or those females who enter domestic service. In Table 11 will be found statistics of the occupations of immigrants arriving in Canada during the fiscal years ended Mar. 31, 1933 and 1934.

**11.—Occupations and Destinations of Immigrants Arriving in Canada, fiscal  
years ended Mar. 31, 1933 and 1934.**

**Prohibited Immigrants.**—The following is quoted from Section 3 of the Immigration Act.

**PROHIBITED CLASSES.**

"No immigrant, passenger or other person, unless he is a Canadian citizen, or has Canadian domicile, shall be permitted to enter or land in Canada, or in case of having landed in or entered Canada shall be permitted to remain therein, who belongs to any of the following classes, hereinafter called 'prohibited classes':—

- (a) Idiots, imbeciles, feeble-minded persons, epileptics, insane persons, and persons who have been insane at any time previously;
- (b) Persons afflicted with tuberculosis in any form, or with any loathsome disease, or with a disease which is contagious or infectious, or which may become dangerous to the public health, whether such persons intend to settle in Canada or only to pass through Canada in transit to some other country: Provided that if such disease is one which is curable within a reasonably short time, such persons may, subject to the regulations in that behalf, if any, be permitted to remain on board ship if hospital facilities do not exist on shore, or to leave ship for medical treatment;
- (c) Immigrants who are dumb, blind, or otherwise physically defective, unless in the opinion of a Board of Inquiry or officer acting as such they have sufficient money, or have such profession, occupation, trade, employment or other legitimate mode of earning a living that they are not liable to become a public charge or unless they belong to a family accompanying them or already in Canada and which gives security satisfactory to the Minister against such immigrants becoming a public charge;
- (d) Persons who have been convicted of, or admit having committed, any crime involving moral turpitude;
- (e) Prostitutes and women and girls coming to Canada for any immoral purpose and pimps or persons living on the avails of prostitution;
- (f) Persons who procure or attempt to bring into Canada prostitutes or women or girls for the purpose of prostitution or other immoral purpose;
- (g) Professional beggars or vagrants;
- (h) Immigrants to whom money has been given or loaned by any charitable organization for the purpose of enabling them to qualify for landing in Canada under this Act, or whose passage to Canada has been paid wholly or in part by any charitable organization, or out of public moneys, unless it is shown that the authority in writing of the Deputy Minister, or in case of persons coming from Europe, the authority in writing of the assistant Superintendent of Immigration for Canada, in London, has been obtained for the landing in Canada of such persons, and that such authority has been acted upon within a period of sixty days thereafter;
- (i) Persons who do not fulfil, meet or comply with the conditions and requirements of any regulations which for the time being are in force and applicable to such persons under this Act;
- (j) Persons who in the opinion of the Board of Inquiry or the officer in charge at any port of entry are likely to become a public charge;
- (k) Persons of constitutional psychopathic inferiority;
- (l) Persons with chronic alcoholism;

## PROHIBITED CLASSES—concluded.

- (m) Persons not included within any of the foregoing prohibited classes, who upon examination by a medical officer are certified as being mentally or physically defective to such a degree as to affect their ability to earn a living;
- (n) Persons who believe in or advocate the overthrow by force or violence of the Government of Canada or of constituted law and authority, or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials, or who advocate or teach the unlawful destruction of property;
- (o) Persons who are members of or affiliated with any organization entertaining or teaching disbelief in or opposition to organized government, or advocating or teaching the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers either of specific individuals or of officers generally, of the Government of Canada or of any other organized government, because of his or their official character, or advocating or teaching the unlawful destruction of property;
- (q) Persons guilty of espionage with respect to His Majesty or any of His Majesty's allies;
- (r) Persons who have been found guilty of high treason or treason or of conspiring against His Majesty, or of assisting His Majesty's enemies in time of war, or of any similar offence against any of His Majesty's allies;
- (s) Persons who at any time within a period of ten years from the first day of August, one thousand nine hundred and fourteen, were deported from any part of His Majesty's dominions or from any allied country on account of treason or of conspiring against His Majesty, or of any similar offence in connection with the war against any of the allies of His Majesty;
- (t) On and after the first day of July, one thousand nine hundred and nineteen, in addition to the foregoing "prohibited classes", the following persons shall also be prohibited from entering or landing in Canada:—Persons over fifteen years of age, physically capable of reading who cannot read the English or French language or some other language or dialect: Provided that any admissible person or any person heretofore or hereafter legally admitted, or any citizen of Canada, may bring in or send for his father or grandfather, over fifty-five years of age, his wife, his mother, his grandmother or his unmarried or widowed daughter, if otherwise admissible, whether such relative can read or not, and such relative shall be permitted to enter; for the purpose of ascertaining whether aliens can read, the immigration officer shall use slips of uniform size prepared by direction of the Minister, each containing not less than thirty and not more than forty words in ordinary use printed in plainly legible type in the language or dialect the person may designate as the one in which he desires the examination to be made, and he shall be required to read the words printed on the slip in such language or dialect; but the provisions of this subsection shall not apply to Canadian citizens and persons who have Canadian domicile, to persons in transit through Canada, or to such persons or classes of persons as may from time to time be approved by the Minister.
- (u) Members of a family (including children over as well as under 18 years of age) accompanying a person who has been rejected, unless in the opinion of the Board of Inquiry no hardship would be involved by separation of the family."

The Immigration Act provides for the rejection and deportation of immigrants belonging to the prohibited classes, and also for the deportation of those who become undesirables within five years after legal entry.

The operation of the above regulations is illustrated in Tables 12 and 13, which give the numbers of immigrants rejected on applying for admission and those deported after admission, the causes of such rejection or deportation, and the nationalities of those deported, for each of the 12 fiscal years ended 1923 to 1934, together with the totals for the 20 fiscal years 1903-22 and the 32 fiscal years from 1903 to 1934 inclusive.

**Juvenile Immigrants.**—Among the most generally acceptable immigrants of recent years were the juveniles of both sexes, many of whom had been trained by highly accredited British organizations for Canadian life before coming to Canada, the boys being taught the lighter branches of farm work, and the girls instructed in domestic occupations. On arrival in Canada the boys were placed on farms, while the girls were placed either in town or country, but the organizations remained the guardians of the children until they had reached maturity and, in addition, the children were subject to efficient and recurrent government inspection until each reached the age of nineteen. This inspection was under the control of the Supervisor of Juvenile Immigration.

Under the British Empire Settlement Agreement the term "children" was applied to boys from 14 to 19 years of age and girls from 14 to 17 migrating to Canada under provincial or approved society auspices. These organizations were assisted by the Oversea Settlement Agreement, which provided free transportation for the boys and girls from the British Isles migrating to Canada under their auspices. On Sept. 23, 1931, the societies concerned were notified that the Dominion Government had decided to discontinue any further assistance of that nature.

The number of such juvenile immigrants to Canada in each year since 1901 is given in Table 14.

**14.—British Juvenile Immigrants, fiscal years ended 1901-34.**

Note.—Juvenile immigrants are of course included in the total number of immigrants recorded elsewhere.

**Oriental Immigration.**—The immigration to Canada of Orientals is fundamentally an economic rather than a racial problem, affecting most of all those parts of the country which are nearest to the Orient and the classes which feel their economic position threatened. A record of Oriental immigration since the commencement of the century is given in Table 15.

15.—Record of Oriental Immigrants, fiscal years ended 1901-34.

*Chinese Immigrants.*—Oriental immigration to the Pacific Coast of North America appears to have commenced with the coming of Chinese immigrants about the time of the discovery of gold in California in 1849, and British Columbia is thought to have received its first Chinese immigrants some time before 1870. The original occupations of these immigrants were laundry workers and domestic servants. As early as 1872 Chinese were employed in the coal mines of the province and the Legislature was already considering the imposition of a poll tax on Chinese, the same proposition coming up later in the Dominion Parliament with the design of preventing the employment of Chinese labour in railway construction. A Royal Commission was appointed by the Dominion Government in 1884 to investigate Chinese immigration, and this Commission recommended the imposition of a head tax of \$10 upon Chinese entering Canada, together with registration and special legislation regulating the entry of Chinese domestic servants. This led to the passage of legislation in 1885 (48-49 Vict., c. 71), providing that thereafter Chinese of the labouring class should be required, as a condition of entering Canada, to pay a head tax of \$50 each. On Jan. 1, 1901 (63-64 Vict., c. 32), this tax was increased to \$100, and on Jan. 1, 1904 (3 Edw. VII, c. 8), after another Royal Commission had reported on this matter, the head tax was further increased to \$500. This tax was paid by all Chinese immigrants except consular officers, merchants and clergymen and their families, tourists, men of science, students and teachers. In spite of this restrictive legislation, the number of Chinese enumerated at the decennial censuses rose from 4,383 in 1881 to 17,312 in 1901, to 27,774 in 1911, to 39,587 in 1921 and 46,519 in 1931. Of this latter number, 43,051 were males and only 3,468 females. Over 58 p.c. of all the Chinese in Canada, *viz.*, 27,139 were residents of British Columbia.

The Chinese Immigration Act of 1923 (13-14 Geo. V, c. 38),\* limits the entry to or landing in Canada of persons of Chinese origin or descent, irrespective of allegiance or citizenship, to the following classes:

- (a) Members of the diplomatic corps or other government representatives, their suites and their servants, and consuls and consular agents;
- (b) Children born in Canada of parents of Chinese origin or descent, who have left Canada for educational or other purposes, on substantiating their identity to the satisfaction of the controller at the port or place where they seek to enter on their return;
- (c) Merchants as defined by such regulations as the Minister may prescribe; students coming to Canada for the purpose of attending, and while in actual attendance at, any Canadian university or college authorized by statute or charter to confer degrees;
- (d) Persons in transit through Canada;

the last two classes to possess passports issued by the Government of China and endorsed by a Canadian immigration officer. As a result of this legislation no Chinese were admitted to the country as immigrants in the fiscal years ended 1925, 1926 and 1927; three are shown by the above table to have been admitted in 1928, one in 1929, none in 1930, 1931, 1932, one in 1933 and two in 1934.

*Japanese Immigrants.*—Japanese immigration to Canada commenced about 1896, and a total of some 12,000 came in between then and 1900, but at the Census of 1901 the total number enumerated as domiciled in the Dominion was only 4,738; in 1911, 9,021; in 1921, 15,868; in 1931, 23,342—22,205 of these latter being domiciled in British Columbia. The immigration of Japanese was especially active in the fiscal years 1906 to 1908, in which three years a total of 11,565 entered the country. In the latter year an agreement was made with the Japanese Government, under which the latter undertook to limit the number of passports issued to Japanese immigrants to Canada. The statistics of Table 15 show that Japanese immigration has been very restricted since 1929. Only 105 Japanese immigrants entered Canada in 1934.

\*R. S. C. 1927, c. 95.  
87473—15

*East Indian Immigrants.*—East Indian immigration to Canada, like Japanese, is shown by Table 15 to have been negligible down to 1907, when no fewer than 2,124 East Indian immigrants arrived. However, as a consequence of the operation of the Immigration Regulations, East Indian immigration has for years been comparatively small. A resolution of the Imperial War Conference of 1918 declared that "it is the inherent function of the Governments of the several communities of the British Commonwealth that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities". However, it was recommended that East Indians, already permanently domiciled in other British countries, should be allowed to bring in their wives and minor children. In the ten-year period ended Mar. 31, 1934, a total of 556 East Indians, many of them women and children, were admitted to Canada.

**Expenditures on Immigration.**—The sums expended by the Dominion Government on immigration in each of the fiscal years ended 1868 to 1934 inclusive, as stated in the Public Accounts issued annually by the Department of Finance, are shown in Table 17.

**17.—Expenditures on Immigration in the fiscal years ended June 30, 1868-1906 and Mar. 31, 1907-34.**

<sup>1</sup> Nine months.

<sup>2</sup> Includes expenditures on British Empire Exhibition: 1924, \$649,882; 1925, \$599,797; 1926, \$70,661

**Emigration from Canada.** An important factor tending to offset the immigration activities of the past was a movement from Canada to the United States which attained considerable proportions at certain periods. The quota system of immigration regulation, applied by the United States Government against immi-

grants generally, but not against the Canadian born, had the effect of limiting immigration to the United States and thereby encouraging Canadians to enter that country. No record of this movement had ever been kept by the Canadian Government, and, while its seriousness was recognized, its magnitude, as indicated by the United States' returns, was questioned on the ground that these returns did not make allowance for Canadians returning to Canada after a more or less extended period of residence in the United States. The Canadian Department of Immigration and Colonization was convinced that a very considerable return movement was taking place, but, until 1924, no attempt was made to ascertain the exact magnitude of that movement. In that year immigration officers were instructed to take note of Canadians returning to Canada from the United States after having left Canada to reside in that country. The results are tabulated in Table 18.

Another circumstance which has, in the past, occasioned a considerable movement from Canada to the United States has, no doubt, been the practice of Europeans to enter Canada and declare themselves *bona fide* immigrants, with the real intention of entering the United States as soon as the quota restrictions would permit them to do so. The tightening-up of the United States Regulations *re* persons entering the United States from Canada, and the active co-operation of the Canadian Department of Immigration and Colonization in discouraging this traffic, seem to have effectually met this situation.

Table 18 shows the number of Canadians who had gone to the United States for purposes of permanent residence and who returned to Canada during the period from April 1, 1924, to Mar. 31, 1934.

| 1928....     | 35,137                  | 3,280                                            | 1,470                          | 39,887 | 1933.....    | 16,320                  | 757                                              | 548                            | 17,625 |
| 1929....     | 30,008                  | 2,795                                            | 995                            | 33,798 | 1934.....    | 8,366                   | 397                                              | 409                            | 9,172  |

Official returns indicate that the movement of population between the two countries is now definitely toward Canada. According to the official returns of the United States' Government, immigration to that country from Canada in the twelve months ended June 30, 1933, amounted to 6,074. The movement of immigrants from the United States to Canada in the same period amounted to 10,996, and there was also a return movement of 15,267 Canadians—a total of 26,263, or a net balance in favour of Canada of 20,189.

In Table 19 will be found the number of transoceanic passengers entering Canada during the fiscal years ended Mar. 31, 1933 and 1934, by description and classes, together with totals by classes for the years 1926 to 1932. It will be seen that the fiscal year ended 1930 showed the largest number of transoceanic passengers and the 1934 figures are lower than for any other year of the record.

**19.—Returning Canadians and Other Non-Immigrants Entering Canada via Ocean Ports, by Class of Travel, fiscal years ended Mar. 31, 1933 and 1934, with Totals for fiscal years 1926-32.**

NOTE.—Figures in this table cover transoceanic passengers only. Details for 1926 to 1932 will be found in previous editions of the Year Book.

| Fiscal Year and Item.              | Transoceanic Passengers. |               |               |               |

## Section 2.—Colonization Activities.

Contemporaneously with the sharp reduction in immigration disclosed by preceding tables, due to the policy of limiting immigration in accordance with the requirements of the country, a new and important development has occurred in the form of colonization activities within Canada. It was found that there were many families and individuals in the cities of the Dominion with farm experience who had been attracted to industrial centres in more prosperous times and would now regard with favour the opportunity of an assured subsistence on the land. In many cases families were still in possession of some capital but were in fear of its gradual depletion through unemployment. It was believed that many such families and individuals would return to the land without financial assistance if they could be guided to suitable opportunities. In order to promote such settlement, co-ordination of the activities of the Land Settlement Branch of the Department of Immigration and Colonization and branches of the Canadian National and Canadian Pacific Railways doing similar work was arranged, a committee was organized with representatives of the three interests mentioned, and an active program of land settlement within the Dominion was undertaken. To establish contact with families or individuals

desiring to return to the land, a small campaign of classified advertising in the daily press was conducted by the committee. There was no suggestion of financial assistance but there was the offer of dependable and disinterested advice and service in placing such families and individuals in touch with opportunities for farm settlement or farm employment. From Oct. 1, 1930, to Sept. 30, 1934, these activities resulted in the recorded placement in farm employment in Canada of 32,602 single men, and in the settlement on farms of 14,748 families, all of this without any expenditure of public funds in the form of financial assistance to such settlers. On the basis of five persons to the family the total landward movement resulting from these activities represented 106,343 persons. In addition to the co-ordinated activities of the two railways and the Department of Immigration and Colonization, several of the provinces carried on effective land settlement movements.

The colonization activities above described disclosed the fact that there were in the cities many families eager to gain a subsistence on the land who could not qualify for such settlement because of lack of capital. As a contribution toward relieving this situation the Dominion Government, in May, 1932, decided to bear a portion of the cost of settlement on the land of selected families who could qualify for such assistance in all localities where the province and municipality concerned were prepared to make a similar contribution, and an agreement to that effect was offered to each of the Provincial Governments. The stipulations of this agreement may be summarized as follows:—

The Dominion Government would contribute one-third of an amount not to exceed \$600 per family for the purpose of providing a measure of self-sustained relief to families who would otherwise be in receipt of direct relief, by placing such families on the land, the remaining two-thirds of the expenditure to be contributed by the province and the municipality concerned as might be decided between them. The Dominion Government contribution was to be regarded as a non-recoverable expenditure. The total expenditure on behalf of any one family during the first year was not to exceed \$500 for all purposes inclusive of subsistence and establishment, a minimum amount of \$100 being withheld to provide subsistence if necessary during the second year. No part of the above-mentioned expenditure was to be used for the purpose of acquiring or renting land.

It was stipulated that all families who might be assisted under the terms of this agreement should be residents of Canada and should be selected from those who would otherwise be in receipt of direct relief, the selection of families to be made without discrimination by reason of political affiliation, race, or religious views.

The province was to be responsible for administration of relief settlement, including the location and inspection of suitable farms, and the selection of families who should be physically fit and qualified in other respects. Expenses of administration were to be paid by the province, and no part of the cost of administration and supervision was to be deducted from the maximum amount of \$600 set aside for subsistence and settlement of each family. Disbursements of funds to the families assisted were to be made by the province, which was required to set up an Advisory Committee, including representatives of the Dominion Land Settlement Branch, the Colonization Branch of the Canadian Pacific Railway, and the Colonization Branch of the Canadian National Railways.

Under this plan, in the period from June 1, 1932, to Sept. 30, 1934, a total of 3,744 families consisting of 19,635 persons have been settled on farms. Under the two plans above described, the total landward movement since October, 1930, has, therefore, exceeded 125,000 persons.

## CHAPTER VII.—SURVEY OF PRODUCTION.

**The Definition of "Production".**—The term "production" is used here in its popular acceptance, *i.e.*, as including such processes as the growing of crops, extraction of minerals, capture of fish, conversion of water power into electrical current, manufacturing, etc.—in economic phrase, the creation of "form utilities". It does not include various activities which are no less "productive" in a broad and strictly economic sense, such as (*a*) transportation, refrigeration, merchandising etc., which add to commodities already worked up into form the further utilities of "place", "time" and "possession", and (*b*) personal and professional services, such as those of the teacher and the doctor, which are not concerned with commodities at all, but are nevertheless essential to any civilized society—representing, in economic language, the creation of "service utilities".

As showing the importance of these latter activities, it may be pointed out, for comparison with the figures in the accompanying tables, that steam railway gross earnings in 1932, the latest year for which complete statistics of production are available, amounted to \$293,390,415, street railway gross earnings to \$43,339,381, and telephone and telegraph earnings to \$70,066,067, all of which, from a broad point of view, may be considered as "production". It may be further noted that, according to the Census of 1931, out of 3,927,591 persons of ten years of age and over recorded as gainfully occupied, 306,273 were engaged in transportation activities, 387,315 in trade, 92,317 in finance and 767,705 in service occupations. While 81,610 of the latter were engaged in custom and repair work, the value of which is included in the survey of production, the value of the "production" of the remaining 1,472,000 gainfully occupied persons in the four occupational groups just mentioned would not appear to be included to any extent in the survey of production. Then, on the assumption that 1,472,000 gainfully occupied persons whose production is not included in the survey were no less "productive" in the broad sense of the term than the remaining 2,455,591\* gainfully occupied persons (of whom they amounted to practically 60 p.c.), 60 p.c. should be added to our total net production to arrive at an estimate of the grand total value of the "production" of all gainfully occupied Canadians. Since the net value of production of commodities as stated in the survey was \$2,105,000,000 in 1932, the grand total money value of the productive activities of the gainfully occupied population of Canada in the same year may be estimated at 160 p.c. of the above figure or \$3,368,000,000 or say \$3,370,000,000 in round figures.

**"Gross" and "Net" Production.**—The values of products are shown under two headings, namely, "gross" and "net". "Gross" production shows the total value of all the individual commodities produced under a particular heading. "Net" production represents an attempt to eliminate the value of materials consumed in the productive process. For purposes of ordinary economic discussion, the net figures should be used in preference to the gross, because of the large amount of duplication which the latter includes on account of the necessity of making the individual items self-contained. The tables show the total values of all commodities produced in Canada in the latest years; the values are given as in the producers' hands.

\* This figure includes 169,263 gainfully occupied persons whose industries were not specified but who were mainly general labourers and office clerks. The products of the labour of these persons were probably mainly included in the survey of production, but here it is assumed that they were all so included.

**Difficulties in Differentiating between the Branches of Production.—**

There is an increasing demand for a survey of production that will differentiate as between the more important branches and at the same time give a purview of the whole which will be free from overlapping. This is somewhat difficult to present with clearness, in view of the varying definitions that attach to industrial groups from different points of view. For example, brick, tile and cement are frequently included in "mineral production" as being the first finished products of commercial value resulting from the productive process; frequently, however, they are regarded as "manufactures" in view of the nature of the productive process—either allocation being correct according to the point of view. In the summing up, production in such industries is regarded as primary production and also as secondary production, but the duplication is eliminated in the grand totals.

**Branches of Production.**—The primary industries of agriculture, fishing, forestry, mining, etc., are separated in this statement from the secondary or manufacturing processes. The close association between the two and the overlappings that are apt to occur have already been pointed out. As further explaining the procedure that has been followed in drawing up the tables, the following notes are appended:—

*Agriculture.*—Dairy factories are included under this heading; farm dairy products (gross) include the milk consumed whole and sold to dairy factories, and the butter, etc., made on the farm.

*Forestry.*—Forestry production is understood to consist of the operations in the woods as well as those of sawmills and pulp-mills, the latter being limited to the making of first products such as lumber, lath, shingles, pulp and cooperage stock.

*Fur Production.*—The item of fur production is limited to the wild-life production. To obtain a total of the peltries produced in Canada, it would be necessary to add to the wild-life output the production of pelts on fur farms, which is included in the total for "agriculture".

*Mineral Production.*—Under mineral production many items are included that are also allocated to "manufactures". Considerable overlapping exists as between "mineral production" on the one hand and "manufactures" on the other. The Bureau presents the detailed statistics of these groups (the chief of which are smelters, brick, cement, lime, etc.) in its reports on mineral production, since their product is the first to which a commercial value is ordinarily assigned.

*Total Manufactures.*—The figure given for this heading is a comprehensive one including the several items listed with the extractive industries above, though also frequently regarded as "manufactures", viz., dairy factories, fish-canning and curing, sawmills, pulp-mills, shipbuilding and certain mineral industries. This duplication is eliminated from the grand totals as listed in Table 5. The figures given for total manufactures are inclusive of the value of the products of all manufacturing processes closely associated with the extractive industries that are frequently included under this heading; hence it is obvious that the grand total is equivalent to an amount obtained by adding the values for total manufactures and for the other eight divisions, and deducting the duplications as shown in the foot-notes to the respective tables.

## Section 1.—The Leading Branches of Production in 1932.

The total net value of production, as estimated for 1932 by the Dominion Bureau of Statistics, on the basis of statistics compiled by its various branches, was \$2,104,900,000. This was less than for any year since 1920, when this survey was instituted. Decreases from the 1931 level were shown in every branch of production except agriculture and the electric power industry and were especially heavy for construction, forestry and manufacturing. Farm yields were generally higher than in 1932, but the average price of farm products was less than in any year in the two preceding decades. The resulting values of farm crops produced in 1932 were less than in any year since 1914.

Manufacturing continued to operate at a comparatively low level of capacity. The value added by the manufacturing process showed a decline of over 20 p.c. from the 1931 level.

Total value of production was 16 p.c. less than in 1931, 35 p.c. less than in 1930, 47 p.c. less than in 1929, 49 p.c. less than in 1928, 46 p.c. less than in 1927 and 42 p.c. less than in 1926. The physical volume of production did not decline to anything like the same extent.

**The Main Branches of Production in 1932.**—Confining our analysis to the net production of commodities, "net" production signifying the value left in the producers' hands after the elimination of the value of the materials consumed in the production process, it is observed that, owing to the conditions of depression prevailing in 1932, most of the main branches showed declines from the preceding year. The net output of central electric stations, however, showed an improvement, the value in 1932 being \$128,420,000 compared with \$122,311,000, an increase of 5 p.c. Forestry, combining woods operations and the value added by the manufacturing process in the sawmilling and pulp industries, showed a drop of 33.5 p.c., while mineral production at \$191,228,000 recorded a decline of 16.1 p.c. The revenues of the fisheries and of trapping showed declines of 14.9 p.c. and 18.6 p.c., respectively.

Among the branches of secondary production, construction showed the heaviest proportional decline of 57.9 p.c. Manufactures was reduced by 20.7 p.c. and custom and repair production was down by 19.7 p.c. compared with 1931.

**Relative Importance of the Several Branches of Production.**—Owing to the increase in agricultural revenue in 1932, the lead of manufactures over agriculture, which was 173.9 p.c. in 1931, decreased to 107.0 p.c. in 1932. Agricultural production in 1932 represented 26.9 p.c. of the net output of all branches, while the total value added by the manufacturing processes was 55.6 p.c. of the total net production. However, a number of industries listed under manufactures are also included in the several extractive industries with which they are associated. Eliminating this duplication, the output of the manufacturing industries not elsewhere included was 43.2 p.c. of the total net production. Mining held third place in 1932 with a percentage of 9.1. Forestry was in fourth place, with a percentage of 6.3, followed by electric power with a percentage of 6.1. The construction group in 1932 had an output of 4.1 p.c. of the total net production. Repair work, fisheries and trapping followed with percentages, in 1932, of 2.7, 1.2 and 0.3, respectively.

A summary of gross and net value of production is given by industries for the years from 1928 to 1932 in Table 1; a detailed itemized statement of the net value of production in 1930, 1931 and 1932, is given in Table 2.

## 1.—Gross and Net Values of Production in Canada, by Industries, 1928-32.

## GROSS VALUES OF PRODUCTION.

| Division of Industry.                | 1928.                | 1929.                | 1930.                | 1931.                | 1932.                |
|--------------------------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
|                                      | \$                   | \$                   | \$                   | \$                   | \$                   |
| Agriculture <sup>1</sup> .....       | 1,905,311,580        | 1,729,821,129        | 1,346,363,659        | 880,053,884          | 818,549,921          |

<sup>1</sup> The gross value of agricultural production here exceeds that given in Chapter VIII, Agricultural Statistics of this edition of the Year Book, by the amount paid to patrons of dairy factories for milk and cream.

<sup>2</sup> Statistics of custom and repair industries were not collected after 1922, and the totals for that year were repeated in 1923 and 1924. The totals for 1926 to 1932 were estimated according to the percentage change in the data for manufacturing.

<sup>3</sup> The item "manufactures" includes dairy factories, sawmills, pulp-mills, fish-canning and-curing, shipbuilding, electric power and certain mineral industries also included under other headings. This duplication, amounting in 1928 to a gross of \$730,780,507 and a net of \$382,078,720, in 1929 to a gross of \$777,954,427 and a net of \$412,456,114, in 1930 to a gross of \$757,438,326 and a net of \$453,015,547, in 1931 to a gross of \$610,025,080 and a net of \$378,885,534, and in 1932 to a gross of \$425,494,363 and a net of \$260,227,869, is eliminated from the grand totals.

<sup>4</sup> The proportion of manufactures, freed from all duplication (as explained in note 3) to the grand total of net production was 43.24 p.c., and, under like conditions, the proportion of all secondary production to the grand total of net production was 50.05 p.c.

## 2.—Detailed Itemized Statement of the Net Values of Production in Canada during 1930, 1931 and 1932.

| Classification.                                          | Net Production.      |                      |                      |

<sup>1</sup> This item is exclusive of duplication involved in purchases of power by reporting companies.

<sup>2</sup> For footnote 2 see foot of p. 235.

## Section 2.—The Provincial Distribution of Production.

The trend of net production has exhibited considerable variation. In Prince Edward Island there was a decline from 1920 to 1922, followed by substantial recovery until the high point of 1926 was reached, with an almost steady decline to the low point of 1932. In Nova Scotia there was a decline from the high point of 1920 until 1925, a marked increase in 1926, then through a slight decline to the highest point reached since 1920, in 1928, then a gradual falling-off to the low point of 1932. In New Brunswick the highest point was reached in 1920, the next highest in 1926 and the low in 1932, the trend of production in this province being almost level from 1925 to 1930.

In Quebec the decline in 1921 was very severe. During the subsequent period the chief features were a substantial gain in 1923, a minor recession in 1924, and a marked recovery in 1925, continued until 1929, when a high point of \$1,050,000,000 was reached. From then to 1932 the decline was rapid, the 1932 production of \$558,000,000 being a decrease of nearly 19 p.c. under the 1931 figure. The trend in Ontario was almost parallel, the 1932 production of \$885,000,000 being 18 p.c. under that of the previous year.

In Manitoba the course of production was most uneven from 1920 to 1926, when for the next two years an increase was registered, culminating in the high of 1928, when goods to the value of \$235,000,000 were produced. Since that time the decline has been rapid, reaching the low value of \$100,000,000 in 1932, this production being 11 p. c. under that of 1931. Saskatchewan exceeded the 1920 production in 1922, 1925 to 1928, when the high point was reached, then registered sharp declines from 1929 to 1931 and in 1932 showed an increase of 42 p.c. over the low point reached in the previous year. The trend in Alberta has not been exactly parallel with that of Saskatchewan, the high point in this province having been reached in 1927, since when a steady decline has occurred, culminating in the low values shown in 1932, when the decline was, however, less than 5 p.c. under the preceding year.

In British Columbia steady increases were registered from 1922 to 1929, with a rapid decline until 1932, when a decline was shown of 23 p.c. under the previous year.

The values of gross and net production are given by provinces for the years 1928 to 1932 in Table 3.

<sup>2</sup> The item "total manufactures" on page 234 includes the following industries, also shown under other heads, the amount of the duplication being deducted from the grand totals:—

| Classification.                                     | Net Production. |               |             |
|-----------------------------------------------------|-----------------|---------------|-------------|
|                                                     | 1930.           | 1931.         | 1932.       |
|                                                     | \$              | \$            | \$          |
| Dairy factories.....                                | 43,541,731      | 34,926,701    | 30,446,292  |

**Relative Production in Different Provinces, 1932.**—It will be seen from Table 3 that Ontario and Quebec held first and second places among the provinces in the net value of production in 1932. The percentage of production of each of these provinces to the total was lower than in 1931, when the net output in the two provinces represented 43.3 p.c. and 27.5 p.c. of the totals respectively. Third place in 1932 goes to Alberta with 7.5 p.c. of the total, while British Columbia, with 7.8 p.c., held third place in 1931. British Columbia and Saskatchewan are fourth and fifth respectively, replacing Alberta and Manitoba from these positions as in 1931. In 1932 Manitoba was in sixth place, followed by Nova Scotia, New Brunswick and Prince Edward Island in the order named.

## Section 3.—Leading Branches of Production in each Province, 1932.

**The Maritime Provinces.**—Production in *Nova Scotia* in 1932 was principally in the manufacturing, mining, agricultural and forestry industries, which were accountable for 38.7 p.c., 22.9 p.c., 18.6 p.c., and 10.5 p.c., respectively, of the net value of output of the province; the contribution of manufactures, aside from

processes carried on in connection with the extractive industries, was 26.3 p.c. In *New Brunswick* manufacturing also took first place as a producer of new wealth, the proportion being 49.4 p.c. Agriculture was second with 24.7 p.c. and forestry third. If the manufacturing group be limited to exclude processes carried on in connection with the extractive industries, it still ranked as the premier industry, with 33.0 p.c. Agriculture, including fur farming, contributed 65.3 p.c. of the net output of *Prince Edward Island*. In the Maritime Provinces as a whole, the value of production was 31 p.c. less than in the preceding year. The generation of electrical energy industry alone showed a gain for 1932.

**Quebec.**—The value of product derived from manufactures in Quebec was greater than that from any other industry. Manufactures, aside from the output of establishments associated with the extractive industries, contributed 52.2 p.c., while the net output of the entire manufacturing division, referred to the same base, was 67.5 p.c. Agriculture with 17.4 p.c., forestry with 9.0 p.c., and the generation of electrical energy with 8.0 p.c., occupied second, third and fourth places. The increases over 1931 in trapping and in the generation of electrical energy were 23.9 p.c. and 6.6 p.c., respectively.

**Ontario.**—The net value of production from the manufactures of Ontario, when stripped of all duplication, was \$473,000,000 or 53.4 p.c. of the total, compared with \$185,000,000 or 20.9 p.c. from agriculture. Mining held third place with 9.7 p.c. of the total, and electric power followed with 5.7 p.c. The forestry output was 3.6 p.c. of the net production of the province. Decreases from 1931 were shown in all the main divisions of production except the generation of electrical energy. The net output of manufactures decreased by \$146,800,000, while agriculture showed a decline of \$10,700,000 or 5.5 p.c. Except in forestry, fisheries, trapping and construction Ontario led the other provinces in the productiveness of the main branches of industry. The province yielded precedence in forestry operations, trapping and construction to Quebec alone, while British Columbia, Nova Scotia and New Brunswick obtained a greater income than Ontario did from fisheries. About 48.5 p.c. of the net manufacturing output of the country was contributed by Ontario and 32.7 p.c. of the agricultural income was derived from the same province.

**The Prairie Provinces.**—About 77.8 p.c. of the output of *Saskatchewan* was obtained from farming, which industry was also a predominant producer of new wealth in *Manitoba* and *Alberta*, the proportions being 36.2 p.c. and 63.4 p.c., respectively. Mineral production, chiefly coal mining, held second place in *Alberta* with an output of 13.5 p.c. of the provincial total. Manufacturing was first in importance in *Manitoba*, representing 36.1 p.c. of the value of the net output. *Saskatchewan* was the only province in the Dominion to show an increase in total net value of production, agriculture showing a betterment of \$47,401,000 or 107 p.c. over 1931. In *Manitoba*, agriculture and trapping showed gains in 1932 over the preceding year. The agricultural and electric power industries of *Saskatchewan* showed gains in 1932, and the net revenue from agriculture and the electric power industry of *Alberta* was somewhat greater.

**British Columbia.**—The net production from manufacturing in British Columbia during 1932 was about \$75,000,000, but almost half of this amount was derived from manufacturing processes closely associated with the primary industries, especially logging and fishing. The remainder, \$41,791,000, was 28.1 p.c. of the net output of the province. Aside from manufacturing, mining consti-

tuted the chief source of new wealth, about 18.4 p.c. of the total net output of the province being contributed by the mines. Forestry and farming followed in order, with percentages of 17.2 and 15.4 respectively.

Details showing the gross and net values of production, by industries, in the various provinces in 1932, together with percentages, are given in Tables 4 and 5.

Tables 4A and 5A give the same information for the year 1931.

#### 4.—Gross and Net Values of Production in Canada, by Industries and Provinces, 1932.

NOTE.—For Dominion totals, see Tables 1 and 2.

##### GROSS PRODUCTION.

| <b>Totals.....</b>              | <b>100,453,108</b> | <b>117,858,748</b> | <b>157,015,824</b> | <b>148,689,806</b> | <b>3,183,840</b>       |

<sup>1</sup>The figures for "manufactures" involve duplicated amounts which were deducted in computing the totals for each province. The duplication arises from including in two places a number of industries which may be regarded as extractive or as manufacturing processes. Shipbuilding for example was included under both "construction" and "manufacturing" up to 1929 (see footnote 1, Table 2). The following statement gives the amount of the duplication by provinces: Prince Edward Island, gross \$2,033,757, net \$682,884; Nova Scotia, gross \$23,389,351, net \$12,685,024; New Brunswick, gross \$28,782,642, net \$14,644,759; Quebec, gross \$249,818,705, net \$156,702,888; Ontario, gross \$271,025,350, net \$168,069,656; Manitoba, gross \$23,261,637, net \$15,171,161; Saskatchewan, gross \$13,164,558, net \$8,264,795; Alberta, gross \$15,577,403, net \$9,714,617; British Columbia, gross \$130,384,923, net \$67,079,763.

<sup>2</sup>Includes the trapping industry of the Northwest Territories.

4A.—Gross and Net Values of Production in Canada, by Industries and Provinces, 1931.

NOTE.—For Dominion totals, see Tables 1 and 2.

<sup>1</sup>Includes the trapping industry of the Northwest Territories.

## CHAPTER VIII.—AGRICULTURE.

Agriculture, including stock raising and horticulture, is the chief single industry of the Canadian people, employing, in 1931, 28·7 p.c. of the total gainfully occupied population and 33·9 p.c. or over one-third of the gainfully occupied males. In addition, it provides the raw material for many Canadian manufactures, and its products in raw or manufactured form constitute a very large percentage of Canadian exports. For a statement of the occupied and the available agricultural lands in Canada, see p. 39 of this volume.

This chapter of the present volume contains a statement of current governmental activities in connection with agriculture, including those of the Dominion and Provincial Experimental Stations. This is followed by statistics of agriculture, including agricultural revenue and wealth, field crops, farm live stock and poultry, dairying, fur farming, fruit, special crops, farm labour and wages, prices, miscellaneous, and, since Canadian exports of agricultural commodities are sold in the world market, a review of world statistics of agriculture, compiled from the publications of the International Institute of Agriculture.

The Canada Year Book, 1924, contained, on pp. 186-191, an article on the "Development of Agriculture in Canada", by Dr. J. H. Grisdale, Deputy Minister, Department of Agriculture, Ottawa. To this the interested reader is referred.

### Section 1.—The Government in Relation to Agriculture.\*

It is provided in Section 95 of the British North America Act that "in each province the Legislature may make laws in relation to agriculture in the province"; it is also "declared that the Parliament of Canada may from time to time make laws in relation to agriculture in all or any of the provinces; and any law of the Legislature of a province relative to agriculture . . . shall have effect in and for the province as long and as far only as it is not repugnant to any Act of the Parliament of Canada".

As a result of this provision, there exist at the present time Departments of Agriculture, with Ministers of Agriculture at their heads, both in the Dominion and in each of the nine provinces, though in two provinces the portfolio of agriculture is combined with one or more other portfolios in the hands of a single Minister. A short sketch of the functions of the various Departments follows.

#### Subsection 1.—The Dominion Department of Agriculture.

The Dominion Department of Agriculture was constituted in 1868 under authority of 31 Vict., c. 53, with numerous functions that were by no means purely agricultural, including: (1) agriculture; (2) immigration and emigration; (3) public health and quarantine; (4) the marine and immigrant hospital at Quebec; (5) arts and manufactures; (6) the census, statistics and the registration of statistics; (7) patents of invention; (8) copyright; (9) industrial designs and trade marks.

\*This section, with the exception of Subsection 2, has been revised by the Dominion Department of Agriculture. The information in Subsection 2 was checked by the various provincial authorities.

MAIN TYPES OF FARMING IN CANADA

In the course of time the purely agricultural work of the Department came to demand greater attention; the non-agricultural functions were one by one entrusted to other Departments of the Government, while specialization became the order of the day within the Department of Agriculture itself. At the present time it includes the following branches: (1) Experimental Farms; (2) Dairy and Cold Storage; (3) Health of Animals; (4) Live Stock; (5) Seed; (6) Entomological; (7) Fruit; (8) Publications; (9) Agricultural Economics.

For the Acts of Parliament administered by the Dominion Department of Agriculture, see in the index "Acts of Parliament administered by Dominion Government Departments". For the publications of the Department, covering a wide field of information, see in the index the entry "Publications of Dominion Departments".

### Subsection 2.—Provincial Departments of Agriculture.\*

*Prince Edward Island.*—The Department of Agriculture is presided over by a Minister, and the staff consists of a live stock superintendent, a superintendent of women's institutes and a dairy superintendent. Assistance is given in co-operative marketing, promoting the live-stock industry and encouraging exhibitions, the formation of boys' and girls' clubs and the welfare of agriculture generally.

*Nova Scotia.*—Agriculture in the province of Nova Scotia is administered by the Department of Agriculture. The Department is divided into the following main divisions: (1) administration; (2) agricultural college and farm; (3) extension service; (4) marketing; (5) agricultural societies, associations, and exhibitions; (6) dairying; (7) poultry; (8) live stock; (9) entomology and botany; (10) apiculture; (11) women's institutes; (12) immigration and land settlement.

*New Brunswick.*—The branches of the Department of Agriculture of New Brunswick are as follows: (1) live stock and agricultural societies; (2) dairying; (3) herd improvement; (4) soils and crops; (5) poultry; (6) horticulture; (7) women's institutes; (8) agricultural representatives; (9) industry, immigration and farm settlement; (10) elementary agricultural education; (11) bee-keeping.

*Quebec.*—The Quebec Department of Agriculture comprises a certain number of branches and sections as follows: *Agricultural Economics Branch*, including the following sections: publicity; co-operation, markets and statistics; demonstration farms; agricultural surveys; field husbandry; drainage; home economics; bee-keeping and sugar making; agricultural societies. *Live Stock Branch*, including the following sections: dairy; veterinary; swine; sheep; horses; poultry; farm buildings. *Horticulture Branch*, including the following sections: fruit growing; truck crops; vegetable canning; flower growing; phytopathology; entomology; botany. *Agricultural Representatives Branch*: 82 agricultural representatives' offices are now established in rural counties of Quebec and are under the supervision of 6 inspectors. The above organizations are all under one General Director of Branches.

There are other activities which are not included in the above organization, such as: agricultural education, agricultural merit competition, provincial dairy school, provincial handicraft school.

\*For publications of provincial Departments of Agriculture, see in the index the entry "Publications of Provincial Governments".

*Ontario.*—The Ontario Department of Agriculture includes the following branches: agricultural and horticultural societies, live stock, institutes, dairy, fruit, crops, co-operation and markets, statistics and publications, agricultural representatives and the Agricultural Development Board. The Department is responsible for the administration of the Ontario Agricultural College, the Ontario Veterinary College, the Kemptville Agricultural School, and the experimental farms at Guelph, Ridgetown and Vineland.

*Manitoba.*—The Manitoba Department of Agriculture includes an agricultural extension service, a dairy branch, a publications and statistics branch, a live stock branch, a debt adjustment board, a registrar of co-operative associations, and a weeds branch. It also conducts the Manitoba branch of the Employment Service of Canada.

*Saskatchewan.*—The work of the Department of Agriculture is chiefly administrative. It includes the following principal branches: live stock, field crops, dairy, statistics, co-operation and markets, a bee division and a debt adjustment bureau. The Live Stock Branch provides the organization for examining and licensing stallions, purchasing and selling cattle, sheep and hogs to farmers on credit terms, and registering brands for live stock. Pure-bred sire areas are being created under statutory authority in order to eliminate undesirable sires and improve the quality of live stock. The poultry industry is promoted through the flock-culling service, the turkey-grading service and the approved hatchery policy. The Field Crops Branch aids in promoting good cropping and tillage practices and providing control measures for suppressing insect and weed pests. The Dairy Branch directs the grading of cream at all the creameries, promotes herd improvement through cow-testing and administers the provisions of the Dairy Products Act with respect to licensing creamery operators, cream testers, and the bonding of creameries. The Statistics Branch, in co-operation with the Dominion Bureau of Statistics, maintains a crop-reporting service and gathers annual data respecting the crops and live stock of the province. The Co-operation and Markets Branch grants charters to co-operative associations under the Co-operative Associations Act, promotes co-operative stock shipping and poultry marketing and maintains an exchange service by a fortnightly news letter through which buyer and seller are brought together. An Apiary Division has been organized to assist bee-keeping, which is developing substantially. Agricultural societies are organized by the Department and grants are paid through the Department, while direction of the activities of societies is centered in the College of Agriculture of the University of Saskatchewan.

*Alberta.*—This Department conducts the following main services: agricultural schools and demonstration farms, field crops, dairy, live stock, veterinary, poultry, apiaries, fairs and institutes, branding, game regulation, women's bureau service, crop reports and statistics, marketing services, district agriculturists and a branch looking after the fur farm leases of the province.

The attention of the Department has recently been given to the development of apiculture and a provincial apiarist is engaged in this work. Increased encouragement is being given to the live-stock industry through the "Pure-bred Bulls Purchase Act", and in giving supervision to the feeding plan for beef cattle now being carried out by the "Red Label" Beef Association. Increasing efforts are being made to cope with the weed menace and encouragement is being given to the sale and production of registered seed. The poultry industry is also receiving increased attention. Money is expended each summer in connection with soil

survey work, and special efforts are being directed to the development of forage crops and grasses and the improvement of pasturage.

*British Columbia.*—The Department of Agriculture consists of three main divisions dealing with general administration, animal industry and plant industry.

Under general administration are the branches dealing with collection of statistics, assistance to fall fairs, distribution of publications, soil survey, apiary inspection, supervision of Farmers' and Women's Institutes, and policies of a general agricultural nature, together with the Markets Branch. The Animal Industry Division includes: dairy, poultry, veterinary and general live-stock branches, as well as brands inspection and junior club work. The Plant Industry Division includes: plant disease and pest control, pathology and entomology, field crops and horticultural activities.

The extension service has representatives located in fifteen agricultural districts. These representatives are under the immediate supervision of either animal industry or plant industry, depending upon the predominating feature of agriculture in the several districts.

Particular attention has been given to the development of a live-stock policy, by which the favourable climatic conditions of the coast districts of British Columbia will enable farmers to finish live stock ready for the market at seasons when weather conditions are not favourable in other parts of Canada. This policy has been devised with the aim of enabling the farmers of British Columbia to supplement the work of the prairie live-stock men in maintaining a continuous supply of well-finished animals for the market.

The British Columbia Department of Agriculture through its Dairy Branch has compiled its initial list of pure-bred sires (of the four dairy breeds) which have five or more daughters with records of production. Where known, the records of the dams of these daughters are also given, offering opportunities for comparison.

Particular attention is now being given by the British Columbia Department of Agriculture to forage and pasture improvement and the soil survey branch is making progress with the classification of the orchard soils in the fruit-growing districts of the province.

### **Subsection 3.—Dominion and Provincial Agricultural Experimental Stations.**

Among the most important contributions of Canadian Governments to the development of agriculture throughout the country, is the maintenance of agricultural experimental stations, where research work in both plant and animal breeding and adaptation to climatic conditions is carried on. Already this work has had a profound effect in the improvement of Canadian agriculture. The introduction during recent years of Marquis wheat is an outstanding example, and it is of interest to note that other newer wheats, particularly Garnet, also originated by the experimental farms, may in the near future replace the Marquis in large areas. Among the earlier experiments undertaken, the results of which have passed permanently into good Canadian farm practice, may be mentioned those relating to early seeding, summer fallowing, the use of farmyard manure, the fertilizing value of clover crops and the introduction of suitable grasses and clovers. Both the common red clover and alfalfa now enter into rotations as the result of experiments and efforts to obtain hardy strains and to discover means of resistance

to winter-killing. Further experiments with earlier-ripening and drought-resisting cereals are now being carried on, each new discovery increasing the cultivable area of Canada. Other researches relate to the production of frost-resisting fruit trees for the Prairie Provinces. This research work has already had a profoundly ameliorating effect upon Canadian agriculture. Statements regarding the work now under way at the Dominion Experimental Farms and Stations and at Provincial Agricultural Colleges and Experimental Stations follow.

### (A) Dominion Experimental Farms and Stations.\*

Inaugurated in 1886 by Act of Parliament (49 Vict., c. 23), the Dominion Experimental Farms system was at first made up of the Central Farm at Ottawa and four branch farms: one at Nappan, Nova Scotia, for the Maritime Provinces; one at Brandon for Manitoba; one at Indian Head for the Northwest Territories; and one at Agassiz for British Columbia.

The opening up and rapid settlement of the Dominion have led to a corresponding increase in the number of experimental farms and stations.\* These, with an experimental fox ranch, now total 29, with a total acreage of 16,256.74, as compared with the original five farms, with a total acreage of 3,472, established in 1886. The following list shows the present number of farms and stations, with the acreage of each and the date of establishment.

DOMINION EXPERIMENTAL FARMS AND STATIONS, 1933.

| Farm or Station.                        | Province.             | Acreage. | Date<br>Estab-<br>lished. |
|-----------------------------------------|-----------------------|----------|---------------------------|
| Central Farm, Ottawa.....               | Ontario.....          | 825.5    | 1886                      |
| Kapuskasing Station.....                | Ontario.....          | 1,270    | 1910                      |
| Harrow Station.....                     | Ontario.....          | 198.3    | 1909                      |
| Charlottetown Station.....              | P.E.I.....            | 173.1    | 1909                      |
| Summerside Fox Ranch.....               | P.E.I.....            | 12       | 1925                      |
| Nappan Farm.....                        | Nova Scotia.....      | 465      | 1886                      |
| Kentville Station.....                  | Nova Scotia.....      | 452.9    | 1912                      |
| Fredericton Station.....                | New Brunswick.....    | 525      | 1912                      |
| Ste. Anne de la Pocatière Station.....  | Quebec.....           | 319      | 1911                      |
| Cap Rouge Station.....                  | Quebec.....           | 345.3    | 1911                      |
| Lennoxville Station.....                | Quebec.....           | 600      | 1914                      |
| Farnham Station.....                    | Quebec.....           | 95       | 1912                      |
| La Ferme Station.....                   | Quebec.....           | 1,200    | 1916                      |
| L'Assomption Station.....               | Quebec.....           | 160      | 1928                      |
| Brandon Farm.....                       | Manitoba.....         | 842      | 1886                      |
| Morden Station.....                     | Manitoba.....         | 614      | 1915                      |
| Indian Head Farm.....                   | Saskatchewan.....     | 1,320    | 1886                      |
| Indian Head Forest Nursery Station..... | Saskatchewan.....     | 480      | 1                         |
| Sutherland Forest Nursery Station.....  | Saskatchewan.....     | 320      | 1                         |
| Rosthern Station.....                   | Saskatchewan.....     | 650      | 1908                      |
| Melfort Station.....                    | Saskatchewan.....     | 640      | 1934                      |
| Scott Station.....                      | Saskatchewan.....     | 520      | 1910                      |
| Swift Current Station.....              | Saskatchewan.....     | 800      | 1920                      |
| Lacombe Station.....                    | Alberta.....          | 435.74   | 1907                      |
| Lethbridge Station.....                 | Alberta.....          | 500      | 1906                      |
| Windsor Station.....                    | British Columbia..... | 425      | 1923                      |
| Summerland Station.....                 | British Columbia..... | 545      | 1914                      |
| Agassiz Farm.....                       | British Columbia..... | 1,400    | 1886                      |
| Sidney Station, Vancouver island.....   | British Columbia..... | 130      | 1912                      |

\*Transferred in 1931 from the Forest Service, Department of the Interior, to the Department of Agriculture.

In addition there are 12 sub-stations, *viz.*, Regina and Rosthern, Sask.; Wainwright, Fort Vermilion and Beaverlodge, Alberta; Fort Smith, Resolution, Provi-

\*The five original farms established in 1886 are known as "Experimental Farms"; those added since are styled "Experimental Stations". No distinction in the work is implied by these titles.

dence and Good Hope, Northwest Territories; Carmacks, Yukon; Horse Farm, St. Joachim (operated from Ste. Anne de la Pocatière), and Harrington Harbour, Quebec. There is also the Dominion Range Experiment Station at Manyberries, Alberta, and a special Forage Crops Research Station at the University of Saskatchewan, Saskatoon. Experimental work under the Division of Illustration Stations is conducted on 13 farms in Prince Edward Island, 19 in Nova Scotia, 19 in New Brunswick, 53 in Quebec, 16 in Ontario, 15 in Manitoba, 30 in Saskatchewan, 22 in Alberta and 19 in British Columbia. Small experimental plots are also being operated at several points along the line of the Hudson Bay Railway.

*Organization of the System of Experimental Farms.*—The Central Farm at Ottawa, as its name implies, is the centre or headquarters of the system. Thereat are stationed the Director, having control and general supervision of the whole, and the chief technical officers, each having charge of his special line of work, both at the Central Farm and the branch farms. At Ottawa, the policy to be pursued throughout the system is settled by agreement after discussion by the Director, the technical officers, and the superintendents on whose branch farms the work is to be conducted. The technical staff at Ottawa supervises the actual experimental work at the Central Farm. At the branches, the superintendents are in charge of the carrying out of the various lines of general experiment, and also conduct experiments of local importance.

The divisions at Ottawa, which represent the different lines of work carried on throughout the system, and have each a technical officer in charge, are as follows: (1) animal husbandry; (2) bacteriology; (3) bees; (4) botany; (5) cereals; (6) chemistry; (7) extension and publicity; (8) economic fibre production; (9) field husbandry; (10) forage plants; (11) horticulture; (12) illustration stations; (13) poultry and (14) tobacco. Briefly the main lines of the work of these divisions are as follows:—

*Animal Husbandry.*—This division is concerned mainly with projects relating to the economical production of live stock and live-stock products on the farms of Canada. Demonstrational, experimental and research work in breeding, feeding, housing and management of beef cattle, dairy cattle, horses, sheep and swine and in the handling of the products of these classes of live stock on the farm constitute the main lines of work of the division.

*Bacteriology.*—The work of this division consists chiefly in research conducted in close co-operation with other divisions on problems having a bacteriological bearing. The main lines of investigation deal with questions of pure milk production and maintenance, soil fertility, the preparation and preservation of food-stuffs and fodders, bee diseases, etc. Assistance is given to farmers through the preparation and distribution of cultures of legume bacteria for seed inoculation. Further service is rendered through the bacteriological analysis of water, milk, foods and feeding stuffs, soils and many other materials.

*Bees.*—The work of the Bee Division is divided into three parts: (1) Experimental and research work related to the care and management of bees. This includes the investigation of such problems as swarm control, wintering, bee diseases, queen breeding, etc. (2) Honey investigations. In co-operation with other divisions a thorough examination of Canadian honeys is being made and projects relating to the storage of this commodity are being conducted. In addition, the inspection of honey for export trade is being carried on. (3) The dissemination of information by means of bulletins, pamphlets, press articles, correspondence, lectures, etc., to beekeepers throughout Canada.

*Botany.*—The work of this division deals with two main phases, economic botany and plant pathology. The former comprises a study of plants of use in agriculture, including medicinal and poisonous plants and plants of general economic value. Considerable attention is being given to a Dominion-wide survey of weeds and a study of the life history of the more important kinds. Many phases pertaining to this section of work are carried on co-operatively with other services in the Department. Pollination studies, pasture investigations, etc., are being carried on under a well-devised policy. A herbarium is maintained, which is becoming increasingly valuable as a reference collection not only for the use of the Department, but also for students and colleges. For reference purposes an extensive collection of seeds has been accumulated, and constitutes one of the most valuable in the Dominion. It comprises representative collections of seeds of plants occurring all over the globe.

The plant pathology section is devoted to research on diseases caused by fungi and bacteria occurring on each and every kind of plant, whether constituting our natural resources, including forestry, or grown for special purposes. Without a recognition of the most up-to-date and modern means used in plant pathology, immense national losses would result. Many instances might be quoted to indicate that modern methods of control and prevention have been responsible for a substantial reduction in the cost of production of all kinds of crop plants.

At Ottawa the Central Plant Pathological Laboratory serves as headquarters for the Dominion. At the same time, besides undertaking special phases of mycological research, the Central Laboratory directs the policy of a series (10) of branch laboratories extending from coast to coast and dealing with the important phases of work of local interest and importance. Among these laboratories, the Dominion Grain Rust Research Laboratory at Winnipeg may be specially mentioned, as an example of a centre of close co-operation between Dominion and Provincial agencies in the study and prevention of losses from grain rust. Three of the branch laboratories deal with the fruit industry, *viz.*: Kentville, N.S., St. Catharines, Ont., and Summerland, B.C. Field crop and potato diseases are dealt with mainly at Charlottetown, P.E.I., and Fredericton, N.B., while Edmonton, Saskatoon, and the Winnipeg laboratory already referred to, are concerned with the diseases of grain most important economically, *viz.*, smuts, rusts, foot and root rots, etc. Saanichton, B.C., serves the interests of Vancouver island and the Fraser valley.

The Central Laboratory directs a Dominion-wide plant disease survey, keeping a close watch on the progress of diseases and enabling steps to be taken without delay to prevent the unsuspected establishment of the insidious enemies of agriculture throughout the Dominion.

The seed potato certification service is also directed from these headquarters and its aggressive policy has secured most valuable export markets for the Dominion.

The National Mycological Herbarium and a unique collection of forest pathological and wood-destroying fungi, both of specimens and living cultures may be mentioned as outstanding among reference collections.

In addition to these more or less specialized research phases of work, the importation of plants and plant products is closely supervised to prevent entry of destructive plant diseases. Thus there exists a plant pathological service devoted to the maintenance of health and quality of every agricultural commodity produced in Canada.

*Cereals.*—The chief functions of the Cereal Division may be enumerated as follows: (1) the production of superior varieties of cereal and leguminous grains

by a process of breeding and selection; (2) the importation and testing of promising varieties from other countries; (3) the production of *élite* stock seed of registerable varieties of grain for propagation by members of the Canadian Seed Growers' Association; (4) the evaluation of various crop combinations which may prove especially desirable for specific purposes; (5) the systematic description and study of leading varieties; (6) the verification of the genuineness and purity of seed stocks submitted for the purpose; (7) the investigation of varieties of grain for which a licence has been requested, in accordance with the Canada Seeds Act; (8) the identification of varieties submitted by farmers and others; (9) the encouragement of the use of good seed of adapted varieties through the use of exhibits, press articles and public addresses; (10) the investigation of special problems which have a bearing on cereal breeding and development work.

Probably the most important problem which the division has in hand at the moment is an attempt to develop for Western Canada a variety of hard red spring wheat capable of resisting the ravages of stem rust. This work, which is centralized chiefly at the Rust Laboratory at Winnipeg, appears to be progressing rapidly toward the goal desired.

*Chemistry.*—Investigations towards the solution of problems affecting Canadian agriculture and direct assistance to farmers, market gardeners, provincial agricultural representatives and others through correspondence and analysis, constitute the two chief phases of the division's activities. Further important work includes the official chemical examination of food products submitted by the Health of Animals Branch, the Dairy and Cold Storage Branch and the Fruit Branch—about 2,000 samples in all. The division also renders chemical assistance to a number of branches of the Government service, *e.g.*, the National Parks Branch, Department of the Interior; the Department of Marine and the Department of Fisheries.

*Extension and Publicity.*—This division edits and prepares for printing all publications issued by the Experimental Farms, prepares and stages educational exhibits at fairs and exhibitions throughout Canada, maintains and operates a lending bureau of educational lantern slides, issues annually to the press about 200 timely and seasonal articles, and in various other ways makes the work of the farms as widely known as possible.

*Economic Fibre Plants.*—Extensive field and mill experiments are carried out with the best varieties of fibre flax and hemp on the Experimental Farm plot fields at Ottawa and several of the branch farms. The division renders valuable marketing services to the Canadian flax growers by serving as a medium for trade with Ireland. Increasing amounts of fibre seed are being sold in the Irish market each year.

*Field Husbandry.*—Experiments are being conducted by this division in order to learn the most suitable crop rotations and crop sequences for various parts of Canada. Information is being secured on the newest and best methods of preparing the land for different crops, as well as on the most efficient methods of seeding and harvesting. Investigations are in progress in regard to drainage, to irrigation and learning the most efficient methods of conserving and utilizing soil moisture in the Prairie Provinces.

How to control the noxious weeds which cause such serious economic losses in many parts of Canada is an important problem studied by means of various cropping systems, cultivation methods and applications of chemicals. How to improve the carrying capacity of unproductive pasture land is another project under investigation. The cost of operating tractors, the value of new types of farm machinery,

and the cost of producing various farm crops is being studied. Comprehensive trials with various silage crops are being continued in order to secure the most reliable information on the proper time and method of ensiling corn, sunflowers, red clover, sweet clover, alfalfa, buckwheat, cereals and other farm crops. To determine the most economical means of using farm manure and commercial fertilizers for farm crops is the object of another group of field husbandry experiments.

*Forage Plants.*—This division has for its work the improvement of forage plants by breeding, the technique of seed production, principles of compounding seeds mixtures, response of different species to grazing, the introduction and testing of new species, and related problems. These studies cover a wide range of crop plants including herbage grasses and legumes, corn, sunflowers, field roots, sugar beets, soya beans, and cereals for forage. Research work with crops that are adapted to Eastern Canada is centered at Ottawa. In Western Canada the Dominion Forage Crops Laboratory has been established at Saskatoon, Sask., in co-operation with the University of Saskatchewan, for the purpose of developing early-maturing, hardy, and drought-resistant strains of herbage plants adapted to the Prairie Provinces. At the Dominion Range Experiment Station at Manyberries, Alberta, range investigations are in progress to study changes in the natural vegetation under different systems of grazing and other feed problems associated with range management.

*Horticulture.*—The Division of Horticulture deals with fruit growing, vegetable gardening and with ornamental plants. The breeding of new varieties has been an important feature of the work of this division. Some of the outstanding fruits originated there which are being planted in Canada are: apples—Melba, Joyce, Hume, Lobo, Linda and Sandow; raspberries—Brighton and Count; strawberries—Cassandra and Portia, and of vegetables: corn—Banting and Pickaninny; egg plant—Blackie; rhubarb—Ruby; tomato—Abel, Alacrity, Bestal and Herald.

Valuable research work in cider making is being done in this division and cold storage experiments with fruits are in progress. The division co-operates with farmers in orchard experiments and blueberry and cranberry investigations. Research in plant nutrition is also an important line of work.

*Illustration Stations.*—By comparative demonstration the Division of Illustration Stations is carrying forward a co-operative program of crop introduction and improvement on some 206 privately-owned farms. These stations are located in the different provinces, primarily in newly-settled agricultural communities, where the most suitable varieties and crops are not being grown, or in the older settled districts, which have developed acute problems in crop production, resulting from weed infestation, soil drifting, depletion of soil fertility, as well as many other varying factors, which limit crop growth. As centres for production of seed grain, seed potatoes, grasses and clover seeds from the most suitable and hardy varieties, the illustration stations have accomplished a great deal and have established leadership in the community in general farm improvement, including live stock, building and home beautification.

*Poultry.*—While past conditions called for work largely along practical demonstrational lines, the present demands more scientific investigation, particularly in the studies of nutrition, disease and breeding problems. To meet these requirements, trained men have been added to the staff and, through the co-operation of the Health of Animals Branch, additional assistance has been supplied for the study of disease, so that the division is equipped as never before to assist the industry as a

whole and the individual poultryman in particular in solving the various problems that are continually arising in this rapidly growing field. In addition, the registration of poultry has increased throughout the whole Dominion.

*Tobacco.*—The Tobacco Division is concerned with investigational and research work in connection with the tobacco industry of Canada. This includes active research on problems of fertilizers and soils; breeding, selection and standardization of varieties; cultural methods; curing and fermentation; diseases and insects; marketing; exhibitions and educational work. Through a closer co-ordination between Dominion, provincial and industrial agencies the industry has made great progress during the past five years, both in the domestic and export markets. The research work of the Dominion tobacco service was completely reorganized in 1929 and subsequently; a co-operative relationship has been developed with the Department of Trade and Commerce with a view to opening up new outlets for Canadian leaf; joint committees, consisting of Dominion and provincial officials, growers and members of the trade, have been set up in Ontario and Quebec to further the interests of the industry. In general, the Tobacco Division renders assistance in the development of Canadian tobacco production along sound economic lines.

In addition to the work done by the Divisions of Extension and Publicity and Illustration Stations, the results of the work of the Experimental Farms are made available to the farmer: (1) by correspondence; (2) by publications; and (3) by articles in newspapers. The farm officers devote considerable time each year to lecturing, demonstrating, judging at fairs and assisting at short courses in agriculture. Excursions to the various farms are also a valuable means of bringing the work to the attention of the farmer.

#### **(B) Provincial Agricultural Colleges and Experimental Stations.**

Under the above heading, outlines of the work done at provincial agricultural colleges and experimental stations were given by provinces at pp. 198-203 inclusive of the 1930 Year Book. The interested reader is referred to that volume, and to the following provincial publications for information concerning courses and programs of work at these institutions:—

*Nova Scotia.*—Annual Report of the Department of Natural Resources for Nova Scotia; College Prospectus of the College of Agriculture, Truro, N.S.

*Quebec.*—The Annual Report of Macdonald College, Ste. Anne de Bellevue, Quebec, and the prospectuses and annual announcements of the School of Agriculture, Ste. Anne de la Pocatière, and the Oka Agricultural Institute, Lake of Two Mountains, Quebec.

*Ontario.*—Annual Report of the Ontario Agricultural College and Experimental Farm, Guelph, Ont.

*Manitoba.*—Annual Report of the Manitoba Agricultural College, Winnipeg, Man.

*Saskatchewan.*—Annual Report of the College of Agriculture, University of Saskatchewan, Saskatoon, Sask.

*Alberta.*—Annual Report of the College of Agriculture, University of Alberta, Edmonton, Alberta.

*British Columbia.*—Annual Report of the Faculty of Agriculture, University of British Columbia, Vancouver, B.C.

## Section 2.—Statistics of Agriculture.\*

**Census Statistics.**—In addition to the statistics collected annually, which are the subject of this section, valuable information is published, following each decennial census, on such subjects as the total number of farms, their tenure, acreage, value, mortgage debt, etc. In this volume of the Year Book, the latest information compiled to date on these subjects will be found in Subsection 10, pp. 295-301.

**Crop-Reporting Service.**—The voluntary crop-reporting service of the Dominion Government, which has been in operation since 1908, has for its object the issue of accurate, timely and independent reports on crop conditions throughout the Dominion; first, in the interests of the general body of Canadian farmers; secondly, for the information and guidance of other interests allied to and dependent upon agriculture (interests represented by statesmen, economists, bankers, grain dealers, transportation agents and others); and thirdly, for reporting to the Institute of Agriculture at Rome (to which Canada is an adhering country), in return for reports on the production of other countries and of world totals which influence prices and consequently affect the interests of Canada. Supplementing the monthly reports from crop correspondents, the Bureau issues telegraphic crop reports utilizing the services of agriculturists throughout the Dominion. For the Prairie Provinces, these are issued every week from the first of June to the first of September, while the reports on a Dominion-wide basis are issued every two weeks during the same period. The program of reports for 1935-36 is given in the Monthly Bulletin of Agricultural Statistics, January, 1935, pp. 38-40, and is also issued as a special leaflet.

**Annual Statistics.**—In addition to the crop-reporting service, statistics of the areas under field crops and of the numbers of farm live stock are collected. These arrangements have been in force since 1918, and are carried out by the Dominion Bureau of Statistics in co-operation with the Provincial Governments. The statistics are secured by simple schedules which are at present returned by about one-fifth of the farmers of Canada. They form the basis of the estimates for the whole of Canada. The results for wheat, oats, barley, rye and flax in the three Prairie Provinces are ready for publication in August, while the results for the remaining crops and for the numbers of farm live stock are published in November and December. The areas, thus determined, when multiplied by the average yields per acre as reported by crop correspondents, form the basis of the total estimated production for each crop.

The June schedule covers the areas sown to field crops, the numbers of live stock and poultry on hand and breeding and marketing intentions with regard to live stock and poultry. The December schedule contains the same items with the exception of field crop areas.

The schedules are distributed and collected through the agency of the rural schools in New Brunswick, Quebec, Ontario, Manitoba and Saskatchewan, while in Prince Edward Island, Nova Scotia, Alberta and British Columbia the schedules are sent direct to the farmer through the mail.

\* Revised under the direction of Dr. T. W. Grindley, Chief of the Agricultural Branch, Dominion Bureau of Statistics. This Branch is concerned with both primary and secondary statistics of agriculture, including statistics of the production and distribution of agricultural commodities. The primary statistics relate mainly to the reporting of crop conditions, crop and live-stock estimates, values of farm lands, wages of farm labour, and monthly and annual prices received by farmers for their products. The secondary statistics relate to the marketing of grain and live stock, and reports on the milling and sugar industries and cold-storage holdings. A list of the publications of this Branch is given in Chapter XXIX, Section I, under "Production".

**Monthly Bulletin of Agricultural Statistics.**—Originally established in 1908 as the "Census and Statistics Monthly", but changed to its present title in April, 1917, this publication is now in its twenty-eighth year. It is the official organ, not only for the monthly crop reports and annual statistics previously described, but also for statistics of dairying, fur farming, fruit, hives and honey, hops, tobacco, maple products, sugar beets, beet sugar, flax fibre, clover and grass seeds, visible supplies, prices, values, foreign agriculture and other subjects in considerable variety.

**Presentation of Agricultural Statistics.**—In the current edition of the Year Book, statistics of agriculture are presented under the following headings: (1) agricultural revenue and wealth; (2) acreage, yield and value of principal field crops, distribution of the wheat and oat crops, etc.; (3) farm live stock and poultry; (4) fur farming; (5) dairying; (6) horticulture; (7) special agricultural crops; (8) farm labour and wages; (9) prices of agricultural produce; (10) agricultural statistics of the census; (11) miscellaneous agricultural statistics; (12) principal agricultural statistics of the world.

### Subsection 1.—Agricultural Revenue and Wealth.

**Revenue.**—Table 1 shows under principal headings the gross agricultural revenue of Canada, by provinces, for the years 1929 to 1933. It is important to note that the figures represent gross values, as no distinction is made between crops used as materials for other kinds of production, such as the feeding of live stock, and no allowance is made for the costs of production.

#### 1.—Estimated Gross Annual Agricultural Revenue of Canada, Itemized by Provinces, 1929-33 ('000' omitted.)

**Note.**—Preliminary figures for 1934 and revised figures for 1930-33 will be found in the Monthly Bulletin of Agricultural Statistics, March, 1935.

<sup>1</sup> Revised since publication of 1933 Year Book.

Table 1 shows that in 1933 the estimated gross agricultural revenue of Canada was \$762,302,000 as compared with \$766,794,000 in 1932, \$836,114,000 in 1931, \$1,268,141,000 in 1930 and \$1,631,081,000 in 1929. The total for 1933 shows a decrease of \$4,492,000 or 0.6 p.c. as compared with 1932. The upward movement of farm prices since the above valuations were made suggests an upward revision for 1933 revenue when new figures are compiled in March, 1935. \*

**Wealth.**—Table 2 shows approximately, by provinces, the gross agricultural wealth of the Dominion in 1933.

**2.—Estimated Gross Agricultural Wealth of Canada, by Provinces, 1933.**

In this table, full use is made of the recently published results of the Census of 1931 giving the values of lands, buildings, and implements and machinery. The 1933 figures quoted for buildings and for implements and machinery correspond with the values quoted in the 1931 returns. These items change very little in value. The 1933 figures for value of lands are based on the 1931 census figures but are corrected to 1933 levels by the use of the annual estimates of farm land values. The other four items—live stock, poultry, animals on fur farms and agricultural production—are estimates for 1933.

The gross agricultural wealth of Canada for 1933 is estimated at approximately \$5,232,512,000 as compared with \$5,209,760,000, the revised estimate for 1932.

### Subsection 2.—Acreages, Yields and Values of Field Crops.

**The Chief Field Crops of the Latest Ten Years.**—In Table 3 will be found a summary statement of the acreages, yields and values of wheat, oats, barley, rye, buckwheat, flaxseed, potatoes, hay and clover and alfalfa for the latest 10 years. Comparative figures back to 1908, given at pp. 230-232 of the 1929 Year Book, indicate the recent growth of Canadian agriculture. In particular may be noted the tripling of the wheat crop, the almost doubling of the oat crop, the tripling of the barley crop, the thirteenfold increase in the rye crop, the 40 p.c. addition to the hay and clover crop and the sevenfold increase in the alfalfa crop within the past 25 years, disregarding the 1931 to 1934 crops as not, by any means, representing maximum yields. On the other hand, the acreages and yields of the potato crop have not shown a wide variation throughout the period, presumably because this crop is produced mainly for home consumption. Those who desire figures for earlier years will find certain information on acreage, yield and value in the Statistical Summary of the Progress of Canada at the beginning of this volume.

### 3.—Acreages, Yields and Values of Principal Crops Grown in Canada, 1925-34.<sup>1</sup>
